[1] The 1940 *Statement* provides that "beginning with appointment to the rank of full-time instructor or a higher rank, the probationary period should not exceed seven years. . . ." Interpretive comments adopted in 1970 note that "the concept of 'rank of full-time instructor or a higher rank' is intended to include any person who teaches a full-time load regardless of his specific title."

mination, how is it to be measured? Should research be weighed more or less heavily than teaching in determining salary?

Given the diversity which exists in higher education, it is difficult to enunciate a general policy on salaries; however, some general observations and recommendations can be made. Fundamental to the establishment of equitable salary standards is the participation of the faculty in the process. With or without collective bargaining, the method of compensation should be formulated through consultation with the faculty. The AAUP has long urged faculty involvement in the academic budgetary process, and salaries are a large share of such budgets (see particularly "The Role of the Faculty in Budgetary and Salary Matters," *AAUP Bulletin*, Summer, 1972, p. 170). It is important that all faculty are aware of the criteria which determine salaries and how they are applied. There should be periodic reviews to discover whether salary discrimination exists, with faculty members informed of the procedures for review.

In many state institutions, salaries are a matter of public record, but in other institutions, public and private, not only individual salaries, but also detailed statistical information, are carefully guarded secrets. It is our view that at least the mean and quartiles of salaries by unit of the insitution should be available to the faculty as a whole.

4. *Committee Z salary survey.*—The 1973 Annual Meeting recognized a greater need for openness of salary information in its resolution "that Committee Z in cooperation with Committee W undertake a systematic study of compensation differentials between male and female faculty members."

In considering how best to implement this resolution, Committee W has recommended that: (a) the 1975 salary survey forms sent to institutions include a request for data on salary by rank and sex; (b) census data collected in connection with the 1975 Committee Z salary survey (number of faculty by rank, number of tenured and nontenured faculty) be broken down by sex; (c) a "do-it-yourself" kit be developed to assist faculties and administrations in undertaking a comprehensive study of salaries at their institution. The kit would permit analysis of salary data from an institution taking into account such variables as terminal degree, years of experience, publications, and field, so that residual sex-based differentials can be identified and then corrected.

Committee Z has agreed to proceed with the second of Committee W's recommendations. The first is still under discussion. The do-it-yourself kit is now being developed by members of the Committee and the staff, and it is hoped that a package will be ready to use by fall.

5. *Sex-based differentials in fringe benefits.*—Committee W believes that the standard of equal pay for equal work requires the payment of equal annual retirement benefits to women and men with the same employment records.

The Department of Labor has proposed a revision of its guidelines on retirement benefits which would bring its position on this issue into conformity with that of Committee W. The General Secretary has written to request that hearings be held on the issue, and Committee W is prepared to present its position in testimony.

The federal government and many state retirement systems do not ask female retirees to adopt a lower standard of living than their male counterparts. While TIAA is not the only retirement plan having sex-based differentials in monthly benefits, it is the carrier for a substantial number of AAUP members, and we find TIAA's active campaign in support of the existing system—a system which Committee W believes discriminates against women—especially disturbing. The Committee sees no justification for TIAA's departure from a neutral position on a question whose outcome is not seen by us as having a potential impact one way or the other on TIAA's own interests. Committee W has asked the President of the Association to send a letter of protest to TIAA on the matter.

6. *Graduate education.*—A variety of concerns relating to graduate education have surfaced in the past year. We have considered whether the AAUP and in particular Committee W is meeting its responsibilities to our future colleagues—many of whom are already AAUP members. What can be done to alleviate the shortage of trained graduate students to finish their degrees and obtain jobs, indeed to encourage women to enter graduate school? The Committee discussion has centered on such items as graduate admission policies, prejudicial conditions for the award of fellowships, and faculty responsibility for the counselling of students. A subcommittee is working to identify and propose ways of dealing with issues of special concern to women in graduate education.

539B

Also in the matter of students, both graduate and undergraduate, the Committee has expressed its concern with the delay in issuing guidelines for the enforcement of Title IX of the Education Amendments of 1972, which prohibits sex discrimination in educational programs and activities. Particularly distressing is the interest expressed by universities, with National Collegiate Athletic Association backing, in having athletic programs excluded from coverage under these guidelines.

7. *Chapter and conference Committee W's.*—As part of the Committee's effort to encourage establishment of conference Committee W's, the staff wrote to each conference where a committee had not yet been established asking that this be done. Mailings from the national office to existing conference Committee W's have been continued, and several Conference Committee W newsletters are now being regularly issued. Since Committee W feels that progress on such issues as affirmative action can best be made locally, it reiterates its belief that women on campus—faculty, staff, and students—should organize to further their own interests. A great deal has been accomplished in the past year, and we commend the significant efforts of AAUP women on the local and state levels. There is a great deal more to be done, however, and concerted action is one important key to success.

Committee W organized a workshop at the Sixtieth Annual Meeting focusing on pressure tactics for women's adbancement—through faculty organization, through collective bargaining, through administrative positions, and through federal agencies—and we believe that the approach would be useful on the state and local levels. The Committee notes that several chapter and state Committee W's have been continued, and several conference Committee W newsletters are now being regularly issued. Since Committee W feels that progresss on such issues as affirmative action can best be made locally, it reiterates its belief that women on campus—faculty, staff, and students—should organize to further their own interests. A great deal has been accomplished in the past year, and we commend the significant efforts of AAUP women on the local and collective bargaining, stand ready to respond to requests for visits and conference meetings.

FUTURE ACTIVITIES OF COMMITTEE W

Many of the actions reported above need to be pursued further in the coming year, and many other problems are far from solution. Some areas of future concern are:

1. *Collective bargaining.*—We are working on informative material on issues of special concern to women for chapters contemplating, or in various stages of, collective bargaining.

2. *Employment roster.*—As in previous years, Committee W has been inundated with job announcements and requests for assistance in filling all sorts of positions. The Committee does not have the resources to serve as an employment register, though it has suggested that positions be advertised in *Academe*. It is hoped that the several women's groups now working on a roster of professional women will have it in operation next year. The Committee suspects that many of the announcements it has seen are *pro forma* attempts to comply with affirmative action guidelines rather than sincere attempts to locate women for faculty and administrative positions. We recommend local monitoring of the actual results of recruiting efforts.

3. *Part-time appointments.*—Committee W recognizes the difficulties in trying to address all issues raised in the context of part-time appointments in a single comprehensive policy statement, but expresses its continuing concern that persons serving in a part-time capacity, many of whom are women, are generally denied benefits and responsibilities to which they should have access. There has always been some reluctance on the part of Committee W to emphasize concerns relating to part-time positions, since we do not believe that part-time service should be considered a "women's issue," nor do we wish to encourage the appointment of women to part-time rather than full-time positions. The Committee is interested in having the Association undertake a comprehensive study of part-time appointments. Meanwhile, the staff is able to offer useful advice on various issues connected with part-time positions on the basis of existing Association policy.

A new issue has recently come to my attention, namely, the sharing of single academic appointments by married couples. This may well be an ideal solution for some couples; however, my own opinion is that the dangers may well outweigh any benefits. Sound policies on part-time appointments should be able to provide the advantages of sharing without the artificial linking of two separate professional identities and careers implicit in the concept of shared appointments. Moreover, administrators may seize on the possibility of shared appointments to avoid appointing women to full-time positions. It seems clear to me that each faculty member should stand or fall on her or his own merits, and that academic women should be careful not to devise a new way to exploit themselves.

MARY W. GRAY,
Mathematics, American University Chairperson.

REPORT OF COMMITTEE W, 1972–73

This has been an active but worrisome year of work on the national Committee W. The broader issues of concern to all members of academe this year—poor employment prospects for recent Ph.D.'s staff reduction as a consequence of financial duress in many institutions, problems in collective bargaining elections, affirmative action (or inaction), the dialogue about academic tenure stimulated by the Tenure Commission report—all have special dimensions of great concern to academic women, and profound bearing on the future status of women in academe.

In this third report of the national Committee W since its re-activation in 1970, I shall summarize the activities and accomplishments of the Committee to date; outline the kinds of items that remain on the Committee's agenda for future attention and action; and suggest a few issues that will hopefully receive Committee attention during the coming year.

RESPONSE TO 1972 WOMEN'S CAUCUS

I would like to begin, however, by responding directly to the complaints and requests registered by the impromptu women's caucus that formed at last year's Annual Meeting in New Orleans. I think the women who attended that meeting were justifiably disappointed to find so little focus in the program in the problems of great and continuing concern to academic women. As an organizer of a women's caucus in my own professional discipline, I appreciate the important role a caucus can serve not only in initiating action but in serving as a continual guard against apathy or the curse of invisibility that all too frequently attends the political efforts of women. The absence of a Committee W report to the Annual Meeting was the unhappy consequence of overcommitment on the part of the chairperson and the press of such issues as collective bargaining that required major attention at the Annual Meeting. The spring of 1972 was a critical period in terms of my work on a volume on academic women under a Russell Sage Foundation grant, the idea for which grew out of the first meeting of Committee W in 1970. I made the judgment, perhaps erroneously, that this volume was as much a contribution to the efforts of Committee W as a more active and visible role at the Annual Meeting. But Committee W is hopeful that those attending the St. Louis meeting this year are pleased by the contrast with last year. Partly in response to the women's caucus and partly as a reflection of our own conscience and commitment, we have tried to compensate for last year's low profile by sponsoring a workshop at the Annual Meeting; by preparing an advance summary of the findings in *Academic Women on the Move* for distribution at the workshop; by presenting a new policy statement for Council approval; and by meeting over luncheon with those involved in the AAUP's Special Project on Developing Institutions.

We have also been guided by the women's caucus requests in other respects: the national Committee has been enlarged and strengthened this year by the appointments of Vilma Hunt, Georgina Smith, Mary Gray, and Lois Moreland, academic women who bring to the committee both new strength and varied experiences from their numerous activities in professional associations, local chapter and state conference Committee W's. Since this report represents the last one under my chairmanship, the new Committee members this year will be important assets in the transition of the Committee to new leadership next year.

ACTIVITIES OF THE NATIONAL COMMITTEE W IN 1972–73

Committee W has held two formal meetings this year, though much of our real work is handled by numerous telephone contacts and a large volume of correspondence. We find that with each year, as a new recommendation or policy guideline is adopted by the Association, we not only move on to new issues, but take on the role of monitor in the implementation of adopted policies. Thus, the work of the Committee has grown with each year. The most important formal actions taken by the Committee this year as follows:

1. *Policy Recommendation*

Committee W approved a final draft of a new policy statement at its February, 1973, meeting on "Leaves of Absence for Child-bearing, Child-rearing and Family Emergencies." This was a complex issue that had absorbed committee energy since our first year, but I am pleased to announce that I brought an approved statement to this annual meeting for Council discussion, which has been approved by the Council for publication in the *AAUP Bulletin* to solicit membership response and comments, and which will be submitted next year to the Annual Meeting for action by the membership. Committee W views the statement as a supplement to and amplification of the *Statement of Principles on Leaves of Absence*, which aims to assist faculty members with parental responsibilities in meeting their obligations both to their professional careers and to their families, and to prevent the loss to the institution and to the academic community of substantial professional skills. We urge flexibility in institutional leave policies for child-bearing and family emergencies, with the timing and duration of absence determined by mutual agreement between the faculty member and the institution, and with compensation that is consistent with customary institutional practices in cases of illness or temporary disability. We also urge the adoption of policies by which leaves of absence or the alternative of a temporarily reduced workload for a semester or more should be available to men and women faculty members with child-rearing responsibilities, with the same considerations with respect to salary increments, insurance coverage, retirement annuities, and the like, as are received by faculty members on leave for public or private sedvice outside the institution.

Committee W invites comments and suggestions from AAUP members when you have had a chance to study the document in the *AAPU Bulletin*.

2. *AAUP Membership Eligibility*

Committee W has endorsed the recommendation of Committee F that active membership in AAUP be opened to faculty members who serve on less than a half-time basis, a change in membership eligibility that we welcome because it will encourage an increase in the proportion of women and of young persons to the ranks of AAUP members.

3. *Publication*

We are pleased to announce that *Academic Women on the Move*, edited by myself and Ann Calderwood, will appear as a Russell Sage Foundation Press publication in the summer of 1973. The Committee hopes it will serve as a useful reference volume to the hundreds of women and men in academe who are devoting time and energy to efforts to improve the status of women in academe, as well as to scholars of the women's movement and researchers on higher education and career development.

4. *Monitoring Affirmative Action*

The Committee greeted with pleasure the publication in October, 1972, of the *Higher Education Guidelines* for Executive Order 11246 by the Department of Health, Education, and Welfare. Committee W arranged for copies of this important document to be distributed to all AAUP chapters and conferences across the country; has maintained close contact with local campus groups involved in complaints to the Office for Civil Rights, and has advised local chapters on the development or monitoring of affirmative action plans in their institutions.

By the February meeting of Committee W, we felt considerable concern that with cases backlogged at HEW, the budget appropriation for the Office for Civil Rights was totally insufficient for adequate implementation of the agency's own guidelines. Accordingly, the Committee drafted a letter this past month to Secretary Caspar Weinberger of HEW, urging that he assure us that progress toward the development of affirmative action program and the processing of class action complaints would not be halted for lack of funds, and that HEW would continue in the role of a fair arbiter in disputes concerning sex inequity in academe. The Committee's letter to Secretary Weinberger was also sent to a number of congressmen and women, and to officers of numerous academic women's organizations, urging that they endorse our request and supplement it with letters of their own to HEW.

Committee W has also noted with some dismay that many people in academic this year have protested that affirmative action plans represent an assault on institutional autonomy and a potential threat to standards of excellence in higher education. This appears to us an unseemly stance from members of a community that has been prominent in advocating federal insistence on goals for minority hiring in the construction industry or on racial integration of the public schools. We find ourselves in accord with Martha Peterson who argued at the Miami convention of the American Council on Education this year that academe would not now be subjected to federal pressure to depart from sex discriminatory practices had our colleges and universities done a sufficiently good job of monitoring their own affairs.

We have also urged that the AAUP Resolutions Committee present to the Annual Meeting a resolution stating the Association's endorsement of the goals of equity and justice in academic hiring, pay, and promotion through support for the development and monitoring of affirmative action plans to improve the position of women and minority group members in our colleges and universities.

5. Masculine Pronoun Usage

Committee W also considered the matter of the use of masculine pronouns and of the term "man" in the generic sense in all official documents produced by AAUP committees, conferences, and chapters. We have reviewed this issue and recommended to the Council that all future AAUP documents avoid the generic use of masculine pronouns and the term "man," on grounds that such usage reinforces the imagery of women as subordinate and ultimately invisible persons seldom in positions of power and authority. The Committee did not consider this an important issue in the first year of its re-activation, believing that our primary focus should be on important structural problems of sex discrimination and sexism. In our third year, however, with some policy revision accomplishments behind us, we believe it important to give attention to the cultural symbols which express the power relations in our social system and which through their usage reinforce and perpetuate sexist social patterns. Hence our recommendations on language usage supplement our central emphasis on policy issues, and are based on the view that one must work on both structural and symbolic levels in order to achieve significant and lasting improvement in the status of women in academe.

6. Monitoring the Repeal of Antinepotism Rulings

Since the adoption by AAUP in the spring of 1971 of a statement calling for the repeal of antinepotism rulings in higher education, on the grounds that they tend to unfairly restrict the professional opportunities of academic women, there has been virtually unanimous support from professional educational organizations for their removal. A survey undertaken by the national office under the sponsorship of Committee W shows that there is still considerable work to be done before this official position is a reality in our colleges and universities. Of the 378 responses received from AAUP chapter officers, 52 indicated their institution had a strict prohibition against two members of the same family being employed at the same institution; another 52 chapter officers reported a stated prohibition against simultaneous service in the same department; and 43 chapter officers reported no written regulation at their institution but a widespread presumption against appointing more than one member of the same family to the same department. Thus antinepotism policies and practices remain a problem, perhaps at a more subtle level than in the past, in about 38 percent of the institutions responding to our inquiry. Committee W considers it important that AAUP chapters monitor the actual practices on their campuses and bring to the attention of faculty colleagues and administrators any evidence that the old restriction against the employment of married professional couples by the same institution or department is still in force.

7. Local and State Committee W Programs

One of the developments we noted in last year's Committee W report was the proliferation of chapter and conference Committee W's across the country. We expressed optimism that the existing structure of AAUP might be activated to play an important leadership role in the movement to achieve equality of opportunity for women in the profession. Developments during this past year have reinforced this optimistic forecast.

For example, the year 1972-73 saw notable salary equity adjustments achieved by women through chapter efforts at the University of Louisville, the University of South Florida, and Rutgers University (in the latter case through the collective bargaining process). Chapter Committee W's at such institutions as the University of Cincinnati, the University of Iowa, Colby College, and Penn State have played a vigorous role in reaffirming faculty responsibility in the development of the institution's affirmative action program. Several state conferences, among them New Jersey, Ohio, California, Iowa, Massachusetts, and North Carolina, have sponsored workshops or panel sessions on the status of women and affirmative action. A number of conferences have expressed support for the passage of the Equal Rights Amendment in their state legislature and individual members have testified in its behalf.

On many campuses, chapter Committee W activity is providing a focus for the interests of all women on campus, students and staff as well as faculty members. Although the concerns of faculty women will naturally remain of primary importance to chapter committees, Committee W believes the key issues of concern to women cut across lines of professional achievement or status, and therefore considers solidary organizational ties among women students, staff, and faculty an encouraging and healthy political development.

Communication among chapters, conferences, and even among women faculty members on the same campus or in the same state continues to be a problem. The staff of the Washington Office has attempted to establish regular communications with all known conference Committee W's, and we are told this has been of help and encouragement to the committees. Conference committees have been urged to contact chapter Committee W's in their state, and to help establish chapter Committee W's where none exist. We believe such state-wide communication among women faculty members is one of the most important aspects of a conference Committee W's efforts. Joint action and shared experiences (whether of success or failure) can be valuable contributions in an efforts to improve the status of women. If more state conferences assume responsibility for coordinating and reporting on the efforts of local Committee W's in their states, they could serve as vital communication links between chapters and the Washington Office and the national Committee. This is not to suggest that chapter Committee W's should not continue to be in direct contact with the national Committee; it is to urge that for purposes of regular communication, the state conference may provide the fastest and most efficient channel through which a flow of information can link the national Committee and the hundreds of chapter Committee W's. This can only work, however, if conference Committee W's make it a first priority to get in touch with all chapter committees in their state.

There has been great variety in chapter and conference programs this past year. Workshops have been held on faculty recruiting, career options for women students, affirmative action, and women's studies. Chapters and conferences have shown ingenuity in extending invitations to their workshops to department chairmen and administrators, students and nonfaculty staff, faculty spouses (both men and women), and women members of the Board of Trustees (if they are fortunate enough to have them).

The workshop sponsored by Committee W at this meeting brought together a number of panelists with experience in local chapter and state conference Committee W work, and they discussed the problems and successes they have experienced over the past year or so. A good portion of the discussion centered on the current exploration and debate concerning retirement benefits under TIAA–CREF. The workshop participants were in agreement in expressing dismay and displeasure with the conclusions of the subcommittee established last year to study the structure and function of TIAA, which appears to accept TIAA's own reasoning on sex differentials in retirement annuity payments. I am sure this issue will be the focus of national, conference, and chapter Committee W discussions in the coming year.

8. Vacancy Announcements

The national Committee has been inundated this year with announcements of vacancies sent to us by affirmative action offices in several hundred colleges and universities. The Committee has taken the position that it is not the proper domain of AAUP to run a professional registry for academic women, and has opted instead to respond to such appeals by suggesting that affirmative action offices advertise their vacancies as equal opportunity employers in *Academe*. Records are being kept on what proportion of the notices we receive subsequently appear in AAUP publications. We note that several women's action groups have begun to devise plans for coping with this same large wave of inquiries, some out of concern that many gestures of willingness to accept applications from qualified women are empty ones, while the informal recruitment networks continue to function quietly in the background in the traditional grooves of the male buddy system. A few women's organizations are developing plans to follow up such vacancy announcements to determine what proportion of the jobs announced are finally filled by women and minority group members. Committee W plans to keep in touch with such efforts and will communicate any relevant information we find to the AAUP membership.

FUTURE ACTIVITIES OF THE NATIONAL COMMITTEE W

While some progress has been made over the course of the past three years, there still remain a number of tasks the national Committee has not yet undertaken, or has not brought to sufficient fruition to report upon. Among them are the following:

1. Retirement Benefits

As mentioned above, Committee W has a continuing interest in the issue of sex-based differentials in retirement benefits. I fully expect the Committee will lean hard on the considerable knowledge and skills of Georgina Smith on this issue.

2. Report of the Commission on Academic Tenure

This report became available a few weeks after the spring meeting of Committee W; consequently, it has not yet received careful review by more than a few members of the committee. We were pleased to note that the Commission made numerous references to the potential frustration of the legitimate aspirations of women and minority group members during the period ahead, when financial duress and reconsideration of tenure, probationary periods, early retirement, and contraction of staff may receive increasing attention in academic circles. Committee W shares the Commission's concern that holding down the proportion of faculty on tenure may frustrate efforts to increase the proportion of women in the upper academic ranks, though we think platitudinous gestures merely citing this potential problem are no longer sufficient in 1973 as they might have been three years ago. While a full-scale consideration of the Commission report will only take place at a future meeting of Committee W, we wish to record in a preliminary way at least one positive and one negative response to the Commission's recommendations.

Committee W is pleased to note that under Recommendation 18, the Commission urges that staffing plans be developed that provide *explicitly* for a substantial increase in the tenure component of women and members of minority groups; and, in Recommendation 38, that institutions consider modifying their tenure arrangements in order to permit part-time faculty service to be credited toward the award of tenure, and to permit tenure positions to be held by faculty members who cannot or do not wish to serve on a full-time basis. This is additional support for the 1971 statement by Committee W on *Senior Appointments with Reduced Loads*. It is the Committee's intention to give this issue of reduced-load appointments at senior ranks further attention during the coming year, in fulfillment of its promise in the 1971-72 report to produce a position paper on part-time and reduced-load faculty appointments.

On the other hand, Committee W notes that the Commission on Academic Tenure endorsed, in Recommendation 2, the commonly accepted principle that only tenured faculty members should play a formal role in the review process involving tenure for junior faculty, without recognizing that this necessarily means that tenure review committees heavily male in composition will be charged with the review of junior faculty which include much larger numbers of women. One may accept the traditional view that nontenured faculty are disqualified on grounds of interest from formal participation in decision-making where a member of their own ranks is concerned, but still urge a procedure that assures a fair balance of women on the tenured faculty review committee—*viz.*, by an explicit recommendation that such tenured faculty committees should have a sex composition similar to that of the nontenured faculty in a given department, so that women under consideration for tenure are assured of judgment by a sufficient number of faculty women.

3. Collective Bargaining

One last item which must be carried over to the agenda of next year's efforts by Committee W is the development of a checklist of issues of importance to women which should be considered in connection with collective bargaining elections and negotiations. We believe that the experiences of new members of the Committee in this area will be critical in fulfilling its promise of last year to develop such a checklist as a service to chapters entering the bargaining arena.

CONCLUDING COMMENTS

Since this is the last official report Committee W will submit under my chairpersonship, perhaps I may be indulged if I make a few final comments about the experience of working on a national AAUP committee and the prospects for academic women in the years ahead. In my first report I argued that AAUP was uniquely suited to contribute to the efforts of the women's movement because of its already elaborate organizational structure and the ease with which it could therefore cut across the boundaries that separate the academic disciplines and the hundreds of institutions of higher education. However, a national committee cannot be effective if it moves too far from its base in the local chapters and state conferences: nor can it serve as an effective representative of its chapter and conference base unless communication channels are open and utilized in a two-way flow of information and opinion. I do not think we have yet solved the question of adequate communication within the AAUP network of Committee W's, and this restricts the capability of the national committee to speak in the name of academic women in relation to other organizations and agencies affecting higher education.

To an individual chairperson, the vantage point of a national committee is enormously illuminating for the view one can obtain of the broad sweep of problems and the contrasts that differentiate our 2,000-plus colleges and universities. One learns to appreciate in a new way what that diversity means both intellectually and politically: we are not easily going to find "one" voice as academic women on all the issues that concern us, and must live with considerable cultural and political pluralism in our own ranks as academic women. While this is exhilarating, it can also be paralyzing where effective action is concerned. One learns more and more about the complex problems and diverse views by AAUP members, chapters, and conferences, and this can lead to undue caution and conservatism after a few years in office. Hence, I believe the time is now very ripe indeed for a new person to provide leadership as the chairperson of the national committee. Leadership turnover in committees, like caucuses at a convention, helps to assure vitality and continuing pressure for innovation and change in an organization.

On behalf of the entire Committee W, I would also like to express the very deep obligations all academic women have to Margaret Rumbarger, who has served these past three years as the Washington staff person carrying the heavy day-to-day responsibilities of Committee W activities. She has kept in balance her loyalties to AAUP as an association and her loyalties to the women's movement, meeting with grace and good cheer an almost impossible schedule of meetings, reports, trips, case inquiries, and a growing correspondence. More than any single person in AAUP, Margaret Rumbarger has been *the* vital communications link among chapter and conference Committee W's, the national office, your chairperson, and the members of the national Committee W.

When I assumed the chairperson's role in 1970, I was prepared for a long battle to rid academe of sex discrimination, but I also harbored a secret hope that we could move beyond the discrimination issue to the more basic problem of widening the aspirations of the young women who pass through our classrooms. Unfortunately, we have found no magic to rid academe of sex discrimination. Academic women are placing sharp demands on academic institutions during a difficult economic period when the best will in the world will not yield easily to them. Hence I suspect Committee W will of necessity continue to devote much of its future energies to the problems of sex discrimination. But I would also hope that the Committee will find the time and the energy to show concern for and to develop the means whereby academic women can contritbute to the enrichment of the experiences our daughters and women students have in our classrooms and laboratories and to the perspectives and plans young women develop for their own futures. There is a magic to watching the impact on one's women students, used as they are to an academic world dominated by men, of attendance at city-wide and regional conferences of academic women. For the first time they sense the power of numbers that academic women have when brought together in one place or joined in a common political effort.

I would hope that in the future all the relevant organizational units of AAUP will seek innovative ways to close the ranks between women students and women faculty. That would provide the richest assurance that the future of women in academe will be a bright one indeed.

ALICE S. ROSSI,
Sociology, Goucher College Chairperson.

REPORT OF COMMITTEE W—1971–72

Interest in and concern for the problems faced by women in the academic profession have continued to grow during the year since the publication of the first report of the reactivated Committee W. Numerous studies and reports on the status of women, as well as an increase in complaints of discrimination, have heightened an awareness of discriminatory policies and practices which have impeded women's professional careers in institutions of higher education. More and more women, individually and as members of groups, are speaking out against inequitable salaries, inadequate grievance procedures, exclusive recruiting networks usually closed to women, exploitative practices relating to part-time faculty, and unfounded and prejudicial assumptions about the needs and capabilities of women.

In general, progress for the academic woman during the academic year 1971–72 has been uneven. Many colleges and universities have moved to develop affirmative action policies, to recruit more women to their faculties, and to adjust inequities in salaries. At many other colleges and universities, 1971–72 can be better characterized as a year of awakening, accompanied by some confusion, with faculties and administrations searching for some orderly yet expeditious ways to change basic practices, and with women moving to consolidate the gains of an earlier and angrier period into lasting reform. At yet other colleges and universities "progress" has consisted of no more than lip-service toward an equality which many do not really desire. In many parts of the country discrimination against working women is still socially and professionally acceptable, and lower salaries, slower promotions, heavier teaching loads, and confinement to nontenured ranks still characterize the woman academic. Too few of our academic institutions have recognized that attainment of equality for women in the academic profession, as in other professions, calls for a reexamination of traditional assumptions about the several roles which working women have been called upon to play in our society. Too few institutions have developed policies in the areas of leave for pregnancy, of part-time appointments and of adjustment for late arrival in the academic market.

Only rarely has it been recognized that men too should be afforded an opportunity for a more flexible career pattern than has in the past characterized professional life. Too often, academic women can expect something approaching equitable treatment only so long as they conform to career patterns and conditions of service convenient to and established by and for men. Even in those institutions which have instituted reforms, old prejudices have often served to prevent their proper functioning.

Increasingly, however, women in academe are searching each other out, studying and becoming critical of their own circumstances, proposing changes to their institution and within their disciplines. Sometimes women have had the good fortune to find valuable allies among their male colleagues and within the more established groups on campus. We believe that AAUP can contribute in major fashion to securing the rights of academic women by extending this work of education and sensitization on individual campuses and on state and national levels. We believe that this function can be served most effectively on the local level, at least in the short run, by a committee W formed by the local AAUP chapter.

ACTIVITIES OF THE NATIONAL COMMITTEE W IN 1971–1972

During 1971–72, Committee W continued work on the development of policy on child-bearing and child-rearing leaves. For a number of reasons, including the need to consider recently promulgated regulations of agencies of the federal government, the preparation of an official Association statement on leaves for pregnancy and child care has been delayed. In the meantime, however, members of the Washington Office staff have advised administrations and faculty members on the development of sound policy in these areas and have assisted in the resolution of several complaints arising from inadequate institutional provisions for leaves.

In the most recent draft of its statement, Committee W's position is that leave should be granted for purposes of child-bearing, as part of the institution's general policy on temporary disability. The length of the leave should be a matter for the woman and her physician to determine, and she should not be penalized in the terms and conditions of her appointment as a result of having taken such a leave, or in her right to return to her former position after a leave of reasonable duration. Longer leaves for purposes relating to child-rearing should be available both to men and women faculty members, in the Committee's judgment, and on the same basis as administrative or military leave.

There is already a basis in AAUP policy on which to build a more detailed policy: the recently adopted *Statement of Principles on Leaves of Absence*, jointly formulated by the AAUP and the Association of American Colleges, provides that leave should be granted "for illness, recovery of health, and maternity." Child-bearing and child-rearing leave policy will be on the agenda of the Committee at its fall meeting. At that time the Committee will take into consideration guidelines issued by the Equal Employment Opportunity Commission and the Office for Civil Rights of the Department of Health, Education, and Welfare.

Committee W intends to continue its work on the development of a position paper on part-time and reduced-load faculty appointment, a subject already treated in limited fashion in the Committee's statement on *Senior Appointments with Reduced Loads*. Committee A on Academic Freedom and Tenure has expressed interest in working with Committee W to develop policy in this area. The coming year will undoubtedly bring a growing concern on campuses across the country in the status of part-time faculty members, in part because of increased financial stress. Over the past year, the staff of the Washington Office has responded to many inquiries on the subject and has generally encouraged institutions to regularize procedures and policies for part-time faculty, to make them eligible for many of the rewards as well as the responsibilities of full-time faculty members. Traditional policies and practices in this area have long been a source of insecurity and frustration for women in the academic profession, and it is encouraging to note the development of new policies governing part-time appointments at a number of institutions, including Columbia University, Princeton University, and Wesleyan University.

There has been considerable progress over the past year in implementing Association policy on antinepotism regulations.[1] A growing number of colleges and universities have rescinded or substantially modified policies governing the simultaneous appointment of spouses, in several cases upon the recommendation of the Washington Office or AAUP chapter. The Washington Office staff has assisted in the successful resolution of several cases brought to the Association's attention by women denied appointment, retention, or tenure on the basis of regulations, prohibiting or limiting faculty appointment to one member of a family, and helped to effect a change in the regulations of those institutions. AAUP chapters and state conferences are working to reform policies at those institutions which still have such restrictions, and their future efforts should gain considerable impetus from the activity of federal agencies with responsibility for enforcing laws against sex discrimination.

The Association's Washington Office staff has also assisted many inidvidual women who have submitted complaints of sex discrimination. These efforts have often taken the form of advising on the development and proper implementation of institutional grievance procedures. The delays and difficulties attending the processing of individual complaints of discrimination by such federal agencies as the Office for Civil Rights in HEW have underscored the need for women to be assured of a duly constituted academic hearing of their complaints of discrimination. Our impression is that internal mechanisms are being used increasingly for the resolution of cases where discrimination is alleged.

It is gratifying to note that several other recommendations contained in Committee W's 1970–71 Report have already been implemented or are on their way to implementation. The Council Committee on Discrimination has urged that institutions establish grievance procedures to hear and judge complaints of discrimination. Committee A on Academic Freedom and Tenure, no longer exclusively male, has accepted the principle that the same full academic due process be afforded in cases where discrimination is alleged that is available in cases where there is an allegation of violation of academic freedom.

---

[1] See the Association's statement on "Faculty Appointment and Family Relationship," *AAUP Bulletin*, 57 (Summer, 1971), 22. This policy, originally formulated by Committee W, was jointly approved by both Committee W and Committee A on Academic Freedom and Tenure, and adopted by the Council and endorsed by the Fifty-sixth Annual Meeting as Association policy.

This year the ten new members elected to the Association's Council included three women (making a total of eight out of thirty members), a woman has been elected as Second Vice President of the Association, and numerous women have been appointed to standing and special committees.

We also note the appointment of an Information Officer to the Washington Office Staff, and we shall encourage this person to devote special attention to issues affecting academic women.

Over this past year, the Washington Office has expanded its work as a clearinghouse for information on women in academe for persons both inside and outside the academic community. It has kept in close touch with committees on the status of women in other professional associations and on individual campuses, sharing information on developments in the law and in government, and on events in various parts of the country. It is clear that the establishment of good communications among the many chapter and state conference committee W's must be given a high priority. Committee W will re-open the question of a national Committee W newsletter at its fall meeting, looking toward the possibility of seeking outside financial assistance for such a venture.

As interest in recruiting women for faculty and administrative positions has increased, the Association has received many requests for information on and referral of qualified women. Although the present resources of the Association do not allow for regular referral of specific individuals for vacancies which may exist, the staff and the Committee will consult with other organizations on ways to provide these much needed services.

Finally, the Committee plans to address itself to chapters which have become or are campaigning to become the exclusive bargaining representative of the faculty, urging consideration of issues of concern to women not merely in the context of an election campaign, but, more important, in the negotiation of collective bargaining agreements.

ACADEMIC WOMEN ON THE MOVE

In planning the first meeting of the reactivated Committee W in September of 1970, the Chairman composed a memorandum which sought to give an overview of the present state of research on women in the academic profession. The idea emerged from the first meeting of Committee W for a synthesis of the many studies and reports on academic women which were already numerous and which would proliferate during the next two years, to provide a historical description of academic women as part of the women's movement of the late 1960's and early 1970's. With the aid of a grant from the Russell Sage Foundation, the Chairman has undertaken to edit a volume which will describe in some twenty chapters what is known about women students in higher education, analyze the many disciplinary and institutional reports on the status of women in the academic profession, and discuss recent efforts to effect a change in that status. It is expected that this volume, entitled *Academic Women on the Move*, will be available during the coming academic year. Since its genesis lies in part in AAUP's involvement with the concerns of women in the academic profession, it is hoped that its publication will constitute an important contribution to the goals of Committee W and to the work of the many chapter and conference committee W's across the country.

CHAPTER AND CONFERENCE COMMITTEE W'S

One of the most striking developments since Committee W's reactivation in 1970 has been the widespread emergence of committees on the status of women among local chapters and state conferences. These local committee W's, of which there are now well over two hundred, have undertaken surveys and studies of the status of women, have formulated proposals for policy in areas such as maternity leave and part-time faculty appointments, have worked for the abolition of antinepotism regulations, and have assisted individual women with complaints of discrimination. They have worked with other women's groups and have enlisted the support of the AAUP chapter, and through it the entire faculty. Many are now working actively for the establishment of sound grievance procedures for dealing with cases of discrimination. They have urged that patterns of prejudicial treatment of women faculty be remedied, and they have been instrumental in directing attention to the need for faculty involvement in the development and implementation of affirmative action programs. Through state conferences of AAUP, women throughout a particular state have worked together to establish coordinating committees to encourage and to share information on the work of local committee W's. As more women assume executive roles in AAUP chapters and state conferences, the importance of Committee W activity is enhanced. On campuses where there has been little chapter activity for years, women are finding that it is possible to revitalize a chapter through their interest in the Committee W program.

A great variety of activities have been undertaken by AAUP chapter committee W's; they have communicated with women members of boards of trustees to enlist their assistance in working for the elimination of discrimination; they have urged faculty senates to become involved in the institution's affirmative action plan, recognizing perhaps better than some of their colleagues the implications of affirmative action for faculty policies and prerogatives; they have provided the statistics upon which salary adjustments have been effected; they have participated in the search for women to fill administrative offices, and they have assisted department chairmen in recruiting women faculty. Chapter committee W's have worked with women's groups on campus, and have supported coalitions of women's groups working for change. At one institution, the president approached the AAUP chapter committee W to ask its advice in developing the institution's affirmative action plan and in selecting a person to serve as equal employment-opportunity officer.

At the state level, several state conferences of AAUP chapters, as has been noted, have assumed active roles in encouraging and coordinating the work of chapter committees. In the spring of 1972, a number of highly successful conferences on the status of women were organized by state conference committee W's and by groups of chapters. For example, in March over 160 registrants attended a conference on women in higher education jointly sponsored by the New Jersey State Conference of AAUP chapters and New Jersey WEAL (Women's Equity Action League), and in April the Ohio Conference Committee W sponsored a successful state-wide conference of women. AAUP chapters at Adelphi University, Hofstra University, Nassau Community College and the New York Metropolitan Council of AAUP Chapters held a meeting of faculty in the New York metropolitan area to explore the variety of problems facing academic women in that region and to encourage communication among concerned members of the academic community. Betty Friedan and Patricia Albjerg Graham, a member of the national Committee W, were keynote speakers at this meeting.

The Minnesota Conference Committee W presented a series of wide-reaching resolutions on women in the profession at the Conference's spring meeting; the resolutions were passed enthusiastically, and forwarded to the administration and governing board of every institution in the state. The Georgia Conference has been working to effect a change in the restrictive antinepotism statute which governs employment policies in all institutions in the Georgia State System, and the Kansas Conference Committee W has undertaken a statewide salary study. The Pennsylvania Division's Committee W has been working in support of the passage of the Equal Rights Amendment by the Pennsylvania legislature. The Massachusetts Conference Committee W has formulated a set of guidelines for the Committee's operation which includes specific recommendations for assisting chapter committees and independent women's groups on campus, and for advising on individual complaints. These represent only a selection of the activities and achievements of conference committee W's.

Social and institutional change does not take place by fiat or remote control. In higher education, the locus of reform is in most cases an individual campus or state system. Hence the most significant agents of change affecting the status of academic women are the active and committed members of the institutional community itself. Conference committees can and do serve a most important function of encouraging and coordinating local groups, but it is at the level of the local chapter where the primary work must be done. AAUP chapters have been responsible for significant advances for women on their campus in the past year, and the majority of active chapters have by now established a committee W. Where a committee has not yet been established, chapters have proved increasingly willing to help women with complaints, and to urge administrative attention to patterns of inequity in salaries and promotion.

Of course, there is still a great deal to accomplish, and too often AAUP chapters, by their past inactivity or domination by unsympathetic leadership, have not earned the trust of women faculty who are looking for a vehicle for rapid change. The academic year 1971–72 has demonstrated, however, that the AAUP chapter can and does serve an important role as a catalyst in institutional reform. The zest with which many chapters have joined in the efforts to remedy patterns of sex discrimination is demonstrating the fact that the existing structure of AAUP can be activated to play an important leadership role in the movement for sex equity.

SEX DISCRIMINATION AND THE FEDERAL GOVERNMENT

As most academic women and, increasingly, entire faculties and administrations are aware, several agencies of the federal government are responsible for enforcing laws against discrimination in faculty employment on grounds of sex. These laws, which include the Civil Rights Act of 1964, Executive Order 11246 as amended, and the Equal Pay Act, have great potential for effecting a change in the status of academic women. The enforcement of these laws has been a matter of critical concern to Committee W. The Committee has worked to develop liaison with the Office for Civil Rights in the Department of Health, Education, and Welfare, and with the Equal Employment Opportunity Commission, to keep in touch with recent developments in the enforcement programs of those agencies, and to encourage their greater attention to the particular problems faced by women on college and university faculties.

During the winter and spring of 1971–72, Margaret Rumbarger, the Washington Office staff person who works most directly with Committee W, was granted a leave of absence to serve as a full-time consultant with the Office for Civil Rights and to work on the development of guidelines for colleges and universities subject to Executive Order 11246 as amended, which prohibits discrimination in employment on grounds of race, sex, color, religion, and national origin. These guidelines, awaited by academic women and by university administrators alike, were issued in draft form in late July, and it is expected that they will provide a basis for the development of affirmative action programs and for their implementation. Committee W has not yet had an opportunity as a committee to review the draft guidelines, but individual members of the Committee who received copies of the draft agree that it represents a significant step forward.

The Committee also wishes simply to note two pieces of legislation which have been passed during the last year and which should have a profound effect on academic women: these are the Equal Employment Opportunity Act of 1972, which amends Title VII of the Civil Rights Act of 1964 and extends its protections to all employees of educational institutions; and the Education Amendments of 1972, which include an amendment of the Equal Pay Act of 1963 to cover executive, administrative, and professional employees. The Equal Pay Act, a part of the Fair Labor Standards Act, requires the same pay for men and women doing substantially equal work requiring substantially equal skill, effort, and responsibility, under similar working condition in the same establishment.

The provisions of Title VII of the Civil Rights Act are enforced by the EEOC, which is now authorized to receive and process complaints of sex discrimination from faculty members; the provisions of the Equal Pay Act are enforced by the Wage and Hour Division of the Employment Standards Administration of the Department of Labor, whose investigations have in the past been successful in achieving salary equity and back pay for numerous victims of discrimination. Faculty women with complaints of salary discrimination who are unable to achieve a resolution through internal academic channels are encouraged to provide specific information of violations to the local field of the Wage and Hour Division.

PLANS FOR THE FUTURE

Clearly we have made a good beginning; just as clearly there is much yet to be done. There is need for continued work in areas of policy mentioned in an earlier section of his report, and a need to convince faculties and administrations of the wisdom of developing institutional policies which are responsive to the several roles of professional persons in our society.

During the coming year, Committee W will consider issues relating to differential retirement benefits for men and women and work to develop a "checklist" of issues of importance to women which should be considered in the context of collective bargaining elections and negotiations. It will continue to develop its relations with committees on the status of women in other professional associations, and maintain liaison with federal agencies responsible for enforcing the laws against discrimination. It will be particularly concerned to encourage institutions to eliminate patterns of discrimination and to undertake programs of internal reform as a desirable alternative to their being mandated as a consequence of investigation by a federal agency. There is also a need to provide more assistance with grievance procedures and to encourage women to make use of appropriate internal mechanisms where they are available.

Procedures and policies by themselves, however, no matter how sound, will not provide a remedy to long-entrenched patterns and cultural assumptions about what women need and want, nor will they open the eyes of those who have not suffered from discrimination to the subtle ways in which it manifests itself. This can be achieved best through a persistent and sensitive campaign to educate our faculty colleagues, administrators, and members of boards of trustees, a campaign waged with vigor and without losing our sense of ultimate purpose: the creation of an academic community in which equity for all persons, regardless of their sex, can be realized.

Alice Rossi,
Chairman.

ERRATUM

In "Coping with Adversity: Report on the Economic Status of the Profession, 1971-72" (*AAUP Bulletin*, Summer, 1972), pp. 178-243, Utah State University's category and ratings (p. 228, columns 3 and 4) were erroneous. Utah State University is a Category I institution and the ratings should have appeared as 5,5,5, and 4 for the ranks of professor, associate, assistant, and instructor respectively.

Report of Committee W—1970-71

BACKGROUND

As chairman of the most recently activated national Committee of AAUP, it is appropriate that I preface my report of this year's Committee activities with a brief sketch of the social and political context from which the Committee emerged in 1970.

To begin with, we are not a "new" but a "reactivated" Committee, resuming activity after forty-two years of dormancy. Committee W on the Status of Women in the Academic Profession was first established in 1918 and retired ten years later in 1928. Just why the Committee was first established is difficult to determine from Association or Committee records. One report of the Committee, published in a 1921 issue of the *AAUP Bulletin*, gives us a few hints. For one, World War I created a scarcity of personnel in American colleges and universities. As academic found it difficult to compete with the more remunerative work available to men outside academic, a great number of women moved in to replace men. Women faculty apparently did a good job, for the 1921 Committee report notes that the presence of women did not "bring the evils that had been feared."[1]

Secondly, colleges and universities were expanding in fields that already had large numbers of women: music, education, home economics, public health. Together with an increase in the popularity of summer sessions, this had the effect of drawing greater numbers of women to faculty ranks. Thirdly, the push for the suffrage amendment involved many academic women in its final years of political effort, and this success no doubt gave some of them courage to examine their own faculty status. Indeed, in 1921 Committee W notes that the success of the women's suffrage movement seemed to have "put the 'fear of God' into the hearts of not a few ever-watchful university executives."[2]

Many contemporary academic women are hopeful that university administrators, surely as watchful in 1971 as in 1921, will share their predecessors' fears. I think, however, that today's feminists have just a bit more humor than the suffragists of an earlier day. I had to smile in reading the 1921 phrase, "fear of God," for I found myself translating that to accord with the spirit of a recent feminist poster labelled "And God Created Woman in Her Own Image"!

The earlier Committee W, ahead of its time perhaps, conducted a survey in 1921 on the status of women in college and universities. The results of that survey underline how much unfinished business remains for the agenda of the current Committee W, for there were many findings that could just as well have been taken from any of the dozens of reports now being produced by women's caucuses in academic disciplines or by institutional committees on the status of women in colleges and universities. For example, the Committee found that although women represented 74 per cent of the faculty in women's colleges, only 22 per cent of these women were found at the full professor rank, compared with 52 per cent of the men. At men's colleges, only two women faculty members were found in a total of nearly 2,000 professors. At coeducational institutions in which women constituted 31 per cent of the students, women represented only 13 per cent of the faculty, though, again like contemporary reports, this varied markedly by rank, women being 4 per cent of full professors but 23 per cent of instructors.

---

[1] A. Caswell Ellis, Chairman, "Preliminary Report of Committee W, on Status of Women in College and University Faculties," *AAUP Bulletin*, October, 1921, n. 25.
[2] *Ibid.*

There are a few hints in these older reports that academic women in the 1920's had some spark and fight to match their descendants in 1971. In one institution, the trustees voted a maximum salary of $1800 for women but a maximum for men at the same rank of $3000. The women did not take this lightly, however, for the report continues by noting that when the trustees learned the women on the faculty were going to file a protest, they promptly published a new salary schedule which made no distinction on the basis of sex.

It has been a source of gratification to note the growing number of Committee W's organized by local AAUP chapters across the country this past academic year. An analogous development followed the establishment of the Commission on the Status of Women by President Kennedy in December, 1961. By 1965, two years after the publication of the commission's report, *American Women*, almost every state in the nation had a counterpart state commission on the status of women, charged with the dual task of investigating the special circumstances facing women in their state and implementing the national report's recommendations through administrative, judicial, and legal reform. It is Committee W's hope that increasing numbers of local AAUP chapters will similarly conduct investigations on the staus of women on their campuses, or cooperate with campus groups already involved in such activity, and then move on from such data-gathering to effect whatever changes are required to assure women students and faculty not only *the right* to equal admission, appointment, and promotion, but equality *in fact.*

Activism among academic women escalated so rapidly between 1968 and 1971 that it is becoming very difficult to keep in touch with all aspects of its development. The way for this current wave of activity was paved during the preceding years, first by the establishment in 1966 of the National Organization for Women, which grew out of the frustration experienced by women in business, government, unions, and academe, who were weary of promises with little follow-through. NOW was followed in 1967 by the mushrooming of women's liberation groups, also stimulated by the frustration of women, in this case women in the civil rights and antiwar movements.

There was no formal activity among academic women, however, until the academic year 1968–69, beginning with the social sciences, quickly spreading to the humanities, and only now in 1971 stirring in the natural sciences. The first women's caucus was formed in the American Sociological Association, which it was my pleasure to serve as organizer, first by conducting a survey of graduate departments of sociology in the early spring of 1969 and then in political action at the national convention in August, 1969. By the fall, similar groups were formed in psychology, political science, history, and the modern languages.

Each discipline at first had a somewhat similar development, typically first forming a women's caucus, but showing variation in structure and focus in the past two years of growth. In some fields, there is only an independent women's caucus, in others an officially established commission or committee on the status of women in the field; in still others, there are both caucus groups and official committees.

In 1969–70, the year immediately preceding the reactivation of Committee W, pressure began to mount on some university campuses to conduct surveys on the status of women on their faculty and in research institutes. The result has been the publication of a great many reports over the past year and a half, analyzing the position of women on both a disciplinary and an institutional basis. Reports are available from the disciplines of sociology, history, psychology, political science, and the modern languages, while such institutions as Chicago, Berkeley, Harvard, Illinois, Indiana, Columbia, and Stanford have produced institutional surveys on the status of women from administration-appointed committees (e.g., the University of Chicago, or the University of California, Berkeley), from groups of women faculty and graduate students (e.g., Columbia and Stanford), or from local AAUP chapters.

During the same academic year, 1969–70, there was a sharp upturn in publication of articles in more general journals on women in the academic profession, and the beginning of a great deal of curricular activity, as courses on women began to be offered in the social sciences and the humanities. Feminist publications have developed both in and out of academe. By early 1971, there were at least forty-five major periodicals in the women's movement, four national women's newsletters, and the first of what I think will be many feminist publishing firms, ranging from Lollipop Power in North Carolina, which focuses on books for young children, to the Feminist Press in Baltimore, which will publish books and pamphlets for somewhat older children, to the Women's Free Press in Pittsburgh, specializing in inexpensive reprints, and to Source Book Press in New York which has republished forty titles from the history of the women's movement.

During the current academic year there have been at least five developments worth noting: (1) Informal women's caucuses in professional disciplines are increasingly shifting to more formal organizational structures. (2) Order organizations outside academe but relevant to women's education and career opportunities, such as the American Association of University Women, have become newly concerned and assertive on issues affecting academic women. (3) There has been new life injected into many college administrations, as pressure mounts from women students and faculty to provide gynecological services, women's studies programs and courses, child-care facilities and women's centers. (4) A most significant development is the pressure now being brought by suits under federal contract compliance procedures by women in higher education as individual and class actions, a development initiated last year by the Women's equity Action League, but now being used by individual women or groups of academic women in given institutions. Last, but not least, the reactivation of Committee W in AAUP symbolizes the need to rise above disciplinary and institutional levels to broaden national focus on the issues and policy guidelines needed in the hundreds of colleges and universities at which women study and work.

Committee W has a unique responsibility, in my judgment, precisely because the AAUP crosses the barriers of academic disciplines and of institutions. It is an enormous facilitation, unmatched by any other organization in academe, to have an existing structure at the national, state, and local levels, through which to reach and coordinate the efforts of individuals and groups sharing concern for the problems faced by women in academe. Reports that reach me form hundreds of women and countless meetings across the country all share a common characteristic: the desire for a more sustained and systematic network through which academic women can be kept informed and through which our efforts can be coordinated. The existing structure of AAUP has given Committee W a good headstart in providing at least part of that coordination.

ACTIVITY OF COMMITTEE W IN 1970–71

Committee W held two formal two-day meetings during the 1970–71 academic year, the first in September, the second in February. Between meetings there has been a lively exchange of letters and memoranda in almost constant circulation among Committee members and the Washington staff. At our first meeting, we quickly decided that our first task should be a review of existing AAUP policies and guidelines with an eye to isolating those issues on which it would be desirable to revise or supplement existing AAUP policy and guidelines to assure equal opportunities for academic women. Three policy areas were demarcated for special Committee attention: antinepotism rulings, maternity leave, and part-time appointments.

REPRESENTATION OF WOMEN IN AAUP STRUCTURE

At that first meeting, the Committee also requested that the staff provide us with a sex breakdown of AAUP committees, staff, the Council, and the officers over a number of years, in the belief that concern for broadening the opportunities for women should properly include the AAUP structure itself. For the information of AAUP members, a statistical summary is appended to this report showing the percentage women have represented among the officers, staff, Council nominations, elected Council members, and national committees in a time series sampling every five years for the period 1916 ot 1970. The data show that women have been very poorly represented at this level of AAUP structure. At most two women have appeared among the officers or the staff of the Association in any given year, and the percentage of women among elected Council members or the committees has rarely exceeded 10 per cent. Committee W urges members, chapters, and conferences to bear this poor representation in mind in nomination procedures and selection of convention delegates. We are in an embarrassing position as an Association representing faculty in higher education if we urge colleges and universities to improve the status of women while we ourselves show a far smaller proportion of women at the committee and Council level of the organization than women represent of the total membership.

ANTINEPOTISM REGULATIONS

At its February meeting, Committee W considered and revised a draft of a statement on antinepotism regulations, calling for the rescinding of laws and institutional regulations which subject faculty members to any automatic exclusion from academic employment solely on the grounds of being related to a member of the same family on the faculty of an institution. Care was taken in drafting this statement to cover reasonable restrictions against abuse by urging that faculty members should neither initiate nor participate in institutional decisions involving a direct benefit to members of their immediate families. This statement was also reviewed by Committee A, and a final joint statement agreed upon by the two committees. It is now operating AAUP policy.

PART-TIME APPOINTMENTS

On the second policy issue, part-time appointments, I can merely give a progress report rather than any announcement of Committee recommendation. The Committee discussed the part-time appointment issue at great length at its February meeting. Realizing that the issue of part-time appointments involves broad and technical problems, the Committee wished to isolate for attention at least one important category of part-time appointment of special relevance to academic women. Our focus has been on opening up the senior professional ranks for part-time appointments to qualified men and women who do not or cannot accept full-time appointments. Our general view is that both men and women should be able to move into regular part-time academic positions which are considered as full-time appointments with half- or quarter-time leave, and that these positions should be governed by the same standards for notice and tenure as regular full-time appointments. We also believe that shifting back and forth between part- and full-time should be possible, depending on personal and institutional needs.

There is already precedent in academic for such part-time appointments at senior faculty levels. In my own survey of graduate sociology departments, for example, I found that a third of the men holding part-time appointments were associate or full professors; among those holding joint appointments between two departments or between a department and a research institute, a full two thirds of the men were at the senior ranks. In our judgment, if part-time services of men faculty are considered desirable to a department, even if shared with another department or institute, it should not matter that the sharing in other cases might be with the families of women faculty members.

Numerous aspects of the part-time appointment issue require careful review, which Committee W plans to pursue at subsequent Committee meetings. In the interim, we have sent to Committee A for its consideration a first statement outlining our position on regular part-time appointments at senior ranks.

Committee W is hopeful that Committee A will find it reasonable to isolate this one type of regular part-time appointment and to join us in drafting a recommendation without waiting until the entire range of more specialized part-time appointments has been considered. In our judgment, this issue of part-time senior appointments is of very special importance to academic women, for it would enable more women to retain a continuous affiliation with academic institutions without prolonged withdrawal during the child-rearing years. We also believe that in an era in which there will be many more dual career families, both husbands and wives may increasingly desire to hold less than full-time appointments for some portion of their careers.

MATERNITY LEAVE

Committee W cannot report anything specific about the third policy issue that has concerned us, maternity leave, except to mention that it is on our agenda. We have not had a report from a Committee member on this issue as yet, nor held anything but preliminary discussion of the issue. It remains therefore as a key topic that will occupy us during the second year of the Committee's work.

CALL FOR AFFIRMATIVE ACTION

One last action by Committee W this year was the drafting of the resolution presented at this Annual Meeting, calling for support of all efforts to seek, as a minimum, full and uniform compliance with Executive Order 11246 as amended by Order 11375, which prohibits discrimination on the basis of sex by any agency holding federal contracts. We hope that all units within the structure of AAUP will initiate or support local effort to improve the status of women in thier institutions and to contribute to the leadership and the development of affirmative action programs. The long-standing permanent nature of local chapter organization makes the local AAUP chapter a natural locus to serve as monitor of any plans to effect changes in institutional procedures for however long it takes to achieve the goals of full equality for women in academe.

FUTURE WORK OF COMMITTEE W

It is no doubt clear from the above that at least some of the focus of Committee W this coming year will be on the continuation of discussion and drafting of recommendations covering part-time appointments and maternity leave.

There is one other possibility I would like to share with you in this annual report. At our February meeting, I proposed to the Committee that, in looking ahead to next year, one of the most important unmet needs in the nation where academic women are concerned is the now-scattered and uncoordinated efforts taking place in academic disciplines, individual institutions of higher education, or separate chapters of the AAUP itself. We are so submerged in the specificity of our own field or our geographic locale that it is often difficult to gain an overview of what is going on from a national perspective. So too, we have little opportunity to think beyond a given year to the larger question of how an increased respresentation of women in American higher education will affect either the structure of academe or the content of the academic disciplines themselves. I proposed therefore that one contribution Committee W could make in this regard might be a conference sponsored by AAUP which would draw together the disparate groups and individuals involved in these issues for a few days of workshops, plenary sessions, and informal discussion. Well in advance of such a conference, we would commission papers on the impact of women on various academic disciplines as well as the structure of higher education itself, with plans for a post-conference publication of the papers. A preliminary draft of a proposal seeking funds for such a conference and its publication was discussed at our February meeting. It has since been revised and submitted through the Washington Office to a foundation for funds to support such a venture. It is too early to tell whether we shall succeed in obtaining such funds in these tight-money days, but if and when we do there will be a notice to this effect in *Academe* and the *AAUP Bulletin*.

We have also been concerned, along very much the same lines, with serving a useful function as a national committee vis-a-vis the local chapter Committee W's. We know from your letters how important these local efforts are and how difficult it is for one local Committee to be informed about what is going on in other local Committees. The workshop Committee W held at this convention is only one small effort to assist communications across the local chapters. We would welcome hearing from you about other mechanisms we could adopt to assist further.

I know from other contexts how difficult it often is for women in one department of one college or university to reach out, become acquainted with, and work together with other women at their own institution or others in their city and its environs. From watching the development of such ties in women' caucuses and in NOW chapters, I think any effort a local Committee W makes to establish contacts with neighboring institutions would go a long way in building up friendship and professional and political ties among women and those of their male colleagues sympathetic to our cause.

Academic women are still a small minority in most institutions of higher education, and, as such, they are subject to some of the same problems other minority groups experience. Belonging to a group of like-minded women from several colleges and universities helps to counteract the psychological impact of minority status. We shall continue to do all we can in the national Committee, but it is the multiplication of dozens of local efforts that can stimulate the sense of shared purpose and trigger the kind of action chain that can yield significant social, economic, and political gains for women. Through our joint efforts, it may be possible to make the 1970's a breakthrough decade for American academic women.

REMARKS FROM THE ANNUAL MEETING

Up to this point I have reported in formal terms on the work of Committee W, written before coming to this convention. I would like to supplement them with a few additional remarks about events during the convention itself, most importantly concerning the workshop held last night under Committee W sponsorship.

The workshop adjourned at 11:30 p.m. but could easily have cohtinued for several more hours, so keen was the interest in and the sense of shared commitment to the issue of academic women. It was a difficult but encouraging experience to chair that meeting, for it helped, more than any experience I have had as chairman of the Committee this year, to dispel the image of AAUP that is held in the world in which I have moved in academe over the past decade—a ponderously slow-moving, tedious establishment with an early twentieth century liberalism that wears thin in the late twentieth century world we live in. It has been a complex first year trying to get accustomed to the structure and procedures of the Association, made tolerable by the conviction I brought to the chairmanship of Committee W that it was a natural springboard for action that is long overdue in behalf of American academic women.

It was a bracing experience last night to meet women and men from local chapters and conferences and to sense in them the same bitter edge of frustration and impatience I brought to the Committee last fall. While I think the Committee has made progress this year, it has been an uphill battle not always successful in resisting the pressure to be mild and bland in the AAUP style. With the encouragement provided by last night's workshop, I would like to say that I do not think my Committee has fought hard enough in saying loudly and clearly that the time is now past when we can do business as usual in the old familiar ways where the problems facing academic women are concerned.

Yesterday afternoon we spent two hours on the St. John's case, clearly an instance on which the delegates felt strongly about righting the wrongs suffered by twenty-one dismissed faculty members. It was called the most serious case of the decade; if I recall correctly, someone suggested it was the case of the century. I understand a resolution will be presented today protesting the denial of academic freedom to professors in Greece. But, my friends, far more serious denial of rights—in hiring, in salary scale, in promotion—has been a regular, persistent, and continuing experience for thousands of American women in higher education. There are many in this ballroom who could match the St. John's case a dozen times over with equally horrifying experiences that women have had on your faculties over the past hundred years, and which, if anything, are increasing as colleges and universities trim their staffs of their easiest "expendables."

It is not sufficient to say that AAUP stands ready to help in individual cases submitted to Committee A. There are growing numbers of academic women in this Association who are articulately and poignantly angry. *If* AAUP hopes to retain them as members or attract new younger women members, it will have to move at a quicker pace and with firmer commitment than has been its usual style in the past.

With the renewed sense of confidence from last night's meeting, I shall in the future urge my Committee to step up the pace of its work and sharpen its demands for action by the Association. This Association should not wait for individual women to file complaints with Committee A or write a letter to Committee W. I shall recommend to my Committee several new directions to go. Among them are the following:

1. Committee A should expand its membership by the addition of several women already conspicuous by their efforts on behalf of women's rights in chapters and conferences. I will recommend that no additional men be appointed to Committee A until it has a membership roster of at least 25 per cent women, approximately the proportion of women in academe today.

2. I shall urge the Committee to recommend that the Association broaden its conception of public relations and press releases beyond *Academe*, the *Bulletin*,

and the *Chronicle of Higher Education*, with special attention to issues affecting academic women.

3. I shall urge the Committee to recommend strongly that the Association make a firm demand that colleges and universities establish whatever grievance procedures are lacking on local campuses to facilitate the processing of complaints from women faculty members, with a strong recommendation that such grievance committees include women in proportion to their representation on the faculty, including all part-time, nontenured, and lower rank personnel where so many women have been kept.

4. I shall recommend that the Committee urge the General Secretary and appropriate persons to designate funds for the establishment of a Committee W Newsletter in which members and local Committee W's can communicate, share ideas, reports, and affirmative action plans with each other, including, if necessary, the hiring of an additional staff person to serve as Editor of such a national Newsletter. The Association should realize that it has a retroactive debt to pay to women members after the forty-two-year retirement of Committee W. Just as we have argued that the financial crisis in higher education should not lightly be resolved by holding the line on faculty salary, it is not acceptable to argue that financial exigency in the Association is grounds for rejecting the request for appropriation of funds to produce a Committee W newsletter.

5. I shall further urge that if AAUP moves into the collective bargaining arena at a greater pace in the future, it should get a better sense of what women in this Association want and need, and incorporate such needs in its platform when it seeks the bargaining agent role, including the representation of part-time and not just full-time faculty employees. If academic women were more articulate about the experiences they have in academe, I think it would be clear that they find it less easy to indulge in a fantasy of "shared authority" between faculty and administration than men can. Few academic women share authority with either department chairman or the administration on their campuses. Most academic women have been taken for granted, subjected to subtle exclusion, refused tenure or promotion, judged expendable, and let go.

Social movements come and go with regularity in American history, but I think an index of those which persist in reaching their goals are those which have a keen sense of being close to the pulse of history. Robert Coles, who has studied the black children and their families involved in the attempt to desegregate southern schools, has reported that these families had such a sense in their bones that their actions were both individual and historic, that, as Coles put it, they were "living close to history." I know from my work over the past ten years that increasing numbers of women in the feminist movement now have that sense as well. They have a right to expect that a professional association, which presumes to represent them, respect their sense that their time has come. As a nation we are painfully learning that technology and military might are no match for the aspirations of peoples with this sense of commitment. By the same token, bureaucratic procedures hallowed by a few decades of tradition are no match for the aspirations of contemporary women now on the move. As intellectuals presumably open to new ideas and able to recognize an idea whose time has come, AAUP members can legitimately be expected to apply their cognitive skills and compassionate values to the goals now being espoused by academic women and articulated in the form of guidelines, resolutions, and recommendations from your own Committee W.

It is with a keen identification with the spirit of Alice Hamilton—a great woman in the history of American public health and medicine, who President Pusey suggested at her death had benefited by the aura provided by her appointment at Harvard but who retired as an Assistant Professor—that I carry the responsibility as chairman of the reactivated Committee W.

It is in this same spirit that I submit the following motion, unanimously endorsed by the one hundred or more members at last night's workshop:

> We recommend that the AAUP move as quickly as possible toward the development of procedures by which colleges and universities can be censured for discrimination against women.[3]

ALICE S. ROSSI,
Chairman, Sociology (Goucher College).

---

[3] The substitute resolution passed by the Annual Meeting read as follows:
Resolved, that the AAUP develop procedures as quickly as possible to use various measures, including censure, against colleges or universities practicing any sort of discrimination contrary to AAUP policy, including discrimination on the basis of age, sex, race, color, religion, national origin, or marital status [Ed.].

APPENDIX D

FACULTY APPOINTMENT AND FAMILY RELATIONSHIP

The following statement prepared initially by the Association's Committee W on the Status of Women in the Academic Profession, was approved by that Committee and by Committee A on Academic Freedom and Tenure. The statement was adopted by the Council of the American Association of University Professors in April, 1971, and endorsed by the Fifty-seventh Annual Meeting as Association policy. It was endorsed by the Board of Directors of the Association of American Colleges at its June, 1971, meeting.

In recent years, and particularly in relation to efforts to define and safeguard the rights of women in academic life, members of the profession have evidenced increasing concern over policies and practices which prohibit in blanket fashion the appointment, retention, or the holding of tenure of more than one member of the same family on the faculty of an institution of higher education or of a school or department within an institution (so-called "antinepotism regulations"). Such policies and practices subject faculty members to an automatic decision on a basis wholly unrelated to academic qualifications and limit them unfairly in their opportunity to practice their profession. In addition, they are contrary to the best interests of the institution which is deprived of qualified faculty members on the basis of an inappropriate criterion, and of the community which is denied a sufficient utilization of its resources.

The Association recognizes the propriety of institutional regulations which would set reasonable restrictions on an individual's capacity to function as judge or advocate in specific situations involving members of his or her immediate family. Faculty members should neither initiate nor participate in institutional decisions involving a direct benefit (initial appointment, retention, promotion, salary, leave of absence, etc.) to members of their immediate families.

The Association does not believe, however, that the proscription of the opportunity of members of an immediate family to serve as colleagues is a sound method of avoiding the occasional abuses resulting from nepotism. Inasmuch as they constitute a continuing abuse to a significant number of individual members of the profession and to the profession as a body, the Association urges the discontinuance of these policies and practices, and the rescinding of law and institutional regulations which perpetuate them.

APPENDIX E

Leaves of Absence for Child-bearing, Child-bearing, and Family Emergencies

The Statement which follows was prepared by the Association's Committee W on the Status of Women in the Academic Profession. It was approved by the Council of the American Association of University Professors in April, 1974, and endorsed by the Sixtieth Annual Meeting as Association policy.

INTRODUCTION

The joint *Statemen of Principles on Leaves of Absence*, adopted in 1972 by the American Association of University Professors and the Association of American Colleges, recommends that leaves of absence be granted for professional growth and intellectual achievement, for public or private service outside the institution, and for "illness, recovery of health, and maternity." The following statement on *Leaves of Absence for Child-bearing, Child-rearing, and Family Emergencies*, prepared by Committee W on the Status of Women in the Academic Profession, supplements and amplifies this last provision of the *Statement of Principles on Leaves of Absence.*

PURPOSE OF THE LEAVES

Committee W recommends that colleges and universities provide leaves of absence to faculty members for child-bearing, child-rearing, and family emergencies. Such leaves are to assist faculty members with parental responsibilities in meeting their obligations both to their professional careers and to their families, and to prevent the loss to the institution and to the academic community of substantial professional skills.

Career patterns of academic men and women vary. Academic women differ in their desire to continue or to interrupt their professional careers during the child-bearing and child-rearing years. Couples differ in the extent to which they wish to share family responsibilities. Some faculty members may wish to take a leave of absence from their professional positions to care for their children, others wish to combine parental and professional responsibilities, while still others prefer to retain their professional affiliation on a full-time basis throughout their child-bearing and child-rearing years.

An institution's policies on faculty appointments should be sufficiently flexible to permit faculty members to combine family and career responsibilities in the manner best suited to them as professionals and parents. This flexibility requires the availability of such alternatives as longer-term leaves of absence, temporary reductions in workload with no loss of professional status, and retention of full-time affiliation throughout the child-bearing and child-rearing years.

Institutional policies which require the termination of the appointment of a woman faculty member because she becomes pregnant penalize the individual unfairly. Moreover, policies which mandate the timing and duration of a leave of absence for pregnancy and childbirth do not take cognizance of particular medical needs or individual circumstances. Institutions which customarily or by policy allow paid absences for illness or temporary disability, but which deny equivalent absences for disabilities resulting from pregnancy or childbirth, discriminate against women.[1] Allowing leaves of absence for illness or temporary disability only in cases where faculty members are themselves ill or temporarily disabled disregards the need to provide short-term care for family members in serious emergencies. In addition, it may prevent fathers from assuming responsibilities in connection with the birth of children.

SHORT-TERM LEAVES OF ABSENCES FOR CHILD-BEARING AND FAMILY EMERGENCIES

Most colleges and universities provide for paid short-term leaves of absence, through formal or informal arrangements, for faculty members who are ill or temporarily disabled. The conditions and duration of compensation for short-term leaves for pregnancy, child-birth, or family emergencies involving spouse, parents, or children, should be analogous to those for leaves granted for temporary disability or personal emergencies. The timing and duration of absence in such cases should be determined by mutual agreement between the faculty member and the institution, and should be based on medical need, the requirements of the educational program, and individual circumstances. Compensation during short-term leaves of absence for child-bearing or the serious illness of a family member should be consistent with customary institutional practices in cases of illness or temporary disability.

---

[1] See the 1972 Sex Discrimination Guidelines of the Equal Employment Opportunitr Commission.

LONGER-TERM LEAVES OF ABSENCE FOR CHILD-REARING

The rearing of children should be considered appropriate grounds for a leave of absence of a semester or more, and such leaves should be available to both men and women faculty members. The timing and duration of such leaves should be determined by mutual agreement between the faculty member and the institution. Faculty members on child-rearing leaves should receive the same considerations with respect to salary increments, insurance coverage, retirement annuities, and the like, as are received by faculty members on leave for public or private service outside the institution.

The alternative of a temporarily reduced workload should be available to faculty members with child-rearing responsibilities (see Committee W's statement on *Senior Appointments with Reduced Loads*).

Individual and institutional obligations in connection with such leaves, including the timing of a tenure decision, should be those set forth in the applicable provisions of the *Statement of Principles on Leaves of Absence.*

APPENDIX F

AMERICAN ASSOCIATION OF UNIVERSITY PROFESSORS

REPORT OF COUNCIL COMMITTEE ON DISCRIMINATION

Background

The Fifty-seventh Annual Meeting of the Association in 1971 approved a resolution which called upon us to

> "Develop procedures as quickly as possible to use various measures, including censure, against colleges and universities practicing any sort of discrimination contrary to AAUP policy, including discrimination on the basis of age, sex, race, color, religion, national origin or marital status."

In response to this resolution, the Council of the Association established a Committee on Discrimination, which it charged with looking into the implications of this resolution for Association policy and making recommendations for its implementation. This committee, chaired by Professor Beatrice Konheim of Hunter College, met twice in two-day sessions during the past year and has prepared the report that follows.

Social movements in this country in recent years have generated governmental action at the national and local level against invidious distinctions based on such non-relevant characteristics as race, with profound impact upon the academic community as well as upon other aspects of American life. An awareness of the disparate treatment of some classes of persons in our colleges and universities has given rise to demands, from external agencies such as the Federal government and from within the academic community itself, for reform of institutional policies and practices. It has seemed clear to the Committee on Discrimination that the wishes of many members of the Association, as reflected by the resolution, are that the Association should welcome these new pressures and, within the limits of its resources and the general nature of its responsibilities, work towards the abolition of unwarranted discrimination in American higher education. We interpret the 1971 Annual Meeting's resolution as asking that the Association expand its traditional concern for the freedom of academics to include explicitly concern for the opportunity *to be* an academic, and as urging that the Association, through its statements and its actions, manifest a commitment to protect faculty members from retributive action not only for what they say and do, but also for what they *are.*

In considering the background of the resolution, and the area in which the need has appeared greatest, our Committee concluded that it should direct its attention principally to questions of discrimination on the basis of race/color and sex. Discrimination on the basis of age seems to the committee to involve a variety of multifaceted and generally separate considerations, ranging from penalizing youth to prejudicial treatment of persons of middle age entering the profession for the first time to matters involving retirement, which could not satisfactorily be approached in the same manner as the other kinds of discrimination specified in the resolution. Questions of discrimination on the basis of marital status have seemed most often to be an aspect of discrimination on the basis of sex. (See, for example, the Association's policy on *Faculty Appointment and Faculty Relationship*, approved by the Fifty-seventh Annual Meeting, which states that faculty members should not be penalized in gaining or retaining academic position solely because of their marital relationship with another member of the faculty, and which first was prepared by Committee W on the Status of Women in the Profession.) The Committee does not intend to imply that the pernicious effects of religious or ethnic discrimination should be minimized. It believes that much of its report is applicable to all those classes of persons who do not yet enjoy equality of opportunity in the academic community.

Recommendations regarding Association Policy

Noting that the resolution asks for the development of procedures to be used against institutions practicing discrimination *contrary to AAUP policy*, the committee reviewed Association policy in this regard. Formal Associaton policy states that consderations unrelated to "the fitness of the faculty member in his professional capacity as a teacher or researcher" should not be taken into account in making determinations relating to his professional status. Pronouncements which specify improper discrimination have, however, been made only in the context of resolutions of Annual Meetings, which since 1956 have resolved against discrimination on the basis of race and, more recently, on the basis of sex.

The Committee has therefore come to the conclusion that explicit acknowledgement of the Association's position on discriminatory treatment of faculty members should be incorporated into the policy which governs the operation of the Association's staff and committee and provides guidance for the profession as a whole. We believe that the Association, and particularly that committee of the Association which bears central concern for the improper treatment of members of the profession, Committee A on Academic Freedom and Tenure, should make explicit what we believe is implicit in the 1940 *Statement of Principles on Academic Freedom and Tenure* and in other declarations of principle dating back to 1915: That freedom from discrimination, like academic freedom, is essential to the free search for truth and its free exposition.

In accordance with this conclusion, this committee has made two recommendations to Committee A: first, that Section 1 of the *Recommended Institutional Regulations on Academic Freedom and Tenure* which deals with faculty dismissals, be amended to include the following:

> Appointments will be made on the basis of the prospective fitness of faculty members in their professional capacities as teachers or researchers and will be without prejudice with respect to race, sex, religion or national origin.

Second, we have recommended that Section 10 of the *Recommended Institutional Regulations*, which sets forth due process for nontenured faculty members who allege that decisions not to reappoint them are based on considerations violative of their academic freedom, be amended to provide the same rights of due process to the probationary faculty member who alleges that considerations based significantly upon race, sex, religion or national origin, contributed to a decision not to offer reappointment.

Grievance Procedures

In addition, recognizing that a large number of complaints involving an allegation of discrimination relate to matters other than dismissal or non-reappointment, e.g., salary, promotion, assignment of teaching duties, and the property of conduct on the part of colleagues or administrators, we believe that the Association should offer further guidance in the matter of institutional procedures for processing grievances, an area dealt with in very general fashion in Section 15 of the *Recommended Institutional Regulations*. While the same kinds of detailed grievance procedures do not tend to be applicable for all institutions, this Committee believes that the publication of sound existing grievance procedures which meet Association standards of due process would serve as useful models to members of the profession, both at those institutions which have not yet established formal procedures and at those whose present procedures have not proven satisfactory. Our Committee has, therefore, recommended such publication to the staff and to the Editor of the *Bulletin*. We are pleased to report that comprehensive grievance procedures recently developed at a regional state university are being considered for publication in the forthcoming issue. We also wish to encourage the staff to continue its program of assisting faculties and administrations at particular institutions in the establishment of suitable grievance procedures and to consider some elaboration of the general principles laid down in Section 15 of the *Recommended Institutional Regulations*.

The Committee recognizes that sound procedures may not in and of themselves be sufficient to get to the root of the problem of discrimination, particularly these kinds of discrimination which have been allowed to exist for generations. The cultural conditioning which has permitted our profession, which in its teaching role should set the example for society in these matters, to accept without question different standards of treatment for certain groups of people, may well impede fair consideration of the elements of an individual's situation within the context of a grievance hearing. It is, therefore, highly important that the Association make concerted efforts to bring the problems of discrimination to the attention of the entire profession and to impress upon the profession the need to change the attitudes and the structures which have allowed the perpetuation of inequitable situations.

Patterns of Discrimination

The committee believes that complaints of discrimination against particular individuals generally can and should be processed adequately under existing Association policy and procedure, particularly if the Association's position on improper discrimination is clarified in the manner we have proposed. A more elusive problem, however, presents itself where *patterns* of discrimination are alleged to exist. The Committee believes that Association policy and structure do not in most instances provide a sufficient basis, and Association resources are certainly not adequate, to mount a comprehensive program of investigation and admonition regarding the problem of discrimination as a pattern, as opposed to discrimination against a specific individual.

Let us be more explicit. In a situation where the faculty has perceived and challenged conditions of discrimination, and where the administration or governing board has not been responsive to faculty efforts to remedy the existing situation, a group of faculty members might under present policy request the General Secretary to authorize an investigation of a situation which poses serious issues of adequacy of governance. In such a case, discrimination practiced by an institutional component, which has failed to respond to expressions of concern from faculty, might lead to an Association investigation and a resulting published report.

The Committee on Discrimination well realizes, however, that the Association cannot rely exclusively upon the *Statement of Government* and the *Standards for Committee T Investigations* as constituting sufficient means to meet the concerns of last year's Annual Meeting. In too many cases it is the faculty itself, or a significant portion of it, which has opposed change in such areas as appointment policies. Improperly utilizing the principle of preserving quality, faculty members responsible for recommending appointments have denied entrance to the academy to women and to persons of minority race and background. Faculties have likewise doubtless been influenced by existing patterns which lead to discrimination based on improper considerations in such matters as salary, retention, promotion, and service on decision-making bodies.

In order for the AAUP appropriately to respond to a request from its members that it censure institutions which discriminate, particularly in cases where it might justly be contended that the faculty itself has contributed to the perpetuation of discriminatory practices and patterns, it would be necessary to devise comprehensively applicable standards for such investigation, so as to measure discrimination out of the context of individual injury and of faculty judgment scorned. Such standards might speak to policies and practices whose discriminatory effect has been establihed, e.g. antinepotism policies and exclusionary systems of recruiting. These standards presumably would also require a nationally applicable measure of discrepancy in rates of salary, promotion and retention. Even assuming that genuinely useful standards could be devised, the absence of the kind of subpoena power which contributes to the operations of the Federal government in this area would make it difficult to establish that discriminatory considerations contributed to the pattern of inequality which is perceived. Equitable standards for investigation would require a showing that the discriminatory treatment persists even after it has been established as such, that it is perceived by those who might act to remedy it and can thus be interpreted as intentional, and that normal avenues for local correction have been explored without substantial success. These troublesome factors reveal the necessary limitations in what can be done by way of enforcement by a professional organization such as AAUP.

Despite these reservations, our Committee has not foreclosed the possibility that the Association would review, as a matter of national concern, cases or conditions involving patterns of discrimination. If *prima facie* conditions of discrimination exist in a given case, and *if no acceptable process is being developed within the institution through which the conditions might be remedied*, a formal Association investigation might well be appropriate, so that the given instance of unrectified conditions of discrimination can be brought to the attention of the entire profession through a published report.

Recommendations to Institutions

The Committee on Discrimination is convinced that the Association can and should take an active role in pointing to practices which foster discrimination or allow it to continue, and that it can be very effective in this role. The Association should assist the academic community in recognizing its responsibility not only to stop discriminating, but to take further steps to see that the effects of past discrimination are eliminated as rapidly as possible commensurate with the maintenance of sound academic standards. The Association should encourage institutions to develop a realistic appreciation of their record in the treatment of women and minority groups, and to develop programs of remedial action to correct inequities which may be found to exist. There are a number of effective approaches:

1. An institution should make explicit its commitment to equal opportunity for all persons and should announce this policy to all those involved in decisions on faculty appointment or advancement, and to all those with whom it consults in seeking candidates for appointment or in deciding questions of advancement.

2. Faculty vacancies should be publicized as widely as possible, and application invited from all interested and qualified persons. (Appointing officers or committees seem frequently not to have been aware of the availability of women or persons of minority race or background because customary recruitment practices have not tended to bring forth their candidacies. Word-of-mouth recruitment has worked a disservice both to candidates and to institutions to the extent that it has limited opportunity for appoinment for reasons unrelated to potential merit and has narrowed the range from which an institution can draw promising candidates.)

3. Colleges and universities would be well advised to charge a faculty committee with studying institutional practices concerning appointments, salaries, tenure and other features of professional status, to determine whether patterns of unwarranted discrimination exist. (Where such studies have been undertaken, they have been of considerable value in calling the attention of faculty members and administrative officers to potential abuses and in educating the academic community to the importance of equal opportunity.)

4. The most appropriate mechanism for arising and resolving cases of prejudicial treatment is effective institutional grievance procedures. We reiterate our concern that colleges and universities still lacking such procedures move promptly to develop them, so that grievances relating to discrimination can be heard and necessary corrective action can follow.

It is no our purpose to set forth a comprehensive model program for affirmative action; examples have been or are being formulated by learned societies, by agencies of the Federal government, and by individual colleges and universities. As in the matter of grievance procedures, the particular programs applicable to a given institution will undoubtedly differ. This Committee urges that the Association's staff remain in close touch with these developments and provide assistance to faculties and administrations which ask for it. We are pleased to report that the staff has been in close touch with the Federal government as it develops policy in this area, and we urge continued surveillance of the government's program to eliminate discrimination. In view of new legislation which extends the authority of the Federal government in matters of discrimination into a far broader area than is the case at present, the Association should be especially concerned to see that the role of the Federal government is not allowed to supersede the appropriate responsibilities of the faculty.

Affirmative Action

The Committee on Discrimination thinks it appropriate in this report to speak to the issue of affirmative efforts to redress the effects of past discrimination in college and university faculties, efforts undertaken under governmental pressure or, to be preferred, in response to concerns from within the academic community. Under the *Statement on Government of Colleges and Universities*, matters concerning faculty status are primarily a faculty responsibility. We believe that this responsibility carries with it an obligation to make decisions affecting faculty status on the basis of standards of judgment which have not on their face excluded certain groups of people, standards which have not served to limit opportunity for certain groups of people because of considerations other than academic merit. We wish to stress that the concept of affirmative action calls for rejection of standards and practices which do not allow equal opportunity for all who may be qualified. It calls for genuine and tangible efforts to bring into faculties members of those groups which have previously been denied full equality of opportunity. Under an affirmative action program, a faculty is asked to reassess its recruiting practices and, if necessary, to attempt to expand the sources from which it has traditionally drawn its new members. Affirmative action may also imply that a faculty consider providing advantage in the selection process for previously excluded groups, as a result of a faculty's desire to look to such additional factors, in evaluating an individual's potential contribution to the institution, as the values which diversity in perspective and experience may infuse into the academic program as a whole. A properly conceived affirmative effort, it must be emphasized, neither requires nor implies the placement of unqualified persons in any position, nor does it require the dilution of valid standards for appointment or promotion to any position. It does, however, make possible a broader interpretation of the criteria which have defined the parameters of academic excellence when this is deemed desirable by those responsible for decisions in this area. We do not believe that the imposition of statistical quotas for hiring by external agencies is either appropriate or necessary. We are convinced, however, that faculties which have not yet done so are likely to benefit by reexamining the procedures and the considerations which over the years have guided their decisions relating to appointment and promotion of faculty, and by moving promptly, when necessary, to insure that all are given a full opportunity to enjoy those benefits and to undertake those responsibilities which are a concomitant of faculty membership.

Finally, our Committee wishes to express its support of members who are keenly interested in drawing the Association as actively as possible into the effort to eliminate prejudice and injustice in our institutions of higher education. The Association has, we believe, a special responsibility to the profession and to the entire academic community to press for reform of discriminatory practices and conditions on the local scene and to take a firm position on the national level in favor of a responsible and positive program to eliminate discrimination.

APPENDIX G

AFFIRMATIVE ACTION IN HIGHER EDUCATION

A REPORT BY THE COUNCIL COMMISSION ON DISCRIMINATION

The Report which follows was presented in April, 1973, to the Council and to the Fifty-ninth Annual Meeting.

The Council Committee on Discrimination has been directed to formulate a position on the role of affirmative action in the elimination [illegible] discriminatory practices in academic recruiting, appointment, and advancement. In doing so, we begin with the premise that discrimination against women and minorities in higher education is both reprehensible and illegal, and reaffirm the emphatic condemnation of such practices by the AAUP.

More particularly, it is to the specific meaning and implications of affirmative action that our concern is directed, and especially to the question of so-called "preferential" or "compensatory" treatment of women and minorities. Because the phrase "affirmative action" has been assigned such extraordinarily different meanings by different persons and agencies, however, we mean to set the tone for that Report at the beginning by stating our own position as to what it must mean consistent with the standards of the AAUP. It is that affirmative action in the improvement of professional opportunities for women and minorities must be (and readily can be) devised wholly consistent with the highest aspirations of universities and colleges for excellence and outstanding quality, and that affirmative action should in no way use the very instrument of racial or sexual discrimination which it deplores.

The plans which we commend are those which are entirely affirmative, *i.e.*, plans in which "preference" and "compensation" are words of positive connotation rather than words of condescension or *noblesse oblige*—preference for the more highly valued candidate and compensation for past failures to reach the actual market of intellectual resources available to higher education. The Committee believes that the further improvement of quality in higher education and the elimination of discrimination due to race or sex are not at odds with each other, but at one. What is sought in the idea of affirmative action is essentially the revision of standards and practices to assure that institutions are in fact drawing from the largest marketplace of human resources in staffing their faculties, and a critical review of appointment and advancement criteria to insure that they do not inadvertedly foreclose consideration of the best qualified persons by untested presuppositions which operate to exclude women and minorities. Further, faculties are asked to consider carefully whether they are requiring a higher standard and more conclusive evidence of accomplishment of those women and minorities who are considered for appointment and advancement. What is asked for in the development of an affirmative action plan is not a "quota" of women or blacks, but simply a forecast of what a department or college would expect to occur given the *non*discriminatory use of *proper* appointment standards and recruiting practices—with the expectation that where the forecast turns out to be wide of the mark as to what actually happens, the institution will at once make proper inquiry as to why that was so. In essence, it is measures such as these which the Committee believes to be required by the Office for Civil Rights of HEW of universities using federal funds, and we do not see that there is in such requirements anything which the AAUP should find inconsistent with its own goals. Indeed, there may be more reason for concern that affirmative action of this kind which is critical to the abatement of discrimination may fail to be pursued with vigor than that it may be pursued too zealously. At the present moment, the politics of reaction are a greater source for concern than the possibility that affirmative action might lend itself to heavy-handed bureaucratic misapplication.

1. Defining the Criteria of Merit

"Excellence" and "quality" are not shibboleths with which institutions of higher learning may turn away all inquiry. Rather, they are aspirations of higher education which are thought to be served by seeking certain attributes and skills in those to be considered for academic positions. Some of these appear almost intuitively to be clearly related to certain standards customarily used by universities, others less obviously so but nonetheless determined by experience to "work," and still others are not infrequently carried along largely by custom and presupposition. Where a long period of time has passed since any serious study has been made to review the effects and the assumptions of stated or unstated standards of appointment and advancement (or where no study was ever made, but the standards were simply adopted on the strength of common custom and plausible hypothesis), it would be reasonable in any case to expect a conscientious faculty to reconsider the matter from time to time. When the use of certain unexamined standards tends to operate to the overwhelming disadvantage of persons of a particular sex or race who have already been placed at a great disadvantage by other social forces (not exclusive of past practices within higher education itself), it is even more reasonable to expect that an institution of higher learning would especially consider its standards in light of that fact as well: to determine whether it is inadvertently depriving itself of a larger field of potential scholars and teachers than simple economy requires, even while compounding the effects of prior discrimination generally.

We cannot assume uncritically that present criteria of merit and procedures for their application have yielded the excellence intended; to the extent that the use of certain standards has resulted in the exclusion of women and minorities from professional positions in higher education, or their inclusion only in token proportions to their availability, the academy has denied itself access to the critical mass of intellectual vitality represented by these groups. We believe that such criteria must thus be considered deficient on the very grounds of excellence itself.

The rationale for professional advancement in American higher education has rested upon the theoretical assumption that there is no inherent conflict between the principles of intellectual and scholarly merit and of equality of access to the academic profession for all persons. In practice, this access has repeatedly been denied a significant number of persons on grounds related to their membership in a particular group. In part, this denial of access has resulted from unexamined presuppositions of professional fitness which have tended to exclude from consideration persons who do not fall within a particular definition of the acceptable academic person. This is in part, but only in part, a function of the procedures through which professional academics have been sought out and recognized within the academy. Insofar as few are called, the range of choice must necessarily be a narrow one, and those fewer still who are chosen tend to mirror the profession's image of what it *is*, not what it should or might be. Beyond procedural defects, however, the very criteria by which professional recognition is accorded have necessarily tended to reflect the prejudices and assumptions of those who set them, and professional recognition and advancement have generally been accorded those who most closely resemble the norm of those who have in the past succeeded in the academy.

It is therefore incumbent upon the academic community, as the first test of equal opportunity, to require something more: that the standards of competence and qualification be set independently of the actual choices made, ostensibly according to these standards; for otherwise, a fatal circulatory ensues, in which the very standards of fitness have no independent parameters other than survival itself.

Where a particular criterion of merit, even while not discriminatory on its face or in intent, nonetheless operates to the disproportionate elimination of women and minority group persons, the burden upon the institution to defend it as an appropriate criterion rises in direct proportion to its exclusionary effect. Where criteria for appointment or promotion are unstated, or so vaguely framed as to permit their arbitrary and highly subjective application in individual cases, the institution's ability to defend its actions is the less. While we do not mean to suggest that criteria for academic appointment and advancement be reduced to an easily quantifiable set of attributes or credentials, all of which might be possessed uniformly by a large number of persons otherwise wholly unsuited to the position in question, we are convinced that a reluctance or inability to explicate and substantiate the criteria and standards employed generally and in a given instance does nothing to dispel the notion that something more than chance or intuition has been at work.

2. *The Critical Review and Revision of Standards for Academic Appointment and Advancement*

The range of permissible discretion has been the norm in reaching professional judgments offers both a hazard and a valuable opportunity to the academic community. The hazard stems from the latitude for the operation of tacit and inadvertent or explicit prejudices against persons because of race or sex, and their consequent exclusion on indefensible grounds when the standards are clearly met; the opportunity stems from the posibility for broadening the Internal criteria for choice in accordance with a general notion of excellence, and hence expanding that notion.

As faculty members keenly aware from our own experience that it may not be possible to verify every consideration taken into account or to experiment wildly, we cannot, of course, urge an abandonment of common sense or common experience. Nor, frankly, have we learned of anything in the specifics of the HEW Guidelines which does so. Rather, what is called for is a review to determine whether we have taken too much for granted in ways which have been harmful, to an extent that institutions themselves may not have known, and a consideration of alternatives which would be neither unreasonable nor unduly onerous in the avoidance of inadvertent discrimination and unwarranted exclusion. Specifically, the review and revision of criteria for academic appointment and advancement should be sensitive to the following considerations:

(a) The greater the effect of a given standard in diminishing the opportunity of women and minorities for possible appointment, the greater the corresponding responsibility to determine and to defend the particular standard as necessary and proper. The disqualification of larger percentages of women and minorities by standards which are only hypothetically related to professional excellence may, understandably, invite skepticism and inquiry.

(b) Standards which may serve valid professional and institutional interests, but which are more exclusionary than alternative standards sufficient to serve those interests, should be reconsidered in light of the less exclusionary alternatives. For instance, an institution-wide antinepotism rule is doubtless connected with a legitimate interest to avoid conflicts of loyalties among faculty members, but its exclusionary effect is far broader than a rule that requires faculty members to excuse themselves from participating in particular decisions involving family members, and in practice the exclusionary effect of overly broad antinepotism rules has overwhelmingly disabled a far greater proportion of women than men from consideration for academic appointment. The AAUP has already called for the curtailment of such rules.

(c) Criteria adopted to limit the field of eligible candidates largely (if not exclusively) for reasons of administrative convenience or out of past habits especially need to be reconsidered. For example, candidates may be sought only from those few graduate programs which in the past have provided the majority of the institution's staff; or application may be limited only to those who have had prior teaching experience. To the extent that such a policy of presumed efficiency excludes persons who may be equally excellent, the interest of economy should be carefully weighed against the tendency of the standard to disqualify a disproportionate number of women and minority persons.

(d) The overall excellence of a given department may be better assured by considering its existing strengths and weaknesses and, accordingly, varying the emphasis given to different kinds of individual qualification for appointment from time to time, rather than applying a rank-order of standards of fitness identically in every case. The failure to consider appointments in terms of a balance of qualities within a department may in fact result in less overall excellence than otherwise. Exactly as excellence of a *total* department is the goal, consideration of different kinds of skills and interests in different persons becomes important in order to maintain that kind of excellence and to liberalize the emphasis given to the appointment of persons stronger in certain respects than those in which the department is already very notable.

We would go further in this observation. An institution which professes to be concerned with many things must not only indicate by its appointment practices that it means what it declares, it must act consistently with that declaration thereafter in the advancement, salary, and respect for the appointee. It is unacceptable and hypocritical to make an appointment of a candidate based on a belief that that candidate, whose strongest assets are different from those of the existing faculty, is appointed precisely because his or her strengths are valued in what they add to the quality of the department, and thereafter nonetheless treat that person as less valuable when it comes to subsequent consideration in respect to salary, tenure, and similar considerations.

(e) The consideration of diversity of characteristics among the faculty of a given department or institution may be relevant to excellence and to affirmative action in an even larger and more important sense. Ordinarily, an institution would never think to list a narrow range of "age" as a categorical criterion of eligibility for academic appointment, precisely because it is a wholly inappropriate means of categorically eliminating great numbers of people who may be as well qualified or better qualified than others. To restrict eligible candidates as a general and categorical matter to persons between, say, thirty-five and fifty years old would be thrice wrong: it unduly narrows the field of excellent people by an exclusionary standard which may work against the achievement of the highest quality of faculty obtainable; it is discriminatory and unfair to the well-qualified persons whom it categorically excludes; it may weaken the faculty in the particular sense of staffing it in a flat and homogeneous manner, depriving it of perspectives and differences among persons of more diverse ages.

It is nonetheless true that a characteristic which may be indefensible when used as a categorical standard of ineligibility is neither inappropriate nor invidious when it is taken into consideration affirmatively in choosing between two or more otherwise qualified persons, when it is related to securing a larger diversity than currently exists within the faculty. As between two otherwise well-qualified persons, a general concern for balance and the subtler values of diversity from the heterogeneity of younger and older faculty members has quite commonly found expression in resolving a preference between two candidates for a given position—never as a reflection upon, or as an "exclusionary" device against, the one, but as a relevant factor in light of the existing composition of the faculty.

The point may be generalized: meeting a felt shortage of tenured professors by preferring a more experienced and senior person; breadening the professional profile within a department, most of whose faculty secured their degrees from the same institution, by preferring in the next several appointments well-qualified persons of a different academic graduate exposure or professional background; leavening a faculty predominantly oriented toward research and publication with others more interested in exploring new teaching methods, and vice-versa. It is useless to deny that we believe such considerations are relevant, as indeed we familiarly and unselfconsciously take them into account all the time, and rightly so; never in lieu of seeking the "best qualified person," but as contributing to a sensible decision of what constitutes the best qualified person in terms of existing needs and circumstance.

As we do not think this Association would disapprove conscientious efforts by academic faculties to register an affirmative interest, as they often have, in the positive improvement of their departments in the several ways we have just illustrated, but rather that this Association would (and does) regard those efforts as wholly conducive to fairness and quality, we do not see any sufficient reason to be less approving in the affirmative consideration of race or sex. We would go further to say that special efforts to attract persons improve the overall diversity of a faculty, and to broaden it specifically from its unisex or unirace sameness, seem to us to state a variety of affirmative action which deserves encouragement. A preference in these terms, asserted affirmatively to enrich a faculty in its own experience as well as in what it projects in its example of mutually able men and women, and mutually able blacks and whites, seems to us to state a neutral, principled, and altogether precedented policy of preference.

The argument to the special relevance of race and sex as qualifying characteristics draws its strength from a recognition of the richness which a variety of intellectual perspectives and life experiences can bring to the educational program. It is more than simply a matter of providing jobs for persons from groups which have in the past been unfairly excluded from an opportunity to compete for them; it is a matter of reorganizing the academic institution to fulfill its basic commitment to those who are seriously concerned to maintain the academic enterprise as a vital social force. The law now requires the elimination of discriminatory practices and equality of access for all persons regardless of race or sex: moral justice requires an end to prejudice and an increase of opportunities for those who have been denied them in the past by prejudice; enlightened self-interest requires that an institution reexamine its priorities where standards of merit are concerned, to revitalize the intellectual life of the community through the utilization of heretofore untapped resources. Most important, insofar as the university aspires to discover, preserve, and transmit knowledge and experience not for one group or selected groups, but for all people, to that extent it must broaden its perception of who shall be responsible for this discovery, preservation, and transmission. In so doing, it broadens the base of intellectual inquiry and lays the foundation of more human social practices.

(f) It is far from clear that every qualification we may associate with excellence in teaching and research is in fact as important as we are inclined to view it, or that our predisposition to certain qualities we habitually associate with significant scholarship is as defensible as we may earnestly suppose. There is, as we have noted, a certain circularity in the verification of standards insofar as professors may discern "excellence" in others who resemble themselves, and thus, by their appointment and advancement decisions, generate the proof that merit is the function of those resemblances. It is also far from clear that some degree of frank experimentation in academic appointment would not yield significant information in terms of how a faculty decides what is to be taught, or what is an appropriate or interesting subject for research and publication. It is surely not impossible, for instance, to question whether what is not taught and what is not researched is at least as much a function of parochialism and endless circularity of education-and-teaching as it is a function of wise perspective in determining what is truly important. The point need not be labored, however, for the professional literature concerned with higher education has itself repeatedly expressed these same concerns.

Nevertheless, the point has relevance to an affirmative action plan in the following sense. An institution appropriately concerned with its own continuing development may well wish to involve a component of experimentalism in its own staff policies—deliberately reserving discretion to depart from standards and criteria it generally employs precisely as a means of determining whether there may be important scholarly and educational functions to be served by standards different from those it ordinarily applies. The selection of some faculty "out of the ordinary" is itself very much a part of an institution's continuing concern with excellence in this sense. The preference for candidates who bring to a particular position certain differences of experience and background which the university may very properly be reluctant to adopt as a general matter in advance of any oportunity to determine what kind of difference they may make, but which it needs to take into account in order to have that opportunity, is neither invidious to others nor irrelevant to a university's legitimate aspirations. This consideration, while it exists quite apart from the need for an affirmative action plan in the improvement of equal opportunity for women and minorities, may nevertheless affect and help to broaden the design of that plan.

3. The Review and Revision of Academic Recruitment Policies

It must be obvious that even the most conscientious review and revision of eligibility, appointment, and advancement standards can have little effect in the shaping of academic faculties independent of recruiting practices. Even supposing that all of the preceding concerns for excellence, diversity, and experimentalism are nominally composed in the standard of a department or institution, they may yield very little if the manner in which the department goes about the business of finding qualified persons is itself so confined that in fact only a very few qualified persons are likely to turn up, and these not necessarily the best qualified. Additionally, it is now abundantly clear that certain conventional ways of locating possible candidates may operate to the disproportionate exclusion of women and minorities from equal opportunity for consideration—not necessarily as a consequence of willful discrimination but as a practical matter nonetheless. It is natural, for instance, that members of an appointments committee would seek names of possible candidates from acquaintances at other institutions—and that the resulting suggestions may substantially understate the availability of interested, qualified women and minority persons in a number of ways. For example, the institution from which the references are sought may be one which has proportionately fewer women or minority groups among its graduates or graduate students than other institutions. Or, the acquaintances providing the reference may act on presuppositions respecting the interest, qualification, or availability of women and minorities, and thus underrepresent them in their references.

Even if we were to assume, therefore, that there is no *willful* discrimination against women and minorities in the easy custom of recruiting principally by personal inquiry and reference, still the consequence of exclusion by inadvertence is grossly unfair—and altogether inconsistent with the development of excellence in higher education.

The call for affirmative actions plans provides an occasion we believe is long overdue—to re-examine recruiting practices and patterns, and to revise them with the specific ambition of broadening the field of persons whose interest and qualifications the institution should want to know of and correspondingly providing them an opportunity to express their interest. In our view, this is an area in which we should be particularly concerned with "under-utilization" of qualified women and minority persons, *i.e.*, that customary and unexamined parochialism in recruiting practices seriously understates the availability of persons fully qualified according to an institution's own standards, and that they do so disproportionately with respect to women and minority persons.

The Committee does not think it feasible to blueprint the particular ways in which each discipline, department, or institution can best proceed consistent with reasonable economy—for the means of reaching larger numbers of qualified candidates differs considerably from discipline to discipline. In nearly all cases, however, it may be necessary to assess academic staffing needs more in advance of the time when the appointment is itself to be made, *i.e.*, to provide greater lead-time in order that new ways of locating additional qualified persons can be given a chance to work successfully. In some disciplines, moreover, it may be feasible through national professional associations to enlist the aid of a national service, readily providing a point of contact between interested candidates and available positions, vastly improving the field of available candidates with very little expense or time to a given department. For more than a decade, the Association of American Law Schools has provided a directory and registry for those interested in law teaching, for instance, and its use by a great number of law schools is now exceedingly well established. Similarly, many of the disciplinary associations in the humanities and social sciences operate professional registers and employment information bulletins, which provide a mutually satisfactory opportunity for prospective applicants and employers to make themselves known to one another. Far from being regarded as introducing an unhelpful and inefficient element in recruiting, such services should be seen as contributing to the efficiency and quality of academic staffing.

Finally, given the procedural inequity of past recruiting practices which have not only worked with discriminatory effect against women and minorities but which may well have had an additional effect of discouraging their interest in considering an academic career, we believe that a highly principled argument for preference and compensation may be made which bears on the generation of the pool of candidates to be considered. Since good evidence exists to support the claim that overwhelmingly there has been an initial skewing of the candidate pool in traditional search and recruitment procedures, it may reasonably be argued that equity itelf now requires a certain "preference" whose effects are "compensatory" in the special sense that more attention and care shall be paid where little or none was paid before; and this is not to the *special* advantage of women or blacks, for example, but for the equalization of their opportunity, in the face of prior disadvantage. Such preference and compensation does not discriminate against majority candidates, but puts them on an equal footing for the first time.

4. Statistical Forecasts under an Affirmative Action Plan, and the Monitoring of Equal Protection

Litigation and government inquiry are substantial risks in any case where the observable facts do not seem to support a claim of nondiscrimination. Historically, the relevance of statistics as a means of shifting the burden to come forward with evidence has most frequently been allowed by courts in respect to racial discrimination and the right to trial by jury. As the actual means which may have been used to compose a jury list are often not subject to public view, it proved virtually impossible for black defendants to establish that the persistent absence of blacks from grand juries and trial juries was, *in each particular case*, the result of willful discrimination. Where a comparison of census figures respecting the proportion of jury-eligible blacks in a given community would give rise to an expectation that over a substantial period of time approximately the same proportion of persons called for jury duty would similarly be black, but where in fact few or none were black, it became familiar that the federal courts would regard the fact of a continuing and significant disparity as yielding a *prima facie* inference that racial discrimination was a contributing element. The effect of the inference was to shift to the state the duty to come forward with evidence which would explain the result on grounds other than racial discrimination. Without doubt, this development in the law—which now has analogues in many other areas as well, including employment—was important to the effective detection and remedying of racial discrimination. We have thought it important to recall this fragment of civil rights history as a useful way of placing in perspective our several observations about "goals" and "targets," which have become misidentified as "quotas" in the litany of criticism of affirmative action plans.

In accordance with present requirements of the federal government, a "goal" and the timetable for its fulfillment are to be set by the institution itself. This means the arriving at the "goal" include exactly the kind of measures we have already discussed in the review and revision of criteria of eligibility and the review and revision of recruiting practices. In this framework, the "goal" is nothing more or less than an expectation of what an institution has reason to suppose will result under conditions of nondiscrimination, given its standards and recruiting practices, in light of the proportion of those within the field of eligibility and recruitment who are women or members of minority groups. Indeed, the word "goal" is itself something of a misnomer insofar as it suggests that the production of percentages is some kind of end in itself. Rather, what is contemplated is the specification of an expectation as to what the institution has reason to believe should appear in the ordinary course of events, given valid criteria of eligibility, proper recruiting practices, and the fair and equal consideration of equally qualified women and minority members in the actual course of selecting among candidates. Essentially, it is an arrangement which leaves open to public review the logic by which the expectation was determined, the general legality of standards which inform the criteria applied in personnel actions, the technical quality of the statistical analyses upon which conclusions are reached, and the degree of integrity with which an institution has adhered to a procedure which it has itself designed. The Committee on Discrimination believes that this part of an affirmative action plan is entirely proper and extremely important in several respects:

(a) Depending upon the unit for which the forecast is made, it will enable an institution to continue a policy of decentralized appointments recommended by the faculties of its respective departments and colleges, while simultaneously providing it with a means of insuring that racial and sexual discrimination is not in fact contributing to those staffing decisions;

(b) It provides the government agency responsible for making certain that institutions assisted by public funds are not in fact violating executive, statutory, and constitutional requirements of equal protection with a means of fulfilling that responsibility;

(c) It provides the institution with a means of rebutting allegations of racial or sexual discrimination, insofar as simplistic impressions of disproportionality might otherwise support an inference of discrimination where, in fact, no such inference is warranted.

Beyond this, conscientious efforts to project personnel needs and to forecast the extent to which affirmative action plans should tend to make a real difference in the employment opportunities of women and minority persons may serve a broader interest as well. As citizens as well as educators we will all have a common interest in attempting to determine how effective our separate and combined efforts are likely to be in the abatement of discrimination and the amelioration of effects from past discrimination. The knowledge these efforts can help to provide is not without significance in assessing whether or not we have done too little in this sensitive area of civil and human rights. It may help, moreover, not only to fortify the thinking of institutions of higher learning in terms of their own role, but in considering more knowledgeably what attention needs to be given to other institutions as well—institutions not involved in higher education, but whose existence and operation nonetheless profoundly affect the equal opportunity of women and minorities.

To be effective even in the three respects we have noted, however, it is obvious that additional material and records must be made and maintained by the university—information to be periodically supplied by the various departments and colleges. An institution's willingness and ability to keep a careful and accurate record of personnel actions is of paramount importance. Among these is the requirement that educational institutions collect and analyze personnel statistics by race and sex, so to determine whether there is cause for inquiry and explanation where actual staffing practices fall short of expectations under a policy of nondiscrimination. The same need to establish reliable information on actual recruiting practices under an affirmative action plan also holds.

Finally, we think it important to note again the point, purpose, and relationships of the several parts of an affirmative action plan. It is a plan which is well designed to improve both quality and equal opportunity, but it is a plan which makes an assumption. It assumes that institutions of higher education are what they claim they are—and that all of us as teachers and professors are also what we say we are; that we mean to be fair, that our concern with excellence is not a subterfuge, that we are concerned to be just in the civil rights of *all* persons in the conduct of our profession. If the assumption is a false one, then it will quickly appear that affirmative action plans can go the way of other proposals which are intellectually sound but which so frequently fail in their assumptions about the nature of people. For without doubt, the temptation will appear to the indifferent and the cynical to distinguish between the appearance and the substance of such a plan and to opt for the appearance alone: the token production of "adequate" numbers of women and blacks to avoid the likelihood of contract suspensions or HEW inquiry, even while disparaging their presence and assigning the "blame" to the government. We do not doubt in this respect that institutions of higher learning will thus reveal more about *themselves* in the manner in which they respond to the call for affirmative action, however, than what their response may reveal about the consistency of such plans with excellence and fairness in higher education. For its own part, the Committee on Discrimination believes that plans reflected in the body of this Report are entirely sound and congenial to the standards of the AAUP, and we commend them for the opportunity they provide for the further improvement of higher education as well as for their contribution to the field of civic rights.

Prepared Statement of Mary Gray, for Committee W, of the Status of Women in the Academic Profession, American Association of University Professors

You have heard the Association's position on affirmative action. I would like to present the concerns of Committee W on the Status of Women in the Academic Profession concerning the failure of Federal agencies to move vigorously in this area.

The critics of affirmative action would have you believe that the federal agencies—in particular the Department of Health, Education and Welfare—have massively invaded the nation's university campuses and arbitrarily and unwisely forced the hiring of hundreds of underqualified women and minority group members.

None of these allegations has been supported by evidence. Indeed if there has been some "interference" in traditional hiring policies, it is precisely because these policies had led to the almost total exclusion of women and minorities from the faculties of our major universities. Finally, at least at the untenured beginning level, more women are being hired. Perhaps there have been a few cases of abuses, of the less qualified candidate being selected in attempts to satisfy affirmative action requirements, but hardly a sufficient number of such incidents to justify the elimination of Executive Order requirements from university contracts, or to stop the application of Title VII and the Equal Pay Act to faculty employment.

What is needed is not the exclusion of universities from the requirements of Revised Order 4 or other regulations, but a more intelligent and informed enforcement by HEW and a more intelligent and informed commitment to equal opportunity and affirmative action on the part of the nation's universities and colleges.

Several assumptions of those engaged in the recent spate of affirmative action criticism are unsupported by evidence. It is undoubtedly true that there is a scarcity of women available for tenured appointments at major universities in some fields. However, qualified women are not non-existent. A statement which has been repeated so much that it is taken as gospel by the affirmative action opponents is that there are, at most, one or two women qualified for tenure appointments in the top dozen mathematics departments in the country. In fact, there are more women than that already in such positions.

Moreover, there are dozens of women mathematicians in untenured positions at these schools, some of whom certainly are qualified to move into tenure slots. In the top three or four dozen universities, there are many more women in tenure positions—as many as four in one department—some of whom could be considered for positions open at the top schools. The pool of male mathematicians counts those men available in other countries. If we count in the same way for women, we see that in Paris alone there are four or five women full professors in mathematics.

Since many of the major universities have mathematics faculties approaching one hundred members, and since over 8 percent of last year's Ph. D.'s in mathematics went to women, it is not unrealistic to set hiring goals of one or two women for such departments.

There are several difficulties which I have seen when recruitment for top positions occurs in a math department. Frequently, the department, after determining the special field it needs or wants, pre-selects an individual within that area whom the department hopes to attract. Then the department specifies the exact specialty as the job description, so that not only are there no qualified women, but there may be at most one or two other qualified men. But faculties, no matter how liberal on other issues, tend to be extremely conservative when it comes to changing internal personnel practices. For example, a personal qualification which universities rarely consider important is the sensitivity and ability of the faculty member to help all students realize their potential.

At least one reason why there might be few so-called "qualified" women available for top positions is that women have been discriminated against as students in the admission policies of some of our most prestigious institutions. In addition, women have been awarded far fewer scholarships or fellowships, and some scholarships, such as the Fullbright, treated men and women on an unequal basis, even when an award was given. For example, for a long time a woman's spouse was not treated as a dependent for the purposes of additional funds as was a man's wife under the Fullbright program. Studies have also established that women have received fewer loans and in lower amounts for educational purposes. It is obvious that HEW has yet to recognize a woman's right to compete for prestigious fellowships since it has exempted the Rhodes Fellowship from Title IX coverage.

Women have sometimes dropped out at various stages of their careers. This is due to a variety of reasons, including lack of encouragement as well as overt discrimination. "Best qualified" is, of course, a subjective term—and it is sometimes used to justify a faculty's desire to reproduce itself or to applaud its own particular credentials. Women rarely fit into this network if it is dominated by men.

One hears talk of the massive hiring of women and the "reverse discrimination" against white men. Nevertheless, the unemployment rate for women with Ph.D.'s in mathematics continues to be almost double that for men, and there is no evidence that it is much different in other fields.

The Universities appear to be committed to *pro forma* affirmative action efforts. In fact, in some cases universities have hired the first woman to appear without any effort to find out whether she was the best qualified available woman, much less the best qualified candidate for the job. I have been told of situations where the lesser qualified of two women has been deliberately chosen so that she can be held up as [illegible] example of the failure of affirmative action to produce qualified faculty.

Some universities have invited women for interviews for jobs already offered to men simply in order to make their statistics look good. It is cruel to ask women to spend their time running around the country on *pro forma* interviews when they have already spent days sending out 300 to 400 job applications. It is cruel to question women about their marital status and present or future child care plans even if there is a possibility of their being offered the job, much less when the interview is only for the purpose of showing "good faith" effort. Such questions provide for "no win" answers. If the woman is married, the interviewer assumes her job is wrapped up with that of her husband. If she is not married, the interviewer wonders why not or assumes she will quit when she does marry. If she has children, the interviewer wonders how they will be cared for. If she has no children, the interviewer wonders when she will become pregnant. If she refuses to answer such questions, she is marked as a "women's libber" and a potential troublemaker.

Other universities have submitted as evidence of their affirmative action efforts, lists of women qualified for the position with the notation "won't move" after the names of women who have never even been contacted about the job. There is no evidence of the flooding of the few qualified senior women in mathematics with job offers and from my less extensive knowledge of other fields, I see very little of this elsewhere. Some women have reported receiving several offers only after it was known that they had accepted a position.

Moreover, at least in mathematics, there is no evidence of inflated salaries for women brought on by overcompetition for a few qualified candidates.

Let me describe situations at two institutions about which I am personally familiar. In the mathematics department of a large midwestern state university, there are no tenured women faculty. One of the two untenured women was notified last fall that she would receive a terminal contract for 1974–1975, and she began to search for a new position. This was, I should mention, after a two-year fight to overcome the institution's anti-nepotism rule and to be put on the tenure track so that she could even be considered for tenure and would at least be eligible for retirement and other fringe benefits as to which she had been excluded in her earlier career. She sent out several hundred applications for teaching and administrative posts for which she was well-qualified. In several interviews she was told she was too old; in others she was asked questions about children, husband's employment status, and family obligations. On several trips for interviews for mathematics teaching positions, she was not introduced to members of the mathematics faculty nor asked to give a talk on her work. On interviews for administrative posts, she was not given a chance to talk with those personnel who would obviously have an input into the hiring decision. Her references were not contacted. One school has even balked at reimbursing her for the travel expenses they originally agreed to pay. At the moment she is teaching where she was last year, on a terminal contract and still job-hunting.

In the same midwestern town there is a black woman with a Ph.D. in mathematics who, after years of trying to get a job appropriate to her qualifications, has taken a job as a programmer with a state agency. In spite of her degree from one of the very top mathematics departments in the country, she was never seriously considered for any of the many openings at the university in the town where she lives.

Recent women Ph.D. graduates of that same university's mathematics department have fared no better than the two women I have described above. One woman graduate has gone back to her native country after two years of fruitless job searching plus extensive additional study in applied areas of mathematical sciences. Another was given a temporary job at her *alma mater* and the position was renewed for a second year. Now she too is a programmer for the same government agency referred to earlier.

But at least these women have jobs. I know of many women Ph.D.'s in mathematics, some with substantial publication records, who are unable to get any employment except perhaps an occasional part-time teaching job which pays as low as $450 per semester course. At the six-hour teaching load of major universities, this would be a full-time salary of $1800 per year—*if* the women were lucky enough to get four courses to teach.

Now let us look at the institution on the West coast which granted a Ph.D. to the black woman described earlier. That institution has one of the top math departments in the country but has no tenured women faculty. They have one woman on the tenure track but she has been on leave for several years. The more cynical assert that that is why the appointment was made. There are two "faculty wives" who have occasionally taught courses, both distinguished mathematicians. One in fact has solved one of the major outstanding math problems of the century.[1] This department has recently hired a number of women in temporary lecturer positions. For the 1974–75 year the department had two tenure-track assistant professorships to fill. In January the positions were offered by the department to two men, but the dean refused to approve, citing lack of affirmative action effort. The mathematics department then sent out hundreds of letters asking for names of eligible women and minority group members. Letters inviting them to apply were then sent to those whose names were gathered or recommended. As a result 28 applications were received. All of these, together with those of the two men who had been offered the job originally, were reviewed by a committee in a brief meeting. The original offers were reconfirmed.

Many of those in the department who were involved in the futile exercise now admit that it was a *pro forma* affirmative action effort. However, lots of hopes were raised, lots of time was spent in good faith by those applying and those writing recommendations. This is not all. An eminently qualified woman who had earlier been a lecturer at the institution and was a research associate at the time of the "search" was not invited to apply. However, when it was pointed out to the committee that she should be considered (in fact they were erroneously told she had been invited to apply), she was rejected on the basis of a file several years old. No attempt had been made to update her records or to verify her so-called "application."

---

[1] Known as, Hilbert's Tenth Problem.

I could continue to describe other phony "affirmative actions" efforts, other fruitless searches for employment. I could tell you of women turned down for promotion because they "didn't need the money"—because their husbands could support them; of a man told he could not be hired because the university administration demanded that a woman or black be hired. In fact the position had disappeared for completely different reasons. I could describe the incident of a search committee's rejecting a woman because they felt she was not tall enough to command the respect necessary to be dean; or the case of a department chairman taking away a teaching assistantship from a pregnant woman and giving it to a male graduate student who "needed the money" because his wife was expecting a child.

Agency enforcement of Title VII, Title IX, the Executive Order, and the Equal Pay Act will not eliminate all discrimination in higher education, but vigorous, intelligent enforcement will mean a better chance for equal opportunity for all.

Getting a first appointment at a good school may be crucial in getting papers published and in obtaining other forms of recognition. It is well known that the peer group review and referee systems are neither sex- nor institution-blind. Some progress has been made. Junior appointments at the major universities have been opened up so that at least a few more women will have the opportunity to do research in a stimulating atmosphere. This should mean that in a few years' time there will be an adequate supply of woman qualified for senior positions. However, even these advances have been made only under the threat of contract withdrawals. Universities cannot be left to their own devices.

What is desperately needed in affirmative action efforts is less attention to statistical computations and more attention to proper procedures for carrying out the sound principles of nondiscrimination. We need real commitment to expand opportunities for women and minority group members, and it is the responsibility of the Federal government to instill such commitment in universities as well as in other contractors.

This can be accomplished in several ways. First of all, intensive efforts are needed to increase the supply of qualified applicants. More women must be encouraged to study those subjects which have been traditionally male-dominated and must be given various kinds of support, both financial and moral, throughout their education and early careers. I have explained about how hiring can play a role in this. There must also be a shift in attitudes on the part of faculty and university administrators, and attention must be given to policies on leaves, antinepotism rules and other related areas where an institution's policies have been changed to reflect the requirements of federal laws and regulations.

Secondly, while faculty in general bear most of the responsibility for hiring, administrators do play a role, particularly in setting the tone. There has been practically no successful affirmative action effort in filling administrative posts, with the exception of specially created positions to deal with affirmative action itself. No major university has a woman president, very few have women vice presidents or provosts, and women deans still are for the most part found only in schools of nursing or home economics. There are few women department chairmen. Indeed, only one of the more than 100 math departments in the country with Ph. D. programs has a woman chairman.

It is often alleged that women lack administrative experience—but prior administrative experience is certainly not required of department chairmen and, in fact, many men who are hired as deans are hired on their promise, not on their experience. HEW should require university administrations in their affirmative action programs to look to themselves as well as to the filling of faculty posts.

The open listing of positions has helped both men and women job seekers. This practice should be encouraged and extended, with attention given to the proper sources within disciplines for advertising rather than encouraging a scatter-gun approach of sending notices to all women's groups whether or not they would have any contact with women qualified to fill the openings.

Finally, since there is a great deal of misinformation about the effects of affirmative action and no systematic study has been made, we would suggest that before any changes in the requirements are made, a review be undertaken by a commission with representatives of the various agencies, universities, of faculty organizations and various advocacy groups. Congressional funding of programs developed under the newly enacted Women's Educational Equity Act (H.R. 208) would be one way of implementing some of these suggestions. We look forward to support in this regard.

Respectfully submitted.

MARY GRAY,
Chairperson,
Committee W on the Status of Women in the Academic Profession.

Mr. DELLENBACK. And then in whatever order you care to present your statements, you can comment on or excerpt from or give us the benefit of what you would have to state.

Ms. POLOWY. Thank you.

I am Carolyn Polowy, and I am associate counsel and associate secretary for the American Association of University Professors and I am here today with Dr. Mary Gray, who is chairperson of the association's Committee W, on the status of women in the academic profession. Dr. Gray is also a professor of mathematics and statistics at American University here in Washington.

I would just like to briefly summarize what the association's position has been on affirmative action and the question of equal opportunities for all persons in higher education institutions.

As you probably know, from its inception, the association has been very concerned that an atmosphere of academic freedom be maintained in our higher education institutions and the association has recognized that it is impossible to have an atmosphere of academic freedom where human values are not espoused and where all persons aren't given an opportunity to participate in higher education.

To this end, the association has been very active in formulating models and standards, suggested standards, for higher education institutions, concerning aspects of academic freedom, academic tenure, and shared governance. These policy statements, many of which are attached as appendixes to my prepared statement, have had quite an impact on the establishment of procedures and regulations in our colleges and universities.

Some of the specific concerns about affirmative action came to the association's attention through the work of Committee W, our committee on women's issues, and that committee, which was reactivated in 1970, has done some very specific things to investigate policies in higher education institutions which militate against the advancement of women.

One statement that has been issued by Committee W and adopted by the association speaks to the problem of antinepotism regulations and has been incorporated in the operating procedures of many institutions.

The committee's statement on faculty appointments and family relationships recommended the discontinuance of antinepotism procedures or regulations, as they may exist, because the association concluded they had acted primarily to limit the opportunities of women in higher education institutions, although they may have been framed in neutral language.

The association also has adopted Committee W's recommended statement on leave of absence for child-bearing and family emergencies. This statement incorporated two policies. First of all, that all persons who are professors or research scholars in higher education institutions, have a right to fulfill their family obligations while fulfilling their professional obligations and that an institution should establish policies which permit these people, both men and women, to carry out their family obligations.

In terms of the particular difficulties of women, the statement supported fair maternity leave policies which are in agreement with title VII regulations and which provide for the types of benefits and the same duration as would be available under other types of leaves.

The association established in 1971 a committee to study discrimination issues and the committee took a special look at affirmative action.

In 1971, the executive orders were being enforced, well, beginning to be enforced, against higher education institutions and there was a great deal of concern in the Association about fair enforcement to improve the opportunities of women and minorities.

The association, at its annual meeting, suggested strong support for the efforts of HEW in the enforcement of affirmative action commitments and the Committee on Discrimination made several specific recommendations as to how an institution could carry out equal opportunity and affirmative action policies. Some of these recommendations included publicizing faculty vacancies. I am sure you have heard discussions about the problem that staff positions are often advertised more by word of mouth than through a system that permits wide exposure.

Another recommendation was for the establishment of a faculty committee to study, or make a systematic study of institutional policies to determine if any of those policies were working against the advancement of women and minorities.

Third, the committee recommended establishment of appropriate institutional grievance mechanisms to handle discrimination complaints, and I think the testimony of Mr. Rios established or shows the need for such grievance procedures.

The Committee on Discrimination also addressed itself to the issue of utilizing affirmative action to remedy past discrimination. At the outset, the committee expressed a desire that affirmative action, or the pressure for affirmative action begin within an institution and that faculty members in fact, initiate procedures for review of institutional standards. It would not be a situation of responding to outside forces if the institution began by policing itself.

Specifically, the committee recommended that all institutional standards be reviewed to establish whether there was discriminatory impact and that the notions of affirmative action be incorporated into hiring policies, retention policies, and promotion policies in higher education.

I think another aspect of the committee's report that was important was that the committee recognized if there was going to be a continuation of the shared governance system which the association had promoted for so long, that individual faculty members would have to be educated to their responsibilities; that is, if peer review is to work in a nondiscriminatory fashion, all of those involved in the review must understand the principle of equal opportunity.

In 1973, the Council on Discrimination reiterated these concepts and again gave its support to the implementation of affirmative action in higher education.

To summarize, I would just like to quote two paragraphs from that 1973 statement which I think express the association's position.

> The committee believes that the further improvement of quality in higher education and the elimination of discrimination due to race or sex are not at odds with each other, but at one. What is sought in the idea of affirmative action is essentially the revision of standards and practices to assure that institutions are in fact drawing from the largest marketplace of human resources in staffing their faculties, and a critical review of appointment and advancement criteria to insure that they do not inadvertently foreclose consideration of the best qualified persons by untested presuppositions which operate to exclude women and minorities.

Specifically, the report recommended the institution of standards in each institution that would incorporate the affirmative action concept.

The committee also pointed out there was more reaction to affirmative action rather than careful analysis of the purpose of affirmative action. I think that it would be inconsistent if higher education asked for a special exception from the policies and goals of the executive orders affirmative action requirement considering the role of higher education in our society to educate leaders and good citizens as well as scholars. I think that the association has given its full support to these principles and goals, although we recognize that there have been problems in enforcement and in carrying out the requirements in specific institutions.

There has been a lot of discussion about whether affirmative action is having either a financial impact on higher education institutions or whether there is a decrease in quality and I think there are more rumors than facts substantiating these assertions and I think Dr. Gray is equipped as a professor and also as chairperson of the Committee W, to discuss some of the myths and realities that are being discussed in regard to affirmative action.

Ms. GRAY. The critics of affirmative action would have you believe that the Federal agencies—in particular the Department of Health, Education, and Welfare—have massively invaded the Nation's university campuses and arbitrarily and unwisely forced the hiring of hundreds of underqualified women and minority group members.

None of these allegations has been supported by evidence. Indeed, if there has been some interference in traditional hiring policies, it is precisely because these policies had led to the almost total exclusion of women and minorities from the faculties of our major universities.

There has been some improvement lately, at least in the hiring of women at the untenured level. We would be the last to contend that there is an oversupply of women for all possible jobs. There is a scarcity of women for some of the tenured positions in the major universities in the country, but the reason for this scarcity is that the universities in the past have not lived up to their responsibilities in providing equal opportunities for all persons.

We think they need to accept this responsibility. We think they need to do a great deal more than they have done in hiring and admissions to graduate schools and in all sorts of policies to increase the supply and to do something for the already existing supply.

What we need is not the exclusion of universities from the requirements of revised order No. 4 or other regulations, but a more intelligent and informed enforcement by HEW and a more intelligent and informed commitment to equal opportunity in affirmative action on the part of the Nation's universities and colleges.

I want to give you an example which has become sort of enshrined in the discussions of affirmative action and it has been repeated so often that people are inclined to believe it. It seems that the chairman of the mathematics department in a major university once stated that there are only one or two women qualified for tenure appointment in the top dozen mathematics departments in the country. That is simply not true.

In the first place, there are more women than that already in the mathematics departments in the top dozen institutions.

Second, there are dozens of women in untenured positions, some of whom are eligible to be moved up.

Third, and most important, there are plenty of women in the group of universities that are immediately below, in some sense, the top dozen universities. The reason there is a heavier concentration of women there is because in the past it has been very, very difficult for women to get appointments in the most prestigious universities.

In other countries there are similar problems, but if you look, for example, at the University of Paris, you will find there are four or five women who are full professors in the mathematics department, which is certainly not the case in the top universities in this country.

The math departments in most universities are very large; 8 percent of Ph. D's in mathematics go to women, so there is no excuse for not having women in most math departments.

Another thing that is frequently claimed is that the faculty itself can judge who the best qualified people are for a given position. The problem of "best qualified" is at best a very subjective term and "best qualified" frequently means the existing faculties want to reproduce themselves and reproduce themselves in white males. They frequently do not take into account such things as whether the faculty members do, in fact, have the sensitivity necessary to promote needs of all students.

One reason why the pool of women applicants for jobs has been so small is that women drop out along the way. One reason that women drop out is because they don't have faculty members to encourage them or once they obtain a first position their senior colleagues don't encourage them and their senior colleagues are usually all men. We need women in positions all the way along to encourage women, to keep them from dropping out.

We cannot find any evidence of a massive reverse discrimination which many people allege exists. The unemployment rate for women with Ph. D's in mathematics still is twice that for men. When I say "unemployment rate," I mean the rate among women actually looking for jobs.

If there has been abuse of affirmative action efforts, it is mostly along the lines of conducting phony searches. Nationwide searches are announced and there is a great deal of fanfare and there is no intention whatever of hiring qualified women.

Sometimes universities will simply hire the first woman who comes along without worrying about finding somebody who is qualified, on the ground they can get rid of her very easily. Universities will invite women for pro forma interviews so they can stack their statistics and show how many women they interviewed for a job. In the interviews they ask questions like whether they are married and if she is married, the interviewer can assume the woman's job is wrapped up with that of her husband. If they are not married, the interviewer wonders why she is not married and assumes she will quit when she does marry, so she doesn't get the job.

They ask if she has children and if she has children the interviewer worries about how they are cared for and if she does not have children, when she is going to become pregnant.

Of course, the women refuse to answer the questions and then the interviewers mark her as a women's libber and potential troublemaker and she won't be hired either.

Let me describe situations at two institutions about which I am personally familiar. In the mathematics department of a large midwestern State university, there are no tenured women faculty. One of the two untenured women was notified last fall that she would receive a terminal contract for 1974–75, and she began to search for a new position. This was, I should mention, after a 2-year fight to overcome the institution's antinepotism rule and to be put on the tenure track so that she could even be considered for tenure and would at least be eligible for retirement and other fringe benefits, from which she had been excluded in her earlier career.

She sent out several hundred applications for teaching and administrative posts for which she was well qualified. In several interviews she was told she was too old; in others she was asked questions about children, husband's employment status, and family obligations. On several trips for interviews for mathematics teaching positions, she was not introduced to members of the mathematics faculty nor asked to give a talk on her work.

On interviews for administrative posts, she was not given a chance to talk with those personnel who would obviously have an input into the hiring decision. Her references were not contacted. One school has even balked at reimbursing her for the travel expenses they originally agreed to pay.

At the moment, she is teaching where she was last year, on a terminal contract and still job hunting.

In the same midwestern town there is a black woman with a Ph. D. in mathematics who, after years of trying to get a job appropriate to her qualifications, has taken a job as a programer with a State agency. In spite of her degree from one of the very top mathematics departments in the country, she was never seriously considered for any of the many openings at the university in the town where she lives.

Recent women Ph. D. graduates of that same university's mathematics department have fared no better than the two women I have described above. One woman graduate has gone back to her native country after 2 years of fruitless job searching plus extensive additional study in applied areas of mathematical sciences. Another was given a temporary job at her alma mater and the position was renewed for a second year. Now she, too, is a programer for the same Government agency referred to earlier.

But at least these women have jobs. I know of many women Ph. D.'s in mathematics, some with substantial publication records, who are unable to get any employment except perhaps an occasional part-time teaching job which pays as low as $450 per semester course. At the 6-hour teaching load of major universities, this would be a full-time salary of $1,800 per year--if the woman were lucky enough to get four courses to teach.

Now let us look at the institution on the west coast which granted a Ph. D. to the black woman described earlier. That institution has one of the top math departments in the country but has no tenured women faculty. They have one woman on the tenure track but she has been on leave for several years. The more cynical assert that that is why the appointment was made. There are two "faculty wives" who have occasionally taught courses, both distinguished mathematicians. One, in fact, has solved one of the major outstanding math problems of the century. This department has recently hired a number of women in temporary lecturer positions.

For the 1974–75 year the department had two tenure-track assistant professorships to fill. In January the positions were offered by the department to two men, but the dean refused to approve, citing lack of affirmative action effort. The mathematics department then sent out hundreds of letters asking for names of eligible women and minority group members. Letters inviting them to apply were then sent to those whose names were gathered or recommended. As a result, 28 applications were received. All of these, together with those of the two men who had been offered the job originally, were reviewed by a committee in a brief meeting. The original offers were reconfirmed.

Many of those in the department who were involved in the futile exercise now admit that it was a pro forma affirmative action effort. However, lots of hopes were raised, lots of time was spent in good faith by those applying and those writing recommendations. This is not all. An eminently qualified woman who had earlier been a lecturer at the institution and was a research associate at the time of the "search" was not invited to apply. However, when it was pointed out to the committee that she should be considered—in fact they were erroneously told she had been invited to apply—she was rejected on the basis of a file several years old. No attempt had been made to update her records or to verify her so-called application.

I could continue to describe other phony "affirmative actions" efforts, other fruitless searches for employment. I could tell you of women turned down for promotion because they "didn't need the money"—because their husbands could support them; of a man told he could not be hired because the university administration demanded that a woman or a black be hired. In fact, the position had disappeared for completely different reasons. I could describe the incident of a search committee's rejecting a woman because they felt she was not tall enough to command the respect necessary to be dean; or the case of a department chairman taking away a teaching assistantship from a pregnant woman and giving it to a male graduate student who "needed the money" because his wife was expecting a child.

Agency enforcement of title VII, title IX, the Executive order, and the Equal Pay Act will not eliminate all discrimination in higher education, but vigorous, intelligent enforcement will mean a better chance for equal opportunity for all.

What is desperately needed in affirmative action efforts is less attention to statistical computations and more attention to proper procedures for carrying out the sound principles of nodiscrimination. We need real commitment to expand opportunities for women and minority group members, and it is the responsibility of the Federal Government to instill such commitment in universities as well as in other contractors.

What little progress that has been made has only been made under severe threats. To withdraw those threats means there will be even less progress.

Thank you.

Mr. **Dellenback.** Thank you very much.

I have a couple of questions. I notice on page 8 of your testimony, Dr. Gray, talking in terms of affirmative action, you say:

> What is desperately needed in affirmative action efforts is less attention to statistical computations and more attention to proper procedures for carrying out the sound principles of nondiscrimination.

Then you helpfully proceed to outline several moves in the direction of those approved procedures.

This leads me to one of the sticky issues that some of our higher education witnesses have been testifying on, and I want to be sure I understand what it is you are saying to us in this regard. It is also tied into your testimony, Ms. Polowy.

You are talking about the most important issue in affirmative action insofar as initial hiring is concerned. It seems to me that a deliberate attempt to impose a statistical measure, a quantitative measure, a quota or a goal—call it whatever you like—to that input, is at loggerheads with trying to also insure that the group is really selected on a nondiscriminatory basis.

I am talking about the input group, you see, as a point of emphasis, rather than the mass to which the increment is being added.

Ms. **Gray.** Certainly, we would think the most important thing is that all of those people who are available for the job and qualified for it, first of all, know of the job, which in the past has just not happened.

Mr. **Dellenback.** We have numerous references to the "old boy" rule, or whatever you call it, where there is a word of mouth solicitation—male faculty members going to their friends and saying things like, "Do you know any men who are well-qualified for a position."

Ms. **Gray.** Once the people all know of a job and can apply, we feel that serious consideration needs to be given to the application. Now, in making a judgment, once you have announced a job widely and once you looked at the applications, the decision as to which person will be hired is, of course, a very difficult one.

As much as we would like to, we don't feel that six or eight things can be written down and you say that "these are the things which we must decide." You can't say that five publications are needed without saying what caliber the publications should be. That just can't be written down on paper. You can't say you need a person who is a skilled teacher and write down what makes a skilled teacher. You can't say that when you need someone who is sensitive to the special problems that women have and the special problems that minorities have and write down on paper what that sensitivity consists of.

So, you do need selective judgments in the hiring. But, what we ask in the selective judgment is that some things be considered that have not been considered in the past and in particular, less attention to this notion of reproducing one's own self-image.

We think with that sort of fair hiring practice the number of women at university faculties will increase, but we don't think that university faculties can be trusted to do it on their own because they have not in the past.

Ms. Polowy. I think you are asking us for two things, one concerns goals and timetables in general, and whether these are realistic in higher education.

Mr. Dellenback. That is correct.

Ms. Polowy. Well, if nothing else; establishing affirmative action plans with goals and timetables requires an institution to examine its hiring procedures at the outset, to see if it is in fact only going to certain schools for appointments, to see if it is only considering people within certain age groups. What happens is it filters down because each department has to participate in the process.

This process is, in a sense, a self-analysis. Many institutions go through this process for other purposes when they are changing policies or making dramatic changes. There will be a self-study of some type and that seems to me to be what an affirmative action plan is, in many respects.

If an institution has a representative body within its present faculty, then its goals and timetables will continue. I mean it will continue doing what it has done. It does not have to change any of its policies.

But, if it has, in fact, used discriminatory methods, it will have to eliminate those so that it does get to a larger group of people. At the same time, the people already in the institution should be seriously considered for promotion and tenure.

Mr. Dellenback. In those areas where a group that is already part of the faculty has had procedures which have not been equal in the past, one can change salary practices, one can change promotion practices, and one can change tenure practices and apply it immediately to the full mass of those already on the faculty. The greater difficulty, and we have gotten contrary testimony regarding this point, deals with the following issue: Let's assume we have a faculty mass of 100 people, and let's also assume that the turnover is about a 20-year turnover so that on the average, there will be five additions each year.

Let's assume initially that there are no women or minorities whatsoever in the 100. In looking at it we say, "This is a result of improper practices; it is inequitable. There is clear evidence of discrimination in this particular situation and we should be doing something affirmatively to bring about a change."

Is it sufficient to say to the university involved, "Next year's increment must have objective criteria about nondiscriminatory practices, and it will range from the initial search to the checking out of references, to the evaluation, and the final selection process; you must do this so that those five coming on next year will clearly be chosen with no discrimination whatsoever?"

Ms. **Gray**. No.

Mr. **Dellenback**. Is it necessary to go further than that and say, "Because of the mass already showing evidence of discrimination, it is necessary to set some sort of measure on that increment to be added so that maybe two or three or four or five will be women; you need to do this in order to accelerate the process of bringing about equality and nondiscrimination within the mass?"

Ms. **Gray**. I would think it is necessary to set some sort of goals depending upon what sort of situation you have.

Mr. **Dellenback**. For the mass or for the increments?

Ms. **Gray**. For both. I think you would find very few people who are willing to admit that they discriminate and therefore it is very difficult for them to believe that what they have done in the past has been discriminatory. Their belief is just that it turned out that way so if you say to them, "Don't discriminate in the future," they will continue to behave as in the past with possibly a few minor adjustments in their policies. If, on the other hand, you say to them, "In spite of your alleged good faith in the past you have not made any progress and we feel that some sort of additional motivation is required, and consequently, we will set up a goal," then at that time you will get some action and people will do something.

If you simply say, "Don't discriminate," that will not be enough.

Mr. **Dellenback**. Perhaps I phrased the question wrong because you are still not speaking to the issue. I am striving to get something in the record. I don't think I am just giving lip service to the change of policy.

Let's assume you say in this hypothetical situation I have drawn out, "Not only does the evidence of the mass show that you have discriminated—because it would just not happen that way if there were not discrimination—but we can look at the practices you have followed, and we can show with specificity there has been discrimination. You have not searched long enough; you have not advertised, evaluated, or made final selections fairly."

Is it enough to really apply nondiscrimination principles to the group that is to be added such that we are dead certain in the evaluation of those five who will be added this year there is absolutely no discrimination. We will put teeth into it, and be sure that is the way it is.

Or, in addition, must we also say, "You must, with x years bring about some rectification of the imbalance within the mass. Consequently, whatever must be done with the increments over the next 5 years, you must at the end of 5 years reach such and such a goal, or we will set such and such a goal for the mass."

Do you see the point of distinction?

Ms. **Gray**. Yes.

Mr. **Dellenback**. What troubles me is that you can't do both. You have to discriminate in some fashion with the increment in order to accelerate the resultant nondiscrimination of the mass.

Ms. **Gray**. I would not feel they are incompatible. I figure you cannot discriminate in the increments and still on the large scale not discriminate.

The reason I would hold that is that because in particular these are new hires at the assistant professor level. The fine distinction that one alleges one can make are just simply difficult to make. You can get a pool of 20 people, say, who are all qualified for this job and while someone may be able to make some subjective judgments that one is the best qualified, it is not all that realistic.

So, you can find plenty of qualified people. If, and among this plenty of qualified people you add in, you need more diversity in your faculty to serve other purposes, for example, in mathematics you frequently say of five hires we have to have one in analytical number theory, but nothing says this is called discrimination against algebraic number theorists or what have you; in other words you are serving a particular purpose in the department.

It seems to me the same thing can be done in setting hiring goals for women and minorities. You are serving a particular purpose within the department to get some diversity and people who are sensitive to all needs of students. In other words, you serve a particular purpose.

Mr. **Dellenback**. In other words, you believe it is in accordance with the law, and not violative of the concept of nondiscrimination, to write into the selection process the specific selection of women?

Ms. **Gray**. That is correct.

Mr. **Dellenback**. Deliberately or inadvertently, and you don't think it is discrimination?

Ms. **Gray**. As I say, I don't think it is any more discrimination than opting for one field of mathematics over another field of mathematics.

Mr. **Dellenback**. Do you agree with that?

Ms. **Polowy**. I would like to spend some time, not right now, but if I might, to submit some additional information. I think what we are really talking about here is what a court would require versus what the agency can require.

Mr. **Dellenback**. We are not worried, frankly, about what the court would require. We are concerned, however, about what the Congress has to establish as to policy in this area as that is our task. I am very much concerned about what kind of legislative amendment we should or should not propose in the light of part of this discussion that we are having this morning.

Ms. **Polowy**. But it would seem that it is relevant to look at what courts have required in terms of affirmative action when there has been a pattern of practice of discrimination.

Mr. **Dellenback**. I must again make the point of distinction. As a lawyer, one of the fascinating changes that takes place is that when you are first a law student and then a practicing lawyer and then a lawmaker, one shifts one's points of perspective.

As a practicing lawyer, my concern is: What is the law? I am very much concerned about what the courts are doing and very much concerned about how they interpret, or are about to interpret, something. When I became a lawmaker, my emphasis shifts to: What should the law be? At this point, I am very much concerned about writing the law as precisely as I can to bring about the result that ought to be brought about.

Ms. **Polowy**. I would think that an informed legislator would look at the policy behind the courts' particular reasoning.

Mr. **Dellenback.** Behind the policy?

Ms. **Polowy.** Yes, and I would say that I would, if I might, add some information about what has been the position of the courts in terms of supporting the implementation of actual goals and numbers.

Mr. **Dellenback.** At the moment, I am interested in what you think as a representative of a group that has real concern about this field——

Ms. **Polowy.** Yes.

Mr. **Dellenback** [continuing]. And real knowledge and capacity.

Ms. **Polowy.** Yes. The association has recognized, in the process of righting past discrimination, there would have to be an emphasis in some respects on the hiring of women and minorities.

Mr. **Dellenback.** Do you think it can be done without discrimination in selection within the increment? Would it not be discrimination if one were to say you are going to select one person this year, and that one person must be a woman?

Ms. **Polowy.** Well, what do you define as "discrimination"?

Mr. **Dellenback.** The concept that is embodied in the law where we say there should be no discrimination on the grounds of race, creed, color, sex, or national origin—or some such language. We use it differently in different statutes. Do you think there would be no discrimination?

Part of the concept of affirmative action is to eliminate discrimination. Now, do you think it would help eliminate discrimination—Dr. Gray apparently thinks it would—to write in a specific criterion wherein you say you can take into account sex in making selection?

I must confess I have difficulty with that as a legislator. The statutes are replete with language of: There shall be no undue emphasis, no consideration given to this particular qualification of sex. We have been trying to say: In evaluating relative merit for a position, those who are doing the evaluation cannot consider legally race, creed, color, sex, or something else.

Now, to turn right around and say, "We will now insist that you consider sex; you have a right and obligation to take the sex variable into account." This gives me trouble, you see, in the light of what we have been striving to do in eliminating discrimination.

Now, I may read Dr. Gray wrong, but I thought she expressly said this is a proper criterion just as in your analogy you used different fields of specialty in mathematics as a proper criterion for selection. Is that correct?

Ms. **Gray.** That is correct. What I said was: I thought you can consider what was serving the needs of the institution and, in this case, that might require that you give special consideration to hiring more women.

Mr. **Dellenback.** And it would also be possible and proper in the reverse situation, if the decisionmakers felt that the institution was better served by having a male president, to insist that it be a male even though there be an equally well-qualified, or maybe even academically superior, female.

Ms. **Gray.** What we are talking about is remedying effects of past discrimination and we are not talking about general policies as to what people think is best and what people think is not best, because for years people have thought it was best for the institutions not to hire women and what we are trying to do is write some sort, or enforce some sort of guidelines which are going to overcome the effect of this past policy, which we believe to be incorrect?

Mr. **DELLENBACK.** And in so doing to discriminate?

Ms. **GRAY.** And, in so doing, give consideration to other things that were not considered until the imbalance has been righted.

Mr. **DELLENBACK.** Including sex?

Ms. **GRAY.** Including sex.

Mr. **DELLENBACK.** In spite of the language of the statute that says, "There should be no discrimination on account of sex"?

Ms. **GRAY.** But I thought your concern was whether the language should be changed, but not what the existing character was.

Mr. **DELLENBACK.** You would have us write that language differently than traditionally, and change the phrase which is in statute after statute which says, "There should be no discrimination on the grounds of sex", and you would have us recoup it into a situation where you say, "It is proper to consider sex as a point of discrimination and a point of differentiation in selection of positions where the mass to which you are applying this has given evidence of past discrimination in the other direction," or words to that effect?

Ms. **GRAY.** Yes, I would want it very carefully qualified that you are giving consideration to this in view of the effects of past discrimination, which I would therefore view it then as only a temporary procedure.

Mr. **DELLENBACK.** OK.

Ms. Polowy, I would like to go on with it, but is there a comment of agreement or disagreement you have made on behalf of yourself?

Ms. **POLOWY.** I think it is difficult to define in a completely clear way the line between "reverse discrimination" and what it means, and changing a pattern or practice of discrimination.

I do agree with you that there are certain social policies which should be considered which a legislator might look at differently than a court, but I think we have, in the past, determined that "separate but equal," for example, was not really equal and we took certain action as a result of that.

Mr. **DELLENBACK.** On the grounds of the objective being equality?

Ms. **POLOWY.** And then righted that which we recognized as unequal.

Mr. **DELLENBACK.** But you are not talking about overemphasis to bring this about, you just say "separate but equal."

Ms. **POLOWY.** But to some people that principle interferes with their right and forms a kind of reverse discrimination.

Mr. **DELLENBACK.** That is part of the busing controversy—there has been a new thrust to say this must be equal. Anyway, I think we understand each other. However, I am not sure where you stand on the particular issue of our discussion; you just indicated it is difficult.

Dr. Gray, your answer to it has been helpful to me. I am not sure I am persuaded by it, but I am not sure that unless this is done, we can accelerate the absence of discrimination in the mass.

Ms. **GRAY.** My concern is what we do in our hiring practices now is what will determine what is going to happen in 10 or 15 years, and if we do not at the moment hire more women on university faculties there will not be more students continue and not more women graduate students and the situation will not be righted and that is so important that universities adhere to this policy.

Mr. DELLENBACK. You have both given us very helpful testimony this morning, and I want to express my appreciation. Let there be no misunderstanding of what I strive to say: I am strongly in favor of eliminating discrimination against women in the academic community as I am also strongly in favor of eliminating discrimination against minorities or against other people who have been discriminated against in the academic community. I think there are clear examples where discrimination has been practiced.

I state also on behalf of the chairman of the subcommittee and myself, having sat through most of these hearings together, we agree that we are desirous of seeing that the laws are so written that they will eliminate discrimination. We are just troubled by some aspects of how to accomplish this. That is one of the things we have been discussing back and forth a little bit in the last few minutes.

Now, I thank you both very much for coming. It has been very helpful testimony and we are very grateful.

Mr. DELLENBACK. The next witness is Dr. Martin Goldman, Reston, Va.

Mr. Goldman, we appreciate your being with us this morning. Without objection, your full statement will be made part of the record and I leave to you the best way to present your comments so as to most profitably use the limited time we have available.

STATEMENT OF MARTIN GOLDMAN, RESTON, VA.

Mr. GOLDMAN. My testimony, I think, is indicative of a nationwide policy of reverse discrimination in institutions of higher learning. The policies have been implemented to supposedly redress racial and/or sexual balance in these institutions at the direction of the Department of Health, Education, and Welfare under so-called affirmative action guidelines.

Between April 1971, the date I successfully passed my Ph. D. preliminary oral examination at Clark University—Worcester, Mass., and July 1973, I applied to approximately 150 to 200 colleges, universities, and private schools in an effort to secure academic employment. As a result of advertisements placed in academic journals, educational periodicals, magazines, and newspapers—most notably the New York Times—I knew of openings in the fields I had studied while in graduate school—the broad field of American history and the specialized fields of Afro-American and urban history. In that period of time I also attended two meetings of the American Historical Association in New York City and Boston and two meetings of the Organization of American Historians in Washington, D.C. and Chicago. At these meetings I received a number of interviews with department chairmen who had advertised teaching positions in my special fields. Most of the time, however, when it was discovered that I was white, I received no response to my applications.

The following summary represents the kinds of experiences I had in what became a futile 2-year search for employment in a discipline that I had devoted the better part of 10 years of study and teaching to master. It should be noted that these documented cases only represent the tip of the iceberg in that the circumstances were clearly pointed out as to why my candidacy would not be advanced for the positions in question.

In the vast majority of cases the individuals were far more subtle in the ways they chose to deal with my application for employment. Thus, the following cases are those where the individuals involved provided me with documentation. This documentation can be made available upon request.

Vanderbilt University advertised an opening in Afro-American history at the American Historical Association's annual meeting in New York in December 1971. Under the signature of Department Chairman Dewey Grantham, the notice stated, "Because the department believes that the responsibilities of the position can best be met by a black, we would prefer a man or woman of that race."

I applied for the position and never received a formal response or even acknowledgment of my application. On January 15, 1973, shortly after the New York Times carried a story entitled "Colleges Accused of Reverse Bias," I wrote Dr. Grantham to inform him that I was the individual who had passed the information on about his department's policy in the Times article and requested an explanation. To date, Dr. Grantham has not responded.

Pennsylvania State University advertised a position in Afro-American history at the American Historical Association in December 1971. In a letter dated January 24, 1972, I was informed that the position had been filled by a fully qualified candidate who had been in VISTA and the Peace Corps where he had been assigned to Africa.

Mr. George D. Wolf, head of humanities at the Capitol Campus went on to write, "As far as the position is concerned, it is only partially a position relating to Black Studies. What we are seeking is a candidate who can teach Black literature and aesthetics." The obvious question here is why advertise for someone in literature and aesthetics at a convention of historians. I wrote Mr. Wolf posing this question and also asking why academic credentials were considered invalid as opposed to work in VISTA and the Peace Corps which, while certainly important and invaluable, had little to do with scholarship and teaching. Mr. Wolf did not respond.

Phillips Exeter Academy—New Hampshire—advertised for an instructor of American history in the New York Times in the early spring of 1973. Responding to my application, Mr. Albert Ganley of the history department explained that the position would be offered to a woman to sexually balance the faculty. I wrote Mr. Ganley and other officials at the school to advise them that they were in violation of my rights to equal opportunity employment and then filed a complaint with the New Hampshire Commission for Human Rights. After 60 days, Mr. Everett O. Ware, of the Equal Opportunity Employment Commission, Boston, advised me that his agency had jurisdiction to proceed in the matter. I have heard nothing more on the situation since December 3, 1973.

Dartmouth College—New Hampshire—advertised for a Ph. D. or Ph. D. candidate in humanities or social science for their black studies program in the New York Times. The director of the program, Mr. S. Jay Walker, wrote that in 'History, sociology, literature, there are intangibles involved which make it probable that someone who has lived the experience will be able to give more to his students, black and white, than someone who has not."

West Virginia University, a friend in the history department advised me that there was an opening for an instructor of Afro-

American history. I applied and was informed that because of a budget cut the position was no longer available. In a letter my friend gave me the real truth when he wrote:

> I really am sorry that nothing came of the opening here, but we too were stuck by the black/white problem. They wanted a black but wouldn't/couldn't pay the price and so did nothing.

Tufts University in Massachusetts advertised for a professor of Afro-American history at the American Historical Association's New York meeting in December 1971. I applied and on January 4, 1972, Dr. Robert J. Taylor wrote acknowledging my application and said:

> I must tell you that we hope to fill the position with a minority person, but in the last analysis we hope to get the best person we can.

As a Jew, I wonder what he meant by that.

After a black colleague with lesser qualifications was invited to the Tufts campus for an interview I wrote a letter of complaint to the school's president, Mr. Burton Hallowell. He responded on July 7, 1972, saying:

> In your case, it appeared from your vita that you did not have the kind of experience and training that the department was presently looking for to fill this position.

This may have been the case but my black colleague was invited to the campus for an interview and I was not.

On June 21, 1972, Dr. Taylor wrote:

> The nub of the matter is that the position remains open. Of the several blacks available whom we interviewed none met our expectations in terms of academic criteria. It is fair to say that we are extending for another year the time period for our search.

The position was advertised again the following year.

Southern Illinois University advertised an opening in black history at the American Historical Association 1971 annual meeting in New York City. In an interview conducted by Dr. M. Browning Carroll of the history department, I was informed that the department wanted a black for the position. The suggestion was made that I go into Jewish studies. I didn't laugh at the idea and the interview was quickly terminated.

Central Michigan University, in an interview conducted in Washington, D.C., in April 1972, Dr. Richard L. Wysong informed me that he could not consider my application because of my color. Dr. Wysong said that the president of the university had directed him to come back from Washington with a black. I don't know if he was ultimately successful.

I am skipping some of the things I think are not as important.

West Chester State College, West Chester, Pa., for 2 years running this department advertised for a teacher of Afro-American history at every professional meeting under the signature of the history department's chairwoman, Dr. Patricia Johnson. Although I had been interviewed by the department in 1968 for the same position and had chosen instead to continue toward a Ph. D. in graduate school, the department never granted me an interview.

I pursued this job opening vigorously as it was nearby Philadelphia where I grew up, went to school and where my family and my wife's family still resides. I requested recommendations from numerous dividuals in Philadelphia public and private life and received them. In addition, I constantly wrote Dr. Johnson.

June 26, 1972, she wrote,

> Please believe that I am deeply distressed that this position for which I interviewed you has, at least temporarily, evaporated. I regret having taken up your time, and I regret, in view of your superb qualifications that I cannot look forward to having you with us next year.

I was informed in March 1974 by a member of the history faculty at West Chester that the department was still seeking a historian of Black America. I had still never been interviewed by Dr. Johnson for the position and wrote her a letter of complaint. The letter was dated March [illegible], 1974. She responded on April 19, 1974—though I did not receive the letter until June—and wrote that,

> In order to comply with the stringencies of the Commonwealth's budget, a member of the staff of the Office of Student Life who is a graduate student at the University of Maryland has been teaching our Afro-American history course without charge to the department. Since this individual appears to have excellent rapport with his students and to be a first-rate classroom teacher, we will probably continue to employ his services in the future. I, therefore, do not anticipate an opening in Afro-American history in the near future.

Although Dr. Johnson continued to refer to a nonexistent interview, in the 3 years that have passed since I applied to this college, Ms. Johnson and I have never met. Nor had I, unlike the mysterious, philanthropically minded Maryland graduate student, ever been offered the opportunity to teach the course without charge to the department of history.

While few colleges refuse to waive academic credentials when the case warrants such a waiver, I wondered why the discipline of Afro-American history at West Chester waived scholarly credentials in that particular field while supposedly demanding such credentials in all other fields. I asked that question of Dr. Johnson in a leter dated June 5, 1974. Dr. Johnson has not yet responded.

University of Michigan, Dearborn Campus, in April 1971, I was invited to the campus, along with my wife, to deliver a paper on teaching black history and to discuss the prospects of a position in Afro-American and urban history. After delivering the paper and meeting with members of the philosophy, English, government, and education departments, the chairman of the department of history, Dr. Donald Proctor, in consultation with Dean Papazian, offered me a half-time position for the academic year 1971–72, with the promise of a full-time position for the academic year 1972–73.

As I had not yet begun to research my doctoral thesis, I requested that the department hold the offer for a year and I accepted a position at Rutgers University on a part-time basis while I was able to complete my research in nearby Philadelphia. Dr. Proctor, of course, could not guarantee that the position would still be available, but did promise to do what he could and reiterated the fact that he was very impressed with my teaching ability and research potential.

In December of 1971, I received a letter informing me that I was still the primary candidate for the position from Dr. Procter, where he again stated how much he and the department admired my work. In a telephone conversation in April 1972, Dr. Proctor related budget difficulties and promised to reconsider me for the following academic year in the spring of 1973. The next year, Dr. Proctor informed me that a new dean had been appointed and that the word had been passed down to department heads to hire blacks or women. Proctor apologized profusely, again stated how much he admired my abilities, gave his best to my lovely wife, and wished me good luck. I never heard from the department again.

University of Oregon, a position was advertised in U.S. social history and Afro-American history through the employment information bulletin of the American Historical Association. I applied and received a response from associate dean and professor of history, Paul S. Holbo, who wrote: "The Department of Health, Education, and Welfare requires that the University secure information on all applicants. Would you kindly complete the enclosed form and return it to me?" The form, sent under the signature of the office of affirmative action's director Myra T. Willard, had spaces requiring acknowledgement of a candidate's sex, ethnic, and racial identity.

Under these headings was "American Indian," "Caucasian," "Black," "Oriental," "Spanish American," and other. A space was also provided which said, "I prefer not to provide the information requested," and a note which said "Election of this option will not be prejudicial to your application." I chose not to fill the form out, complained about its use in a letter to Dr. Holbo and never heard from the University of Oregon again.

University of Northern Colorado. For 2 years, between 1971 and 1973, the department of history advertised in the employment information bulletin published by the American Historical Association for an instructor of Afro-American history. The first year I received no response to my application. The second year I received a letter dated December 20, 1972 from acting chairman Robert W. Larson, which stated:

> As you probably know there are guidelines issued by the United States Office of Civil Rights requiring that we take positive action "to recruit, employ, and promote qualified members of minority groups." A black person, naturally, would be particularly appropriate for this position and we intend to follow the federal guidelines.

The department's motives were made apparent by an advertisement which appeared in the Black Scholar, February 1973, which read, "The University of Northern Colorado is recruiting a black faculty member to teach Black History and African History for the academic year beginning in the fall of 1973." This ad was listed under the name of Prof. Robert W. Larson.

A letter written by me to Professor Larson on January 15, 1973, complained of the department's recruitment policies and the obvious violation of white candidate's rights to equal opportunity employment. The letter was never acknowledged or answered.

In Chicago in April 1973, at the Organization of American Historians annual meeting, a professional opening was advertised by the college in black history, Id. No. 901, by Dr. Barry Rothaus. The listed requirements stated, "master's degree plus," and "some college teaching." I requested an interview from Dr. Rothaus who was present in Chicago and received no response.

On June 13, 1973, Dr. Rothaus wrote to me saying:

> The Department of History has offered a one-year contract to teach Black History to Mrs. Alice Reynolds. The choice of Mrs. Reynolds was a particularly

> difficult one considering the number of candidates applying for the position. But, in view of Mrs. Reynolds' knowledge of Black History and the Black experience, the department has selected her.

Lake Forest College, Lake Forest, Ill., in the fall of 1972, the department of history advertised an opening in black history in the employment information bulletin. I applied and received no response or acknowledgement. In February 1973, the Black Scholar advertised:

> Lake Forest College is instituting a search for black faculty. Position in Sociology Department. Two positions in History Department with preference for urban studies and Afro-American History. Applicant must be working on Ph. D.

On June 14, 1973, Dr. John G. Sproat, chairman of the department of history wrote:

> This is to inform you that the position in Afro-American History in this department has been filled for the academic year 1973–1974. The process of evaluating the many able applicants for this position has been a long and difficult one, hence the late date of this letter. Please be assured that we gave your candidacy serious consideration. I trust that you have by now found a position to take advantage of your evident qualifications.

In light of the advertisement in the Black Scholar, Sproat's assertions must be doubted.

University of Santa Clara, Calif., at the New York convention of the American Historical Association in 1971, the department of history advertised a position in black history. E. Thadeus Flood responded to my application of January 1972, 6 months later, writing, "We have in fact decided on a candidate—a Chicano specialist—for the job." To my great surprise, the following fall the department advertised the same job in the employment information bulletin published by the American Historical Association.

Once again, I applied. On January 22, 1973, I received a form letter informing me that the position was once again filled. I wrote Flood on January 25, 1973, requesting clarification of the department's activities in the hiring and search for an Afro-American historian. He did not reply to my letter.

Temple University, Philadelphia, Pa., in the spring of 1972 the Institute of Pan-African Studies advertised for a historian to teach Afro-American history in the New York Times. In response to my application, Odeyo Ayaga, chairman of the department, called me at my home in Massachusetts and invited me to Philadelphia for an interview. Ayaga informed me that my qualifications were among the best he had seen of all the applicants and also informed me that Temple would be glad to pay my travel expenses. At the end of the conversation, in order to avoid a long trip for nothing, I informed Ayaga that I was white. I was promptly disinvited.

The following September, a young woman identifying herself as a staff member of the Pan-African Institute called and inquired whether or not I was still interested in the position which had still not been filled. I said that I was and she also informed me that the position was only open to black candidates.

I wrote a letter of complaint to President-designate Marvin Wachman informing him of the two unpleasant exchanges. The Temple situation was especially painful as I had attended the university as an undergraduate and received my master of arts degree there as well. It was at Temple where my interest in black history had first been kindled.

President Wachman responded to my letter on November 20, 1972, writing:

> I received your letter sometime ago, and have pursued it at several levels. I thoroughly understand your anger and frustration; you were treated in an inexcusable fashion. All I can say at this time is that there is interim leadership in the Afro-Asian Institute, and Mr. Ayaga did not appear to be aware of the implications of the activities of his office.

Although President Wachman extended a cordial invitation to look him up when I was next in Philadelphia, he made no offer to rectify what seemed to be the clearest case of discrimination I had experienced to that date. Under the initiative of the American Jewish Committee the case was pursued through the Commission of Human Relations in Pennsylvania where I lodged my complaint against the university. In return for a monetary settlement relating to lost wages while I was unemployed during that period all charges, State and Federal, were dropped against the university. The case received national publicity and the story of the settlement was carried in most major newspapers as the first positive finding in a reverse-discrimination case in the country—actually there have been a few others.

In an editorial entitled "Costly History Lesson at Temple" the Philadelphia Inquirer reviewed the case and noted:

> Racial discrimination is equally deplorable whatever the victims's race may be. If young people today are to learn anything from the study of history, including black history, it needs to be taught to them by professors who themselves are selected on the basis of qualification, not color.

Since the story broke I have received letters from students and other applicants to the department's Pan-African studies program. Mr. Ayaga is still head of the department and has not, apparently, changed his tactics. White students are discriminated against when they try to enroll for black studies courses and when finally permitted entry have to suffer the racial harangues of ill-prepared classroom teachers who in the place of substantive analysis of their disciplines preach hatred of whites and selected ethnic groups. The position in Afro-American history was again advertised last spring in the New York Times.

In conclusion, let me say this: While my case appears to be somewhat exceptional in light of the nature of the discipline involved, I am convinced as a result of my contact with unemployed or underemployed young male scholars across the country that this is not the situation. The experiences I have outlined have hit young men in every scholarly discipline and especially in the liberal arts and humanities. Granted that there is currently a glutted academic job market and a financial crunch that is even jeopardizing those formerly comfortable tenured faculty members.

However, the combination of reverse discrimination coming on the heels of a depressed academic market makes it virtually a certainty that the vast majority of young white males who have spent years of underpaid and agonizing work in this Nation's graduate schools will see few rewards at the end of the road. It is my opinion that, far from being the exception, my experiences are the rule in the current academic job climate with affirmative action guidelines setting discriminatory quotas under the direction of the Department of Health, Education, and Welfare.

No rational individual could ever argue against the fact that Afro-Americans, and women, have suffered grievous oppression and injustice in this country's past. It is also painfully clear that blacks are still being systematically excluded from equality in many areas of American life. However, the introduction of exclusionary quotas will do precious little to reverse the twisted path of the past and the movement toward equality in the present.

What is worse, quotas will further divide the races. It is no secret to political observers that white ethnics are up in arms over the attempt of Government, by social manipulation, to regulate the lives of the great middling order in this society. This unrest can be primarily detected in the unrest resulting from the regulation of their children's educational experiences.

Discriminatory quotas which force college administrators, with one eye on Federal funds and the other on HEW affirmative action guidelines, to bring blacks and women onto their beleaguered campuses without reference to quality and qualification will only create divisiveness and hatred, and, at the same time undermine the quality of higher education in America.

A recent Carnegie Commission study has indicated that this deterioration is already well underway. It is also important to note that many of the schools that are in the forefront of this discriminatory practice are State institutions funded by the class most affected by discriminatory practice, an irony that is of dubious constitutionality.

Finally, history has always taught the lesson that it is unprofitable and unjust to visit the sins of one generation upon another. An entire generation of young scholars is currently being forced to pay for sins which they did not commit, but in some cases were actively involved in eradicating during the civil rights struggles of the early 1960's.

I myself fall into this category and can now attest from experience what it is like to have one's own civil rights constantly violated in America. Although no one can predict with any degree of accuracy where the policies of reverse-discrimination will lead, it is clear as of now that they have produced no salutary results and have altered the status of blacks and women in only a miniscule fashion. Blacks are still being excluded and shunted aside in other areas of academic life as their numbers increase in fields like black studies but remain relatively nonexistent in the more traditional disciplines of chemistry, physics, biology, classic, et cetera.

When the HEW guidelines are strictly followed, few bureaucrats pay attention to what is being taught or the quality of the individuals who do the teaching. The game simply becomes one of numbers—how many blacks, or how many women are on a given faculty. It is time for the Congress of the United States to reverse the tide of this new discrimination. Individuals in a democratic society must be judged solely on qualification and individual merit and not by what racial, ethnic, or sexual group they, by an accident of birth, belong to.

If these evils are not eradicated, I can assure you that the day will come when my children or my children's children will demand, as they inevitably will, that the scales once again be set in balance. Who will be singled out for retribution then? Would it not be so much easier for Americans, on the eve of their Bicentennial celebration, to end discrimination once and for all and to finally make the dream of the Founding Fathers a reality for this generation and every generation to come.

It is high time to stop advertisements that read, "Lake Forest College is instituting a search for black faculty," and to open all of our great institutions to all our people.

Mr. O'Hara (presiding). Thank you very much, Mr. Goldman, for a very powerful statement.

I notice that you use the term that has become fashionable, "reverse discrimination," and I am sure you would agree with me, though, that in actual logical fact it is just plain old discrimination. There is nothing reverse about it. It just happens with a different target.

Mr. Goldman. Yes, sir.

Mr. O'Hara. To my mind it partakes of all of the evils of discrimination that has caused the Congress to move slowly, but to move in eradicating the older forms of discrimination. There is no difference. It does not seem to me it matters much if an individual is being discriminated against, it hardly matters to him if the motive of the discriminator is maybe a better motive than it would have been 30 years ago, you know.

Mr. Goldman. Yes; I couldn't agree more.

Mr. O'Hara. What difference does it make? Unless we treat it that way, we are going to establish the principle that discrimination is all right as long as your motives are pure. Then, we get to the question of "What about those people."—we used to have a lot of them and we still have a few—"who really and truly believe that segregation of the races is the best public policy and that it is good for everyone involved?"

If we are going to look to their motives, maybe they will be exculpated now because their motives are good, I don't know.

But, I guess, if the individuals' motives are good, it is not if the individuals' motives are good but if the judge thinks they are good or whoever is in charge, will substitute his judgment for someone else.

I am very happy you came before the committee to let us have the benefit of your very sad experiences.

Mr. Dellenback, any questions?

Mr. Dellenback. If we were not limited by time, I would have preferred to explore not only the case you put forth in your testimony, but, as you pointed out, you had a great many other experiences beyond this and you only put down some of those which are most easily reduced to writing. For the sake of helping our thinking, I will ask you this couple of questions.

You indicated that to a large degree, the game has become one of numbers. Do you think that in this kind of consideration, numbers should play any part? Whether one is analyzing race, creed, sex, or whatever the measuring point is, can we avoid making the game solely one of numbers or even predominantly one of numbers and still validly give some consideration to statistical analysis that deal with those particular criterion?

Mr. Goldman. No. I don't think we can avoid looking at numbers because of the obvious fact of past discrimination. We have to see that the numbers and the balances somehow are redressed. The problem that you gentlemen face, and which legislators face across the country, is "How to redress the balance; how to redress the grievance, without discriminating against a whole new segment of population."

Mr. DELLENBACK. Do you think the number analysis is a valid part of what we need to do?

Mr. GOLDMAN. Very much. In fact, I would like to go on record as favoring affirmative action. I do not oppose affirmative action. If I came up before a board in opposition to a historian who was black who was equally qualified with myself, I would hope that he would get the job, in that sense.

Mr. DELLENBACK. That leads me to my second question: While not discriminating on the grounds of race in the sense of taking a less well-qualified person do, you think there are times were in determining what the criteria are that validly make up the measure of whom you are going to pick for a position, could race ever be a valid criterion as part of the total picture?

Mr. GOLDMAN. Not in the academic area. I don't think you can make race a criterion, or sex a criterion in the academic arena. There may be other areas, you know, but in the academic area I don't think you can. I think you have to make an effort to bring all peoples on to the campus, but I don't think you can search for people on the basis of race.

Mr. DELLENBACK. Perhaps this is a bizarre example, but I just thought of it as we talked, if some institution is looking for someone to coach a men's football team on a college campus, would it be valid for the selectors to say, "We want a male to coach that men's football team," or at least give consideration to that as one of the criteria in making the determination of who ought to be the coach?

Mr. GOLDMAN. In a hypothetical sense. I would say perhaps, But I don't know a damn thing about football.

Mr. DELLENBACK. This town is filled with people who—after yesterday—are inclined to think there are others around here in that same situation.

Well, would you make a distinction between the theory and the possibility of a modification in practice, the theory in this case being that there should not be consideration given to race, or creed, or sex, or anything?

Mr. GOLDMAN. Not in an equalitarian society, a society that has the standards we are supposed to have, I think, whatever we should be moving toward, who can ever reach the goal? You know, the goal is unreachable. That is perfection, but you should always be moving toward a society where quality and competence are the basic standards of evaluation.

Mr. DELLENBACK. You don't think within the field of measuring competence, there are times that sex or age or race might be a valid part of the mass of the selection?

Mr. GOLDMAN. I have heard that before, but, if we do that—what we are doing is to say to, I would say, "To know Caesar one does not have to be a Caesar".

By that, I simply mean if we did that, what we would say to a novelist, "You can't write about women, you can only write about what you feel, or a man". Or a "female", she would be limited to females. I don't think you can limit the selection of anyone on the basis of what they have been.

Now, certain experiences are valid. I don't mean to invalidate experience. But, I certainly would not want to be selected on the basis of my Jewishness for any kind of a job. Even in a Department of Hebraic Studies, I wonder how many non-Jews are doing that kind of thing. But, I think that even in that area, Jewishness is meaningless.

I made a big mistake, perhaps, to go into a field in my academic area that was precisely at the wrong time. I couldn't have been more wrong in terms of my timing, but I got into it 10 years before as a result of Civil Rights work and as a result of teaching at an all-black school and it was accidental. But, I don't see how, in a society that projects egalitarianism to the world, how selections can ever be made on any basis other than competence, quality, and those kinds of criteria.

Mr. DELLENBACK. Can experience validly be part of competence? For example, if one has been a woman for 30 years, is one able to deal with certain aspects of what you might talk about with women in a way superior to a man?

Mr. GOLDMAN. If you are going to use the analogy of a woman—you are talking primarily about women studies on a college campus which is a big field today—and my argument would be that if experience is the sole criteria, then you are invalidating every field of study there is because of this.

Mr. DELLENBACK. I am not saying, "Should it be the sole criteria", but is there any room in the selection process for that kind of thing being one of the factors that is considered?

Mr. GOLDMAN. I would say yes, there is room, but for that to be the sole criteria as it has been is ridiculous. It invalidates the study of everything.

How many Colonial Americans do we have around? We can't study Puritans because we can't find Puritans to teach us. We can't study Irish because Professor Choy is not Irish; that kind of thing.

Mr. DELLENBACK. Thank you very much. This has been very helpful, and I appreciate your answer to the last question, as well as others. This has been very moving and troublesome testimony.

Thank you very much.

Mr. O'HARA. Thank you very much on behalf of the committee, Mr. Goldman.

PREPARED STATEMENT OF MARTIN S. GOLDMAN, RESTON, VA.

This testimony is indicative of a nation-wide policy of reverse discrimination in institutions of higher learning. The policies have been implemented to supposedly redress racial and/or sexual balance in these institutions at the direction of the Department of Health, Education, and Welfare under so-called "affirmative action" guidelines. Between April 1971, the date I successfully passed my Ph.D. preliminary oral examination at Clark University (Worcester, Massachusetts) and July 1973 I applied to approximately 150–200 colleges, universities and private schools in an effort to secure academic employment. As a result of advertisements placed in academic journals, educational periodicals, magazines and newspapers (most notably *The New York Times*) I knew of openings in the fields I had studied while in graduate school—the broad field of American History and the specialized fields of Afro-American and Urban History. In that period of time I also attended two meetings of the American Historical Association in New York City and Boston and two meetings of the Organization of American Historians in Washington, D.C. and Chicago. At these meetings I receive a number of interviews with department chairmen who had advertised teaching positions in my special fields. Most of the time, however, when it was discovered that I was white, I received no response to my applications.

The following summary represents the kinds of experiences I had in what became a futile two-year search for employment in a discipline that I had devoted the better part of ten years of study and teaching to master. It should be noted that these documented cases only represent the tip of the iceberg in that the circumstances were clearly pointed out as to why my candidacy would not be advanced for the positions in question. In the vast majority of cases the individuals were far more subtle in the ways they chose to deal with my application for employment. Thus the following cases are those where the individuals involved provided me with documentation. This documentation can be made available upon request.

Vanderbilt University—advertised an opening in Afro-American History at the American Historical Association's annual meeting in New York in December 1971. Under the signature of Department Chairman Dewey Grantham the notice stated, "because the department believes that the responsibilities of the position can best be met by a black, we would prefer a man or woman of that race." I applied for the position and never received a formal response or even acknowledgment of my application. On January 15, 1973, shortly after the *New York Times* carried a story entitled "Colleges Accused of Reverse Bias," I wrote Dr. Grantham to inform him that I was the individual who had passed the information on about his department's policy in the *Times* article and requested an explanation. To date Dr. Grantham has not responded.

Pennsylvania State University—advertised a position in Afro-American History at the American Historical Association in December 1971. In a letter dated January 24, 1972 I was informed that the position had been filled by a fully qualified candidate who had been in VISTA and the Peace Corps where he had been assigned to Africa. Mr. George D. Wolf, Head of Humanities at the Capitol Campus went on to write, "As far as the position is concerned, it is only partially a position relating to Black Studies. What we are seeking is a candidate who can teach Black literature and aesthetics. . . ." The obvious question here is why advertise for someone in literature and aesthetics at a convention of historians. I wrote Mr. Wolf posing this question and also asking why academic credentials were considered invalid as opposed to work in VISTA and the Peace Corps which, while certainly important and invaluable, had little to do with scholarship and teaching. Mr. Wolf did not respond.

Phillips Exeter Academy—New Hampshire advertised for an instructor of American History in the New York Times in the spring of 1973. Responding to my application Mr. Albert Ganley of the History Department explained that the position would be offered to a woman to sexually balance the faculty. I wrote Mr. Ganley and other officials at the school to advise them that they were in violation of my rights to equal opportunity employment and then filed a complaint with the New Hampshire Commission for Human Rights. After sixty days Mr. Everett O. Ware of the Equal Opportunity Employment Commission, Boston advised me that his agency had jurisdiction to proceed in the matter, I have heard nothing more on the situation since December 3, 1973.

Dartmouth College—New Hampshire advertised for a Ph.D. or Ph.D. candidate in humanities or social science for their Black Studies program in the New York Times. The Director of the program Mr. S. Jay Walker wrote that in "History, Sociology, Literature, there are intangibles involved . . . which make it probable that someone who has lived the experience will be able to give more to his students, black and white, than someone who has not."

West Virginia University—a friend in the history department advised me that there was an opening for an instructor of Afro-American History. I applied and was informed that because of a budget cut the position was no longer available. In a letter my friend gave me the real truth when he wrote, "I really am sorry that nothing came of the opening here, but we too were stuck by the Black/White problem. They wanted a black, but wouldn't/couldn't pay the price and so did nothing."

Tufts University—Mass., advertised for a professor of Afro-American History at the American Historical Association's New York meeting in December 1971. I applied and on January 4, 1972 Dr. Robert J. Taylor wrote acknowledging my application and said, "I must tell you that we hope to fill the position with a minority person, but in the last analysis we hope to get the best person we can." (1) After a black colleague with lesser qualifications was invited to the Tufts campus for an interview I wrote a letter of complaint to the school's President, Mr. Burton Hallowell. He responded on July 7, 1972 saying, "In your case, it appeared from your vita that you did not have the kind of experience and training that the Department was presently looking for to fill this position. . . ." This may well have been the case but my black colleague was invited to the campus for an interview and I was not. On June 21, 1972 Dr. Taylor wrote, "The nub of the matter is that the position remains open. (Sic!) Of the several Blacks available whom we interviewed none met our expectations in terms of academic criteria. It is fair to say that we are extending for another year the time period for our search." The position was advertised again the following year.

Illinois State University—advertised for an Afro-American historian in the American Historical Association's *Professional Register* to which I responded. On November 27, 1972 Dr. M. Paul Holsinger wrote, "Honesty, however, compels me to note that our administration has insisted that we emphasize the policy of 'affirmative action' in our search, which in practical terms means that we must give first priority to Black candidates for the post before any others. This does not necessarily rule out others, but it clearly negates them to a considerable extent."

Southern Illinois University—advertised an opening in Black History at the American Historical Association 1971 annual meeting in New York City. In an interview conducted by Dr. M. Browning Carroll of the History Department I was informed that the department wanted a black for the position. The suggestion was made that I go into Jewish Studies. I didn't laugh at the idea and the interview was quickly terminated.

Central Michigan University—in an interview conducted in Washington, D.C. in April, 1972 Dr. Richard L. Wysong informed me that he could not consider my application because of my color. Dr. Wysong said that the President of the university had directed him to come back from Washington with a black. I don't know if he was ultimately successful.

University of Louisville—advertised for an Afro-American historian in the American Historical Association's *Professional Register*. C. W. Brockwell, Jr. of the History Department responded to my application saying, "let me say that so far as any new appointments are concerned this department is an affirmative action employer. We encourage applications from all qualified persons, including women and members of ethnic minorities." I never heard from Mr. Brockwell again.

West Chester State College, West Chester, Pennsylvania—for two years running this department advertised for a teacher of Afro-American History at every professional meeting under the signature of the History Department's Chairwoman, Dr. Patricia Johnson. Although I had been interviewed by the department in 1968 for the same position and had chosen instead to continue toward a Ph.D. in graduate school, the department never granted me an interview. I pursued this job opening vigorously as it was nearby Philadelphia where I grew up, went to school and where my family and my wife's family still resides. I requested recommendations from numerous individuals in Philadelphia public and private life and received them. In addition I constantly wrote Dr. Johnson. On June 26, 1972 she wrote, "Please believe that I am deeply distressed that this position for which I interviewed you has, at least temporarily, evaporated. I regret having taken up your time, and I regret, in view of your superb qualifications, that I cannot look forward to having you with us next year." I was informed in March, 1974 by a member of the history faculty at West Chester that the department was still seeking a historian of Black American. I had still never been interviewed by Dr. Johnson for the position and wrote her a letter of complaint. The letter was dated March 1, 1974. She responded on April 19, 1974 (though I did not receive the letter until June) and wrote that ". . . in order to comply with the stringencies of the Commonwealth's budget a member of the staff of the Office of Student Life who is a graduate student at the University of Maryland has been teaching our Afro-American History course without charge to the Department. Since this individual appears to have excellent rapport with his students and to be a first-rate classroom teacher we will probably continue to employ his services in the future. I, therefore, do not anticipate an opening in Afro-American History in the near future. . . ." Although Dr. Johnson continued to refer to a non-existent interview, in the three years that have passed since I applied to this college, Ms. Johnson and I have never met. Nor had I, unlike the mysterious, philanthropically-minded Maryland graduate student, ever been offered the opportunity to teach the course without charge to the Department of History. While few colleges refuse to waive academic credentials when the case warrants such a waiver I wondered why the discipline of Afro-American history at West Chester waived scholarly credentials in that particular field while supposedly demanding such credentials in all other fields. I asked that question of Dr. Johnson in a letter dated June 5, 1974. Dr. Johnson has not yet responded.

State University College of Arts and Science, Genesco, New York. In an advertisement placed in the *Employment Information Bulletin* published by the American Historical Association, the Department of History noted an opening in Afro-American History. In response to my application Dr. Valentin H. Rabe wrote on November 14, 1972, "I will write again whenever I have any positive information concerning the prospective position." On January 30, 1973 Dr. Rabe wrote, "I regret to inform you that the tentative position about which we have corresponded will not materialize this year. This outcome is partly the result of budgetary uncertainties, but primarily due to the decision to commit the anticipated position to the appointment of a new department chairman." However, in April 1973 at the Organization of American Historians annual meeting in Chicago a notice, identification number 907, was posted by S.U.C., Genesco, New York that read, "Seeking a historian who will continue to develop a traditional history curriculum, and who will be capable of expanding the present interdisciplinary majors in American Civilization and in Black Studies." Since my primary field was American History with a concentration in the History of Black America I applied for a second time to the department. My application was never acknowledged.

University of Michigan, Dearborn Campus—In April 1971 I was invited to the campus, along with my wife, to deliver a paper on teaching Black History and to discuss the prospects of a position in Afro-American and Urban History. After delivering the paper and meeting with members of the Philosophy, English, Government and Education Departments the chairman of the Department of History, Dr. Donald Proctor, in consultation with Dean Papazian offered me a half-time position for the academic year 1971-1972 with the promise of a full-time position for the academic year 1972–1973. As I had not yet begun to research my doctoral thesis I requested that the department hold the offer for a year and I accepted a position at Rutgers University on a part-time basis while I was able to complete my research in nearby Philadelphia. Dr. Proctor, of course, could not guarantee that the position would still be available but did promise to do what he could and reiterated the fact that he was very impressed with my teaching ability and research potential. In December of 1971 I received a letter informing me that I was still the primary candidate for the position from Dr. Proctor where he again stated how much he and the department admired my work. In a telephone conversation in April 1972 Dr. Proctor related budget difficulties and promised to reconsider me for the following academic year in the spring of 1973. The next year Dr. Proctor informed me that a new dean had been appointed and that the word had been passed down to department heads to hire blacks or women. Proctor apologized profusely, again stated how much he admired my abilities, gave his best to my "lovely wife" and wished me good luck. I never heard from the department again.

University of Michigan, Flint Campus—In response to an advertisement in the *Chronicle of Higher Education* I applied for an opening in Afro-American History. Dr. Robert W. Heywood responded, "The position in African and Afro-American history in which you have expressed interest has recently been redefined, and partially staffed for this next year. The History Department has recommended a part-time appointment. . . . A number of courses remain unstaffed, most notably in the field of Afro-American history. There is, at the moment, some uncertainty as to the precise definition of the remaining appointment, except that it will be primarily with the Black Studies program." No further communication from the department was received.

Holy Cross College, Worcester, Massachusetts—In the spring of 1970 I taught the first course in Black History offered at the college. In the fall of 1972 the Department of History advertised for a full-time teacher of African and Afro-American History. Members of the department privately informed me that the word was out that only blacks would be given consideration for the position but I decided to apply anyway. No interview was offered although Dr. Edward Wall, chairman of the department, requested my credentials. On March 1, 1973 Dr. Wall wrote to inform me that the vacancy had been filled. Upon investigation I discovered that no white candidates had been interviewed by the department.

University of Oregon—A position was advertised in United States Social History and Afro-American History through the *Employment Information Bulletin* of the American Historical Association. I applied and received a response from Associate Dean and Professor of History Paul S. Holbo who wrote, "The Department of Health, Education and Welfare requires that the University secure information on all applicants. Would you kindly complete the enclosed form and return it to me?" The form, sent under the signature of the Office of Affirmative Action's Director, Myra T. Willard, had spaces requiring acknowledgment of a candidate's sex, ethnic and racial identity. Under these headings was American Indian, Caucasian, Black, Oriental, Spanish American and other. A space was also provided which said, "I prefer not to provide the information requested," and a note which said "Election of this option will not be prejudicial to your application." I chose not to fill the form out, complained about its use in a letter to Dr. Holbo and never heard from the University of Oregon again.

Glassboro State College, New Jersey—Advertised in the *Employment Information Bulletin* for someone to teach Afro-American History. After three or four applications in May 1973 Marie G. Wanek, Chairman of the Department of History, responded in a form letter, "We are now limiting active consideration to those applicants whose qualifications most specifically fit our current needs." At the bottom of the letter was a handwritten PS that said, "We have decided upon a minority person." The following September the Department placed an advertisement in the same bulletin for the same position.

University of Northern Colorado.—For two years between 1971–1973 the Department of History advertised in the Employment Information Bulletin published by the American Historical Association for an instructor of Afro-American History. The first year I received no response to my application. The second year I received a letter dated December 20, 1972 from Acting-Chairman Robert W. Larson which stated, "As you probably know there are guidelines issued by the United States Office of Civil Rights requiring that we take positive action "to recruit, employ, and promote qualified members of minority groups. A black person, naturally, would be particularly appropriate for this position, and we intend to follow the federal guidelines." The department's motives were made apparent by an advertisement which appeared in The Black Scholar, February, 1973, which read, "The University of Northern Colorado is recruiting a black faculty member to teach Black History and African History for the academic year beginning in the fall of 1973." The ad was listed under the name of Professor Robert W. Larson. A letter written by me to Professor Larson on January 15, 1973 complained of the department's recruitment policies and the obvious violation of white candidate's rights to equal opportunity employment. The letter was never acknowledged or answered. In Chicago in April, 1973 at the Organization of American Historians annual meeting a professional opening was advertised by the college in Black History, ID number 901, Dr. Barry Rothaus. The listed requirements stated "Master's degree plus," and "Some college teaching." I requested an interview from Dr. Rothaus who was present in Chicago and received no response. On June 13, 1973 Dr. Rothaus wrote to me saying, ". . . the Department of History has offered a one year contract to teach Black History to Mrs. Alice Reynolds. The choice of Mrs. Reynolds was a particularly difficult one considering the number of candidates applying for the position. But in view of Mrs. Reynolds' knowledge of Black History and the Black experience, the department has selected her."

Lake Forest College, Lake Forest, Illinois—In the fall of 1972 the Department of History advertised an opening in Black History in the *Employment Information Bulletin*. I applied and received no response or acknowledgement. In February, 1973 *The Black Scholar* advertised, "Lake Forest College is instituting a search for black faculty. Position in Sociology Department. Two positions in History Department with preference for urban studies and Afro-American history . . . Applicant must be working on Ph.D." On June 14, 1973 Dr. John G. Sproat, Chairman of the Department of History wrote, "This is to inform you that the position in Afro-American history in this department has been filled for the academic year 1973–1974. The process of evaluating the many able applicants for this position has been a long and difficult one, hence the late date of this letter. Please be assured that we gave your candidacy serious consideration. I trust that you have by now found a position to take advantage of your evident qualifications." In light of the advertisement in *The Black Scholar* Sproat's assertions must be doubted.

Shippensburg State College—Pennsylvania—advertised in *The Black Scholar* for a teacher of Black History. In response to my application Louis M. Bouchard wrote on December 30, 1971, ". . . we do have a department of 21 people and not one of them is black. There are only two black staff members on our whole faculty of 300. We do not believe that this is a healthy situation . . . I shall keep your letter on file . . . but I am afraid I can hold out little hope."

University of Santa Clara, California—At the New York convention of the American Historical Association in 1971 the Department of History advertised a position in Black History. E. Thadeus Flood responded to my application of January, 1972 six months later writing, "We have in fact decided on a candidate—a Chicano specialist—for the job." To my great surprise the following fall the department advertised the same job in the *Employment Information Bulletin* published by the American Historical Association. Once again I applied. On January 22, 1973 I received a form letter informing me that the position was once again filled. I wrote Flood on January 25, 1973 requesting clarification of the department's activities in the hiring and search for an Afro-American historian. He did not reply to my letter.

University of Wisconsin, Green Bay—Over the signature of R. Christian Johnson my application to this department's opening in Black History was answered on January 18, 1972. I was notified, "We are unable to include your credentials among those receiving final consideration for a position at the University of Wisconsin–Green Bay." I requested clarification and asked what the department's criteria were for the position. No answer was ever received.

University of Connecticut—In response to my application for a position advertised in Black History in the *Employment Information Bulletin*, Professor Richard D. Brown wrote, "Our decision not to invite you for an interview was based on many factors, and so should not be regarded as an adverse judgment on your credentials." On February 13, 1973 I wrote Professor Brown requesting information regarding the criteria the department used in making its selections. In a response dated February 16, 1973 Brown sympathized with my distress over the job market but *did not* discuss the criteria used to hire by his department. The job was filled by a black candidate and Brown wrote, "Of those who possessed adequate credentials, only 5% were brought to the campus. As a result we were forced to eliminate many excellent candidates from our consideration."

Temple University, Philadelphia, Pennsylvania—In the spring of 1972 the Institute of Pan-African Studies advertised for an historian to teach Afro-American History in the New York Times. In response to my application Odeyo Ayaga, Chairman of the Department, called me at my home in Massachusetts and invited me to Philadelphia for an interview. Ayaga informed me that my qualifications were among the best he had seen of all the applicants and also informed me that Temple would be glad to pay my travel expenses. At the end of the conversation, in order to avoid a long trip for nothing, I informed Ayaga that I was white, I was promptly disinvited. The following September a young woman identifying herself as a staff-member of the Pan African Institute called and inquired whether or not I was still interested in the position which had still not been filled. I said that I was and she also informed me that the position was only open to black candidates. I wrote a letter of complaint to President-designate Marvin Wachman informing him of the two unpleasant exchanges. The Temple situation was especially painful as I had attended the university as an undergraduate and received my Master of Arts degree there as well. It was at Temple where my interest in Black History had first been kindled. President Wachman responded to my letter on November 20, 1972 writing, "I received your letter sometime ago, and have pursued it at several levels. I thoroughly understand your anger and frustration; you were treated in an inexcusable fashion.

All I can say at this time is that there is interim leadership in the Afro-Asian Institute, and Mr. Ayaga did not appear to be aware of the implications of the activities of his office." Although President Wachman extended a cordial invitation to look him up when I was next in Philadelphia he made no offer to rectify what seemed to be the clearest case of discrimination I had experienced to that date. Under the initiative of the American Jewish Committee the case was pursued through the Commission of Human Relations in Pennsylvania where I lodged a complaint against the university. In return for a monetary settlement relating to lost wages while I was unemployed during that period all charges, state and federal, were dropped against the university. The case received national publicity and the story of the settlement was carried in most major newspapers as the first positive finding in a reverse-discrimination case in the country—actually there have been a few others. In an editorial entitled "Costly History Lesson at Temple," the Philadelphia Inquirer reviewed the case and noted, 'Racial discrimination is equally deplorable whatever the victim's race may be. If young people today are to learn anything from the study of history, including black history, it needs to be taught to them by professors who themselves are selected on the basis of qualification, not color." Since the story broke I have received letters from students and other applicants to the department's Pan-African Studies program. Mr. Ayaga is still head of the department and has not, apparently, changed his tactics. White students are discriminated against when they try to enroll for Black Studies courses and when finally permitted entry have to suffer the racial harangues of ill-prepared classroom teachers who in the place of substantive analysis of their disciplines preach hatred of whites and selected ethnic groups. The position in Afro-American history was again advertised last spring in the New York Times.

In conclusion, let me say this: While my case appears to be somewhat exceptional in light of the nature of the discipline involved, I am convinced as a result of my contact with unemployed or under-employed young male scholars across the country that this is not the situation. The experiences I have outlined have hit young men in every scholarly discipline and especially in the Liberal Arts and Humanities. Granted that there is currently a glutted academic job market and a financial crunch that is even jeopardizing those formerly comfortable tenured faculty members. However, the combination of reverse discrimination coming on the heels of a depressed academic market makes it virtually a certainty that the vast majority of young white males who have spent years of underpaid and agonizing work in this nation's graduate schools will see few rewards at the end of the road. It is my opinion that, far from being the exception, my experiences are the rule in the current academic job climate with affirmative action guidelines setting discriminatory quotas under the direction of the Department of Health, Education, and Welfare.

No rational individual could ever argue against the fact that Afro-Americans (and women) have suffered grievous oppression and injustice in this country's past. It is also painfully clear that blacks are still being systematically excluded from equality in many areas of American life. However, the introduction of exclusionary quotas will do precious little to reverse the twisted path of the past and the movement toward equality in the present. What is worse, quotas will further divide the races. It is no secret to political observers that white ethnics are up in arms over the attempt of government, by social manipulation, to regulate the lives of the great middling order in this society. This unrest can be primarily detected in the unrest resulting from the regulation of their children's educational experiences. Discriminatory quotas which force college administrators, with one eye on federal funds and the other on H.E.W. affirmative action guidelines, to bring blacks and women onto their beleaguered campuses without reference to quality and qualification will only create greater divisiveness and hatred and, at the same time undermine the quality of higher education in America. A recent Carnegie Commission study has indicated that this deterioration is already well underway. It is also important to note that many of the schools that are in the forefront of this discriminatory practice are state institutions funded by the class most affected by discriminatory practice—an irony that is of dubious constitutionality.

Finally, history has always taught the lesson that it is unprofitable and unjust to visit the sins of one generation upon another. An entire generation of young scholars is currently being forced to pay for sins which they did not commit, but in some cases were actively involved in eradicating during the civil rights struggles of the early 1960s. I myself fall into this category and can now attest from experience what it is like to have one's own civil rights constantly violated in America. Although no one can predict with any degree of accuracy where the policies of reverse discrimination will lead, it is clear as of now that they have produced no salutary results and have altered the status of blacks and women in only a miniscule fashion. Blacks are still being excluded and shunted aside in other areas of academic life as their numbers increase in fields like Black Studies but remain relatively non-existent in the more traditional disciplines of Chemistry, Physics, Biology, Classic etc. When the H.E.W. guidelines are strictly followed, few bureaucrats pay attention to what is being taught or the quality of the individuals who do the teaching. The game simply becomes one of numbers—how many blacks, or how many women are on a given faculty. It is time for the Congress of the United States to reverse the tide of this new discrimination. Individuals in a democratic society must be judged solely on qualification and individual merit and not by what racial, ethnic or sexual group they, by an accident of birth, belong to. If these evils are not eradicated I can assure you that the day will come when my children or my children's children will demand, as they inevitably will, that the scales once again be set in balance. Who will be singled out for retribution then? Would it not be so much easier for Americans, on the eve of their Bicentennial celebration, to end discrimination once and for all and to finally make the dream of the Founding Fathers a reality for this generation and every generation to come. It is high time to stop advertisements that read, "Lake Forest College is instituting a search for black faculty," and to open all of our [illegible] institutions to all our people.

Respectfully submitted,

Martin S. Goldman.

[On September 27, George D. Wolf, dean of faculty, the Pennsylvania State University, Middletown, Pa., wrote to the subcommittee, requesting an opportunity to reply to certain allegations made by Dr. Goldman in the course of his testimony. The chairman invited Dean Wolf to submit whatever statement he felt would clarify the testimony, and the following materials were submitted by him:]

6

Prepared Statement of George D. Wolf

Mr. Martin S. Goldman's testimony of 23 September 1974 cleverly combines his application for two different positions with a complete and utter distortion of the factual record of the case. In the first place, his original inquiry of 2 May 1971, which I actually received on 7 May 1971, came two days after the offer had been made to the successful candidate. At that point, I considered the case closed as my letter indicated. Mr. Goldman's abusive response to my letter of 13 May 1971, following the appropriate listing of a second position with the American Historical Association, led to my response of 24 January 1972. Most readers of Mr. Goldman's letter of 6 February 1972 would agree that it required no response. When The American Jewish Committee requested a summary of the case from me on 20 November 1972, I was happy to respond and did so on the 29th of November 1972. Unfortunately, Mr. Goldman has continued to abuse me in an article in The Social Studies, Volume LXV, No. 1, page 34, as well as his testimony before your Committee. I am happy to correct the record. I trust that the Subcommittee will not simply become a forum for disappointed candidates to vent their spleen over imaginary abuse.

Enclosures.

Auburn, Mass., *May 2, 1971.*

Dean of Faculty,
Pennsylvania State University, Capitol Campus, Middletown, Pa.

Dear Sir: Kindly allow me at this time to add my vitae to the thousands that will probably be pouring into your office as a result of your advertisement in the New York Times. I do not envy your task.

As you probably realize, there is an academic blight that has set in and the discipline of history has been among the hardest hit. Thus I am quite sure that you will have your pick among the finest doctoral candidates and Ph.D's that America has to offer. I would, however, like to throw my hat in the ring for a shot at the position in Afro-American Studies. As you will see by my vitae I have had a rather substantial background in this field.

I grew up in Philadelphia, living there for the first 25 years of my life and only left when an opportunity for work combined with a good graduate school became available in central New England in 1966. Clark University is a small school of 1500 undergraduates and 300 graduate students. The History Department has only about 30 graduate students on a full time basis. It is intimate and we work closely with our professors who become, as time passes, more than mentors and teachers to us. I must say I have enjoyed the experience. But it is now time, I think, to go out again on my own.

I know that you will have many qualified candidates for your opening. But I feel that I have one qualification that puts me heads and tails above most of my younger competitors today. And that is my sincere commitment to good teaching combined with a dedication to scholarship and professionalism. I am very much interested in the interdisciplinary approach to college teaching and have even experimented with it in my freshman classes at Clark. I know that today many schools who seek instructors in ethnic disciplines hope to obtain an ethnic for the discipline in question. I have faced up to this difficulty and decided not to give up my interest in Black History. This interest goes back to my early experiences as a high school instructor where I taught in the so-called "ghetto" in Philadelphia. I didn't know it was a ghetto because I had grown up there only 4 years earlier, attending the very same school to which I later returned as a teacher.

I don't profess to have all the answers to the problems that are confronting the teacher who ventures into ethnic studies these days. In fact I'm not sure I have any. Indeed, I too have had my difficulty with Black students as they have come to discover their long-hidden roots. But then I have also had difficulty with White students. I think teaching is the most difficult task in our society today and I am skeptical of anyone who claims to have all-purpose solutions. However, I am well-versed in my discipline, I love to teach and I would like to be considered for a position as I am now formulating my plans for the next academic year.

Sincerely,

MARTIN S. GOLDMAN.

FACULTY APPLICANT FORM

Goldman, Martin
Date of receipt of inquiry May 5, 1971.
Acknowledged by G. Wolf.
Kindly fill in the code numbers below:
Area 1 560
Area 2 ____________
Area 3 ____________
Area 4 ____________

Explanation:

This form should be attached to the front of every vita or letter of inquiry received relating to a faculty position. The date of receipt of the inquiry and the name of the person acknowledging it should be indicated. The inquiry, this form, and a copy of the acknowledgment if one is sent should be forwarded promptly to Room W-102 where the file will be recorded and retained.

It will be helpful if the code numbers of the applicant's fields of competence are indicated. They should be listed in the order of strength with a 1 preceding the code numbers of any fields of particular strength.

MAY 13, 1971.

Mr. MARTIN S. GOLDMAN,
Auburn, Mass.

DEAR MR. GOLDMAN: Thank you for your inquiry concerning the Afro-American Studies position on our campus which was referred to me by the Dean of Faculty. That position, however, has recently been filled.

With your permission, we will keep your credentials on file for future reference or in the event the present situation changes.

Sincerely,

GEORGE D. WOLF,
Head, Division of Humanities, Social Sciences and Education.

CLARK UNIVERSITY,
Worcester, Mass., January 4, 1972

Dr. GEORGE D. WOLF,
Capitol Campus,
Pennsylvania State University,
Middletown, Pa.

DEAR DR. WOLF: Last spring I applied for a position in Black History at your campus. I sent my credentials and in a few weeks received a reply that the position was filled and that my credentials were going to be kept on file for future reference. You can imagine my surprise at the recent AHA meeting in New York City when I saw an announcement for the position, once again, under your name.

This only leads me to conclude that for some reason I was not interviewed for the position. It can't be experience for I have been teaching Black History for over 5 years at the university level. It can't be my credentials as a scholar, for unlike most graduate students I have published during my graduate student life and most certainly will continue to do so as a professor. It can't be my personality because you never met me and don't know me. Thus, one can only conclude that you people will not interview me because I am White. This, of course, is a violation of the Civil Rights Act of 1964 (Equal Opportunity Employment Code).

Now I know that you will have many qualified candidates for your position. And I also know that you could easily interview me and then write me off as having complied under the law. But I wonder if you realize what you and so many administrators like you are doing to the academic profession in carrying out such discriminatory hiring policies. Such liberalism could well be catastrophic for higher education.

I am only asking that you allow me to compete with *all* candidates for the position in Black History. I have a sincere commitment to excellence in teaching combined with a well-balanced dedication to scholarship. I don't profess to have all of the answers to the problems of higher education today. Indeed, I have, in recent years, had my problems with Black students who question my right as a White scholar to teach them about their history. But isn't this to be expected as Blacks come to grips with their long-misplaced roots. It is to be less expected of college administrators who should know better and who should know what discrimination has produced in the past. At any rate my classes at Rutgers University in New Brunswick are largely Black and these students have come to accept me on my merits and abilities as a teacher. I am well-versed in a discipline that I love and which I refuse to abandon because of a temporary madness that has seized the academic profession.

If this letter seems angry, you're damn right!

Very sincerely,

MARTIN S. GOLDMAN, *Lecturer.*

JANUARY 24, 1972.

Mr. MARTIN S. GOLDMAN,
Department of History,
Clark University,
Worcester, Mass.

DEAR MR. GOLDMAN: Your letter of 4 January piqued my interest, to say the least. But time for an adequate reply has not been available until the present moment. Needless to say, your candidacy will be given the consideration it deserves in terms of the qualifications necessary for the position. Unfortunately, your letter is in error on several counts.

In the first place, the position which was advertised last year was filled by a fully qualified candidate who had been to our campus on previous occasions in conjunction with his work with VISTA. Furthermore, his Peace Corps experience in Africa, as well as his completion of graduate work in the Black Studies program at Ohio University, presented a leading candidate whom we settled upon quickly. One of the difficulties of higher educational administration is the necessity for decision and, in the case mentioned, we felt the candidate was what we were seeking and he has proven to be a good choice. This university is an equal opportunity employer and violations of anyone's civil rights, whether white or black, will not be passed over.

Incidentally, your lumping me together with "so many administrators like you" demonstrates guilt in the kind of action of which you accuse me. My hiring policies, I trust, have not been discriminatory in terms of whites, blacks, males or females. Qualified persons are still what we seek.

As far as the position is concerned, it is only partially a position relating to Black Studies. What we are seeking is a candidate who can teach Black literature and aesthetics, and perhaps participate in either our Education, Humanities or Social Science programs. On this count, I must confess that your credentials do not suggest that you are a likely candidate. However, if you feel to the contrary, we will be happy to hear from you again and will give your credentials the consideration which they merit.

Don't let your anger cloud your vision.

Sincerely,

GEORGE D. WOLF,
Head, Division of Humanities, Social Sciences and Education.

CLARK UNIVERSITY,
Worcester, Mass., February 6, 1972.

Dr. GEORGE D. WOLF,
Head, Division of Humanities, Social Sciences and Education, Pennsylvania State University, Middletown, Pa.

DEAR DR. WOLF: I would like to take this opportunity to partially apologize for jumping the gun on you in terms of the position which was advertised last spring in The New York Times and at the AHA Convention last December in

New York. It is obvious that, as a teacher of Afro-American History, I do not fit the requirements of "a candidate who can teach Black literature and aesthetics." I only wonder why such a position was advertised at the AHA where, to my limited knowledge, all candidates were trained as historians.

It is obvious, from your letter of January 24, that you are very sensitive to the qualifications of your prospective employees. Our only difference here, it would seem, is in how we evaluate academic credentials. You place, it appears from your letter, a great deal of weight upon a candidate's previous experience in terms of community-oriented services. Thus the fact that a man has been a VISTA worker, a Peace Corps volunteer, adds immeasurably to his chances of being hired. I differ with you simply in the fact that these things are in my estimation quite irrelevant in measuring an individual's academic talents in teaching and research. I would stand close to Eugene D. Genovese who wrote in his recent book In Red and Black, "What has to be resisted firmly is the insanity that claims . . . that the experience as a SNCC field organizer should be considered more important than a Ph.D. in the hiring of a professor of Afro-American History. This assertion represents a general contempt for all learning and a particular contempt for black studies as a field of study requiring disciplined, serious intellectual effort . . ." (PP. 223–224)

I hope you don't get the impression that I think that a Ph.D. entitles me to special consideration. I don't. One of the reasons that the state of American higher education is in a shambles today is because of the Ph.D. mania that has dominated our universities. However, I would hesitate to trade upon my experiences for 4 years as a teacher in black ghetto schools in order to acquire a decent academic position. As far as my academic credentials go these years mean absolutely nothing. I am, therefore, naturally skeptical of anyone who claims expertise in an area without having spent many years of teaching, reading, studying and research in the area. But I am afraid, that our differences will remain and this crazy profession will continue on its collision-course way. Again, I sincerely apologize for having misjudged what seems to be only a difference of opinion as to standards—a difference which must be allowed if academic freedom is to be maintained. I wish you luck with your search.

Sincerely,

MARTIN S. GOLDMAN.

THE AMERICAN JEWISH COMMITTEE,
Philadelphia, Pa., November 20, 1972.

Dr. GEORGE D. WOLF,
Head, Division of Humanities, Social Sciences and Education, The Pennsylvania State University, The Capitol Campus, Middletown, Pa.

DEAR DR. WOLF: This letter is with reference to your correspondence with Mr. Martin Goldman, an applicant for a position in Afro-American Studies with your faculty. I am enclosing a copy of correspondence dated January 24 from you to Mr. Goldman regarding this matter for your convenience.

The American Jewish Committee has taken a vigorous interest in problems relating to preferential treatment and quotas in hiring. It is because of this keen interest that we are asking your cooperation in developing the facts behind Mr. Goldman's application for a position with your faculty. Although Mr. Goldman has authorized us to file a complaint with the Equal Employment Opportunities Commission and the Pennsylvania Human Relations Commission, if the facts do not warrant such action on our part, we would not wish to do so.

We would, therefore, appreciate your advising us of the manner in which the position in which Mr. Goldman expressed interest was filled, and the dates and techniques surrounding the recruitment and interviewing processes.

Your prompt cooperation will be appreciated.

Sincerely,

MURRAY FRIEDMAN, *Regional Director.*

Enclosure.

NOVEMBER 29, 1972.

Mr. MURRAY FRIEDMAN,
Regional Director, The American Jewish Committee, Pennsylvania Building, Philadelphia, Pa.

DEAR MR. FRIEDMAN: I was intrigued by your letter of 20 November 1972, and certainly appreciate your "vigorous interest in problems relating to preferential treatment and quotas in hiring." However, in the case involving Martin Goldman, who authorized you to file a complaint with the Equal Employment Opportunities Commission and the Pennsylvania Human Relations Commission, I am afraid that the facts do not warrant such action on your part. Nevertheless, I am happy to supply you with whatever evidence I have relative to the case.

Enclosed are copies of Mr. Goldman's original inquiry of 2 May 1971, and my response of 13 May, indicating that the position had been filled. Also included is Mr. Goldman's letter the subsequent year, improperly dated as the content indicates—4 January 1971 (sic) 1972. My reply of 24 January 1972 is apparently in your possession since you sent me a copy of it. Finally, there is a copy of Mr. Goldman's letter of 6 February 1972 which was our final communication.

You will note that Mr. Goldman's 4 January letter takes me pretty much to task in the third paragraph, in a kind of guilt by association, which prompted my response. Furthermore, in his final communication to me, he expressed surprise that the position was advertised with the American Historical Association, when most reputable scholars know that the American Historical Association has been something of a home for American Studies people since the origin of that group. I, myself, have a degree in American Studies and teach in areas other than history, although being primarily historically trained. Incidentally, the offer was made to the successful candidate on the fifth of May in 1971, consequently, I am not even certain that Mr. Goldman's application had reached me at that point. As a matter of fact, the successful candidate was black and is still with us. In the final analysis, I can only repeat what I said to Mr. Goldman that my hiring policies have not been discriminatory in terms of whites, blacks, males, or females. We seek qualified persons.

Thank you for your inquiry and please let me know if you need any further information.

Sincerely,

GEORGE D. WOLF,
Head, Division of Humanities, Social Sciences and Educatio

Mr. O'HARA. Our last witness this morning is Lucy Sells, of the National Women's Caucus of Alameda County, Berkeley, Calif.

TESTIMONY OF LUCY SELLS, NATIONAL WOMEN'S CAUCUS OF ALAMEDA COUNTY, BERKELEY, CALIF.

Ms. SELLS. First, documentation of differential education achievement of women and minorities compared with white men.

These are the facts which document the systematic filtering of women and minorities out of the opportunity structure of higher education. While the facts are primarily about women, the processes which filter them out work even more intensely against minority students. Keep in mind the question of what happens differently to women and minority students and to white men that might account for sex and ethnic differences in educational achievement.

1. In a systematic random sample of freshmen admitted to Berkeley in fall 1972, 57 percent of the men had taken 4 years of mathematics in high school, including the trigonometry-analytic geometry sequence, compared with 8 percent of the women. This high school mathematics sequence is required for admission to the standard calculus course, which, in turn is required for an undergraduate major in every field at the university, except the traditionally female fields of humanities, social sciences, librarianship, social welfare, and education. Law is the only traditionally male field which doesn't require intensive mathematics as undergraduate preparation.

The math fact itself is changing, reflecting changing attitudes in society. By fall, 1973, 65 percent of the entering men, and 22 percent of the entering women had taken the trigonometry-analytic geometry sequence in high school. This may reflect the growing interest in the health sciences, and less sex role stereotyping on the part of high school counselors.

2. Among a class of upper division social science students at Berkeley, there was a large and statistically significant relationship between presence or absence of social support from teachers, parents, or peers, and pursuit of the fourth year of mathematics in high school.

3. Among students earning the bachelor's degree in the 21 largest letters and science departments, there is a strong and statistically significant relationship between having the standard calculus requirement in the curriculum, and having less than one-third of the degrees in the department earned by women.

4. The ethnic differences in choice of major based on the mathematics requirement are as dramatic as the sex differences. At Berkeley, 68 percent of the oriental men majored in physical sciences, life sciences, or mathematics, compared with 41 percent of the Caucasian men, and 37 percent of all other men. In contrast, 45 percent of the oriental women majored in these fields, compared with 17 percent of Caucasian and all other women—table VII, page 9 of "Strategies" paper, appendix II.

5. In the physical sciences at Berkeley 26 percent of the bachelor's degrees are earned by women. Only 11 percent of the applicants to graduate school are women. This statistically significant drop in the percentage of women from undergraduate to graduate levels is evidence of both differential aspirations among the students involved, and differential expectations on the part of faculty who might encourage them to pursue graduate careers.

6. At the same time women seem to be admitted to graduate departments in the same proportion in which they apply, and to receive financial support in the same proportion in which they apply.

7. A secondary analysis of data on Woodrow Wilson fellows who entered graduate school from 1958 to 1963 shows a 20-percent sex difference in dropouts from doctoral programs. This sex difference almost disappears among those who had second-year financial support, gets much larger among those who have children, and gets larger yet among those rated "excellent" by their faculty. There was no difference in the dropout rate of women who were rated "excellent" and that of men who were rated "average to dreadful." At a very minimum affirmative action requires that the achievements of women rated "excellent" might surpass those of men rated "average to dreadful." Fullfledged affirmative action will be achieved when the achievements of women rated "excellent" equal those of men rated "excellent"—table IV, page 74, "Strategies" paper.

8. There has been a dramatic reduction in the fourth-year doctoral dropouts among women at Berkeley. Among the entering class of 1962 25 percent of the men had dropped out of doctoral programs by the fourth year compared with 42 percent of the women. Among the entering class of 1968, 27 percent of the men had dropped out by the fourth year compared with 42 percent of the women. Among the entering class of 1968, 27 percent of the men had dropped out by the fourth year compared with 27 percent of the women. This can be attributed both to the powerful social support of the women's movement and to the fact that faculty are learning not to impose expectations and stereotypes based on the behavior of women in the 1950's and 1960's on women of the 1970's.

9. In a national survey of graduate students sponsored by the Carnegie Commission on Higher Education there are large and statisti-

cally significant sex differences in the percentage of students reporting that their primary faculty contact regards them as a colleague or apprentice. In psychology 72 percent of the men and 53 percent of the women reported such a relationship. In history it was 57 percent and 37 percent; in English it was 52 percent and 33 percent, and in mathematics, 39 percent and 22 percent. (Table VI, p. 17, Strategies.)

10. In the faculty sample of the same survey similar sex and discipline differences appear in the percentage reporting having had a faculty "sponsor" when looking for their first job out of graduate school.

Documentation is contained in the following papers in appendix II:

1. High school mathematics as the critical filter in the job market.
2. Strategies for achieving affirmative action.
3. Sex differences in graduate school survival.
4. Availability pools as the basis of affirmative action.

ANALYSIS OF 4 YEARS OF PARALYSIS BETWEEN THE DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE (HEW) AND INSTITUTIONS OF HIGHER EDUCATION (IHE)

This analysis is based on my 4 years of participant observation on affirmative action at Berkeley, from a variety of roles and perspectives:

1. As a researcher on filtering points in educational achievements, first of women, and subsequently on minorities.
2. As a woman graduate student struggling with the psychological, sociological, and economic implications of academic and professional success.
3. As a student member of the chancellor's advisory committee on the status of nonsenate academic women.
4. As a student member of the academic senate's committee on the status of women and minorities.
5. As a consultant on affirmative action for the University of California, on the Berkeley, Davis, San Diego, San Francisco, and Santa Barbara campuses.
6. As a consultant for HEW's Office of Civil Rights in developing guidelines for faculty recruitment, hiring, and promotion.

In my participation of discussions between and among students, faculty, and administrators I have observed 4 years of paralysis on affirmative action, which is just beginning to be resolved. The primary source of that paralysis was the conflict generated between and among three separate subcultures: the advocates, adversaries, and enforcers of affirmmative action. Discussion between and among the three groups took place in a context of mistrust, ill will, and closed communication generated by differences in perceptions of the goals and consequences of affirmative action, and in perceptions of the commitments and motivations of the other party.

The advocates of affirmative action are convinced that it is necessary to achieve the highest standards of scholarship and excellence, and that merit, rather than sex or ethnicity, should be the sole criterion for recruitment, hiring, and promotion. They are trying to develop ways of evaluating merit which don't build in the idea that being female, or belonging to an ethnic minority are demerits. Those who haven't yet tasted the rewards of the system are especially suspicious and hostile to the adversaries, whom they perceive as trying to exclude them from the system. Some are even suspicious of the enforcers, whom they perceive as not trying hard enough to include them in the system. Some even perceive the adversaries and enforcers in deliberate collusion to exclude them from the system.

The adversaries of affirmative action are convinced that their cherished values of scholarship and excellence will be destroyed by affirmative action. This comes from their misunderstanding that affirmative action means "Whenever you have a white man competing with a woman or ethnic for a job, preference must be given to the woman or ethnic, even though the white man is better qualified." In fact, Federal policy says that "In very limited instances only can preference be given to women and minorities: when there has been a history or pattern of exclusion, and/or discrimination, and if two candidates are equally qualified, only then can preference be given to the member of the minority group."

The enforcers of affirmative action are convinced that the adversaries have been recalcitrant on affirmative action because of their deliberate, conscious sexism and racism. Their paternalistic authoritarianism which assumes the worst about IHE, and about adversaries within those IHE is as fundamental to the problem as is the sexism and racism of which they accuse the adversaries.

Each group tends to think of itself as the hero or victim, and those above and below in the hierarchy of power and authority as the villains, regardless of position on the ladder.

In working with State and national organizations devoted to achieving affirmative action, I have discovered that the typology of advocates, adversaries, and enforcers of affirmative action which I had thought limited to the Berkeley situation is, in fact, applicable to all IHE affected by Federal policy. Moreover, the model of three separate subcultures talking past each other with different norms, values, styles of rhetoric, and political behavior holds up for large public universities, State colleges and universities, community colleges, and private colleges and universities.

The differential educational achievement of women and minorities is a societal problem, not one that can be solved simply by having you, the decisionmakers, crack the whip on HEW, the enforcers, to crack the whip on IHE to recruit, hire and promote women and minorities in proportion to their existence in the total population. In order to achieve those results, we must change the structure of society, so that automatic, implicit, unconscious assumptions about human beings are no longer defined in terms of sex, ethnic, and power and authority status categories.

The major themes emerging from my research on sex and ethnic differences in educational achievement are sexism, racism, and authoritarianism. They are the automatic, implicit, unconscious assumptions about human beings based on their sex, ethnic and status categories. They are so pervasive in the structure of society and personality that they are as invisible to those of us who are constrained by them as the air we breathe.

Sexism and racism are self-explanatory concepts. This thing I am labeling authoritarianism has to do with a profound sense of mistrust of people at different levels of power and authority from one's own. It consists of the automatic, unconscious, implicit expectation that persons above will behave like bad parents, either as bad fathers who will punish them, or as bad mothers who will neglect them. The second assumption is that persons below will behave as bad children, either as bad sons for compulsive rebellion or as bad daughters for compulsive docility. This phenomenon I have called misplaced familial authoritarianism is fundamental to the pathology of graduate student-faculty relations. I have observed a great deal of it in graduate school at Berkeley. I suspect that you have observed as much in your relations with the executive branch and its departments.

Sexism, racism and authoritarianism are internalized as need dispositions in the personalities of individual human beings. This calls for psychological solutions through raising people's awareness of their existence. Appendix III describes the process of consciousness-raising as it has developed among small groups in the women's movement.

Sexism, racism and authoritarianism are also institutionalized as role expectations based on stereotypes about human behavior based on sex, ethnicity and position in the power and authoritiy structure. This calls for sociological solutions, through a parallel process of organizational and institutional consciousness-raising, described in the political effectiveness paper in appendix IV. It has important implications for helping all social groups to achieve their own autonomy as responsible, creative, productive adults, independently of sex, ethnicity, or level of power and authority.

The conflict between and among the advocates, adversaries, and enforcers of affirmative action is exacerbated by the fact that you, as members of an important congressional Committee on Education are responding to conflicting demands from your own constituents. They are that you force HEW to do more on behalf of women and minorities, and that you force HEW not to commit reverse discrimination against white men. These goals need not be mutually exclusive, if we focus on the goal of freeing all persons to rise to the limits of talents and energies, independently of sex or ethnicity, as opposed to quotas, which build in exclusion, independently of talent and energy. Our efforts should be on freeing people to include themselves in the system, as well as freeing IHE to identify and rectify previous exclusionary practices.

My own work in affirmative action consists of gathering, analyzing, and disseminating whatever data I can get my hands on among the advocates, adversaries, and enforcers of affirmative action. The positive response from all three groups convinces me that sexism, racism, and even authoritarianism are veils of ignorance which can be lifted through an educational process which doesn't threaten people's sense of themselves as worthwhile human beings with accusations of blame and bad faith.

SUMMARY AND PROPOSALS FOR RESOLUTION OF THE PARALYSIS

As in all social controveries the cast of heroes, villains, and victims in the affirmative action drama depends on one's objective position in the power and authority structure and one's subjective experience of being included or excluded in that power and authority structure. Those women and minorities who experience themselves as included in the system are free to trust the good faith, intentions and will of IHE, HEW, and even of Members of Congress.

I have watched the subcommittee's hearings last week and read the transcripts from the earlier sessions. The performance of the affirmative action drama that I have seen at Berkeley has been repeated here in Washington. The actors are more articulate, the lines more cogent and precisely presented, and the overall performance more polished. However, I still see people from each perspective clinging to their own perception of the reality of affirmative action, and shutting out the perspectives of the others.

1. HEW and advocacy groups both insist that goals are not quotas.
2. HEW and advocacy groups both insist that lowering of standards is not required.
3. Adversary groups insist that goals are quotas.
4. Adversary groups insist that lowering of standards is inevitable because of their assumptions that department chairmen will take the easy way out rather than risk losing Federal funds.
5. Advocacy groups are frustrated that HEW and Congress have not done enough to improve the status of women and minorities.
6. Adversary groups are concerned that affirmative action has already produced reverse discrimination at the expense of white men.

First, I want to dispel the myth that there has been no real progress in the status of women and minorities at Berkeley, which has repeatedly been cast in the role of villain.

1. The dramatic decline in sex differences in doctoral programs reported earlier is evidence of a changing climate of expectations on the part of women students for themselves, as well as of a changing climate of faculty expectations for students.
2. The proportion of women on ladder level appointments has increased from 1969 to 1972:

	Percent
Full professor:	
1969	2
1972	3
Associate professor:	
1969	5
1972	7
Assistant professor:	
1969	5
1972	12

In academic year 1967–1968 3 percent of 124 new hires at the assistant professor level were women. In 1973–1974 27 percent of 74 new hires were women, although nationally the availability pool was around 20 percent. While the national availability pool was about 2 percent on minorities, 8 percent of the new hires were minorities. The provost assures me that affirmative action recruitment at Berkeley has increased the quality of new hires, not reduced it. I have similar data on Princeton, Stanford, and Yale with respect to percent and quality of new hires.

Second, I want to pick up on Professor Hook's theme of recruiting and hiring the best qualified person to do the job. I call your attention to the concept of differentiation of function of institutions of higher education. This has been most clearly spelled out in California's master plan for postsecondary education. Differentiation of function recognizes that major universities do something very different from State universities and colleges and community colleges.

The major function of universities is research—the creation of new knowledge—which keeps them at the cutting edge of civilization. The major function of the States universities and colleges in the California system is the transmission of existing knowledge. The major function of the community college system is to provide for smooth transition of students who might otherwise have been excluded from access to the university for a variety of reasons. A second function is the transmission of skills and technical training.

This formal recognition of the differentiation of function of IHE is not elitism, but rather, the most economical and effective division of labor and resources. It helps avoid duplication of function, as well as making it possible for institutions to meet the needs and aspirations of students.

Patterns of recruitment tend to differ among segments of postsecondary education. The qualities that make a person best qualified to do the job are quite different for a research-oriented university, a teaching college and a skill transmission and avenue for upward mobility institution.

Third, I want to dispel the myth that it is possible for department chairmen to take the easy way out by lowering standards rather than risk losing funds. If I were under consideration for an appointment at a major university the materials in appendixes I and II would be scrutinized and reviewed by (1) the departmental search committee, (2) the department chairmen and dean, (3) an ad hoc committee of five people from the faculty of the campus at large, (4) the budget committee itself comprising a dozen senior faculty members, (5) by the provost, (6) by the vice-chancellor, (7) by the chancellor.

Each review would be of the academic quality of the work, my teaching record, and my university and public service activities, and would be in competition with similar dossiers from other candidates. This gives you an idea of the care with which the search for best qualified person to do the job is conducted in major universities, with emphasis on research potential, productivity, and promise. Even if department chairmen were as spineless and irresponsible as adversaries assume them to be, there are six higher levels of review to insure that standards of quality will be upheld.

Recommendations:

1. The subcommittee is in a position to make a power contribution to the present impasse between IHE and HEW, and between advocates and adversaries of affirmative action. Whatever new legislation is adopted, it will be more effective if it is cast in positive language of facilitation instead of the negative language of enforcement. It is a subtle but profound difference, but frees all parties to look for and find the best in each other. Further, it frees them from the constraints of looking for and, hence, finding the worst in each other. Appendix V suggests a more constructive approach to helping people at all levels of IHE to recognize the need for effective affirmation action, and to come up with solutions to the difficult problems posed by civil rights obligations.

I respectfully point out that the assumption that department chairmen will take the easy way out is yet another example of not trusting people to behave as responsible, autonomous adults. I hope we can change this.

2. Make it clear that it is illegal as well as immoral to refuse to hire any person on the basis of sex or ethnicity. A graduated scale of fines would help get the point across.

3. Provide middle-range penalties short of total withdrawal of Federal funds for noncompliance.

4. Expand opportunities for remedial mathematics and remedial reading and writing skills to compensate for inequities and deficiencies in primary and secondary education, independent of sex or ethnicity.

5. In some ways the Federal Government has itself contributed to the sex differences in faculties through the GI bill of rights, which was rightfully used to reward men for years of faithful military service, although it was clearly a form of preferential treatment. I toss out for exploration the idea of a homemaker's bill of rights, to reward women for years of faithful and domestic service, to help them develop their potential contribution to solving pressing social and scientific problems once their children have left the nest.

6. We need a clear policy statement against all forms of discrimination in primary, secondary, and postsecondary education.

[Statement and appendices referred to follow:]

PREPARED STATEMENT OF LUCY W. SELLS, NATIONAL WOMEN'S CAUCUS OF ALAMEDA COUNTY, BERKELEY, CALIF.

Mr. Chairman, and members of the committee: My name is Lucy W. Sells. I'm a graduate student completing a dissertation on sex differences in educational achievement. I'm a political sociologist who specializes in problems of power and authority relationships in a variety of social systems: marriage, the family, the educational system, the economic system, and the political system. Appendix I documents my qualifications to testify, and my commitment to the goal of freeing all persons, independently of sex or ethnicity, to rise as far as their talents and energies will carry them, in educational, and hence occupational and political systems.

My testimony will consist of three major parts:

First, documentation of the differential educational achievements of women and minorities from those of white men.

Second, an analysis of the apparent four years of paralysis between the Department of Health, Education, and Welfare, and institutions of higher education.

Third, a proposal for resolving that paralysis, so that we might all work together to achieve our shared goals.

For brevity, the documentation based on my dissertation findings is presented in Appendix II.

DOCUMENTATION OF DIFFERENTIAL EDUCATIONAL ACHIEVEMENT OF WOMEN AND MINORITIES COMPARED WITH WHITE MEN

These are the facts which document the systematic filtering of women and minorities out of the opportunity structure of higher education. While the facts are primarily about women, the processes which filter them out work even more intensely against minority students. Keep in mind the question of "What happens differently to women and minority students and to white men that might account for sex and ethnic differences in educational achievement?"

1. In a systematic random sample of freshmen admitted to Berkeley in Fall, 1972, 57% of the men had taken four years of mathematics in high school, including the trigonometry-analytic geometry sequence, compared with 8% of the women. This high school mathematics sequence is required for admission to the standard calculus course, which, in turn is required for an undergraduate major in every field at the University, *except* the traditionally female fields of humanities, social sciences, librarianship, social welfare, and education. Law is the only traditionally male field which doesn't require intensive mathematics as undergraduate preparation.

The Math Fact is itself changing, reflecting changing attitudes in society. By Fall, 1973, 65% of the entering men, and 22% of the entering women had taken the trigonometry-analytic geometry sequence in high school. This may reflect the growing interest in the health sciences, and less sex role stereotyping on the part of high school counselors.

2. Among a class of upper-division social science students at Berkeley, there was a large and statistically significant relationship between presence or absence of social support from teachers, parents, or peers, and pursuit of the fourth year of mathematics in high school.

3. Among students earning the Bachelor's Degree in the twenty-one largest Letters and Science Departments, there is a strong and statistically significant relationship between having the standard calculus requirement in the curriculum, and having less than one third of the degrees in the department earned by women.

4. The ethnic differences in choice of major based on the mathematics requirement are as dramatic as the sex differences. At Berkeley, 68% of the Oriental men majored in the physical sciences, life sciences, or mathematics, compared with 41% of the Caucasian men, and 37% of All Other men. In contrast, 45% of the Oriental women majored in these fields, compared with 17% of Caucasian and All Other women. (Table VII, page 9 of *Strategies* paper, Appendix 11.)

5. In the physical sciences at Berkeley, 26% of the Bachelor degrees are earned by women. Only 11% of the applicants to graduate school are women. This statistically significant drop in the percentage of women from undergraduate to graduate levels is evidence of both differential aspirations among the students involved, and differential expectations on the part of faculty who might encourage them to pursue graduate careers.

6. At the same time, women seem to be admitted to graduate departments in the same proportion in which they apply, and to receive financial support in the same proportion in which they apply.

7. A secondary analysis of data on Woodrow Wilson Fellows who entered graduate school from 1958 to 1963 shows a twenty percent sex difference in dropouts from doctoral programs. This sex difference almost disappears among those who had second year financial support, gets much larger among those who have children, and gets larger yet among those rated "excellent" by their faculty. There was no difference in the dropout rate of women who were rated "excellent" and that of men who were rated "average to dreadful." At the very minimum, affirmative action requires that the achievements of women rated "excellent" might surpass those of men rated "average to dreadful." Full-fledged affirmative action will be achieved when the achievements of women rated "excellent" equal those of men rated "excellent." (Table IV, page 14, *Strategies* paper.)

8. There has been a dramatic reduction in the fourth year doctoral dropouts among women at Berkeley. Among the entering class of 1962, 22% of the men had dropped out of doctoral programs by the fourth year, compared with 42% of the women. Among the entering class of 1968, 27% of the men had dropped out by the fourth year, compared with 27% of the women. This can be attributed both to the powerful social support of the women's movement, *and* to the fact that faculty are learning not to impose expectations and stereoypes based on the behavior of women in the 1950's and 1960's on women of the 1970's.

9. In a national survey of graduate students sponsored by the Carnegie Commission on Higher Education, there are large and statistically significant sex differences in the percentage of students reporting that their primary faculty contact regards them as a colleague or apprentice. In Psychology, 72% of the men, and 53% of the women reported such a relationship. In History, it was 57% and 37%, in English it was 52% and 33%, and in Mathematics, 39% and 22%. (Table VI, page 17, *Strategies.*)

10. In the faculty sample of the same survey, similar sex and discipline differences appear in the percentage reporting having had a faculty "sponsor" when looking for their first job out of graduate school.

Documentation is contained in the following papers in Appendix II:

1. High School Mathematics as the Critical Filter in the Job Market.
2. Strategies for Achieving Affirmative Action.
3. Sex Differences in Graduate School Survival.
4. Availability Pools as the Basis of Affirmative Action.

ANALYSIS OF 4 YEARS OF PARALYSIS BETWEEN THE DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE (HEW) AND INSTITUTIONS OF HIGHER EDUCATION (IHE)

This analysis is based on my four years of participant observation on Affirmatice Action at Berkeley, from a variety of roles and perspectives:

1. As a researcher on filtering points in educational achievements, first of women, and subsequently, on minorities.
2. As a woman graduate student struggling with the psychological, sociological, and economic implications of academic and professional success.
3. As a student member of the Chancellor's Advisory Committee on the Status of Non-Senate Academic Women.
4. As a student member of the Academic Senate's Committee on the Status of Women and Minorities.
5. As a consultant on Affirmative Action for the University of California, on the Berkeley, Davis, San Diego, San Francisco, and Santa Barbara campuses.
6. As a consultant for HEW's Office of Civil Rights in developing guidelines for faculty recruitment, hiring, and promotion.

In my participation of discussions between and among students, faculty, and administrators, I have observed four years of paralysis on affirmative action, which is just beginning to be resolved. The primary source of that paralysis was the conflict generated between and among three separate sub-cultures: The *Advocates*, *Adversaries*, and *Enforcers* of Affirmative Action. Discussion between and among the three groups took place in a context of mistrust, ill will, and closed communication generated by differences in perceptions of the goals and consequences of affirmative action, and in perceptions of the commitments and motivations of the other party.

The *Advocates* of Affirmative Action are convinced that it is necessary to achieve the highest standards of scholarship and excellence, and that merit, rather than sex or ethnicity, should be the sole criterion for recruitment, hiring, and promotion. They are trying to develop ways of evaluating merit which don't build in the idea that being female, or belonging to an ethnic minority are demerits. Those who haven't yet tasted the rewards of the system are especially suspicious and hostile to the Adversaries, whom they perceive as trying to exclude them from the system. Some are even suspicious of the Enforcers, whom they perceive as not trying hard enough to include them in the system. Some even perceive the Adversaries and Enforcers in deliberate collusion to exclude them from the system.

The *Adversaries* of Affirmative Action are convinced that their cherished values of scholarship and excellence will be destroyed by Affirmative Action. This comes from their misunderstanding that Affirmative Action means "Whenever you have a white man competing with a woman or ethnic for a job, preference must be given to the woman or ethnic, even though the white man is better qualified." In fact, Federal policy says that "In very limited instances only can preference be given to women and minorities: when there has been a history or pattern of exclusion, *and* or discrimination, *and* if two candidates are equally qualified, only then can preference be given to the member of the minority group."

The *Enforcers* of Affirmative Action are convinced that the Adversaries have been recalcitrant on affirmative action because of their deliberate, conscious sexism and racism. Their paternalistic authorization which assumes the worst about IHE, and about Adversaries within those IHE is as fundamental to the problem as is the sexism and racism of which they accuse the Adversaries.

Each group tends to think of itself as the Hero, or victim and those above and below in the hierarchy of power and authority as the Villains, regardless of position on the ladder.

In working with state and national organizations devoted to achieving Affirmative Action, I have discovered that the typology of Advocates, Adversaries, and Enforcers of Affirmative Action which I had thought limited to the Berkeley situation is, in fact, applicable to all IHE affected by Federal policy. Moreover, the model of three separate sub-cultures talking past each other with different norms, values, styles of rhetoric, and political behavior holds up for large public universities, state colleges and universities, community colleges and private colleges and universities.

The differential educational achievement of women and minorities is a societal problem, not one that can be solved simply by having you, the Decision Makers crack the whip on HEW, the Enforcers, to crack the whip on IHE to recruit, hire, and promote women and minorities in proportion to their existence in the total population. In order to achieve those results, we must change the structure of society, so that automatic, implicit, unconscious assumptions about human beings are no longer defined in terms of sex, ethnic, and power and authority status categories.

The major themes emerging from my research on sex ethnic differences in educational achievement are "sexism," "racism," and "authoritarianism." They are the automatic, implicit, unconscious assumptions about human beings based on their sex, ethnic, and status categories. They are so pervasive in the structure of society and personality that they are as invisible to those of us who are constrained by them as the air we breathe.

"Sexism" and "racism" are self explanatory concepts. This thing I'm labelling "authoritarianism" has to do with a profound sense of mistrust of people at different levels of power and authority from one's own. It consists of the automatic, unconscious, implicit expectation that persons above will behave like bad parents, either as bad fathers who will punish them, or as bad mothers, who will neglect them. The second assumption is that persons below will behave as bad children, either as bad sons for compulsive rebellion, or as bad daughters for compulsive docility. This phenomenon I've called "misplaced familial authoritarianism" is fundamental to the pathology of graduate-student faculty relations. I've observed a great deal of it in graduate school at Berkeley. I suspect that you've observed as much in your relations with the Executive branch and its Departments.

"Sexism," "racism," and "authoritarianism" are internalized as need dispositions in the personalities of individual human beings. This calls for psychological solutions, through raising people's awareness of their existence. Appendix III describes the process of consciousness raising as it has developed among small groups in the women's movement.

"Sexism," "racism," and "authoritarianism" are also institutionalized as role expectations based on stereotypes about human behavior based on sex, ethnicity, and position in the power and authority structure. This calls for sociological solutions, through a parallel process of organizational and institutional consciousness raising, described in the Political Effectiveness paper in Appendix IV. It has important implications for helping all social groups to achieve their own autonomy as responsible, creative, productive adults, independently of sex, ethnicity, or level of power and authority.

The conflict between and among the Advocates, Adversaries, and Enforcers of Affirmative Action is exacerbated by the fact that you, as members of an important Congressional Committee on Education are responding to conflicting demands from your own constituents. They are that you force HEW to do more on behalf of women and minorities, and that you force HEW not to commit reverse discrimination against white men. These goals need not be mutually exclusive, if we focus on the goal of freeing all persons to rise to the limits of talents and energies, independently of sex or ethnicity, as opposed to quotas, which build in exclusion, independently or talent and energy. Our efforts should be on freeing people to include themselves in the system, as well as freeing IHE to identify, and rectify previous exclusionary practices.

My own work in Affirmative Action consists of gathering, analysing, and disseminating whatever data I can get my hands on, among the Advocates, Adversaries, and Enforcers of Affirmative Action. The positive response from all three groups convinces me that "sexism," "racism," and even "authoritarianism" are veils of ignorance which can be lifted through an educational process which doesn't threaten people's sense of themselves as worthwhile human beings with accusations of blame and bad faith.

PROPOSAL FOR RESOLVING THE PARALYSIS

(This section will be re-written in the context of observing the testimony of Advocates, Adversaries on September 17, 19, and 20, and of reading the testimony of Enforcers which occurred earlier in the summer.)

SUMMARY AND PROPOSALS FOR RESOLUTION OF THE PARALYSIS

As in all social controversies, the cast of Heroes, Villains, and Victims in the Affirmative Action Drama depends on one's objective position in the power and authority structure, and one's subjective experience of being included or excluded in that power and authority structure. Those women and minorities who experience themselves as included in the system are free to trust the good faith, intentions, and will of IHE, HEW, and even of Members of Congress.

"I've watched the Subcommittee's Hearings last week, and read the transcripts from the earlier sessions. The performance of the Affirmative Action Drama that I've seen at Berkeley has been repeated here in Washington. The actors are more articulate, the lines more cogent and precisely presented, and the overall performance more polished. However, I still see people from each perspective clinging to their own perception of the reality of affirmative action, and shutting out the perspective of the others.

1. HEW and Advocacy groups both insist that goals are not quotas.
2. HEW and Advocacy groups both insist that lowering of standards is not required.
3. Adversary groups insist that goals are quotas.
4. Adversary groups insist that lowering of standards is inevitable, because of their assumption that Department Chairmen will "take the easy way out", rather than risk losing Federal funds.
5. Advocacy groups are frustrated that HEW and Congress have not done enough to improve the status of women and minorities.
6. Adversary groups are concerned that Affirmative Action has already produced reverse discrimination at the expense of white men.

First, I want to dispel the myth that there has been no real progress in the status of women and minorities at Berkeley, which has repeatedly been cast in the role of Villain.

1. The dramatic decline in sex differences in doctoral programs reported earlier is evidence of a changing climate of expectations on the part of women students for themselves, as well as of a changing climate of faculty expectations for students.
2. The proportion of women on ladder level appointments has increased from 1969 to 1972.

	Percent
Full professor:	
1969	2
1972	3
Associate professor:	
1969	5
1972	7
Assistant professor:	
1969	5
1972	12

In Academic year 1967–1968 3% of 124 new hires at the Assistant Professor level were women. In 1973–1974, 27% of 74 new hires were women, although nationally, the Availability Pool was around 20%. While the national Availability Pool was about 2% on minorities, 8% of the new hires were minorities. The Provost assures me that Affirmative Action recruitment at Berkeley has increased the quality of new hires, not reduced it. I have similar data on Princeton, Stanford, and Yale, with respect to percent and quality of new hires.

Second, I want to pick up on Professor Hook's theme of recruiting and hiring the best qualified person to do the job. I call your attention to the concept of differentiation of function of institutions of higher education. This has been most clearly spelled out in California's Master Plan for Postsecondary Education. Differentiation of function recognizes that major universities do something very different from state universities and colleges and community colleges. The major function of universities is research—the creation of new knowledge—which keeps them at the "cutting edge of civilization." The major function of the State Universities and Colleges in the California system is the transmission of existing knowledge. The major function of the Community College system is to provide for smooth transition of students who might otherwise have been excluded from access to the University for a variety of reasons. A second function is the transmission of skills and technical training.

This formal recognition of the differentiation of function of IHE is not elitism, but rather, the most economical and effective division of labor and resources. It helps avoid duplication of function, as well as making it possible for institutions to meet the needs and aspirations of students.

Patterns of recruitment tend to differ among segments of Postsecondary Education. The qualities that make a person "Best qualified to do the job" are quite different for a research oriented university, a teaching college, and a skill transmission and avenue for upward mobility institution.

Third, I want to dispel the myth that it is possible for Department Chairmen to "take the easy way out" by lowering standards rather than risk losing Federal funds.

If I were under consideration for an appointment at a major university the materials in Appendices I and II would be scrutinized and reviewed by:

First, the departmental search committee.

Second, the department Chairman and Dean.

Third, an ad hoc committee of five people from the faculty of the campus at large.

Fourth, the Budget Committee, itself comprising a dozen senior faculty members.

Fifth, by the Provost.

Sixth, by the Vice-Chancellor.

Seventh, by the Chancellor.

Each review would be of the academic quality of the work, my teaching record, and my university and public service activities, and would be in competition with similar dossiers from other candidates. This gives you an idea of the care with which the search for 'Best qualified person to do the job' is conducted in major universities, with emphasis on research potential, productivity, and promise. Even if department chairmen were as spineless and irresponsible as adversaries assume them to be, there are six higher levels of review to ensure that standards of quality be upheld.

1. The subcommittee is in a position to make a powerful contribution to the present impasse between IHE and HEW, and between Advocates and Adversaries of Affirmative Action. Whatever new legislation is adopted, it will be more effective if it is cast in positive language of "Facilities" instead of the negative language of "Enforcement." It is a subtle, but profound difference, but frees all parties to look for, and find the best in each other. Further, it frees them from the constraints of looking for, and hence finding, the worst in each other.* I respectfully point out that the assumption that department chairmen will 'take the easy way out' is yet another example of not trusting people to behave as responsible, autonomous adults. I hope we can change this.

2. Make it clear that it is illegal as well as immoral to refuse to hire any person on the basis of sex or ethnicity. A graduated scale of fines would help get the point across.

3. Provide middle-range penalties short of total withdrawal of Federal funds for non-compliance.

4. Expand opportunities for remedial mathematics, and remedial reading and writing skills to compensate for inequities and deficiencies in primary and secondary education, independently of sex or ethnicity.

5. In some ways the Federal Government has itself contributed to the sex differences in faculties, through the GI Bill of Rights, which was rightfully used to reward men for years of faithful military service, although it was clearly a form of preferential treatment. I toss out for exploration the idea of a Homemaker's Bill of Rights, to reward women for years of faithful domestic service, to help them develop their potential contribution to solving pressing social and scientific problems once their children have left the nest.

6. We need a clear policy statement against all forms of discrimination in primary, secondary, and postsecondary education.

APPENDIX I

Lucy Watson Sells, Berkeley, Calif., Social Security No. 569–40–5460

EDUCATION, ALL AT UNIVERSITY OF CALIFORNIA, BERKELEY

B.A., June 1962, with honors, in Communication and Public Policy.

M.A., December, 1967, in Sociology.

Fields of specialization for the Oral Examination, May 25, 1971 were: Research Methodology, with Charles Y. Glock, Chairman; Political Sociology, with Jeffery

---

*Appendix V suggests a more constructive approach to helping people at all levels of IHE to recognize the need for *effective* affirmative action, and to come up with solutions to the difficult problems posed by civil rights obligations.

M. Paige; Sociology of Education, with Martin A. Trow; and Systematic Sociological Theory, with Neil J. Smelser.

Filed for doctoral candidacy March 1, 1973. Dissertation on Sex and Discipline Differences in Doctoral Attrition near completion, with Neil J. Smelser as Chairman.

RESEARCH EXPERIENCE, ALL AT UNIVERSITY OF CALIFORNIA, BERKELEY

Assistant Specialist, Institute of Governmental Studies, Multi-campus Universities Project. 4–74—6–74

Coordinator, Project to evaluate and improve undergraduate education, for the Academic Affairs Council of the ASUC. 1–74—6–74

Senior Administrative Analyst, Affirmative Action Planning Group. 4–73—6–73

Research Assistant, Academic Senate Sub-Committee on the Status of Women. 5–69—12–69

Postgraduate Research Sociologist, III, Survey Research Center, Librarian for International Data Library and Reference Service. 5–69—9–69

Research Assistant for National Science Foundation survey of the behavioral and social sciences. February, 1969

Project Director for Associated Students of the University of California. Pilot study of student-faculty relations among undergraduates. 5–67—9–67

Postgraduate Research Sociologist, I, Center for Research and Development in Higher Education. Wrote manual on questionnaire design and analysis; designed questionnaire for study of higher education in Wisconsin. 1–67—9–67

Research Assistant, Center for Research and Development in Higher Education. Study of the aftermath of the Free Speech Movement at Berkeley. 7–66—9–66

Research Assistant, Institute of Business and Economic Research. Survey of Panel Studies in Market Research. 6–65—9–65

Research Assistant, Survey Research Center. Cleaning data for loading to computer tapes. 6–64—9–64

Interviewer, Survey Research Center. Conducted 99 intensive hour long interviews on drivers' attitudes toward use of seat belts. 6–63—9–63

TEACHING EXPERIENCE, ALL AT UNIVERSITY OF CALIFORNIA, BERKELEY

Associate, Social Science 100ABC, teaching one seminar on Changing Roles of Women, and one on Education and Society. 9–69—6–70

Teaching Assistant, Sociology 105, Introductory Research Methods. 6–65—8–65

Teaching Assistant, Sociology 201, Graduate Methodology requirement. 9–64—6–65

Teaching Assistant, Sociology 40, Introductory Statistics, and Sociology 105, Introductory Research Methods. 9–63—6–64

AWARDS AND FELLOWSHIPS

American Association of University Women Fellowship. 7–71—6–72

Soroptimist Fellowship to study for the Orals Examination. 1–71—6–72

PROFESSIONAL SOCIETIES

American Association for Higher Education, American Sociological Association, American Association for the Advancement of Science, California Women in Higher Education, Comparative and International Education Society, Sociologists for Women in Society, Women's Equity Action League.

OTHER ORGANIZATIONS

National Women's Political Caucus of Almeda County, Berkeley Women's Democratic Forum.

APPOINTMENTS INVOLVING PROFESSIONAL SOCIETIES

Chair, Research Committee, Sociologists for Women in Society, 1971–72, 1972–73, 1974–75.

Chair, Education Committee, Sociologists for Women in Society, 1973–74.

Institutional Representative to Affirmative Goals and Actions Committee of the Association of Women in Science, 1973–74, 1974–75.

Coordinator, California Women in Higher Education, January 1974, to present.

Steering Committee, Women's Caucus, American Association for the Advancement of Science, February, 1974 to present.

APPOINTMENTS AT THE UNIVERSITY OF CALIFORNIA

Appointed to Sub-Committee on Student Needs, Fall 1973.

Appointed to Demography Review Committee, Spring 1973.

Appointed to Search Committee for Affirmative Action Coordinator, Spring, 1973.

Appointed to Academic Senate Committee on Academic Planning, 1972–73, 1973–74, 1974–75.

Appointed to ASUC Academic Affairs Council, 1972–73, 1973–74, 1974–75.

Chair, Graduate Assembly Committee on the Status of Women, 1972–73, 1974–75.

Appointed to Academic Senate Committee on the Status of women, 1971–72, 1972–73, 1973–74.

Appointed to Chancellor's Advisory Committee on the Status of Women, 1971–72, 1972–73.

Elected Secretary-Treasurer, Graduate Assembly, 1971–72.

CONSULTANTSHIPS, COORDINATORSHIPS, AND FACILITATORSHIPS

Affirmative Action Consultation, for University of California, San Francisco, two hours, June 11, 1974.

Affirmative Action Consultation, for University of California, Davis, two days, May 21, 22, 1974.

Affirmative Action Consultation for University of California, San Diego, three hours, May 18, 1974.

Affirmative Action Consultation, for University of California, Santa Barbara, Women's Assembly, two days, March 15, 16, 1974.

Affirmative Action Consultation for U.S. Department of Health, Education, and Welfare, six days, March 4–9, 1974.

Statistical Consultation for Chancellor's Advisory Committee on the Status of Women, University of California, San Francisco, three hours, February 12, 1974.

Statistical Consultation for Management Analysis Group, University of California, Berkeley, six hours, January, 1974.

Facilitator, Workshop on Techniques on Data Collection for Institutional Research on the Status of Women, at Conference on Women in California Higher Education, University of California, Irvine, December 1, 1973.

Co-facilitator of Graduate Women's Project, Spring 1973, sponsored by the Women's Center and the Affirmative Action Office.

Coordinator of Workshops, Conference, Women: Breaking the Shackles, University of California, Berkeley, Boalt Hall, January 31, 1970.

APPENDIX II

HIGH SCHOOL MATHEMATICS AS THE CRITICAL FILTER IN THE JOB MARKET

We know that the job market is dismal for untrained people. We know that it is somewhat better for people with high school and college degrees. We know that the fields which are opening up in the next ten or fifteen years are based on mathematics training. We know that certain groups of students are less likely to take any more mathematics in high school than is required for admission to the University. These include girls and non-Asian minority students.

A study of admission applications of Berkeley Freshmen shows that while 57% of the boys had taken four years of high school math (first year algebra, geometry, second year algebra, trigonometry and solid geometry), only 8% of the girls had done so.

The four year mathematics sequence is required for admission to Mathematics 1A at Berkeley, which in turn is required for majoring in every field at the University of California *except* the traditionally female, and hence lower paying, fields of humanities, social sciences, education, and social welfare.

We do not know what causes these large differences in mathematics preparation. The following hypotheses need to be tested:

1. Sex and ethnic differences in ability;
2. Sex and ethnic differences in motivation;
3. Sex and ethnic differences in career aspirations;
4. Sex and ethnic differences in parental encouragement;
5. Sex and ethnic differences in peer support; and
6. Differences in counselor encouragement and advice, depending on sex or ethnicity of student.

Two small pilot projects conducted at Berkeley are summarized on the next few pages. The first examines applications for admission for sex differences in high school mathematics preparation. The second provides evidence for the effect of social support among members of an upper division social science class.

PILOT TEST OF SEX DIFFERENCES IN HIGH SCHOOL MATHEMATICS PREPARATION

This pilot study was conducted to test the investigator's long standing contention that inadequate preparation in mathematics presents a serious constraint in choice of undergraduate major in college. It was hypothesized that girls applying for admission at Berkeley would be less likely to have taken advanced mathematics than boys.

A systematic random sample of names was drawn from the applicants for admission as Freshmen at Berkeley for the Fall of 1972. The folders were pulled from the files, and coded by sex and number of years of high school mathematics taken by the applicant. Some students take only the minimum entrance requirement of two years, some take three years, and some take four years. The distribution is presented below:

YEARS OF HIGH SCHOOL MATH BY SEX, 1972

	Berkeley applicants for admission as freshmen		
	Boys	Girls	Total
Mathematics (percent):			
2 years	7	36	21
3 years	36	56	46
4 years	57	8	33
Total	100	100	100
Number	42	39	81

Source: Berkeley admissions office.

The difference of forty-nine percentage points between boys and girls among those who took four years of mathematics is striking, and statistically significant at the .001 level. $X^2=19.942$ with two degrees of freedom.

Pilot Study of Attitudes toward Mathematics

This is a summary of an exploratory pilot project on attitudes towards mathematics. A questionnaire was distributed to the members of an upper-division social science class. It contained questions about performance in elementary school, high school; expectations and encouragement by teachers, parents and peers; whether or not respondents had taken mathematics beyond the geometry requirement in high school; and an open ended question on "What do you consider to be the most important factors which influence your interest and aptitude for doing mathematics?"

There were 34 women and 4 men, with no sex differences in the responses.

The first table shows the relationship between encouragement by parents, teachers, or peers, and whether or not students took mathematics beyond the admissions requirements for the University of California.

ADVANCED HIGH SCHOOL MATHEMATICS BY SOCIAL SUPPORT

	Some social support	No social support	Total
Took advanced math	13	7	28
Did not take any advanced math	1	17	10
Total	14	24	38

There is a strong (Q=.94) and statistically significant ($X^2=13.87$, ——.001 with 1 degree of freedom) relationship between social support from teachers, parents, and peers, and the pursuit of advanced mathematics courses in high school.

The second table shows the relationship between encouragement by parents, teachers, or peers, and performance in the advanced mathematics courses.

	Some social support	No social support	Total
A's and B's	13	3	16
C's and D's		4	4
Total	13	7	20

Again, the relationship between social support and performance in advanced high school mathematics is strong (Q=1.00) and statistically significant.

While it is not possible to generalize beyond the small sample of social science undergraduates, the relationships between social support, taking advanced high school mathematics, and performing well in it are striking. They suggest the need for an experimental project designed to increase the level of social support for those undertaking high school mathematics.

OPEN-ENDED RESPONSES TO "IN SUMMARY, WHAT DO YOU CONSIDER TO BE THE MOST IMPORTANT FACTORS WHICH INFLUENCED YOUR INTEREST AND APTITUDE FOR DOING MATHEMATICS?

1. From those who took advanced math, and did well in it

"Good grades and encouragement of teachers. Also I simply enjoyed it. I do know that if kids were not especially interested in taking more math, high school counsellors did not push them to."

"I did well in math in my pre-high school year & had confidence in my ability to handle it in high school. I was encouraged by my teachers in high school but was not encouraged (in fact discouraged) to consider a college major in math."

"Self-motivation and parental support. Also competition between all of the kids (over 200) in the advanced classes in my high school. We all took the same courses. It never occured to me that I couldn't do well in math—only that more effort might be required than say in English."

"Mainly, my ability to do well in math. Also my counselor and my parents encouraged me to take higher levels of math as preparation for college."

"I had planned to discontinue math after the minimum university requirement of two years, however because of a good math department I continued 'just in case' my interest headed in that direction—also peers decided to continue. However, by senior year I was only female in class."

"I did well in Jr. High, my parents were pleased. I took 3 years of math partly because I knew I did fairly well in the field & I wished to have a good background for college. There was encouragement to take math & science, and *all* the college-prep courses."

"I did well in math because I have an organized mind. I have received an 'A' in almost every math class I have taken, including college logic. But my major is English, in which I did consistently well, but not with a straight 'A'. The dichtomy must mean something in my socialization which I cannot put my finger on."

"I feel I have an inborn feel for numbers. I enjoy calculations and although many male classmates felt competition, this never bothered me. I don't ever remember any discouragement toward mathematics. I was constantly encouraged from all sides. I must add that I was almost a math major, but decided to use it practically instead." (!)

"My father and male math teachers were most encouraging and then most discouraging as I did not want to continue in a field which seemed to stress abstract thought without concern with its relationship to personal experience. They saw my interests in other fields as impractical, silly, sentimental. I rebelled and discontinued my math program."

"The enthusiasm of the teacher for his subject & his or her ability to communicate it to me and my fellow students. Also helps to have fellow students excited about their work."

2. From those who took advanced math, and did poorly in it

"I felt less intelligent than males and some females in the class, but this gave me incentive. I still feel this way, but no longer get incentive from this inferior position. A math teacher called me stupid in front of the class once and this had a great negative effect on my opinion of my intelligence."

"My first and half of my second year of High School was in a very large co-ed school. Classes in math were mainly boys. Few girls planned college careers. In Soph year I went to a small convent HS for girls. My teachers were nuns. I did very well that year in my math classes, compared to the previous experience. I then transfered to a co-ed religious school. All classes were segregated *except* for math and science, where the school felt they would not have enough women enrolled to warrant an all-women's class. We had a man teacher, it was predominantly a men's class. That year I failed Algebra III & IV. So did many of the other women in the class."

"General feeling from parents that all the members of the family did well in the humanities, poorly in math. This was not a sexist orientation, but very influential. Have since found out that I have a very strong natural bent for math. I grew up feeling that I was not inclined toward math—feeling that other academic areas were more interesting—that I wouldn't have much use for a lot of math—all this even though I did very well in Arithmetic in early school years. My interest in math consistently declined—feelings from peers and from parent were anti-math—not overtly sexist—nevertheless I never considered getting a degree in a field that was predominantly a male field—probably because of a mostly covert sense of the feminine role—*absolutely no encouragement* from teachers, parents, peers or anyone."

"My math teachers in high school were mostly men. I remember them as being very cold, impersonal, apathetic of my existence as anything other than a math student. And in the fifth grade when math didn't sink in right away I became very discouraged. According to the tests I've taken I'm supposed to be getting A's in math."

In first grade my teacher told me I was stupid because I didn't understand arithmetic, but offered me no help with it. I know I hated the teacher from that point on and possibly I also hated math."

3. *From those who did not take advanced math in high school*

"My good aptitude for math was not encouraged. It was generally ignored and not stressed. I was pushed into fields of social science. If I had been encouraged to continue in math, I would have continued. But my straight 'A's in math were noticed by no one. My social science 'A's were heartily encouraged."

"My parents and teachers never encouraged and in some cases, discouraged my interest in any profession. (They assumed I would marry and have children.) I never saw any need for math beyond the beginning levels because I did not intend to go into any profession requiring it. I was, at one time in high school actively interested in chemistry and university work in pharmacy, but my chemistry teacher ignored it and did not respond to my stated interests. (I got A's in Chemistry.) and my parents felt my ambitions were foolish, so I gave up my first interest in chemistry, and the second interest in business administration, and chose education!"

"None. Everyone discouraged me."

"Everyone told me it was hard and complicated. Although I got good grades in it I didn't really apply myself and very early believed that I didn't understand it and it was over my head."

"I had very poor, apathetic math teachers who never gave technical or psychological help. There was no inspiration to learn and no help when I didn't understand something."

"Parochial school 1–8 gave excessive drill and emphasis on efficiency and skill rather than math for fun and creativity."

"My teachers were usually women—then suddenly in 7th and 8th grade there were men teachers and they all taught math or science. Something was going on here and it scared me, so I avoided science and math. The message wasn't verbal but it was clear. (Influences:) Socialization factors. And fear. It's difficult to step confidently into what is obviously male territory if you're confused about the necessity of taking the course at all, you're unsure about how well you'll do, (if obviously intelligent women refuse math then there must be something magical and terrible about it that only men can handle), you're not even sure you like math. "What a bother," you think, and you take drama."

"Inability to ask questions, fear of looking stupid, considering the unimportance of math in the future for me. Since it was unimportant for me (for various reasons) to pursue math and I had average performance in math most attitudes were neutral but as for myself I was (and am) fearful of math, science (almost mystically) I discourage myself thinking I could not do well."

"My neutrality turned to dislike of mathematics when I began Algebra. Also my interests became focused upon my social life, so the subjects that I felt to be difficult I avoided as much as possible. Math, especially the higher maths, gave me some difficulty. Probably the only high school subject I had to apply much effort at—so I steered away from math and took subjects that afforded me no difficulty."

"I was the top student in my 8th grade class, and even won prizes. I thought I would continue in mathematics. Boring, disinterested teachers led to my disenchantment with mathematics, combined with a growing interest in social sciences and humanities. I could have passed any math class offered, but it was my choice, and I chose not to continue in math."

"Poor instruction, uninterested, uninspired by teachers; lack of encouragement from home (except sister tried to help but she could not help enough); my attitude was completely defeatist."

"In the 4th grade I was a slow learner and was placed in remedial math from which I never escaped. There were more boys than girls in my class and we remained together through 12th grade. (Once you get behind in arithmetic, it is difficult for the teacher you get later to catch you up.) I took math every year in Jr. High and High School, and ended up a senior in geometry with 9th graders."

"When in the third grade I missed two weeks of school during which multiplication and division were introduced. Since then I have never regained any confidence in the field. The interest has always been lagging and the aptitude, if any, unfound."

"Too frustrating. Could not see any relevance in working with figures."

"There was a kind of (basically unspoken) pressure from peers, parents, faculty, etc. for males at my school to continue, but a smaller amount of pressure for females. (Females were never discouraged, though, and frequently encouraged.)"

STRATEGIES FOR ACHIEVING AFFIRMATIVE ACTION*

(By Lucy W. Sells)

This paper is an attempt to clarify the goals, specify the means, and delineate some of the resources available for effective achievement of affirmative action on behalf of women and minorities in postsecondary education.

It consists of a presentation of the facts which document the need for affirmative action; a sociological analysis of the current state of paralysis in efforts to achieve it; and strategies for changing the climate of social opinions, expectations, and aspirations so profoundly, that by 1980, the concept of affirmative action will no longer be necessary.

My goal for affirmative action is that we might achieve a society in which the educational and occupational opportunities and achievements of women and minorities might equal those of WAMP's and JIM's. WAMP's are the class of White Anglo Male Protestants, and JIM's are the class of Jewish Intellectual Males. It is these two groups, rather than WASP's who have been most favored in levels of educational, and hence, occupational achievement.

1. THE FACTS WHICH DOCUMENT THE NEED FOR AFFIRMATIVE ACTION

These are the facts which document the social climate of different attitudes, beliefs, and expectations about the performance and aspirations of women and minority students. Effective affirmative action at faculty hiring levels rests ultimately on increasing availability pools at each critical hiring point implicit in the facts.

The first filtering point is adequate high school mathematics preparation, so people can keep their options open as long as possible. The University of California requires one year of high school algebra, and one year of plane geometry for admission as entering freshman. In a systematic random sample of Freshmen admitted to Berkeley in the Fall of 1972, 57% of the men had taken four full years of math in high school, including the trigonometry and solid geometry sequence, compared with 8% of the girls. The four year math sequence is required for admission to Mathematics 1A, the beginning calculus sequence. It, in turn is required for majors in every field at the University *except* the traditionally female, and hence lower paying, fields of humanities, social sciences, librarianship, social welfare, and education.

Tables I through IV show the percentage of women in each school and college at Berkeley for the Fall Quarter, 1972, more detailed breakdowns for the College of Letters and Science, and for the Professional Schools. They appear on pages 2 through 6, and show that every field or major with the calculus requirement has thirty percent or less women as undergraduates. They also show a consistent and statistically significant pattern of dropoff in the proportion of women from the undergraduate to the graduate level. The decision to apply for graduate school is the second filtering point in educational achievement for women and minority groups. Table V, on page 6, shows the ethnic distribution of Berkeley students, for the Fall Quarter, 1972. The pattern is similar to that for women.

---

*Paper presented at the Pacific Association Meetings, Hyatt House, San Jose, March 28, 1974.

TABLE I.—UNIVERSITY OF CALIFORNIA, BERKELEY: PERCENTAGE WOMEN AT UNDERGRADUATE AND GRADUATE LEVELS BY SCHOOLS AND COLLEGES

School or college	Undergraduates	Graduates	Dropoff	Dropoff rate[1]
Agricultural sciences (percent)	48 (314/651)	30 (73/242)	−18	−0.38
Chemistry (percent)	14 (50/358)	9 (36/394)	−5	−.36
Engineering (percent)	3 (37/1, 361)	2 (28/1, 336)	−1	−.33
Environmental design (percent)	17 (130/748)	25 (108/424)	+8	+.47
Business administration (percent)	17 (117/693)	9 (51/565)	−8	−.47
Criminology (percent)	46 (93/201)	38 (21/57)	−8	−.17
Forestry and conservation (percent)	7 (9/132)	6 (5/89)	−1	−.14
Optometry (percent)	17 (20/121)	12 (13/112)	−5	−.29
Ethnic studies (percent)	55 (18/33)			
Letters and science (details in table II) (percent)	46 (6, 859/14, 909)	31 (1, 053/3, 353)	−15	−.33
Graduate professional schools (details in table IV) (percent)		44 (1, 164/2, 624)		
Total	40 (7, 647/19, 290)	28 (2, 552/9, 196)	−12	−.30

[1] Dropoff rate is calculated by the formula: Percent undergraduates minus percent graduates over percent undergraduates.

Source: Calculated from "Campus Statistics, Fall Quarter 1972" and year 1971-72, Office of Institutional Research March 1973, table 6, pp. 22-25.

TABLE II.—UNIVERSITY OF CALIFORNIA, BERKELEY: PERCENTAGE WOMEN AT UNDERGRADUATE AND GRADUATE LEVELS IN LETTERS AND SCIENCES

Field	Undergraduates	Graduates	Dropoff	Dropoff rate
Humanities (percent)	58 (1, 159/2, 001)	48 (465/965)	[1]−10	−0.17
Social sciences (percent)	46 (1, 727/3, 754)	33 (352/1, 082)	[1]−13	−.28
Biological sciences (percent)	33 (362/1, 085)	29 (135/465)	[2]−4	−.12
Physical sciences (percent)	22 (148/664)	11 (89/817)	[1]−11	−.50
Total	45 (3, 396/7, 504)	31 (1, 041/3, 329)	[1]−14	−.31
Field difference in percentage of women	[1]36	[1]37		

Source: Calculated from "Campus Statistics, Fall Quarter 197 and Year 1971-72," Office of Institutional Research March 1973, table 6, pp. 23, 24, and 25.

[1] Dropoffs and field differences are statistically significant at the 0.05 level, using a conservative estimate of a 2-tailed test.

[2] NS.

Note: Dropoffs and field differences are statistically significant at the 0.05 level, using a conservative estimate of a 2-tailed test. I am indebted to Arthur L. Stinchcombe, who provided the rule of thumb, which has both prevented embarrassment for getting excited about possibly random differences, and saved hours of calculations to prevent that embarrassment. The rule is: In comparing percentage differences in any context, let $(\%_1-\%_2)=E$, or Epsilon, the percentage difference. If E_2 is greater than $\left(\frac{1}{N_1}+\frac{1}{N_2}\right)$, then E is significant at the 0.05 level on a 2-tailed test. N_1 and N_2 are the numbers on which $\%_1$ and $\%_2$ are based.

It should be pointed out that aggregation of departments within fields conceals sharp variation among departments within fields. Table II, below, illustrates this problem by showing the departments within field with the highest and lowest percentage of women among undergraduates.

TABLE III.—UNIVERSITY OF CALIFORNIA, BERKELEY—PERCENTAGE WOMEN IN HIGHEST AND LOWEST DEPARTMENTS WITHIN FIELDS

Field	Undergraduates		Graduates		Dropoff	Dropoff rate
	Percent	Number	Percent	Number		
Humanities:						
History of Art	83	87/105	67	34/51	[1] −16	−0.19
Philosophy	24	31/130	25	13/51	[1] +1	+.04
Department difference		[2] 59		[2] 42		
Social sciences:						
Anthropology	61	205/336	55	78/143	[1] −6	−.10
Economics	14	41/295	8	11/138	[1] −6	−.43
Department difference		[2] 47		[2] 47		
Biological sciences:						
Bacteriology	53	74/140	48	22/45	[1] −5	−.09
Biochemistry	20	41/201	21	17/82	+1	−.05
Department difference		[2] 33		[2] 27		
Physical sciences:						
Mathematics	30	101/332	13	48/380	[2] −17	−.57
Physics	5	5/105	4	9/245	[1] −1	−.20
Department difference		[2] 25		[2] 9		

[1] NS.

[2] Difference is statistically significant at the 0.05 level, using a conservative estimate of a 2 tailed test.

Source: Calculated from "Campus Statistics, Fall Quarter 1972 and Year 1971-72," Office of Institutional Research, March 1973, table 6, pp. 23, 24, and 25.

Note that the magnitude of the department difference within fields gets smaller as we move from Humanities, with a difference of fifty-nine percentage points, through the Social Sciences with a difference of forty-seven percentage points, through the Biological Sciences, with a difference of thirty-three percentage points, and the Physical Sciences, with a difference of twenty-five percentage points.

Note also that Philosophy has a requirement in Logic, and that admission to the Economics undergraduate major requires completion of Math 1A or Math 16A, both of which require the high school Trigonometry sequence.

TABLE IV.—UNIVERSITY OF CALIFORNIA, BERKELEY—PERCENTAGE WOMEN IN GRADUATE PROFESSIONAL SCHOOLS

School	Percentage women	Number of women/total
Education	54	516/ 953
Journalism	50	24/ 42
Law	25	216/ 851
Librarianship	66	135/ 205
Public Health	43	120/ 282

Source: Dec. 12, 1972 compliance report to HEW by University of California, Berkeley.

The ethnic categories used in the compliance report on which Table V is based were American Indian, Negro, Oriental, Spanish Surnamed American, and all Other Students, whom I presume to be Caucasian. Table V shows the percentage of students who are Negro, Oriental, and All Other, by college, for undergraduates, graduates, and professional schools. American Indians and Spanish Surnamed Americans were excluded from the table, because their percentages were so small, and to simplify presentation of the data.

In every college and school except Criminology, there is an increase in the percentage of All Other (Caucasian) students from the undergraduate to graduate levels, and a corresponding drop in the percentage of Negro and Oriental students. In order to rule out the possibility of discrimination against Orientals implicit in the drop from 18% undergraduates in the College of Chemistry, to 3% of the graduate, I made discrete inquiries with a friend on the faculty. It turns out that the Department of Chemistry has a policy of not admitting its own undergraduate students to graduate programs. The high proportion of Orientals among undergraduates in Chemistry is an artifact of Berkeley's proximity to San Francisco's Chinatown. Apparently, a high proportion of Orientals from Berkeley's Chemistry Department do go on to graduate school, but at MIT, Harvard, Cal. Tech, or Stanford.

This demonstrates the importance of ruling out alternative explanations for data before jumping to conclusions of discrimination, and of having friends with whom one can make discrete inquiries, before making grotesque errors in public.

On the second filter in educational achievement for women and non-Oriental students, it is clear from the data provided by the Berkeley Graduate Division that they are being admitted to graduate departments in the same proportion in which they are applying. They also receive financial support in the proportion in which they are applying. The problem is that they are not applying to graduate school in the same proportion as they earn undergraduate degrees.

If we assume that talent and willingness to work are randomly distributed between the sexes, and across ethnic groups, the data suggest a differential climate of encouragement and support for application to graduate school.

In most social systems based on meritocracy and achievement, the aspiration to move up the ladder is very much shaped by those who have already demonstrated their achievement. In a University system, this means that faculty have both the power and the responsibility of encouraging potential talent, regardless of the sex or ethnicity of the person who displays that talent. The primary goal of affirmative action should be to help faculties and administrations of institutions of higher education recognize that their cherished values of scholarship and excellence will be upheld only when all persons are free to develop their talents and energies to highest potential, regardless of sex or ethnicity.

Recent data from Berkeley show large and statistically significant sex and ethnic differences in percentage of students reporting the doctorate as the highest level of education they plan to complete. Among the men, 63% gave the doctoral response, compared with 36% of the women. Table VI, on page 8, gives the percentage of doctoral aspirants by sex, ethnicity, and field.

While 67% of the students in Physical Sciences, Life Sciences, and Mathematics plan to get the doctorate, only 44% of those in the Humanities do so.

TABLE VI.—PERCENTAGE OF DOCTORAL ASPIRANTS BY SEX AND ETHNICITY, CONTROLLING FOR FIELD

	Men		Women		Sex Difference	Total	
	Percent	Number	Percent	Number		Percent	Number
Humanities and social sciences:							
Oriental	44	195	21	295	[1] 23	30	490
Caucasian	57	2,419	33	2,511	[1] 24	44	4,930
All other	59	438	34	343	[1] 25	48	781
Total	56	3,052	32	3,149	[1] 24	44	6,201
Ethnic difference	[1] 15		[1] 13				[1] 8
Physical sciences, life sciences, and mathematics:							
Oriental	65	420	32	243	[1] 33	53	663
Caucasian	75	1,675	58	529	[1] 17	71	2,204

There is a strong interaction effect between sex and ethnicity in choice of field, with a difference of fifty-one percentage points between Oriental Men in the physical sciences, life sciences, and mathematics, and Caucasian and All Other Women. The percentage of Oriental Women in these fields even exceeds that of Caucasian Men. As a sociologist, I attribute these very large sex and ethnic differences in choice of field to cultural, rather than to biological factors.

The third filter in educational achievement for women and minorities has to do with survival in doctoral programs, so that they might become members of the pool of qualified persons eligible for hiring at institutions of higher education. The remainder of this paper is based on data about women. However, it is clear that some of the casual mechanisms whch operate to filter women out of the doctoral pool operate more intensely against minorities. These include a social climate which systematically lowers aspirations and expectations, sense of competence, and self esteem. Both actively by discouragement, and passively, by absence of social support and encouragement.

SEX AND DISCIPLINE DIFFERENCES IN DOCTORAL ATTRITION

The data in this section come from a secondary analysis of Mooney's 1966 study of the Woodrow Wilson Fellows who entered graduate school from 1958 through 1963. The Fellows were selected by professors while still seniors in college, for their special promise in a career of college teaching. Because of the method of their selection, they represent a biased sample of some of the best graduate students in their entering class. Other things being equal, attrition rates should be lower among Woodrow Wilson Fellows than in the total population of graduate students. At the time of the study, 49% of the Fellows had not yet earned the doctorate, *and* were no longer in school. Among the men, 44% were thus defined as dropouts, compared with 64% of the women. The sex difference in dropouts of Woodrow Wilson Fellows was twenty percentage points.

Table I, on page 12 shows both sex differences and discipline differences in the percentage of dropouts among the Woodrow Wilson Fellows. The sex differences can be read across the rows, and the discipline differences down the columns. Within the Humanities, there is a small, but statistically significant difference in the percentage of dropouts in English and Philosophy, with 58% of the English Fellows dropping out, compared with 52% of the Philosophy Fellows. Within the Social Sciences, History, Political Science each had 53% dropouts, compared with 39% in Psychology, a difference of fourteen percentage points. Within the Physicial Sciences there is a difference of twelve percentage points between Mathematics and Chemistry.

In the Humanities, the sex difference is fourteen percentage points. In the Social Sciences, it is eighteen percentage points, and in the Physical Sciences it is twenty-eight percentage points. While the dropout rate is lower for women in the Physical Sciences, the magnitude of the sex difference increases as we look from Humanities to Social Sciences, to Physical Sciences.

Table II, on page 13, shows the effect of second year financial support on the sex and discipline differences in dropouts. Among those with no financial support during the second year of graduate school, the original sex difference of twenty percentage points holds up. Among those with any second year financial support, the sex difference is reduced to nine percentage points. For men, the effect of second year support is to reduce dropouts by fourteen percentage points. For women, the effect is to reduce dropouts by twenty-six percentage points. The effect of second year support is even more dramatic when field is controlled. It makes a difference of twenty-nine percentage points for women in the Humanities, and forty percentage points among women in the Physical Sciences.

This may reflect the special kind of self-esteem and assertiveness that it takes for a woman to think her work is good enough to justify her applying for support. If she thinks that well of her own work, she's free to communicate her worth to others. Traditional female socialization has taught young girls that assertiveness is unfeminine, just as traditional ethnic socialization had taught Blacks that the Uncle Tom role was the key to their survival.

Table III, on page 13 shows the effect of parenthood on dropout rates for men and women, by field. For men, regardless of field, having children makes no statistically significant difference. For women, having children makes a difference of thirteen percentage points in the Humanities, eleven in the Social Sciences, and thirty-one in the Physical Sciences. Unfortunately, it is not possible to infer from the data whether women dropped out of graduate school because they have babies, or whether they have babies as a face-saving alternative to trying to succeed in an unhospitable social climate.

Table IV, on page 14 shows the effect on sex and discipline differences in attrition when faculty rating of Woodrow Wilson Fellows was controlled. The assumption was that in a pure meritocracy, where talent and willingness to work are the primary determinants of "success", dropout rates would be very low among those who were rated 'Excellent,' and very high among those who were rated 'Average to Dreadful.'

In fact, the zero-order difference of twenty percentage points is specified, rather than being interpreted in the Lazarsfeld sense. When faculty rating of graduate performance is controlled, the sex difference increases to twenty-six points among the "Excellent" students. When field is also controlled, it increases to *thirty-eight* percentage points among those rated "Excellent" in the Physical Sciences. Table IV in this series shows no statistically significant difference in the dropout rates of women who were rated "Excellent," and of men who were rated "Average to Dreadful" by their faculty.

A second goal of affirmative action is that we make it possible for the achievements of women and minorities who are rated "excellent" to surpass those of white men who are rated "average" or "dreadful."

There has been a dramatic reduction in the fourth year dropout rates among women Doctoral students at Berkeley. Among the entering class of 1962, 22% of the men had dropped out of doctoral programs by the fourth year, compared with 42% of the women. Among the entering class of 1968, 27% of the men had dropped out by the fourth year, compared with 27% of the women. This can be attributed both to the powerful social support of the women's movement, and that faculty at Berkeley are beginning to learn not to impose expectations and stereotypes based on the behavior of women in the 1960's on the behavior of women in the 1970's. (Sells, August, 1973.)

Table V, on page 15, shows the systematic reduction in fourth year dropout rates for women at Berkeley from entering classes of 1962 through 1968.

The fourth filter in educational achevement for women and minorities is the traditional academic recruiting system, known as the "old boy" or "buddy" system. Job openings at first rate doctoral institutions have, until recently, been closed or kept secret, except among long-time friends and colleagues of those in a position to do the recruiting and hiring. In 1968, the Carnegie Commission on Higher Education sponsored a National Survey of Higher Education. Analysis of the data on faculty members of Universities rated "high quality" shows very large sex and field differences in percentage of "yes" responses to item "As a graduate student, was there a faculty member who acted as your 'sponsor' when you were looking for your first job?" With the exception of the Social Sciences, in which there were no differences, the pattern is consistent with the pattern of dropout rates observed in the Woodrow Wilson dropout data. Table VI, on page 16, shows the percentage of faculty who reported having had a faculty sponsor themselves, by sex and field.

There has been a striking reduction in the sex differences in dropout rates at Berkeley, starting with the entering classes of 1963. Table V, on page 16, shows what's happened to the entering cohorts of 1962 through 1968 by their fourth year of graduate school. Almost 80% of the doctoral dropouts occur by the fourth year.

The pattern of sex and discipline differences in dropouts is repeated in the pattern of sex and discipline differences in a national survey of students, in which students were asked whether their primary faculty contact regarded them as a colleague or apprentice. Table VI, on page 17, shows the percent responding yes, by sex and discipline. The discipline differences are larger than the sex differences, with 72% of the men in Psychology reporting collegial or apprentice relations, compared with 39% of the Mathematics students.

Among the faculty sample in the same national survey, similar patterns appear in the percentage of faculty who reported having a faculty sponsor when they were looking for their first job. Table VII, on page 18 shows the faculty response.

[1] NS.

Note: Field effects within graduate ratings are not statistically significant among the women because there are so few women in each cell in the physical sciences. Field effect within graduate ratings:

	Among the men	Among the women	Among total
Excellent	E=30	E=13	E=31
Very good	E=31	E=15	E=30
Average to dreadful	E=16	E=18	E=20
Total	E=29	E=15	E=38

The fifth filter in educational achievement for women, but probably not minorities, is the underutilization of women who have pulled themselves into the availability pool of qualified persons for faculty hiring by virtue of having earned the doctorate. Table I, below, shows the juxtaposition of availability pools and utilization for selected academic disciplines. The availability pools are here defined as the percentage of women earning the doctorate in the decade of the 1960's for each field. Utilization is here defined as the percentage of women among those persons with a doctorate on the faculties of the "High Quality Universities" in the Carnegie survey.

TABLE I.—PERCENT WOMEN IN AVAILABILITY POOLS AND PERCENT WOMEN PH. D.'S ON FACULTIES OF HIGH QUALITY UNIVERSITIES FOR ACADEMIC DISCIPLINES

Discipline	Availability pool		Utilization		Under utilization
	Percent	Number	Percent	Number	
Humanities	18	22, 392	8	1, 525	[1] 10
Social sciences	15	22, 854	8	1, 319	[1] 7
Biological sciences	14	17, 708	8	957	[1] 6
Physical sciences	5	31, 902	3	1, 388	[2] 2
Total academic	12	94, 856	7	5, 189	[1] 5

[1] The percentage difference as a measure of underutilization is statistically significant at the 0.05 level, using a conservative estimate of a 2-tailed test. The number column is the basis of the percentage. Read "18 percent of the 22,392 doctorates in the humanities were women. 8 percent of the doctorates on the faculties of high-quality universities were women, giving an underutilization of 10 percentage points."

[1] Statistically significant at the 0.05 level, using a conservative estimate.

[2] NS.

While 56% of the male faculty in the Humanities reported having a faculty 'sponsor' when looking for the first job, only 41% of the female faculty members did so. The field difference is almost twice as large for women as for men.

Underutilization is largest in the field of English, which has an availability pool of 24% women, and only 6% women among the faculty members with doctorates, giving an underutilization of eighteen percentage points. Not only is the available pool of qualified women being underutilized in this national sample of faculty at high quality universities, but also, it is disproportionately distributed at the lower end of the faculty ranks.

Table II, below, shows the percentage of women among faculty with doctorates, by rank and field. For each field, the percentage of women gets larger, from Full Professor down to Instructor or Lecturer. There are large, and statistically significant differences in the percentage of women among Full Professors and Instructors and Lecturers in all but the Physical Sciences, where the small size of the availability pool places an artificial ceiling on underutilization.

TABLE II.—PERCENT WOMEN AMONG FACULTY MEMBERS WITH DOCTORATES, BY RANK AND FIELD

	Full professor	Associate professor	Assistant professor	Instructors Lecturers	Rank difference	Total

[2] NS.

Source: Secondary analysis of Carnegie data.

This section has demonstrated both the underutilization of those who already belong to the pool of qualified persons in a national sample of faculty at high quality universities, and the differential distribution of women at the lower faculty ranks. At Berkeley, the ranks of Instructor and Lecturer are separate, non-ladder ranks, from which, by definition, it is impossible to transfer horizontally to the ladder positions of Assistant Associate, and Full Professor. The 1970 Report of the Subcommittee on the Status of Academic Women (*Blue Book*) shows a similar pattern, but with only 5% women among the Assistant Professors, and 27% women among the Instructors and Lecturers.

Berkeley has made tremendous progress in new appointments at the Assistant Professor level. In 1967–68, 4 of the 124 new hires were women, or 3%. In 1973–74, 16 of the 64 new hires were women, or 25%. These kinds of results indicate that traditional recruitment patterns are changing.

The difference in the percentage of women from Full Professor to Instructor-Lecturer grows *larger* with each increase in length of time at the institution, as shown in Table III, below.

TABLE III.—PERCENT WOMEN AMONG FACULTY WITH DOCTORATES BY RANK AND NUMBER OF YEARS AT INSTITUTION

	Full professor	Associate professor	Assistant professor	Instructors lecturers	Rank difference	Total
Less than, or up to 3 years:

Source: Secondary analysis of Carnegie data.

These are the facts which document the need for affirmative action on behalf of women and minorities, first to increase their numbers in the availability pools at each filtering point, and second, to utilize more adequately those already qualified. The whole point of affrmative action is that every person be free to achieve to the limits of talents and energies, independently of sex or ethnicity.

The next section provides a sociological analysis of the current state of paralysis on efforts to achieve affirmative action on both counts.

2. THE CURRENT STATE OF PARALYSIS IN EFFORTS TO ACHIEVE EFFECTIVE AFFIRMATIVE ACTION ON BEHALF OF WOMEN AND MINORITIES

The letter and spirit of Executive Order 11246 as amended, Title VII of the Civil Rights Act of 1964 as amended, the Equal Pay Act of 1963 as amended, and Title IX of the Education Amendments Act of 1972 are clear. From the perspective of those trying to get some of the rewards of the system for themselves, progress has been agonizingly slow. By Fall, 1972, the percentage of women among Full Professors at Berkeley was up to 3% from the Blue Book of 2% in 1969. The percentage of women among Associate Professors is up to 7% from 5%, and among Assistant Professors, up to 12% from 5%.

The primary source of paralysis with respect to affirmative action for women and minorities at Berkeley has been the amount of conflict generated between supporters and opponents of affirmative action within the University, and between the University and HEW. At both levels, discussions about the merits and demerits of various aspects of the Affirmative Action Plan to be filed with HEW had become adversary proceedings in which neither side was willing or able to trust the other to act in good faith.

Within the University, and between the University and HEW, people at every level of power and authority have been responding to people or groups above and below in terms of their fantasies about what people and groups at higher levels expect, instead of taking responsibility and initiative in clarifying those expectations.

The major fantasy among those resistant to the idea is that affirmative action means that "Whenever you have a white male competing with a female or black for a job, preference must be given to the women or black, even though the white male is better qualified."

In fact, the letter and spirit of the Federal requirements cited in the first paragraph of this section require the opposite interpretation.

The institution sets the criteria, not HEW. The criteria must be applied equally to men and women, whites and blacks, and must not itself be discriminatory, i.e., criteria which give preference to people who did their undergraduate work at Ivy League Schools would be discriminatory in that women have been denied, until very recently, the opportunity to attend such institutions.

In very limited instances only can preference be given to women and minorities: when there has been a history or pattern of exclusion, *and* or discrimination, *and* if two candidates are equally qualified, only then can preference be given to the member of the Minority Group. (*Summary of Federal Policy Concerning Twenty-Five Affirmative Action Issues in Employment*, published by the Project on the Status and Education of Women, Association of American Colleges, reproduced in Sells, March 30, 1973, page 40.)

Paralysis and lack of productivity come from conflict about the goals to be achieved, the means of achieving them, and the standards of evaluation of achievement at a number of levels:

1. Internal conflicts within individuals paralyzes individual performance and achievement.
2. External conflict between individuals or groups at the same level of power and authority paralyzes performance and achievement.
3. Internal conflict within groups paralyzes group performance and achievement.
4. Within institutions, such as Universities and Federal bureaucracies, conflict paralyzes performance and achievement.

The first step in the healing process is to clarify the nature and extent of the conflict by articulating and identifying the goals to be achieved, the means of achieving them, and the standards of evaluation of achievement as experienced by people and groups at each level of power and authority, within the University, and within the Department of Health, Education and Welfare.

For over two years, three sides have been talking past each other, with differing perceptions of the goals and consequences of affirmative action. Those of us who have been working for it do so from the position that it is necessary in order to maintain the highest standards of scholarship and excellence. We firmly believe that merit rather than sex or ethnicity should be the sole criterion for recruitment and hiring. We need to establish ways of evaluating merit which don't contain implicit assumptions that make being female, or a member of a minority group a demerit.

Those members of the faculty and administration who have up til now opposed affirmative action did so from a genuine conviction that it might destroy their cherished values of scholarship and excellence. They are feeling coerced and constrained both by external pressure from HEW, and internal pressure from us within the system.

In the meantime, HEW has been harboring the fantasy that faculty and University administrations have been recalcitrant on affirmative action because of deliberate, malevolent, hostile sexism and racism. My own perception is of a more benign conception of what sexism and racism are, and I use the word "benign" because of my conviction that they are both curable. Sexism and racism are the unconscious, implicit assumptions which are so pervasive in the structure of society that they are as invisible to those constrained as the very air we breathe. They are internalized as needed dispositions in the personalities of individuals, which calls for psychological cures, through consciousness raising. They are also institutionalized as role expectations based on sex-role and ethnic-role stereotypes, which calls for sociological cures, through institutional consciousness raising.

One amusing example of sexism occurred to me in my role as member of the Board of Trustees of the Berkeley Public Library. The librarian recognized the last name on my library card, and her face lit up as she said "Oh, your husband is on the Board of Trustees, isn't he." There was nothing hostile or malicious intended. She was operating with the unconscious, implicit assumption that only men get appointed to public office.

As an unemployed graduate student conducting research, I've been free to travel up and down the ladder of power and authority within the University, between the University and members of the State legislature, and between the University and Members of Congress and HEW. When I was in Washington, D.C., I was free, as a consultant rather than permanent employee, to travel up and down the five floors of the HEW building. The symbolism of the power and authority structure was even more oppressive than in University Hall. It was felt most acutely by those on the ground floor, who carried the weight of the other four floors, while being responsible for the effective performance of nine regional offices with considerable variation in competence of directors. My fantasy for improving the level of political appointments is that the standards of merit and excellence aimed for in facility recruitment and hiring be carried over to political appointments.

The week in Washington has crystallized my thinking about the phenomenon of paranoid authoritarianism, which I see as a profound mistrust of people and groups above and below one's own in the hierarchy of power and authority. Like sexism and racism, this authoritarianism cripples and constrains trust, good will, and openness of communication. It is fundamental to the pathology of bureaucracies, whether educational or political. Fortunately, like sexism and racism, it too can be cured, by calling people's attention to its existence, by rendering it visible.

This section has analyzed some of the factors underlying past paralysis in efforts to achieve effective affirmative action. The last section will specify means of achieving it, delineate some resources which can be mobilized, and suggests strategies for achieving it.

3. STRATEGIES FOR ACHIEVING AFFIRMATIVE ACTION

The first section of this paper has clarified two major goals of affirmative action on behalf of women and minorities:

1. The first is to help faculties and administrations of institutions of higher education recognize that their cherished values of scholarship and excellence will be upheld *only* when all persons, including women and minority members are free to develop their talents and energies to highest potential.

2. The second is to make it possible that the achievements of women and minority students who are rated "excellent" might surpass those of white men who are rated "average."

The second section of this paper suggests internalized and institutionalized sexism, racism, and authoritarianism as the major factors contributing to the paralysis on affirmative action discussions between proponents and opponents, and between the University and the Department of Health, Education, and Welfare.

This last section will focus on means, resources, and strategies.

I. Means for Achieving Affimative Action

My approach to achieving effective affirmative action on behalf of women and minorities involves a five pronged educational campaign aimed at presenting the facts about the differential distribution of women and minorities at five levels of power and authority within and outside the University system. The purpose of this campaign is to bring every group's fantasies about those above and below into closer contact with reality.

This approach is an extension of my philosophy of education, which defines the highest form of learning as that which is discovered by freeing people to draw their own conclusions from the data, rather than trying to force my own conclusions onto them. My experience has been that discovered knowledge is more likely to be retained, and to be made relevant to problems at hand more effectively than force-fed regurgitated knowledge.

I have found people at all levels within and outside the University to be very open and receptive when I present the facts outlined in the first section on the paper, and solicit feedback from them about the causes and consequences of the data. A frequent response to the high school mathematics differential is "But why do you take this to be a problem? Maybe girls don't take any more math in high school because they don't *want* to. Shouldn't they have freedom of choice?"

My response is to ask what happens differently to boys and girls, that makes boys want to continue, and girls not want to continue in math. Contrary to the experiences of some proponents of affirmative action, and of some people in HEW, I have found academic men to be reasonable. The brighter the group I'm working with, the more quickly their faces light up with comprehension of the powerful effects of their unconscious, implicit assumptions about human behavior based on sex-role stereotyping. When I see their faces light up, I know that their consciousness has been raised to new levels of awareness. Then I point out that freedom of choice depends on keeping options open, and that the math filter closes options more intensely for minorities than women.

This approach frees them to contribute solutions to the problem, partly by not threatening their sense of themselves as worthwhile people. My brief experience on the Board of Library Trustees confirms my hypothesis that decision makers are more likely to listen to offers of help to solve problems, and to expressions of support, interest, and concern than they are to listen to protest and outrage which implicitly accuse them of acting out of hostility, bad faith, and of being bad human beings.

It is both vulgarized and intellectualized Dale Carnegie, but it gets results.

Major targets for my educational progress include:

1. Students, starting in junior high school, to raise their aspirations and motivations consistent with ability levels, and to develop their sense of autonomy, initiative, and responsibility for their own lives, with respect to faculty.

2. Faculty, to change their expectations and assumptions about sex and ethnic stereotypes of students, and to develop their sense of autonomy, initiative, and responsibility for their own lives with respect to the campus administration, and the state legislature, and the federal congress and administrative bureaucracies.

3. Administrators, to change their expectations and assumptions about students and faculty, and to develop their sense of autonomy, initiative, and responsibility for their own lives with respect to the Regents and Legislature, Congress, and HEW.

4. Legislatures, to change their expectations and assumptions about students, faculty, administrations, and to develop their acceptance of grass-roots upward development of autonomy, initiative, and responsibility for control for people's own lives at each level, both as individuals, and as groups. (There's an implicit, but not thought through message to Legislatures, which feels like a vulgar plagiarism of Edmund Burke. Elected officials need to develop their sense of autonomy, initiative, and responsibility for their own lives, as well.)

5. U. S. Department of Health, Education, and Welfare, to clarify the similarities and distinctions between the goals, needs, and standards of evaluation in University systems and Industrial systems.

I am convinced that the paralysis of the past two years is not part of some evil Machiavellian plot to keep women and minorities in their place, nor to destroy institutions of higher education. Rather, it is because people are oblivious to their own unconscious, implicit assumptions about human behavior based on sex-role and ethnic stereotyping. We can eliminate internalized and institutionalized sexism, racism, and authoritarianism by giving people enough facts to see the light for themselves.

II. Resources for Achieving Affirmative Action

The most important resource for achieving affirmative action is our own personal talents and energies, working together on our own behalves to pull ourselves into the availability pools. We need to stop wasting our time and energies fighting with faculty and administrations, and with H. E. W. over words on pieces of paper, in order to produce the kinds of results in our respective fields that qualify us for jobs and salaries consistent with our abilities and ambitions.

A second powerful resource is the growing number of academic and professional organizations devoted to achieving affirmative action on behalf of women and/or minorities. These include:

1. The Women's and Minority Caucuses of the various professional societies.
2. The Association of Women in Science (AWIS). Membership is $5.00 for students and unemployed, $18.00 for Faculty, and $25.00 for Libraries. Send Check to: Dr. Ellen C. Weaver, Membership Chair, AWIS, Office of Research Development, California State University, San Jose, 125 South Seventh St., San Jose, CA 95192.
3. The Project on the Status of Women and Education, The Association of American Colleges, 1818 R Street N.W., Washington, D.C. 20009. (202) 265-3137. Bernice Sandler, Executive Associate, puts out a fantastic array of affirmative action materials and information.
4. California Women in Higher Education (CWHE). This statewide organization is devoted to maximizing opportunities for women in California higher education. Membership is open to all persons from all segments of higher education in California, and to persons at all levels within each segment:

	Levels
The University of California System	Undergraduate students. Graduate Students.
The State University and College System	Non-Academic Staff.
The Community College System	Academic Staff. Faculty.
The Private Colleges and Universities	Administration.

The appendix contains a membership application for this organization, which provides social and political support for women to organize to act affirmatively on their own behalves.

A third resource is the good will of persons at all levels who are already on our side. My most difficult job is to persuade people who have not yet tasted the rewards of success in their own field that there are such people. I see this most clearly among graduate students who are still agonizing over whether they want to make the commitment necessary for academic success. People who are still experiencing the pain of their oppression as women or minorities, or as those at any level of power and authority feeling oppressed by those above, and disappointed by those below, are as oblivious to the existence of good will on the part of persons or groups they feel are oppressing them as most human beings are to their own sexism, racism, and authoritarianism.

III. Strategies for Achieving Affirmative Action

The emerging theme from my research on graduate student and faculty relationships extends to all power and authority relationships, including faculty and administration, administration and State and Federal legislative and administrative bodies, and even Congress and outraged citizens and pressure groups. When individuals and groups at any level of power and authority are feeling pressured and harassed by those above and below them, it paralyzes constructive solutions to problems.

Autonomy, initiative, and responsible adulthood are not characteristics which can be conferred upon human beings by other persons, groups, or social institutions. Instead, they come from individuals acting affirmatively to produce the kinds of results that will persuade the decision makers in their particular social system that their autonomy, initiative, and results earn the same rewards in that system that others who succeed are earning. For those who have not yet succeeded in the system, this is perceived as selling out to the system. For those who have already succeeded, this is perceived as using the rules of the system to work for their success, rather than against it.

I don't have the data, but it's conceivable that WAMP's and JIM's traditionally have been more in touch with the rules for succeeding in educational systems, because of the heretofore closed nature of communication within such systems. One of the cherished values of Universities as social systems is that of academic freedom in the context of the free market place of ideas. One strategy for achieving affirmative action is to use that value to achieve a free market place of information about the rules for succeeding within the system, at every level: Adequate mathematics preparation to keep options open as an undergraduate, survival and flourishing as an undergraduate and graduate student, getting hired, promoted, and getting tenure at the highest possible levels consistent with abilities, energies, and ambitions, independently of sex or ethnicity.

A second strategy is to change society so profoundly that sex and ethnic differences in psychological variables no longer exist, and that societal expectations based on sex-role and ethnic-role stereotyping no longer exist. We can't accomplish either alone, but must work on both together.

My own strategy is to work at both levels presenting the data wherever I get the chance, even to the point of leaving the fact sheet with tips when I attend professional meetings. At every level, I have assumed good will until I have direct evidence to the contrary, and have assumed openness to the data until I have direct evidence to the contrary. So far, I've not been disappointed. An alternative strategy has been to assume ill will and closed mindedness until there is direct evidence to the contrary. My own experience suggests that both strategies tend to become self-fulfilling prophecies, and that human beings tend to live up to the expectations placed on them by others. We each have the potential for eliciting both the best and the worst in other human beings. Let's concentrate on the best!

SEX DIFFERENCES IN GRADUATE SCHOOL SURVIVAL*

(By Lucy W. Sells)

This is a report on recent trends in graduate school survival. It is based on national survey data, a recent pilot project in attrition reduction conducted at the University of California, Berkeley, and on trend data in doctoral attrition provided by the Graduate Division at Berkeley.[1]

A national study of 1950–1953 Post-Master's students in the traditional arts and sciences shows a sex difference of twenty percentage points in completion of the doctorate by December, 1962. (Tucker, Gottlieb, and Pease, 1964.) While 65% of the men in the sample had earned the degree nine to twelve years later, only 45% of the women had done so. A similar pattern was found among Woodrow Wilson Fellows who entered graduate school from 1958 through 1963. (Sells, 1973.) In the national sample, the mean time to completion of the doctorate was 8.5 years, so the Money data gathered on Woodrow Wilson Fellows six to eight years after entrance to graduate school were analyzed in terms of dropouts rather than completions. At the time of the study, 44% of the men and 64% of the women were no longer in graduate school, and had not earned the doctorate. Data on the entering cohort of 1962 doctoral students at Berkeley show that by the fourth year of graduate school, 22% of the men had dropped out, compared with 42% of the women.

The pilot project at Berkeley grew out of concern with understanding the psychological and sociological factors contributing to the twenty per cent sex difference. We were particularly concerned with isolating those factors which might be different for women graduate students in the 1970's, so that expectations based on the behavior of women in the 1950's and 1960's would no longer be imposed on contemporary women. The project consisted of an eight week series of two hour sessions in which groups of women from a variety of disciplines attempted to define and articulate problems faced by women in graduate school, and to generate solutions to these problems.

Because of the comparatively short duration of the project, the discussions were somewhat more structured than under the usual Consciousness Raising procedures of women's groups in the past few years. A number of recurring themes emerged from the discussions. They were echoed and amplified independently in a questionnaire survey of non-participants from the mailed announcement of the project. The major themes emerging from the group explorations and the questionnaire responses can be grouped into three categories:

---

*Paper presented at the annual meetings of the American Sociological Association, New York, August 28, 1973.

[1] The Graduate Women's Project was co-sponsored by the Women's Center and the Affirmative Action Office at Berkeley. It was conducted by the author, and Nancy Isaac Kuriloff, a doctoral candidate in the Division of Higher Education. It was supervised by two consultants in group dynamics, Paul Baum and Vivian Gold.

1. Factors beyond the control of students or faculty.
2. Factors within the control of faculty.
3. Factors potentially within the control of students.

Each group will be outlined below, with the greatest emphasis on those factors potentially within the control of students themselves.

1. FACTORS BEYOND THE CONTROL OF STUDENTS OR FACULTY

Decline in Federal and private courses of graduate student financial support, which makes students increasingly dependent on departmental good will for support.

Rising tuition costs, and costs of living in general.

Declining job market for Ph. D.'s, combined with the proliferation of doctoral production from lower quality institutions.

2. FACTORS WITHIN THE CONTROL OF FACULTY

Lack of women as role-models on the faculty, which affects the socialization process of the women graduate student.

Poor formal advising procedures, which are the source of much unnecessary confusion and bitterness.

Exclusion of women from the informal communications network by both faculty and graduate students, which contributes to an increasing sense of invisibility as time passes.

Exclusion of women from the traditional apprentice relationships with faculty.

Indifference of professors Many women feel that the remoteness and unapproachability of professors makes it difficult to seek advice and help.

Mystery, characterized by the lack of easy availability of information. Many women cited the absence of well-defined, *public* criteria for evaluation, requirements, or procedures.

Secrecy. Many complained about the absence of information about attrition, flunking, and success rates within the department; about the length of time it takes to get the degree; about the employment situation once they earn the degree. There were also complaints about the absence of due process for students who felt they were wrongfully being dropped from doctoral programs.

3. FACTORS POTENTIALLY WITHIN THE CONTROL OF STUDENTS

These factors were repeatedly recurring themes in the group discussions and the non-participant questionnaire. Each woman in the group had initially perceived them as unique, personal problems. The major insight arising from the group process was the recognition by the women involved that their feelings were in fact not individual, and even more importantly, that they were not limited to students in their own departments. Recognition of these feelings as pervasive characteristics of graduate student life seems to have made it possible to deal with them more effectively.

Problem areas were raised at two different levels, psychological and sociological.

The psychological level

Students mentioned the following kinds of feelings which interfere with performance and inhibit the kind of sustained effort needed for intellectual achievement, and which seem to become more intense as length of time in graduate school increases:

1. Lowering of self-confidence.
2. Lowering of self-esteem.
3. Ambivalence about professional and career norms which seem to exclude the legitimacy of personal life.
4. Ambivalence about professional norms which put research ahead of teaching.
5. Ambivalence about success and failure, arising from fears of professional success as inherently defeminizing.
6. At least three different forms of alienation:

A. Alienation arising from ambiguity about the norms governing academic and professional success. This ambiguity could be resolved by explicit clarification of what it takes to succeed in a field, so that students could decide early in their graduate careers whether or not they want to play the game.

B. Alienation arising from the student's sense of powerlessness. To the extent that she perceives her academic life outside of her own control, she will be hindered in degree progress. This sense of powerlessness could be resolved by providing greater opportunity for student participation in the decision making processes which affect doctoral progress.

C. Alienation arising from a sense of the meaninglessness of hurdles to be passed. This could be resolved by clarifying the relationship between curriculum hurdles and their contribution to professional growth and development.

The sociological level

Graduate students frequently complain about the infantalization imposed on them by graduate school. The women in the pilot project also mentioned this. A faculty advisor told one of our women scientists that "the trouble with students is they want to take too much charge of their own lives." Of course it is not always clear which way the casual arrow operates. Do faculty behave in a paternalistic manner because students behave in a dependent, childlike manner? Or do students behave in a dependent, childlike manner because faculty expectations elicit and reward such behavior? Is the question of paternalism versus autonomy related to the sex of the student, or does it affect the progress of male students as well?

Women enter graduate school with stronger records than men. They have to be better to survive the initial screening process. All of the women in the exploratory group, and most of the women in the questionnaire survey reported a sense of progressive demoralization, of skidding downhill in their sense of competence, self-esteem, and self-confidence. They see the male graduate students with whom they entered accepted as apprentices and junior colleagues, but feel shut out from such relationships themselves.

The evidence from the pilot project at Berkeley is corroborated by findings in a national survey of graduate students, conducted by the Carnegie Commission on Higher Education. One of the questionnaire items was "Does the Professor with whom you have the most academic contact regard you primarily as: a colleague, an apprentice, an employee, or a student?" Table I on page 5 shows the percentage of doctoral students who responded that their primary faculty contact regarded them as "colleague" or "apprentice", broken down by sex and discipline.

TABLE I.—PERCENTAGE OF DOCTORAL STUDENTS WHOSE PRIMARY FACULTY CONTACT REGARDS THEM AS A COLLEAGUE OR APPRENTICE, BY SEX AND DISCIPLINE

[2] NS.

Source: Secondary analysis of data gathered by the National Survey of Higher Education, sponsored by the Carnegie Commission on Higher Education.

In the national sample, the sex differences in being treated as an apprentice or colleague are large and statistically significant among students in Psychology, Anthropology, the Biological Sciences, Sociology, History, English, and Mathematics. The mean sex difference in these seven disciplines is nineteen percentage points. The discipline differences are even larger.

All of the tables based on the Carnegie data were based only on the institutions designated "High Quality University" in the codebook. They do not include medium or low quality universities, four year colleges, or junior colleges.

Students in the pilot project at Berkeley reported an increasing sense of not being taken seriously, by faculty, or by their fellow students. This sense of not being taken seriously contributes to their sense of demoralization, and of futility in pursuit of the doctorate. Again, the evidence from a self-selected sample of women concerned about their anxieties about graduate school is corroborated by data from the Carnegie national survey of graduate students. Table II. below, shows the distribution of responses to the Carnegie item that "Professors in my department don't really take female graduate students seriously, by sex and year in school. While 26% of the first year women agreed strongly or agreed with reservations to the item, 36% of the fourth year women did so.

TABLE 11.—PERCENTAGE OF GRADUATE STUDENTS WHO AGREE THAT PROFESSORS IN MY DEPARTMENT DON'T REALLY TAKE FEMALE GRADUATE STUDENTS SERIOUSLY, BY SEX AND YEAR OF GRADUATE SCHOOL

Year of graduate school	Men	Women	Total	Sex difference
1:				
Percent	22	26	23	4
Number	2,195	1,004	3,239

Number	1,077	244	1,321	
4:				
Percent	27	36	29	[1] 9
Number	720	137	857	
5 or more:				
Percent	23	30	25	[1] 7
Number	979	279	1,258	
Total:				
Percent	24	28	25	4
Number	6,491	2,169	8,660	
Year difference 1 to 4	+5	[1] +10	+6	

[1] Percentage difference is statistically significant at the 0.05 level.

If we assume that faculty beliefs about the seriousness and dedication of female graduate students are based on their previous experience with having women graduate students drop out, we would predict large differences in agreement to the item across the ranks of faculty appointments, with Full Professors showing higher percentage agreement than Associate Professors or Instructors and Lecturers. In fact, the differences are modest.

TABLE III.—FACULTY: PERCENT AGREEMENT THAT FEMALE GRADUATE STUDENTS ARE NOT AS DEDICATED BY RANK AND SEX

	Full professor	Associate professor	Assistant professor	Instructors	Lecturer	Rank difference
Men:						
Percent	30	28	29	25	23	[1] 7
Number	2,118	1,180	1,539	274	223	
Women:						
Percent	20	14	8	19	20	
Number	45	76	165	64	94	
Total:						
Percent	30	27	29	25	23	
Number	2,163	1,256	1,704	338	317	
Sex difference within ranks	[2] 10	[1] 14	[1] 21	[2] 6	[2] 3	

The twelve point difference between agreement by women Lecturers and Full Professors compared with women Assistant Professors is not significant because of the small number of cases involved.

It appears that faculty perceptions of the seriousness of women graduate students have no relation to their number of years experience with students succeeding or dropping out. Among those who have been teaching for one year or less, 23% agreed that women are less dedicated, compared with 22% among those who have been teaching for thirty or more years. The N's are large enough to preclude random fluctuation, with 1119 and 787 respectively.

Table IV, on page 9 shows the distribution of faculty responses to the item "The women graduate students in this department are not as dedicated as the males," and the distribution of female student responses to the item "The professors in my department don't take female graduate students seriously." There are large and statistically significant differences in faculty attitudes toward women, across disciplines, in student perceptions of faculty attitudes, across disciplines, and most importantly, between faculty attitudes and student perceptions in History, English, Political Science, and Sociology.

Again, it is not clear whether students pick up and reflect faculty expectations with respect to their seriousness, or whether students behave in a manner which elicits expectations of lack of seriousness.

One of the themes emerging from the pilot project and the national survey data was the sense of exclusion from the informal colleague or apprenticeship relationship with faculty. It was particularly strong for women in the national sample, but obviously also a problem for men. While 72% of the men in Psychology and Anthropology felt that they were regarded as colleagues or apprentices by their major faculty contact, only 39% of the men in Mathematics did so. At least 40% of the men in the major doctoral disciplines indicated that they did not feel like colleagues or apprentices to their major faculty contact.

Graduate student organizations can provide an ideal mechanism for students to develop the interpersonal and professional skills which contribute to their sense of colleagueship and apprenticeship. The paradox is that many students are so involved in their individual progress or paralysis that they fail to see the possibility of organizational solutions. This is particularly true for students who see problems in graduate school as evidence of personal failure and ineptitude, rather than evidence of problems shared by most students. Until quite recently, women have tended to internationaliz blame for these problems, while men have tended to project it on faculty, and on the system.

[3] NS.

Source: Secondary analysis of data gathered by the National Survey of Higher Education, sponsored by the Carnegie Commission on Higher Education.

Trend data on doctoral dropouts provided by the Graduate Division at Berkeley suggest the powerful impact of students organizing themselves on their own behalf. Table V, on page 11, reflects the growth of Women's Caucus Activities at Berkeley. The longstanding sex difference of twenty percentage points in dropouts was gradually reduced to zero in the wake of women's increasing efforts to seize their own autonomy.

Some of the processes which operate to drive women out of doctoral programs also work against men. Solutions derived from working with women students might also be used to reduce attrition among talented men. The problem is to help students recognize that it is to their advantage to become involved in departmental student organizations, in order to take responsibility for their own professional growth and development. There appears to be considerable student resistance to the idea of "professional socialization," in which students are rewarded for becoming more and more like faculty, and penalized for serious deviation from the faculty model of appropriate professional academic behavior. This resistance comes from men as well as women, and needs to be explored. Part of it may stem from rejection of the passivity and denial of autonomy implied by the process of being socialized by authority figures who are solely responsible for determining standards of evaluation. Part of it may stem from rejection of these standards of evaluation. Part may stem from a rejection of the faculty models of appropriate professional attitudes and behavior.

Students should be encouraged to organize on their own behalf to improve communications among each other, and with faculty; to find out, and make explicit the standards of evaluation governing performance and professional behavior; to explore and make explicit alternatives to accepted models of appropriate professional attitudes and behavior; to find out, and make explicit the opportunities and limitations for employment imposed by the rapidly changing supply and demand for doctorates in each field.

Some might argue that such activities are the primary responsibility of the faculty. However, for faculty to continue to spoon-feed students with the rules for success becomes the worst form of paternalism and denial of student autonomy. The paradox is that students have to act like colleagues and apprentices in order to be so treated, and they have to feel like colleagues and apprentices in order to act accordingly.

TABLE V.—PERCENTAGE DROPOUTS FROM DOCTORAL PROGRAMS BY THE 4TH YEAR OF GRADUATE SCHOOL UNIVERSITY OF CALIFORNIA, BERKELEY

Year of entrance	Men	Women	Total	Sex difference
1962:				
Percent	22	42	25	20
Number	1,093	194	1,287	
1963:				
Percent	20	36	23	16
Number	1,185	213	1,398	
1964:				
Percent	21	36	23	15
Number	1,233	264	1,497	
1965:				
Percent	20	34	22	14
Number	1,185	238	1,423	
1966:				
Percent	22	33	24	11

1968:				
Percent	27	27	27	
Number	1,136	323	1,459	
Total:				
Percent	22	34	24	12
Number	8,222	1,798	10,020	
Difference by year of entrance	+5	−15	+2	

Source: Graduate Division, University of California, Berkeley. In the entering cohort of 1962, 22 percent of the 1,093 men had dropped out of the doctoral program by the 4th year. In that same cohort, 42 percent of the women had dropped out by the 4th year. By the entering cohort of 1968, the sex differences in 4th year doctoral dropouts had disappeared. There was a reduction of 15 percentage points in 4th year dropout rate for women from 1962 through 1968.

There is considerable variation across disciplines in the kinds of attitudes and commitments required for success. One possible approach to student initiated organization on their own behalf is outlined below. It would need to be tailored to meet the special needs of individual departments, disciplines, curriculum requirements, and job opportunities and limitations.

STUDENT ORGANIZATION ACTIVITIES

Students could learn to become autonomous in three major areas of their graduate careers by organizing seminars around those areas, and taking the initiative to invite faculty to contribute their special expertise on particular topics. At the same time, they need faculty support and encouragement for taking initiative.

The first major area is that of clarifying their first year students precisely what a serious professional commitment involves. This could be done in a seminar held by advanced doctoral students on behalf of entering students during their first quarter. Weekly sessions could help first year students decide early in their graduate careers whether they really want to commit themselves to the exacting demands of their discipline. A useful text for such a seminar would be Pierre van den Berghe's little gem, ACADEMIC GAMESMANSHIP, New York, Abelard, 1970. Topics for such a seminar might include:

1. *Introduction to the Department.*—Overview, and introduction of the entire faculty to first year students. Examination of the diversity of research interests, theoretical perspectives, and methodolcgical strategies of the faculty. This could help students to decide with whom they might be intellectually compatible during their first few months.

2. *Introduction to the job market.*—For persons with Master's degrees, and with doctorates. Presentation of data on approximate number of new doctorates in the field; approximate number of openings each year, nation wide, and at various types of institutions; range of job alternatives open (graduate teaching and research; undergraduate teaching; industry; business; government—Federal, State, Local; Private research organizations; other options.)

The remaining sessions might be devoted to the means of achieving career advancement, given the options available, and those in which the student is interested. Means to advancement include:

3. *Publications.*—Importance of research and publications for each of career options; which journals most appropriate for which options; how to submit papers; constructive ways of handling rejections.

4. *Graduate Student Job Experience.*—How to make teaching assistantships and research assistantships contribute to career advancement, rather than impede it; importance of early building up of Vita; extra-curricular activities that will enhance or hinder advancement.

5. *Organization Membership.*—Which scholarly, scientific, or professional societies are important for each of the career alternatives? How do you join them? How do you use them for career advancement? Importance of participation in regional and national meetings; importance of developing relations with graduate students with similar research interests at other institutions.

6. *Fellowships and Research Grants.*—Letters of recommendation, based on classroom performance, written work, results; recognizing the importance of choosing research topics with long-range payoff in terms of theoretical and empirical fertility in a field.

7. *First postdoctoral job strategies for various alternatives.*—Importance of keeping options open as long as possible.

The second major function could be filled by a series of seminars for students who are preparing for qualifying examinations. These could be organized around substantive areas in the discipline, so that students working on similar areas could work together to carve out the major issues and codify relevant materials in preparation for exams. The underlying assumption is that students will be free to work hard to meet each other's expectations, and that they work harder in such a context than in meeting the imaginary expectations of faculty who will ultimately decide whether they pass or fail.

The third function could be filled by a series of seminars for students engaged in dissertation research. It would provide students who are working on similar research topics with an opportunity to resolve some of the intellectual and emotional issues involved in the design, execution, and writing up of their research before submitting it for the ultimate evaluation by faculty.

This paper has traced through recent trends in sex differences in doctoral attrition, suggested some of the processes which operate to drive men as well as women out of graduate school, and suggested some concrete ways in which graduate students can take charge of their own autonomy to become apprentices, and ultimately, colleagues.

Field	Mean number of years to doctorate by field			
	Years from bachelor's to doctorate, total	Years from start of postmaster's work to doctorate		
		Public	Private	Total
Humanities:				
Percent	11.8	6.2	5.5	5.9

Source: A. Tucker, D. Gottlieb, and J. Pease, "Attrition of Graduate Students at the Ph.D. Level in the Traditional Arts and Sciences," Office of Research Development and the Graduate School, publication Nov. 8, 1964, Michigan State University, Mean years from bachelor's to doctorate taken from p. 59, mean years from time postmaster's study began taken from p. 63.

Number in parenthesis is number of doctorates on which the mean number of years to completion is calculated. Read "The mean time to completion for 1,395 doctorates in the Humanities was 11.8 years."

The study was based on all students who were enrolled in work beyond the master's degree in the traditional arts and sciences at twenty-four selected universities between 1950 and 1953. Data were gathered in 1962.

Data are based on Stratum I Institutions: Schools which fall within the top 15 schools rated by Keniston. Private schools are Chicago, Cornell, Princeton, and Yale. Public schools are Illinois, Indiana, Michigan, Minnesota, UCLA.

AVAILABILITY POOLS AS THE BASIS FOR AFFIRMATIVE ACTION*

(By Lucy W. Sells)

Federal policy requires that all institutions with Federal contracts totaling more than $50,000 develop written affirmative action plans on behalf of women and minority employees.[1] These affirmative action plans are required to include numerical goals and timetables, based on the available pool of qualified persons. In the context of hiring for University faculty, the pool of qualified persons consists of those who have earned the doctorate, or its professional equivalent, in their field.

This paper will argue that affirmative action requires both greater use of persons in the existing pool, and long range action to increase the number of women and minorities in that pool. First, it will indicate the distribution of women in the recent pool of doctoral production. Second, it will demonstrate that, at least for women, the already available pool is not being adequately used. Third, it will show that certain persons have, until very recently, been systematically filtered out of the pool. Fourth, it will conclude by suggesting that really effective affirmative action requires an educational process aimed at three target groups: Those who do the hiring, those who seek access to the pool of doctorates, and those who have traditionally contributed to the filtering process which has kept women and minorities out of the pool.

In a world of only random differences between the sexes, and among ethnic groups, we would expect only random differences in their distribution within social institutions, such as universities. The discrepancy between the proportion of women and minorities in the population and at various levels within the institution is one measure of the existence of non-random factors.

This paper is based on data about women. However, it is clear that some of the same casual mechanisms are operating to filter minority persons out of the doctoral pool. These include a social climate which systematically lowers aspirations and expectations, sense of competence and self-esteem—both actively, by discouragement, and passively, by absence of social support and encouragement.

---

[1] This policy comes out of: Executive Order 11246 as amended; Title VII of the Civil Rights Act of 1946 as amended; Equal Pay Act of 1963 as amended; Title IX of the Education Amendments Act of 1972.

1. THE DISTRIBUTION OF WOMEN IN THE DOCTORAL POOL

It seems reasonable to assume that a minimal definition of the "pool of qualified persons" eligible for hiring at tenured faculty levels in the University is "those persons with doctorates in the field." Among those who actually entered that minimal pool from 1960 through 1969, 12% were women.[2] These range from 97% of the doctorates earned in Home Economics, to less than 1% in Engineering. In the academic disciplines, English has the highest percentage of women doctorates with 24%. It is followed by Anthropology, with 21%; Psychology, with 20%; Sociology with 17%; the Biology Sciences, with 14%; History, with 12%; Political Science with 9%; Chemistry, Economics, and Mathematics, each with 6%; and Physics, with 2% of the doctorates earned by women.

2. THE DISTRIBUTION OF WOMEN ON UNIVERSITY FACILITIES

This section is based on a secondary analysis of the National Survey of Higher Education, sponsored by the Carnegie Commission on Higher Education. The analysis was restricted to the twenty-five Universities designated "High Quality" in column 30 of the public codebook for the study.

Table I, below, shows the juxtaposition of Availability Pools and Utilization for selected academic disciplines. Availability Pools are here defined as the percentage of women earning the doctorate in the 1960's for each field. Utilization is here defined as the percentage of women among those persons with a doctorate on the faculties of the "High Quality Universities" in the national sample.

Underutilization is largest in the field of English, which has an availability pool of 24% women, and only 6% women among the faculty members with doctorates, giving an underutilization of eighteen percentage points. Not only is the available pool of qualified women being underutilized at High Quality Universities, but also, it is disproportionately distributed at the lower end of the faculty ranks.

TABLE 1.—PERCENT WOMEN IN AVAILABILITY POOLS AND PERCENT WOMEN PH. D.'S ON FACULTIES OF HIGH QUALITY UNIVERSITIES FOR ACADEMIC DISCIPLINES

Discipline	Availability pool		Utilization		Underutilization
	Percent	Number	Percent	Number	
Humanities	18	22,392	8	1,525	[1] 10
Social sciences	15	22,854	8	1,319	[1] 7
Biological sciences	14	17,706	8	957	[1] 6
Physical sciences	5	31,902	3	1,388	[1] 2
Total academic	12	94,856	7	5,189	[1] 5

[1] The percentage difference as a measure of underutilization is statistically significant at the 0.05 level, using a conservative estimate of a 2-tailed test. The number column is the basis of the percentage. Read "18 percent of the 22,392 doctorates in the humanities were women. 8 percent of the doctorates on the faculties of high quality universities were women, giving an underutilization of 10 percentage points."

Source: Availability pools: Women's Equity Action League, "Proportion of Doctorates Earned by Women, by Area and Field, 1960-69," June 1971. Distributed by the Project on the Status and Education of Women, Association of American Colleges, 1818 R St., NW., Washington, D.C. 20009. Utilization: Secondary Analysis of the National Survey of Higher Education, sponsored by the Carnegie Commission on Higher Education.

Table II, below, shows the percentage of women among faculty with doctorates, by rank and field. For each field, the percentage of women gets larger from Full Professor down to Instructor or Lecturer. There are large and statistically significant differences in the percentage of women among Full Professors and Instructors and Lecturers in all but the Physical Sciences, where the small size of the availability pool places an artificial ceiling on underutilization.

In order to test the possibility that the rank difference was merely an artifact of academic women following their husbands from place to place, number of years at institution was controlled. The rank difference for the entire sample increases from seventeen percentage points to twenty-eight percentage points among those who had spent seven or more years at their current institution.

Source: Secondary analysis of Carnegie data.

This section has demonstrated both the underutilization of those who already belong to the pool of qualified persons in a national sample and the differential distribution of women at the lower ranks. The difference in the percentage of women from Full Professor to Instructor-Lecturer grows *larger* with each increase in length of time at the institution. It appears from these data that some non-random factors are operating on women who have already entered the pool of qualified persons. Further research is needed to isolate particular problem areas and situations, so that effective affirmative action might be implemented at the hiring and promotion level. Such a program would free those already employed in teaching and research at Universities to rise as high as their talents, energies, and ambitions might take them, regardless of sex or ethnicity. The next section will discuss some filtering points at which access to the pool of qualified persons is blocked.

3. FILTERS WHICH BLOCK ACCESS TO THE POOL OF QUALIFIED PERSONS

To the extent that certain groups of persons are systematically filtered out of the pipelines to the pool of qualified persons, effective affirmative action requires that the filtering mechanisms be identified and remedied. This section will trace through some of the filtering points which impede free access to the kind of academic achievement which ultimately leads to hiring at tenured faculty levels.

TABLE III.—PERCENT WOMEN AMONG FACULTY WITH DOCTORATES BY RANK AND NUMBER OF YEARS AT INSTITUTION

	Full professor	Associate professor	Assistant professor	Instructors lecturers	Rank difference	Total

Source: Secondary analysis of Carnegie data.

In the first place, we know that certain groups of students are less likely to take any more mathematics in high school than is required for admission to the University. These include women and non-Asian minorities. A study of admissions applications of Berkeley Freshmen shows that while 57% of the boys had taken four years of high school math (first year algebra, geometry, second year algebra, Trigonometry, and solid geometry), only 8% of the girls had done so, a difference of forty-nine percentage points in four years of mathematics.[3]

The four year math sequence is required for admission to the first year calculus sequence, Math I A–B–C. This sequence is a prerequisite for the *undergraduate* major in every field at the University of California except the "traditionally female", and hence lower paying, fields of humanities, social sciences, education, and social welfare. Recent data on Berkeley ethnic enrollment suggest the same pattern for non-Asian minority groups.[4]

It appears that high school girls and some minorities are experiencing different kinds of support and encouragement for taking mathematics than boys and Asians. This hypothesis was confirmed in a content analysis of statements made by students in a questionnaire survey about their high school mathematics preparation and performance. It contained questions about performance in elementary school and high school; whether or not respondents had taken mathematics beyond the minimal first year of geometry required in high school; and an open-ended question, "What did you consider to be the most important factors which influenced your interest and aptitude for doing mathematics?" The responses were coded for presence or absence of social support from parents, teachers, or peers with respect to mathematics; whether or not students had taken mathematics beyond the minimal two year requirement for admission to the University of California; what their grades were if they did so.

There was a strong and statistically significant relationship between the presence of social support from parents, teachers, or peers, and the pursuit of advanced mathematics courses in high school.[5] When the relationship between presence of social support and performance, measured by A's or B's compared with C's or D's was analyzed, a strong and statistically significant relation was also found.[6]

An effective affirmative action program for high school students would be one which educates parents, counselors, teachers, and most importantly, the students themselves, on the importance of keeping one's options open as long as possible. The failure of students with the ability to perform to take as much mathematics as they can get while in high school effectively precludes freedom of choice of undergraduate discipline, and filters people into the 'helping' disciplines of education, nursing, social welfare, and the humanities, and social sciences.

In the second place, while women appear to be admitted to graduate departments in the same proportion as they apply, there is a drop from the proportion of women earning the Baccalaureate in a field, to the proportion of women applying to graduate school in that field. At Berkeley, 26% of the Bachelor's of Science (Physical Sciences) are earned by women, but only 11% of the applicants to graduate school in these fields are women.[7] Ambitions and expectations for pursuit of graduate careers are shaped as much by faculty and peer encouragement and support as by individual, idiosyncratic factors. An effective affirmative action program would be one which educates faculty to the need for identifying and encouraging talented students, regardless of sex or ethnicity. It further would work to develop self-esteem and self-confidence among these outsiders to traditional doctoral programs.

In the third place, even when admitted to doctoral programs, women have a history of higher dropout rates than men. A secondary analysis of data on Woodrow Wilson Fellows who entered graduate school from 1958 through 1963 shows a sex difference in dropouts of twenty percentage points, and a field difference of twenty-eight, between the Humanities with 58% dropouts, and the Physical Sciences, with 30% dropouts.[8] The sex difference almost disappears among those who have second year fellowship support. It gets much larger among those who have children. It gets even larger among those rated "Excellent" by their graduate faculty. While 12% of the men in the Physical Sciences who were rated "excellent" dropped out, 50% of the women who were rated "excellent" dropped out, giving a sex difference of thirty-eight percentage points. Among those rated "average to dreadful", only 51% of the men dropped out without a doctorate.

[7] Sells, Preliminary Report, p. 5.

[8] Ibid., pages 23–27.

It appears that something other than meritocracy was operating on the graduate careers of Woodrow Wilson Fellows in the early sixties. An effective affirmative action program would be one which identifies those factors which are still operating differently for men and for women, and those which have changed in the past decade. It would result in a table which showed that "Among the 'excellent students, less than 10% dropped out without the doctorate, independently of sex or ethnicity. Among those rated 'average to dreadful' more than 80% dropped out, independently of sex or ethnicity."

While the data presented in this paper are based on sex differences in access to the pool of qualified persons for hiring at tenured faculty levels, the same filtering mechanisms operate to bar access for some minority persons as well. A pilot project at Berkeley suggests some of the processes which impinge on all graduate students, but more intensely on women.[9] It is suspected that these processes impinge even more intensely on minority students, that the further one is removed from the dominant, white male culture of a department, the more intensely these processes operate. They appear to include an increasing sense of isolation from faculty and graduate students, absence of positive feedback, ambiguity of norms governing evaluation of work, ambivalence about success in the academic ratrace, and, unless the student starts to experience some of the rewards and gratifications of academic success, a dropping out from the doctoral program. Research is in progress to try to find ways of overcoming these processes.

4. CONCLUSION

In conclusion, affirmative action is necessary both to utilize the existing pool of qualified persons, *and* to enlarge the pool of those who might become qualified in the future. If women and minorities see only white males on the faculties of their respective departments, it is very difficult to imagine themselves breaking the barrier. This is a fundamental source of ambivalence about earning the doctorate. Why bother if you can't get the kind of job you want?

Genuine affirmative action can only be achieved by creating a social climate in which all persons are evaluated on the basis of their performance, independently of sex or ethnicity. This will involve a long-range educational process aimed at three major targets:

1. Those doing the hiring, to show then that there are women and minority persons already in the pool, and to suggest creative, innovative ways of using them.
2. Those who have contributed to the filtering process in the past, to sensitize them to the nature and extent of their contribution; to help them understand how sex-role and ethnic stereotypes based on the sixties are no longer relevant to the seventies.
3. Those who have the potential to seek access to the pool, by identifying and encouraging talent, commitment, and willingness to work; to help them understand how sex-role and ethnic stereotypes are both internalized in the personality system as need dispositions, and institutionalized in the social system as role expectations, so that such stereotypes can be overcome at both the individual and social system levels.

APPENDIX III

CONSCIOUSNESS RAISING *

Consciousness raising takes place in small, leaderless groups which are structured to maintain a supportive, non-hierachical atmosphere in which we can begin to understand our position as women in society and to apply this understanding to making changes in that society.

---

[9] The Graduate Women's Project is co-sponsored by the Women's Center and the Affirmative Action Office at Berkeley. It is being conducted by the author and Nancy Isaac Kuriloff, a doctoral candidate in the Division of Higher Education. It is being supervised by two consultants in group dynamics, Paul Baum and Vivian Gold.

*Thanks to Maxine Raz, Department of Sociology, Berkeley, for providing us with the list of Consciousness Raising Techniques from which this page was derived. LWS

STRUCTURE OF CR GROUPS

1. Go around the circle, allowing each woman to talk uninterrupted on the chosen topic. This procedure prevents confrontations, challenges and debate. It is the essence of CR because it creates a kind of 'Free Space' where women can talk about themselves in a way they never have before. It helps us to listen to each other. It breaks down feelings of competitiveness among us. It enables women who are more reticent to have the same opportunity to talk as more aggressive women. It gives each woman a chance to compose herself and her thoughts.

A. *Always speak personally, subjectively, and specifically* during this part of the meeting, Try not to generalize, theorize, or talk in abstraction; rather, speak directly from your own experience. There is bound to be someone in the group who feels she doesn't fit into a generalization, and she will be alienated. We aren't all the same, and we haven't had the same experiences. We can learn from the differences.

B. *Don't interrupt*, except to ask specific informational questions.

C. *Never challenge anyone else's experience.* This may be the hardest rule to stick to, but it is also the most important. Although other people's experience may seem all wrong to you, it is true for them at the moment. Keep in mind that the other woman speaking may never have had a chance to talk about herself without being interrupted by a father, mother, husband, child, or psychiatrist. Ask yourself why you want to challenge her, and remember that, when it's *your* turn, no one will challenge you.

d. *Confidentiality.* No personal information about any group member should ever be discussed outside the group.

2. Choose a topic from your own ideas, from a list of suggested topics, or from some reading.

3. *Have a rotating facilitator.* Take turns alphabetically or go down the names on your list of members so each woman has a turn. *Don't take volunteers* for this job. We need a rotating facilitator not only to keep the meeting running smoothly (to get it started, remind us of the topic, indicate whose turn it is to talk, etc.) but also so that we can all learn leadership skills. This helps prevent the emergence of informal hierarchies which interfere with the CR process.

4. *Analysis.* After each woman has related her personal experience with the topic, the group should discuss the common elements in all the experiences. What conclusions can you draw about the role of women in society? What social structures enforce these roles? How can we change what we don't like? (The facilitator may want to write down a summary of this analysis for future reference.)

APPENDIX IV

ON INCREASING POLITICAL EFFECTIVENESS*

Political effectiveness means being able to persuade individuals and groups at both higher and lower levels of power and authority that it is in their best interests to help you as an individual or group achieve your goals. This paper tries to accomplish three goals:

1. To suggest some powerful tools for strengthening the political effectiveness of goal oriented organizations.
2. To suggest important issues which need to be raised among those involved in trying to achieve political effectiveness.
3. To suggest an analogy between the personal energy that can be liberated by good therapy, and the social energy that can be liberated by good consciousness raising in groups, and to suggest that this social energy might be used for influencing those up and down the ladder of power and authority, in order to achieve political goals more effectively.

1. TOOLS FOR STRENGTHENING POLITICAL EFFECTIVENESS

An important way for a political organization to become stronger and more effective is to get an accurate profile of its own members. This means gathering information on their background characteristics; their views of what the goals of the organization are, and what they ought to be; their views of what the most effective means to achieve those goals are, and what they ought to be; their views of the resources available within and outside the organization; their views of the sources of conflict in their personal lives coming from their participation in the organization, and how they cope with the stress generated by that conflict; their views of the sources of conflict among the members of the organization itself, and how they cope with the stress generated by that conflict.

---

*This paper was written for the First Annual State-Regional Convention of the National Women's Political Caucus of California. September 28–30, 1973.

Such a profile can be a powerful tool for identifying both strengths and weaknesses of a political organization. It can be used as a diagnostic tool for reaching consensus on goals and means, thus freeing social energy within the organization to mobilize resources, and build credibility and legitimacy by producing results in the political arena.

A second important way for a political organization to become stronger is to take stock of the resources available from outside the organization. For example, there are experienced professional organizations which provide for small political campaigns the kinds of services that really sophisticated party organizations provide for large campaigns.

These services are performed by people with many years of experience in developing technical skills and competence in running successful political campaigns. They can help the idealistic, but inexperienced candidate or organization learn to win without having to re-invent the wheel before they discover by failure that it has to be round instead of square.

2. ISSUES TO BE RAISED AND RESOLVED TO INCREASE EFFECTIVENESS

Effective goal achievement at the individual or group level involves at least four parts: being clear on what the goals are; identification of the most effective means to achieve the goals; mobilization of resources (time, energy, money) to carry out the means to achievement; building credibility and legitimacy up and down the levels of power and authority. The following hypotheses are offered for testing against your own political experience:

1. Clarity of goals leads to consensus on means.
2. Consensus on means leads to mobilization of resources.
3. Credibility and legitimacy increase outside resources.
4. Consensus on goals and means, combined with credibility and legitimacy, lead to goal achievement.

I have seen these processes operate in a variety of social groups, moving up and down the levels of power and authority. They occur in student relations with teachers, union relations with management, parent relations with school authorities, and individual and group relations with city councils, state legislatures, and congress.

So long as there is conflict about goals and means, individuals and groups are paralyzed in effective mobilization of resources. This paralysis makes it impossible to build credibility and legitimacy up and down the levels of power and authority. In order to achieve credibility and legitimacy an effective political organization must do the following:

1. Build a strong membership base to carry out the work.
2. Gather information to document arguments in support of goals.
3. Distribute that information up and down the levels of power and authority.
4. Distribute that information to similar organizations at one's own level, to build coalitions of support of goals.

The basic problem of goal oriented groups in the women's movement is the tension between the ideology of equality of all persons, and the reality of inequality based on differences in competence, expertise, and skills. These differences often are related to the amount of experience, which permits growth and development, a person has had. Experience tends to be related to age.

The most effective political organization would be one which gives two things: First, willingness to take the risk of trusting the experience of those who have been successful in developing political effectiveness. Second, willingness to take the risk of trusting those who are trying to develop their own competence, expertise, and skills. It is almost as difficult for inexperienced persons to be open to the successful experience of others as it is for experienced persons to be open to letting the inexperienced risk failure. The most important the issue, the stronger the conflict between the group's need to achieve its goals, and the individual member's need to learn how to be successful by taking risks. If this issue could be resolved, the organization would be stronger, for it would have a larger base of persons who have had the chance to learn effectiveness.

An organization devoted to increasing the political effectiveness of women needs to provide enough structure that people can learn to develop their political skills by carrying out the work of the organization. At the same time, it needs to provide a climate of social support which frees the novice to take the risk of making mistakes, without risking the goals of the group. Clarity of goals makes this possible.

3. LIBERATION OF PERSONAL AND SOCIAL ENERGY AS A POWERFUL RESOURCE

Good therapy releases a tremendous amount of personal energy that used to be drained off in handling conflict within the individual. It is accomplished, very slowly, at first, by the development of trust, good will, and openness of communication between patient and therapist.

Good consciousness raising in groups releases a tremendous amount of social energy that used to be drained off in handling conflict between individuals. It, too, is accomplished, very slowly, at first, by the development of trust, good will, and openness of communication among the members of the small group.

My own experience in trying to influence people up and down the levels of power and authority on the need for Affirmative Action on behalf of students has been: they are willing to listen when I treat them with the same kind of trust, good will, and openness of communication that I've learned from therapy and from the women's movement. If I treat them with mistrust, ill will, and am closed to hearing them, they neither listen, nor hear what I have to say.

By concentrating my energies on areas of consensus at the different levels of power and authority I have been free to accomplish the kind of work which seems to make an impact. Part of my strength in dealing with people at various levels lies in my own confidence in the validity of my data. I don't have to threaten people's sense of good will about themselves by screaming outrage, anger, and ill will. The very fact that 57% of the male applicants for admission to the University of California took trigonometry and solid geometry in high school, compared with 8% of the female applicants, speaks loudly and clearly on the climate of different social expectations imposed on boys and girls.

I use my energy to gather and distribute the data, but leave people free to draw their own conclusions. So far, for me, it is a comfortable way of being politically effective. I hope it works as well for you in your respective efforts to persuade individuals and groups up and down the levels of power and authority that it is in their best interest to help you achieve your goals.

Ms. SELLS. I very much appreciate this opportunity to share my work with the committee.

Mr. O'HARA. Thank you very much. I think your testimony has been very clearly a product of a more thorough analysis than I think this problem received by any of our witnesses.

I noticed your constant attendance, as I said, last week and I am aware, of course, of your having read the transcript of all of the other hearings. So you, of course, have come into this hearing today with a better preparation of what the differing points of view are than the members of the committee themselves do, so it is hard for me to quarrel with you about what was said in the past.

You pointed out that there are a number of safeguards to prevent administrators from imposing what has become known as reverse-discrimination as an easy way out and you list various steps through which a faculty hire must be approached. But, you don't think that that same number of steps is any proof against discrimination, right?

In other words, you feel that those seven steps don't prevent discrimination against women and minorities but that they do prevent discrimination in favor of them?

Ms. SELLS. I think that academic men are reasonable people who are capable of being persuaded by the facts. I think that once I get a chance to get my data in their hands that they will evaluate people on the basis of merit rather than the fact that we have this other situation.

Mr. O'Hara. My point is if they can be trusted to do it on the basis of merit, then what do we need an enforcement procedure for with respect to that, any enforcement procedure at all?

Ms. Sells. That is why I am proposing an educational process rather than an enforcement procedure, yes.

Mr. O'Hara. In other words, you feel that the steps listed by you as being a protection against reverse discrimination can also be our protection against positive old-fashioned discrimination—if there is a proper program?

Ms. Sells. That is how educable faculty are, particularly when I start with the math fact, which is not their fault.

Mr. O'Hara. Did you read President Fleming's testimony?

Ms. Sells. Yes, I did.

Mr. O'Hara. I don't think it was in his testimony to us; I can't remember where it was.

Ms. Sells. I would like to see that feature.

Mr. O'Hara. But there was something like out of 328 faculty new hires their goal had been projected at 311 who would be women and minorities or something like that and that clearly suggested they were going to engage in some real recruiting in order to reach it and one wondered how they possibly were going to do it without discriminating.

So, I would think that whatever we do, and I like the way you approached this problem, it is a positive approach, but whatever we do also has to provide adequate protection for the members of the majority groups so that they are not going to be quota'd out of jobs or out of promotions.

Ms. Sells. I hope we can reach Mr. Dellenback's ideal state of no discrimination whatsoever.

Mr. O'Hara. Right.

Well, I would like ~~to see~~ that.

I appreciate very much your taking the time to thoroughly research your testimony and to present us with some thoughts and I would appreciate it if you would permit us to be in touch with you as we move forward in this area.

Ms. Sells. Yes.

Mr. O'Hara. Thank you.

The subcommittee will now stand in adjournment until Wednesday morning at 9:30 a.m. at a location to be announced.

[Whereupon, at 12:30 p.m. the subcommittee recessed, to reconvene at 9:30 a.m., Wednesday, September 25, 1974.]

CIVIL RIGHTS OBLIGATIONS OF INSTITUTIONS OF POSTSECONDARY EDUCATION

WEDNESDAY, SEPTEMBER 25, 1974

House of Representatives,
Special Subcommittee on Education
of the Committee on Education and Labor,
Washington, DC.

The subcommittee met at 9:40 a.m., pursuant to recess, in room 2175, Rayburn House Office Building, Hon. James G. O'Hara (chairman of the subcommittee) presiding.

Present: Representatives O'Hara, Dellenback.

Staff members present: Jim Harrison, staff director; Webb Buell, counsel; Elnora Teets, clerk; Yvonne Franklin, minority counsel; Richard H. Mosse, assistant minority counsel.

Mr. O'Hara. The subcommittee will come to order. Today we will continue our hearings into the obligations of institutions of postsecondary education that they be considered eligible institutions for the purposes of the Higher Education Act and in particular title IV.

We have been examining civil rights obligations of institutions of postsecondary education both with respect to employment and admissions.

Our first witness this morning is the newly elected president of the American Federation of Teachers, Mr. Albert Shanker who will be introduced by our old friend Carl Megel, director of legislation for the federation.

TESTIMONY OF ALBERT SHANKER, PRESIDENT, AMERICAN FEDERATION OF TEACHERS, ACCOMPANIED BY CARL J. MEGEL, DIRECTOR OF LEGISLATION, AMERICAN FEDERATION OF TEACHERS, AFL-CIO

Mr. Megel. Thank you, Mr. Chairman, members of the committee. It is a great privilege and honor for me this morning to be able to present our distinguished and newly elected president of the American Federation of Teachers, Mr. Albert Shanker.

Mr. Shanker will make the presentation this morning on behalf of the American Federation of Teachers.

Mr. O'Hara. Thank you, Mr. Megel.

Welcome, Mr. Shanker.

Mr. Shanker. Mr. Chairman, members of the committee: I am Albert Shanker, president of the American Federation of Teachers, AFL-CIO, a union of 440,000 teachers and other educational workers.

We represent over 40,000 persons employed in the field of higher education.

I am pleased to make my first appearance representing the AFT before this committee on the subject of employment policies in institutions of higher education. The health of our institutions providing post-secondary education is very important to the AFT, and I hope to be here on other occasions to discuss other problems in higher education with you.

These hearings are a hopeful sign. We hope it is the intention of this committee to provide some guidance to the Government officials currently enforcing guidelines in relation to racial, ethnic and gender representation on university staffs. In the past, we used to ask whether or not an institution was practicing discrimination. It is a sign of progress that today the question is what are we doing that will help offset the effects of discrimination.

The AFT has always been a vigorous advocate of any program which would abolish discriminatory employment practices. Our collective bargaining agreements, now covering faculties at more than 140 higher education institutions. reflect that advocacy. The AFT concern for equal employment opportunities for all is also reflected in its support and endorsement of meaningful and effective affirmative action policies.

Unfortunately, there is presently some confusion as to what constitutes an effective affirmative action program. Some have argued that affirmative action must mean a system of quotas and/or preferential hiring practices. We, in the AFT reject that concept on the grounds that such programs are neither meaningful nor effective. In fact such a narrow definition not only subverts the very objectives which affirmative action intends to reach, but dooms such goals to inevitable failure.

For an affirmative action program to meet AFT requirements that it be both meaningful and effective, it must not deal only with the numbers of new minority hirings and promotions, nor merely the question of salary inequities. It must consider the root problem of increasing the available pool of qualified job aspirants. To do less, that is to equate affirmative action with quotas, is to flirt with forms of discrimination no less repugnant than Jim Crow laws were.

The result of this practice for many highly qualified individuals seeking teaching positions will be the understanding that their academic qualifications are really secondary to their purely biological classifications and that when they draw up their résumés, ability and scholastic achievement should be placed after their status as a preferred group under this year's affirmative action goals. Programs that foster this sort of frustration have serious consequences. It is not an overstatement to say that policies that restrict employment opportunities and in the process affect an individual's opportunity to make a living and support his or her family will lead to the most basic sort of conflict and could result in a reaction that will set us all back many years.

Our view as to what an affirmative action program should contain starts with open admission, free tuition, interest-free loans and grant money which will not only open the doors of educational opportunity to minorities, but encourage their pursuit of professional careers. Any significant increase in minority hirings on college staffs must begin by significantly increasing the pool of available personnel. In 1970, approximately 10.6 percent of all undergraduate admissions were black, American Indian, Spanish surnamed, and Oriental American. These groups constituted 16.8 percent of the U.S. population as a whole. (While this figure represented a tripling of these groups' participation from 1960, still more should be done.) Of bachelor degrees awarded in 1970, 5.2 percent were awarded to blacks, 1.2 percent were awarded to those of Spanish surname, and 1 percent to orientals.

With this pool to draw upon, the number of minority group members entering advanced study is roughly comparable to the percentages receiving bachelor degrees. According to a survey taken by the American Council on Education of 156 Ph. D.-granting information, 1.2 percent of all students enrolled in Ph. D. programs were from minority groups. These minority group students were concentrated in education, sociology, and the health professions. Fields with an unusually low percentage of minority group students were engineering, physics, biochemistry and other like sciences.

What these enrollment figures show is that in selecting faculty, one is not drawing candidates from the population at large, but from a significantly smaller pool of qualified candidates. The only way to increase minority employment opportunity in higher education is to increase the number of qualified applicants and at the same time increase the available positions.

If more minority students are to be accepted into graduate school, many who come from underprivileged backgrounds will certainly require academic and financial compensatory help at both the undergraduate and graduate level to allow them to compete with students who enter college better prepared for academic pursuits. This would be a useful method of achieving the two goals most crucial to increased minority participation. It is folly to believe that significant numbers of minority job applicants will be hired while colleges and universities are cutting back on teaching positions. Furnishing this extra help under an open admissions program would require the hiring of additional personnel to provide the compensatory assistance to make the open admission program work. We would have an increase in both minority hirings and completion of degree programs.

We advocate the provision of this help—academic, financial, and in other ways—to allow minority students to compete successfully. Open admission does not mean that everyone who enrolls will automatically do well. What is important and must be guaranteed is that everyone admitted has the opportunity and is encouraged to do well. It is a strongly held American belief that this is the land of opportunity where each citizen has the right to succeed in his or her own abilities. The kind of program that we advocate would enhance opportunity without the lowering of standards for we believe that standards must be maintained or the degrees awarded will become meaningless.

There are things that can be done and have proven successful. While this hearing applies only to higher education, I would like to take the time to talk about a couple of affirmative action programs that work without the imposition of quotas and goals and timetables. The United Federation of Teachers, Local 2 of the American Federation of Teachers, represents almost 10,000 paraprofessional employees of the New York City School Board. Paraprofessionals are largely black and Puerto Rican women for the most part, former welfare recipients, who work in the classroom, assisting teachers. Most did not have high school diplomas when they started, and almost none had bachelors degrees. Through the provisions of their collective-bargaining agreement, there are approximately 6,000 paras currently upgrading their formal education. Thousands of them have now received bachelors degrees under the program. Many of these are now teaching in the New York City schools, and many more are awaiting employment because of the very tight job market. All this was done without displacement and the lowering of standards. These union members who had in the past been denied the chance to pursue a higher education made the most of this opportunity provided by the union contract.

There is a similar story to be found in noneducational employment fields. The recruitment and training program, which is a plan to increase minority job holders in the construction trades, has had great success in securing apprenticeships in the construction skills and in providing minority recruits with the knowledge to successfully complete their training. There are more than 10,000 people currently working in the building trades who were recruited through the RTP. Contrast this with the so-called Philadelphia plan which concerned itself only with the numbers on any particular jobsite and led to the formation of motorcycle squads of minority construction workers shuttling from jobsite to jobsite in order to show the Labor Department inspectors that each federally funded project provided minority job opportunities. To our knowledge, the Philadelphia plan produced almost no new hirings, and certainly provided no avenue for unskilled workers to secure the skills needed to hold a construction industry job. It only resulted in the shifting of minorities from one job to the other.

The premise behind both the paraprofessional and recruitment and training program is the same: Any program that wants to make a dent in the low participation figures and to promote minority hirings must begin by providing qualified personnel. Affirmative action can be useful in other ways, for example, in evaluating institutions, to see that they make it their policy to expand the hiring pool to include all qualified individuals. Programs for the evaluation of promotion and pay policies to assure nondiscrimination would be useful for achieving the objectives of equal employment opportunities. Further, compilation of available personnel seeking employment and positions that are open would aid in minority hiring.

If all of these things are done, the degree of minority participation in higher education will increase; and it will increase without resorting to numbers, timetables, and other polarizing, and discriminatory factors. Quotas or numerical goals and timetables are based upon the assumption that when all artificial barriers that impeded minorities are removed, minority groups still need preferential treatment to achieve their employment goals. This is not only a false assumption, but it indicates a patronizing attitude toward the abilities of our minority citizens.

One final observation that occurs to me from a life spent as both an educator and trade unionist. In the long run, no group can succeed at the expense of another group, and those programs that intensify the conflict that comes from a shrinking job market and increased aspirations for those jobs, under the guise of improving minority hiring do none of us a service. In our society, either we all succeed together or we all bear the consequences of failure. In the current situation, only an expanding job market with affirmative action programs can begin to solve the problems. Our current employment situation is grim. The observation was made at the HEW summit last week by Virginia Trotter that education is not a growth industry. This is a national tragedy. Our efforts should be aimed at correcting this situation. If this employment situation remains stagnant, the hopes for a real inclusion of previously unrepresented groups in higher education teaching positions may be illusory, because job openings simply do not exist in sufficient numbers to meet expectations. There is great danger in the frustration produced by too many applicants for too few jobs. Higher education as a national priority in a democratic society should be made available to more students for many important reasons unrelated to the numbers on any particular university staff.

In conclusion, the goal in any hiring program must be equal opportunity for all our citizens. Equal opportunity does not guarantee that university or any other teaching staffs will reflect numerically the population as a whole. It does provide assurances that individual ability, scholastic achievement, and individual merit are the best methods for success in higher education or any other vocation. Equal opportunity is the goal; practices and programs that frustrate this goal are not useful in a democratic society. Undemocratic and discriminatory methods for whatever purpose are not viable solutions to any problem that we have.

I think there are two models. One of them unfortunately is a model which is developing in many of our institutions.

There is a model which seemingly affords equal educational opportunity. It is a model which opens the doors of the university to minority groups students.

It then changes the standards for those students, offering them no help, offering them no tutoring, offering them nothing to overcome the obstacles of discrimination and perhaps inferior education at the elementary and secondary levels.

Degrees are then awarded on the basis of those lowered standards thereby supposedly creating job opportunities by establishing a certain number of positions at the university reserved for the minority groups.

Ultimately such action will result in our total society looking upon minority group members who are doctors, lawyers, engineers, professors, as people who made it with pieces of paper labeled diplomas that do not have the same value as others in our society have. We are not doing them a favor.

We are not doing our society a favor when we set up essentially a phony second-class system which has a different quality, a different content and a different meaning than that which we generally require.

I would contrast that with a true affirmative action program where we seek out minority applicants. When we get these applicants into college we do everything in college to make sure they are given special help so that they can compete within the same framework and standards as everyone else competes in, maintain the same standards on the part of the academic institution, fail those who do not make it, to give all the help possible and then provide for those who do make it, an expanding job market so there will be positions for them.

One of the major focuses of the American Federation of Teachers in this period will be to provide some expanding opportunity throughout our educational system to provide for universal early child education.

This is to provide many professional opportunities for minority groups and others coming out of our colleges. Also to develop a program of life-long education so that people who, maybe, made a mistake and perhaps dropped out of high school or who left college early and who have been in a tough, perhaps unrewarding job, and who now realize the mistake they made, when they were younger, can return to continue their education at a later time.

It would open additional opportunities for employment within universities and the jobs vacated by workers returning to school to further their education would ease the massive unemployment situation that our country has right now, by taking someone off welfare or unemployment and putting him into the job, temporarily left by the person who went back to school.

So we have essentially two models. One of them perpetuates the discrimination that our society has always had except that instead of denying higher education to a minority group applicant it gives a meaningless degree and then says that our society has not provided equal treatment.

A degree thus attained is not the same degree unless it involves the same skills and the same effort. Just handing out a mere piece of paper is papering over the real problem. That is precisely what should not be done.

Thank you.

Mr. O'HARA. Mr. Shanker, thank you very much. I can see you and I are going to get along very well.

I am looking forward to your appearances before this committee.

I think you have stated a sound proposition. That indeed echoes some of the things I have been saying. We have talked for instance about the law schools and their admission practices.

I hope that we in the committee can at the appropriate time soon come up with a way to expand opportunities for those who aspire to careers in the law.

Right now we are talking about a situation where only a small percentage of those who apply for admission into law school or to medical school are actually admitted which seems to me to be the great shame of the entire situation.

So we are talking about rationing scarce resources. The question is, on what basis do you ration them? You ration them on a nondiscriminatory basis by picking the best qualified applicants or if you want to make a pool of qualified applicants and then draw at random from them, that would be all right with me.

Mr. SHANKER. That would be fine, yes.

Mr. O'Hara. I don't want any picking out by saying "we are going to take five Chicanos and 16 Afro-Americans and we are going to take three Japanese-Americans and two Chinese-Americans," you know? I don't think that is the way we want to put our society together. I don't think the Constitution permits it.

One of the things that kind of disturbed me in terms of affirmative action programs, admissions, and so forth. I would like to see affirmative action programs that make certain that we open the door to all groups, that we are absolutely certain that all groups are aware of opportunities, that perhaps were not formerly available.

But I don't think that affirmative action programs aim particularly at one racial or ethnic minority. In other words, I sometimes use the expression of two youngsters who are children of migrant farm workers and who suffered from grinding poverty, suffered from interrupted education.

I can't see any reason to help one more than the other based upon the color of their skins. I think the two have comparable problems and ought to be helped.

Would you comment on that?

Mr. Shanker. I would agree with that but every effort must be made to ameliorate the effects of racial bias. The beneficiary of programs aimed at blacks and Puerto Ricans have often been poor whites. At the University of New York the greatest beneficiaries to date have been Italians, Poles, and Irish. The population in New York City which has not taken advantage of higher education to date are the blacks and Puerto Rican groups. They have not yet taken advantage of the open admission program to the extent that it was felt that they would.

But this has reached people who were previously unaware or weren't in the 85-percent bracket in high school. They were in the 82-percent level or the 81-percent or 80-percent level.

I would agree that I would find it repugnant to deal with this in terms of race. I have reminded people on a number of occasions that when you do it on that basis you may very well be favoring a youngster who came from a fairly well-to-do black family and deny the right to some poor white who had really struggled to that particular position.

When you try to move from the implication of group rights to a question of two individuals who are competing, it just doesn't follow that the sufferings of a group have been suffered by all members of the group.

I would target the affirmative action at all those who have been either economically or whose historic patterns have been such that ethnic groups decided not to seek education but to go into some other field or it could be to make up for previous racial or religious discrimination.

But I think all those patterns ought to be targeted.

Mr. O'Hara. I couldn't agree more. It is a point that I have been trying to make in these hearings. I am glad that you make the point of the great importance of open admissions and other programs to assist all of those who have missed the opportunity for one reason or another in the past, failed to graduate from high school, dropped out at some stage, who want and need an opportunity.

To me the idea of saying that the high school diploma and certain grade point averages in high school ought to be necessary to obtain the advantages of postsecondary education is crazy. That denies more people an opportunity than any form of discrimination or indeed even financial circumstances.

I think when you look at the disparity between the number of college-aged persons who are attending postsecondary educational institutions from the lowest income group and the highest income group you find a very large disparity.

Fully half of that disparity can be accounted for at least in part by the lack of a high school diploma.

Mr. SHANKER. Yes.

Mr. O'HARA. I think we have to open up those doors. I know a lot has been done in that regard in recent years. But I think a great deal more needs to be done to bring in the student who didn't succeed at some earlier stage and now can be helped to succeed.

Mr. SHANKER. This Nation conducted a great experiment in that regard some years ago. It was not conducted for the purposes that we would want it conducted now.

But under the GI bill of rights, which I suppose had as its two major reasons: First, a reward for their service to our Nation and second, perhaps even more important, a fear of a massive recession or depression if all those veterans were thrown back into the economy and at the same time. Here were millions of men who had dropped out of school or college at some point and had gone to work. Now they learned what the world out there was like and they were the most mature generation of college students this Nation had ever seen.

I had the privilege of being in college with them. I just happened to have missed being a veteran. I was a junior among all of these veterans. There was an atmosphere on campus which is quite different from what one gets from a high school person who has never had the feeling of working for a living and doesn't know how important it is to stay in school to succeed.

Also, I think it is extremely important that we take the position that it is cruel for us to assign to that person who makes a mistake once in life and has learned from that mistake, that he is doomed forever. We do not have such behavior in our criminal justice system anymore.

To say that a person who hasn't committed a crime but who has made a mistake isn't given a second chance is really an outrage.

In this regard my experience has been very heartwarming. In 1966 and 1967 at least 10,000 paraprofessionals were hired in the New York City public schools. Very few of them had high school diplomas.

These paraprofessionals were given jobs in the classroom. They were told that they could only keep the job if they continued to try to get their high school diploma. They all did get their high school diploma. By June 1974, 2,000 of them are college graduates.

Instead of having 10,000 welfare mothers there are now 10,000 employees in the public school system, 2,000 of whom are about to become college graduates.

By the way, we could have said that these paraprofessionals should automatically receive a certain number of college credits for their experience in the classroom. We could have tried to give them a favored short-cut route into the position of teaching. We refused to do that.

We said to these paraprofessionals:

> We can get you a cheap college degree which may or may not 10 or 15 years from now get you a job in the school system. As long as this superintendent is here and this board of education is here. But we did move. We said we are going to give you the money and the opportunity and the help to go to college. When you graduate you will have something that is of value to our society.

They accepted it. It can work.

Mr. O'HARA. I think that is a very good example.

Mr. Dellenback, I see, is busy executing an important document in the midst of all this.

Mr. Dellenback?

Mr. DELLENBACK. Thank you, Mr. Chairman.

I wish to indicate to Mr. Shanker that it is a tribute to him and the subsequent witnesses that I am executing a proxy so that I can be here to listen to what you have to say.

It was very helpful. Thank you very much for what you have done. Your emphasis on increasing the available pool of qualified job aspirants is really an emphasis that we haven't had from any of the witnesses who have been before us prior to this time. It is very helpful, and what you say makes very good sense.

We can talk all we want about being sure that everybody who is potentially able to get a particular job—whatever their race or sex classification—there is nobody in the pool, or it is a proportionately small number of people in the pool, you are not getting the position filled in any substantial number.

I agree with you that there are difficulties which are present in attitudes at the present time.

The point still remains that this is a fundamental part of what we can do to help. I think you put it well. For the sake of emphasis, that is what you say in a few lines on page 6 of your testimony. I agree that an important part of affirmative action should be action to expand the hiring pool to include all qualified applicants.

Everyone who is qualified should be considered for whatever jobs are available. Implicit therein is a vast revolution in what many institutions have actually followed as a policy.

Am I correct?

Mr. SHANKER. That is correct. It is intended in exactly that way.

Mr. DELLENBACK. That is the way I read it. I think for the sake of the record, I want to be sure that you are saying affirmatively, there are institutions that aren't doing that. There may be a pool out there somewhere, and they don't solicit.

You also go on and talk in terms of evaluation programs for promotion and pay policies to assure nondiscrimination. That is another very important part of what needs to be done.

If qualified personnel are hired, you still haven't solved the problem if once in that situation there is discrimination in promotion and/or pay on the grounds of race, sex, or any other qualification you can dream of.

So again I read into those words, if I understand what you are saying correctly, a strong program of affirmative action which assures that within the employment pool there is equal opportunity in that area.

Mr. Shanker. That is right. I want to stress another point. I think the problems with respect to women are different from the problems with respect to blacks, Chicanos, and Puerto Ricans I think that the available pool is much greater.

For example consider the New York City School System. There has been a lot of agitation, stating that 60 percent of the children in schools are from minority groups and therefore 60 percent of the teachers should be from minorities. But we do not select our teachers from a pool of children.

The pool of minority group people in New York City is considerably below 60 percent. Furthermore we aren't even selecting from the adult pool. We are selecting from the college graduates, which is still smaller.

So when you start analyzing the kinds of demands that are made it doesn't make very much sense.

But on the other hand I think that women have a much better case of discrimination. They are very well represented in the teaching force but a much smaller percentage are assistant principals, principals. At the district superintendent level it is still smaller.

There is no evidence that they are poorer teachers, poorer administrators. Here I think is a case where more immediate steps can be taken. There are people on the job who are there and who are suffering immediate discrimination at the present time.

Mr. Dellenback. That is helpful. A second question deals with the compilation of available data of all personnel seeking employment in positions that are open.

If the institution is ready to circularize to everyone they know about—not just a narrow group—and there is no really broad-based data as to who is available, they are going to be limited in getting out full information as to available jobs.

Again, do I read you correctly that this is part of what you are pushing?

Mr. Shanker. It certainly is. Many unions try to get into their contracts, a posting of everything available as a fairness mechanism so that everyone who feels that he or she is qualified will at least be able to compete for the job.

Mr. Dellenback. In talking about the goal of equal opportunity, those are dangerous and ambiguous words. What your testimony has given us is a good "fleshing out" of aspects of this.

I am grateful for your being with us this morning.

Thanks for your very helpful testimony.

Mr. Chairman, thank you very much.

Mr. O'Hara. Thank you very much, Mr. Dellenback.

I understand, Mr. Shanker, that you have another meeting. It is a miracle. But you are going to get there on time.

Mr. Shanker. Thank you very much.

Mr. O'Hara. You are probably the only man who has ever appeared before a congressional meeting and got to his other meeting on time.

Mr. Megel. We want to thank the chairman for giving us the opportunity to participate and to the members of the committee. We are grateful. Thank you very much.

Mr. O'Hara. Thank you, Mr. Megel.

We look forward to hearing from you further.

Mr. DELLENBACK. Mr. Chairman, may I ask unanimous consent that a statement which is going to be coming from Reed College of Oregon when it is received in connection with affirmative action be made part of the record?

Mr. O'HARA. Without exception it is so ordered.

[Information referred to follows:]

REED COLLEGE,
Portland, Oreg., October 11, 1974.

MS. MARLAINA KINER,
Director, Office for Civil Rights, Region X, Department of Health, Education, and Welfare, Arcade Plaza Building, Seattle, Wash.

DEAR MS. KINER: In accord with your letters of August 16 and September 25, 1974 and my initial response of September 6, 1974, I am forwarding my comments on the Report of Findings, Reed College.

Before commenting on the specific provisions of the Report I would like to reaffirm my strong personal belief in the desirability of eliminating all traces of discrimination from higher education. I have no doubt that one of the reasons I was offered the Presidency of the College, and certainly one of the reasons I accepted, was that my deeply held convictions in this area found a congenial home in Reed's long tradition of equality and openness. That tradition, and my own views, antedated the development of federally sponsored affirmative action programs. It is not surprising, therefore, that my staff shares with me sympathy for the objectives of affirmative action—the widening of recruitment to include all qualified applicants, the elimination of sexism, racism, or any other kind of discrimination from all aspects of college life.

Having said this, I would like you to know that we were hampered in responding to the Office of Civil Rights (OCR) Report on Reed because we found significant portions of the orders and regulations issued or administered by the OCR, particularly Executive Order 11246, inapplicable to Reed College. While I will respond in greater detail below, I can say at the outset the regulations as they are currently interpreted appear to us deficient in four major areas:

(1) They apply to Reed without any reservation, the industrial, or large scale model of personnel management. As a result the College is asked to do many things (for example, assemble data and keep records on literally thousands of applicants for the few sought after faculty openings) for which we lack the organization and resources.

(2) There appears to be little recognition on the part of OCR of the financial constraints under which the College operates. Thus we would be required to embark on a costly program of "validating" the entire recruitment process.

(3) In many respects the Report assumes a uniform system of governance and practices for all College employees. As you know, this is not the case. Faculty and staff have distinct career systems with separated procedures for recruitment, promotion and, in the case of faculty, tenure. Thus, the requirement that the College prepare job descriptions for faculty as well as nonacademic staff is completely unworkable for faculty where rank is not dependent on particular responsibilities of the position, but is related to qualities of mind, and teaching and research skills.

(4) The critique of the College's utilization analysis and goals is based on flimsy data (for instance, the study on which OCR derives higher women and minority faculty hiring targets for Reed includes many academic disciplines not represented here), ignores the small number of openings projected at Reed, and lacks basic probability analysis to measure the likelihood of Reed meeting targets under the best of circumstances.

A further area of concern to us is the change over time in what OCR requires in the Reed Affirmative Action Plan. You will recall that our initial Plan was submitted to your office March 12, 1973. The response, in a letter from Larry Omo, Acting Chief, Higher Education Branch, on June 1, 1973, noted deficiencies in the following sections:

Required Utilization Analysis
Goals and Timetables
Dissemination of Policy
Responsibility for Implementation
Identification of Problem Areas

Development and Execution of Programs
Internal Audit and Reporting System
Maternity Leave and Nondiscriminatory Nepotism Policy

Our revised plan which addressed these specific problem areas was submitted on September 27, 1973. We were informed by your office in a letter from Tricia Watson, Equal Opportunity Specialist, on November 13, 1973, "The Higher Education Branch staff has completed its analysis of Reed College's revised Affirmative Action plan. Some remaining weaknesses were identified and will be briefly discussed below." The only two deficiencies in the Reed College Plan according to her letter were in the: "Required Utilization Analysis" and "Identification of Problem Areas."

Since these were described as the "remaining weaknesses" we assumed OCR had eliminated the other six problem areas, noted in Mr. Omo's June 1 letter, on the grounds the College actions had effectively corrected any alleged deficiency.

Working on this basis following the November 13 instruction, we addressed ourselves to the two remaining problems. These were revised and submitted as part of our Affirmative Action Plan to the Review Team during their visit February 25-27. You will understand our bewilderment, I am sure, when we received our next communication from the OCR. The Report of Findings, Reed College, dated August 16, 1974. The Report is divided into three sections: the first, an evaluation of our Affirmative Action Program; the second, deficiencies resulting from the February on-site review; and third, findings related to student services. The first part of the Report—that dealing with an evaluation of our Affirmative Action Plan—no longer was limited to the two "remaining weaknesses" described in Ms. Watson's letter of November 13, 1973. Instead we were told our Plan was deficient in eight areas most of which were included in Mr. Omo's letter of June 1973. A new finding—possible discrimination in salary based on sex—was part of the list. This finding had not appeared on any previous communication from OCR. As we look back on our experience over the last year or so we find the changing OCR evaluation of our Plan perplexing and confusing. Any explanation you can provide on what appear to be substantial shifts in judgment by your office would be appreciated.

On a number of occasions in the comments that follow I refer to the small size of the Reed staff—even relative to schools with roughly the same number of students. During the visit of the Review Team I turned over comparative data we had assembled on Reed's endowment, current operating budget, financial aid, voluntary giving and faculty salary scale. With regard to faculty salaries, the most recent data available, a Colorado College survey of eleven colleges, shows Reed ranks either tenth or eleventh on the median scale of Associate, Assistant and full Professor. (Please see Attachment A.) I believe the information made available to the review team provides strong support for assertions—made later in this document—that Reed lacks the staff and resources to carry out many of the data gathering and record keeping requirements suggested by the OCR. As is apparent from these documents, Reed's endowment is a tenth of the nearest comparable institution. One consequence is that our operating budget (and expenditures for administration) is extremely low. A statistical profile of colleges and universities in the September 15, 1974 issue of Forbes magazine shows Reed with the lowest operating budget of twenty four-year colleges surveyed (Attachment B). Swarthmore, with roughly the same number of students, has an operating budget twice that of Reed's. It follows that we do not have many of the offices and services commonly found in such institutions. There is no Office of Institutional Research at Reed to which one normally would turn for much of the data requested by the OCR. We also do not have a personnel or employment office to establish job descriptions or assemble and analyze data on job applicants.

Budget restraints are only part of the reason Reed's administrative structure is lean. Traditionally the Reed faculty have taken on a substantial portion of the administrative load, the evidence of which is a list of 1974–75 committee assignments (Attachment C). The burden of much of the data gathering and analysis required by OCR would fall on the faculty—assignments which could be discharged only at the expense of the central academic mission of the College.

One last point before moving to the Report itself. We noted in the paragraph on Student Services in your letter of August 16 the instruction that "The College will not be required to modify any of its existing programs in areas where policy has not yet been established." We have chosen, nevertheless, to respond to the findings in the Report in the field of student services, recognizing, as you advise, federal policy is still uncertain.

My comments refer to the findings in the order in which they appear in the Report.

REQUIRED UTILIZATION ANALYSIS

The Report first refers (page 1) to Section 60-2.11 of Revised Order #4 regarding inadequacies in the College's utilization analysis for staff. Specifically, we are required to provide information on:

(a) the availability of promotable and transferable women and minorities within the contractor's work force;

(b) the existence of training institutions capable of training persons in the requisite skills;

(c) the degree of training which the contractor is reasonably able to undertake as a means of making all job classes available to women and minorities.

We are at somewhat of a loss in determining exactly what is meant by the need to identify "promotable and transferable women and minorities." In practice, the women and minorities on our staff from food service and janitorial employees through technical and professional staff—represent a wide range of abilities, experience and interest. In this sense, all of our employees are promotable or transferable should a suitable opening occur. When there is a vacancy, the College, in common with many employers, carefully reviews its entire staff, including all women and minorities, before seeking applicants outside of the College. (At the same time, we publicize the opening to the widest possible audience.) This has always been College policy and it is particularly important now in a period of retrenchment when the opportunity for advancement to greater responsibility (and income) plays an important role in employee morale and productivity.

In connection with "training institutions capable of training persons in the requisite skills" (page 2) again we are perplexed as to exactly what is wanted from us. Obviously many of our employees have skills which can be learned in universities, trade or professional schools. Does the OCR wish us to provide an inventory of such institutions? If so, it is beyond the capability of our limited staff. Similarly, we are asked to provide on the job-training in an effort to make "all job classes available to women and minorities." There are no resources or staff here to establish formal training programs, if that is what is suggested by Executive Order 11246.

The Report states (page 2) that the Reed utilization analysis for staff "does not identify underutilization by particular job classification." It would be appropriate here to describe how all the activities falling under what is normally called "personnel management" are handled at Reed College. First, as I noted above, there is no personnel office, per se, with responsibility for hiring, firing, maintaining records on each employee, etc. To a large extent, decisions are decentralized; department heads are responsible for their employees, subject, of course, to the overall College policies (such as Affirmative Action and Equal Employment Opportunity) and budget controls. Reed does not have a system whereby each nonfaculty position is ranked, with formal job description. As a matter of fact, progression up the academic ladder reflects qualities of mind and teaching skills which cannot be identified in a job description. We firmly believe large scale, industrial model personnel systems are inappropriate for the small staff and informal working relationships at the College. More importantly, we lack the capability—given present and expected restrictions on size of staff—to both establish personnel procedures of this type and monitor and administer them. Furthermore, because of the small size of the College, work for a large percentage of the staff is less specialized and defined; people are expected to apply their general capabilities to a much larger variety of tasks which it is not in the interests of the College to closely specify or categorize. This is true over a large range of employees, who partially prefer to work more as generalists than would be true in commercial, industrial or large-scale university work forces.

The devised E. O. (Section 60-2.11) notes the College's utilization analysis is required to include:

"An analysis of all major job groups at the facility, with explanations if minorities or women are currently being underutilized in any one or more job groups (job "groups" herein meaning one or a group of jobs having similar content, wage rates and opportunities)."

We submit that our utilization analysis breakdown of non-faculty employees into professional, technical, clerical, maintenance, janitorial and food service is responsive to the E. O. definition of job group.

The Report continues (p. 2) that Reed's utilization analysis distorts "the true underutilization of women and minorities." We believe an analysis of the Reed submission does not justify this conclusion. For example, it can be seen that in the "Professional" job group (which includes the senior college administrators), of the 33 employees 15 are women. We fail to see how this presents a distorted picture of the utilization of women and minorities.

The faculty utilization analysis, according to the Report (page 2) "provides no summary statistical data to show the utilization of women and minorities by job classification (rank) for the entire institution." As a matter of fact, our submission identified women, minorities and total faculty by Lecturer, Assistant Professor, Associate Professor, and Professor from 1973 through 1977.

We are also advised (page 2 of the Report) that the "faculty utilization analysis provides no comparison of the availability of women with requisite skills (i.e., Ph.D. in specific discipline) with their utilization in the corresponding organizational unit (department)." This is what we have attempted to do in Table A of the faculty Utilization Analysis. That is, of the eleven departments where vacancies are expected to occur, we indicate seven women faculty members for the 1973–74 academic year. In your letter of September 25 you asked for a breakdown of available women Ph.D.'s in departments where vacancies are not expected to occur. We will be happy to provide this information as soon as we receive the *National Research Study on Doctorate Recipients from U.S. Universities, May 1973*, which is more current than the documents on which our figures were based.

In this connection the Report states (page 3):

"Although an agreement has been reached between Reed College and the Office for Civil Rights which allows the College to set academic goals and timetables by the faculty as a whole, it is nonetheless necessary to identify the individual departments where there is underutilization of women and, in seeking to meet the established goals and timetables, to assure that there is a distribution of women in all departments where underutilization has been identified."

We find this language confusing and apparently contradictory. Pending further instructions, we will assume timetables can be set for the faculty as a whole, and not for departments.

The Report asserts (page 3) that our goal of women as 15 percent of the faculty in five years is not acceptable. In support of this finding a preliminary study of the National Center for Educational Statistics is quoted, indicating that for 1972–73, women represented 23.6 percent of the total faculty at all ranks in privately controlled four-year institutions. As noted in Biology Professor Helen Stafford's letter to you of September 18, the so-called availability figure of 23.6 percent includes colleges and staffs of widely varying qualities. We have reviewed the National Center for Educational Statistics study, from which this figure was abstracted, and we can find no comprehensive data on the kinds of private four-year schools and disciplines included in the study. A footnote advises the study includes but is not limited to "organized theological schools, schools of art, and miscellaneous independent professional schools offering programs in medicine, law, business, pharmacy, etc." Obviously, there is no way to determine—from the scarce information provided in this study—the size or quality of the pool of women Reed can draw on.

Another key variable, which apparently was not considered by OCR in reviewing our faculty utilization analysis, was the small number of vacancies, sixteen, projected over the next five years. Section 60–2.12 of Revised Order #4 states: "In establishing timetables to meet goals and commitments, the contractor will consider the anticipated expansion, contraction and turnover of and in the work force."

We have calculated the probabilities of reaching a goal greater than 15 percent women in the Reed faculty with the low turnover and small number of projected vacancies. To reach a goal of approximately 23 women in a faculty of 100 within five years, 12 of the expected 16 vacancies will have to be filled by women. Assuming that the nationwide pool of 23.6 percent represents nothing but well-qualified applicants in the limited number of disciplines we expect vacancies (there is every reason to conclude this is not the case), and assuming the total absence of sexual discrimination in hiring, the probability of meeting the goal is 0.0000204, or one in 50,000. Insofar as the applicant pool of women is less than 23.6 percent of the total pool of men and women, the probability of meeting the goal decreases even further.

With regard to goals for faculty recruitment of minorities (Blacks, American Indians, Spanish surnamed Americans, and Asian Americans) the Report advises (page 3), "No goals set exclusively on the basis of availability of only one of these groups will be acceptable." Also, in your letter of September 25, 1974, commenting on our revised plan, "No data was given on the availability of minorities by the department." At the same time the Report notes, "It is acknowledged by HEW that data indicating availability of minorities to academic disciplines is difficult to obtain. Such information will not be required at this time." These instructions appear to be contradictory and we would appreciate your advice.

The Report implies (page 4) that our goal of two percent minority employment in the faculty is too low considering the Carnegie Commission Report which indicates that minorities represent 5.3 percent of all full-time faculty in colleges and universities. We have not yet had the opportunity to review this study, but again, as was the case in the estimate of the size of the pool of women Ph.D.'s, we have no way of knowing what portion of the minority pool represents—in either subject matter or quality—potential faculty for the College.

If we were to meet the inflated goals of *both* women and minorities over the next five years only one position out of the 16 available would be filled by a white male. Clearly this is not feasible given the representation of white males in the total qualified applicant pool. Thus, in the case of both women and minorities, even if the College accepts the most generous assumptions about the pool of qualified applicants, elementary statistical analysis leads to the conclusion that the probabilities of meeting higher faculty employment targets—as suggested by OCR—are extremely unlikely unless reverse discrimination is applied.

Reed College will continue to seek out applicants from the widest possible pool and then select the best candidate, irrespective of sex, race, or origin. To revise our women and minority hiring targets upward would require abandoning this long standing policy of selecting faculty on merit alone. We strongly believe that in hiring the best qualified candidate we are complying with the law. As you know, the Health, Education and Welfare Higher Education Guidelines (p. 9) instruct us:

"In the area of academic appointments, a nondiscriminatory selection process does not mean that an institution should indulge in "reverse discrimination" or "preferential treatment" which leads to the selection of unqualified persons over qualified ones. Indeed, to take such action on grounds of race, ethnicity, sex or religion constitutes discrimination in violation of the Executive Order."

Similarly, Title VII of the Civil Rights Act of 1964 states:

"Nothing contained in this title shall be interpreted to require an employer . . . to grant preferential treatment to any individual or to any group because of the race, color, religion, sex, or national origin of such individual or group on account of an imbalance which may exist with respect to the total number or percentage of persons of any race, color, religion, sex, or national origin employed by an employer . . . in comparison with the total number or percentage of such race, color, religion, sex, or national origin in any community, state, section, or other area, or in the available work force in any community, state, section or other area."

Finally, we believe the College's nondiscriminatory faculty hiring policy is completely consistent with the U.S. Supreme Court decision in *Griggs* v. *Duke Power* (1971):

"Congress has not commanded that the less qualified be preferred over the better qualified simply because of minority origins. Far from disparaging job qualifications, Congress has made such qualifications the controlling factor, so that race, religion, nationality and sex become irrelevant."

With regard to the finding that "neither of the two minorities currently on the faculty have academic rank," this was answered in my letter to you of September 6, 1974. One of the two Black faculty members is Assistant Professor of Black Studies with academic rank as defined in the Reed Constitution. The second minority member is Director of the Black Studies Center, a position which normally does not carry academic rank.

GOALS AND TIMETABLES

We are told (page 4) that "The goals and timetables in the Reed Affirmative Action Program are inadequate." Specifically, "There is no indication that the goal setting process involved personnel relations staff, department and division heads, and local and unit managers as required in 41 CFR 60–2.12(b)." We believe this is an excellent illustration of application by OCR of administrative and management standards more suitable for a large industrial concern than Reed College. We do not have personnel relations staff or local and unit managers. The staff goals submitted to OCR were discussed by all appropriate College officials. Faculty goals were reviewed and approved by me, the senior faculty advisory committee, and the faculty as a whole. These are the only existing comparable decision makers.

The second reason cited (page 5) for the assertion that our goals and timetables are inadequate is that "The goals do not meet the requirements of 41 CFR 60-2.12(g)." We have carefully reviewed this section of the Executive Order and believe our goals and timetables do meet the specific provisions of the Executive Order. For example, the Executive Order states (Section 60-2.12), "Goals may not be rigid and inflexible quotas which must be met, but must be targets reasonably attainable by means of applying every good faith effort to make all aspects of the entire Affirmative Action work." We believe the goals and timetables established by the College are completely consistent with the regulations. In order to correct any possible deficiences in this area, we will require more detailed instruction from your office.

DEVELOPMENT OR REAFFIRMATION OF THE EQUAL EMPLOYMENT OPPORTUNITY POLICY

The Report asserts (page 5) that the College's "Equal Employment Opportunity Policy does not meet all of the requirements of Section 60-2.20, specifically:

"(a) the policy statement does not include prohibitions against discrimination on the basis of color and national origin;

"(b) it does not state that discrimination will be prohibited in each of the areas listed in Section 60-2.20(1) and (4)."

The revised policy statement reflects the changes suggested by this finding. It was printed in the September 4th issue of REED BRIEFLY, a semimonthly publication, copies of which are distributed to all members of the Reed community as well as off-campus friends of the College. The revised policy statement is as follows:

"This statement on equal opportunities at Reed College puts into writing the fundamental philosophy that has characterized the college since it was founded: all relationships with the college are based on personal merit. Individual characteristics of race, color, religion, sex, and national origin are extraneous. The preparation of this formal statement is in response to current federal regulations that require such a statement as condition to receive federal grants.

"In operation, Reed's policy of equal opportunity based on personal merit means:

"1. Students are admitted on demonstrated competence and intellectual potential in the context of Reed academic goals, and academic opportunities are available in equal measure to all.

"2. Employment, job status, pay, and promotion are based on the individual's qualifications, performance, and appraised potential for future performances. In particular, Reed will continue to recruit, hire, train, and promote persons in all job classifications, without regard to race, color, religion, sex, or national origin, except where sex is a bona fide occupational qualification, and to conduct all personnel actions such as compensation, benefits, transfers, layoffs, return from layoff, company sponsored training, education, tuition assistance, social and recreational programs, without regard to race, color, religion, sex, or national origin.

"3. To avoid the remote possibility that Reed's policy is not recognized by potential and present employees, such measures as necessary will be taken to establish understanding of this policy.

"To insure that this policy is completely achieved in employment and in all phases of college operation, Carleton Whitehead has been designated as Equal Employment Opportunity Officer, and Richard Dent and Leila Birnbaum as Associate Directors. If any employees or students of Reed College have any questions about Reed policy or believe that the conditions of their employment or college life have been adversely affected because of their race, color, religion, sex, or national origin, they should advise one of the above individuals."

DISSEMINATION OF THE POLICY

In my letter of September 6 (pages 1 to 6), I answered in detail the finding that the College "has not adequately disseminated its affirmative action policy to staff and faculty." Please let me know if you have any questions (other than the comments in your letter of September 25, 1974) on the extensive list of statements, meetings, publications enumerated in my letter designed to publicize the Reed policy to the widest possible audience.

RESPONSIBILITY FOR IMPLEMENTATION

We have reviewed the pertinent section of the Executive Order referred to in the finding that the "Reed College Action Program does not clearly indicate line responsibilities as required in Section 60-2.22(b)." In eight of the nine examples of line responsibility detailed in the Executive Order, the College's Affirmative Action Officer plays a major role. The only exception is career counseling (60-2.22(b)6), a service to students which the College has just initiated. Our Affirmative Action Officer does not do career counseling per se (if this is what is meant by the Executive Order) although he does monitor the activities of this office along with all others in the College. Please advise what changes, if any, need to be made in our procedures to address this finding.

IDENTIFICATION OF PROBLEM AREAS

Under Section 6, Identification of Problem Areas, the Report finds (page 6), "The College has not established procedures for systematically monitoring applicant flow data." We are instructed to establish a comprehensive system of data gathering and analysis including:

(a) statistical data by organizational unit (department) for faculty and job classification for staff showing the total number of applicants for the past year by race, sex, source of referral and disposition (including reasons for nonemployment);

(b) an analysis of our recruitment and selection procedures; that is, an assessment of the productivity of each recruitment source and a review of the performance of each College employee in the recruitment process.

[There are, in addition, two requirements we do not understand and about which we will need further information from your office. They are:

(1) an "analysis of the applicant flow data to determine the impact on minorities and females who apply for or are referred for employment," and

(2) an evaluation of "the effect that the College's image as an Equal Opportunity employer in the recruitment areas has on the number of minority and female applicants who apply or make inquiry to the facility for employment."]

The OCR findings in the monitoring of applicant flow data raise two major problems for the College. First, many of our faculty searches generate 500–1,000 applications by mail from all across the country and from other countries, and we expect this kind of response to continue or increase in the foreseeable future. I am sure you can appreciate the fact that the staff required to assemble and analyze data on this scale is completely beyond our meager administrative capability.

Second, and possibly more important, requests for such data from our applicants raise a serious question of principle. For many of us in the college community the solicitation of race and sex information from job applicants is a step backward in the fight for equality of opportunity. Pertinent federal and state legislation appear to substantiate this conviction. As I noted in my letter of September 6, our counsel has advised a College request for information on race and sex may be a violation of Title VII of the Civil Rights Act of 1964. The regulation we are referring to is the Equal Employment Opportunity Guideline in Pre-Hire Inquiries, #4030, as amended on May 27, 1968 (Attachment D). The Oregon State guidelines (Bureau of Labor Rules on Employment Inquiries #27.050—Attachment E) clearly state, according to our counsel, "that it is unlawful to make a preemployment inquiry regarding race or sex."

Aside from the questionable legality of seeking information from applicants on their race, sex or national origin, there is a likelihood the College would be subject to legal action by unsuccessful minority and women job seekers. Our counsel advises, "You may rest assured that charges of discrimination would be filed against the College by minorities and women if, during the application process, they were asked to state their race, sex, etc. and were subsequently denied employment. The State of Oregon and the Equal Employment Opportunity Commission would clearly take the position that the rejected applicant had established a prima facie case of discrimination by the College if the prohibited information were requested and applied in the final review by the search committee or other individual responsible for making the hiring decision."

The OCR is aware, I believe, that the top three to five candidates of each faculty search are normally invited to the campus for interviews. In these cases it is, of course, not necessary to request information from the applicant on race and sex. It is feasible to keep track of the number of women and minority candidates and we are, in fact, doing so.

This section of the Report concludes with the statement (p. 10) that two studies referred to by Mr. Whitehead in his letter of September 27. 1973, "were not included in the submission to the OCR. Therefore no determination as to their adequacy can be made." In fact, as noted in page 11 of the Report, one of the studies, entitled "Staff Equitable Salary Review," was given to the Review team during their visit. (It was not provided prior to the review because Ms. Watson advised us on November 13, 1973, "Copies of the analyses (the staff and faculty studies) must be kept on file for possible review.") No request was made for the second faculty study on equitable treatment of women teaching staff, and it is appended as Attachment F.

DEVELOPMENT AND EXECUTION OF PROGRAMS

As noted above, Reed College does not have a personnel office, nor do we have job descriptions which would flow from such an office. As a result, there is no capability within this understaffed administration to draft job descriptions (page 10 of the Report) as specified in Section 60–2.24 of Revised Order #4, and equally important, administer and update them. Absent a substantial increase in staff (given the financial constraints under which we are operating this does not appear likely), we will not be able to "conduct a detailed analysis of position descriptions . . .", nor "provide approved position descriptions and worker specifications to all personnel involved in the recruiting, screening, selection and promotion process." Further, for the reasons stated above, we believe such descriptions neither feasible nor appropriate for Reed College. We can state emphatically that all College employees, particularly those connected with recruitment and selection are very much aware of the College's equal opportunity policy. Should a job applicant bring a complaint of racial or sexual discrimination to the Affirmative Action Officer or President's Office, the complaint would be investigated; if valid, the employee in question would be disciplined. To date, no such complaints have been made.

This section of the Executive Order continues (page 10): "(The College) . . . must validate worker specifications to insure that requirements do not in themselves constitute inadvertent discrimination and that specifications are consistent from one location to the next." We assume this refers to procedures whereby large business firms verify that tests, interviews or educational requirements do not disadvantage any applicants because of their sex, religion, race or background. We have reviewed in detail the informed arrangements used by the College in selecting staff and are confident that no single element in the process nor the process as a whole is discriminatory.

When "validation" of recruitment techniques is applied to faculty we run into serious problems, however. At Reed, the Faculty Advisory Committee has the responsibility of recommending to the President the most qualified candidate for each available position. The Committee's judgment is based on an analysis of candidates' résumés (reflecting experience and accomplishments), reviews of published and unpublishd work, letters from other faculty, and, in the case of top candidates, personal interviews. From a practical standpoint, it would be next to impossible to "validate" in a formal sense each element in this process. Even if we were able to do so, I would consider such procedures a threat to the traditional system of faculty self-determination whereby jobs are offered to the best qualified candidates in the professional judgment of other faculty members.

ADDITIONAL REQUIRED COMPONENTS OF AFFIRMATIVE ACTION PROGRAM

The Report continues (page 11): "The College has not provided evidence that it is in compliance with the Sex Discrimination Guidelines." Specifically, "The employer must not make any distinction based on sex in employment opportunities, wages, hours, or other conditions of employment."

We disagree with the finding that we have not provided evidence re compliance with the Sex Discrimination Guidelines. First, all College equal opportunity statements (beginning with my notice of December 13, 1972) clearly assert that with regard to admissions, job recruitment, and employment status after hiring, "individual characteristics of religion, race, ethnic origin and sex are extraneous." The Affirmative Action program submitted to the OCR provides ample documentation that the College's policy is, in fact, carried out. For example, of the 33 senior professional jobs in the College administration, 15 are held by women, including the Registrar, Director of Job Placement and Career

Services, Director of Commons and Dormitories, head of the Office of Public Affairs, and Alumni Director.

To justify the conclusion that "The College has not provided evidence it is in compliance with the Sex Discrimination Guidelines," the Report cites a preliminary analysis of the 1973–74 Faculty Personnel Budget and Reed's informal maternity leave policy.

In my letter to you of September 6 I described in some detail the faculty-wide procedures and criteria used by this College in setting salaries and recommending merit increases. As noted, factors of sex, race and religion are completely extraneous to the criteria used in evaluating faculty and in fixing salaries. I also pointed out in my letter that a careful review by my administrative staff of the salaries of faculty members listed in Attachment A to the Report disclosed no evidence of sexual discrimination. In addition, the Faculty Advisory subcommittee, which had investigated possible sexual discrimination in salary in March, 1973, was reconstituted. The Committee—again chaired by Professor Gail Kelly—came to the following conclusions regarding the Report's "salary analysis."

October 9, 1974.

To the Faculty Advisory Committee: Following the suggestion in the Office of Civil Rights Report of August 16, 1974, that the College undertake an investigation of "possible discrimination" in faculty salaries, this committee met to review the data. We are satisfied that there is no evidence of any case of salary discrimination attributable to sex. The cases chosen for our special consideration in Confidential Attachment A were carefully considered. The matched pair analyses do not reveal differential treatment by sex but, in every case, discrepancies may be accounted for by traditional formal criteria of academic appointments: experience expressed in number of years of teaching by type of appointment and institution, rank at appointment, and adjustment for partial teaching load. Judgments of teaching competence, which are the central consideration in advancement of Reed faculty, figure only peripherally in these examples, since they are mostly drawn from initial or temporary appointments, but cases of progress at more advanced levels appear to us to be attributable to evaluations in terms of the normal criteria.

MARSHALL CRONYN,
Professor of Chemistry.
GAIL KELLY,
Professor of Anthropology.
JOHN LEADLEY,
Professor of Mathematics.

Since your finding of possible discrimination in salary was based on a "preliminary analysis of the computer printout, 1973–74 Personnel Budget," I am confident that a more thorough review of the data—including the information provided in my letter of September 6 and the most recent Faculty study—will result in the elimination of this finding from the Report.

In connection with the College's maternity leave policy (page 12), we are instructed that while a written statement is not necessary at this time, we are required to show that our policy "is in compliance with the Guidelines and is applied consistently to all female employees." The College's procedures are completely consistent with the Guidelines (Section 60–20.3(9)(1). The Staff Handbook of February, 1974, states under Maternity Leave (page 3), "Maternity Leave is granted. The details of the conditions of the leave are worked out on an individual basis." Requests for maternity leave have become increasingly rare at the College; there has been only one case in the last decade. An Assistant in the Computer Center was granted maternity leave from March 1, 1973, to May 31, 1973. She returned to work on June 1, 1973, and resigned January 18, 1974. As stated in the Guidelines, the College does consider childbearing as justification for a leave of absence for a reasonable period of time. After childbirth, we will continue to reinstate female employees to their original or equivalent job should they wish to return to work.

ALLEGED DEFICIENCIES IDENTIFIED THROUGH ON-SITE REVIEW

The Report asserts (page 13) the College does not have an acceptable grievance procedure. We must establish such procedures "which provide for prompt and equitable hearing of employee grievances relating to employment discrimination. These procedures must be disseminated to all employees."

Notwithstanding the assurance in your letter of September 25, 1974, "The question of the existence of a grievance procedure was not the main concern of my letter," I would like to describe our two major grievance mechanisms, one for faculty and one for staff. The Faculty Constitution (which is distributed to all faculty members) provides for an Appeals and Review Committee under Article VII, as follows:

ARTICLE VII.—THE APPEALS AND REVIEW COMMITTEE

"*Section 1.*—The Appeals and Review Committee as established under the Bylaws of the Reed Institute consists of ten members: Four Trustees appointed by the Chairman of the Board of Trustees, four members of the Faculty elected by the Faculty, and the Chairman of the Board and the President ex officio. The Committee chooses its own chairman. The Committee meets on the call of the President or upon the written request of two or more members.

"*Section 2.*—The Appeals and Review Committee has authority to consider matters pertaining to the general welfare of the College and in particular matters referred to it by the Board of Trustees, the President, the Faculty, or the Faculty Advisory Committee, or by any member of the Faculty where the matter concerns his employment status. The Committee makes such written reports or recommendations to the Board of Trustees, to the officers of the Board, or to the officers of the College as it deems advisable, transmitting a copy of such reports or recommendations to the Faculty Advisory Committee for its information. In case of disagreement, a minority may, if they desire, submit a written minority report to the Board of Trustees or its officers or to the officers of the College, with a copy to the Faculty Advisory Committee for its information."

With regard to nonacademic staff, Carleton Whitehead's memorandum of February 15, 1973, has been distributed to all employees. We believe the instructions are clear that complaints concerning discrimination on the job may be made verbally or in writing to the Director or Assistant Director of the Equal Opportunity Program. In practice, this system has worked well. There have been few complaints, but they have been handled promptly to the satisfaction of all concerned. We believe, therefore, that the College now has procedures which insure the fair and speedy treatment of cases where discrimination is alleged.

The next finding (page 14) directs the College to confer academic rank on the Director of the Women's Physical Education Department on the same basis as that of the Men's Physical Education Department. You also questioned Ms. Atkinson's status in your letter of September 25. As I explained in my letter of September 6, I consider the essential facts to be:

(1) The Director of the Women's Physical Education Department has been tenured member of the Reed faculty since 1964.

(2) This position does not carry academic rank because of the special character of teaching responsibilities in Physical Education.

(3) The decision not to confer academic rank for this position follows from a Collegewide policy that full-time directors of campus activities not directly related to classroom teaching such as the Black Studies Center, the Dance Department (and Physical Education Department) not receive academic rank.

(4) This decision was made after Mr. Barta received academic rank in 1962.

The Report advises (page 15), "The College currently uses two gender-linked job titles in the area of staff employment." The titles referred to, "watchman" and "lead lady," are the job titles in our current agreement with the Service Employees Union, Local #49. (Please see Attachment G.) It would be more accurate to say that the contract refers to "lead man" or "lead lady," depending on the sex of the person hired to fill this position. It is now a woman, hence the designation "lead lady" in the College's salary budget. Please note that the contract distinguishes between "janitor" and "janitress." With regard to the title of "watchman," we will suggest the inclusion of a "watch women" title when our contract is renegotiated.

PROVISION OF SERVICES TO STUDENTS

The concluding portion of the Report deals with student services. In connection with the requirement of prominently stating the College's policy of nondiscrimination (page 2 of Part II) all publications relating to admissions and employment will carry the following statement:

"Reed College admits students and provides services, benefits, and equal opportunity in employment and education without regard to race, color, religion, sex, or national origin."

Please note that we have deleted the references to legislation from the proposed statement in my letter of September 6, 1974. We have done so on the advice of counsel that the language which includes the legislative reference implies Reed College provides equal opportunity only because of the relevant governmental rules and regulations. In fact, as I have stated above, the College followed a nondiscriminatory policy before federal programs in this area were initiated.

In my letter of September 6 I provided a detailed description of our substantial, expanding program to recruit minority students, including a special minority student financial aid fund, visits to minority high schools and counseling organizations, and active pursuit of minority scholarship recipients. The information made available to your office should assure the OCR that Reed College will continue to "recuit minority students as actively as it recruits nonminority students."

You expressed concern in your letter of September 25 over the recruitment practices in the Master of Arts in Teaching Program. The scholarship money and recruiting trips in the period 1968–71 directed to predominantly Black schools, to which you refer, were financed by the Federal government (The Higher Education Act of 1965), not by Reed College. We have sought, but not been able to obtain, financing after the $85,636 received under this program was expended. With regard to additional financial aid for minority students, the M.A.T. Department is budgeted as a self-sufficient program. The estimated expenditures of $42,400 this academic year will be matched, we expect, by tuition income. A high percentage of the total budget ($12,000) has been earmarked for financial aid. If it were feasible to do so, we would very much like to allocate additional financial aid for minority students. Given the current job market for M.A.T. graduates and corresponding decline in enrollment (an average of 30 students up to 1972; an average of 12 the last two years) this does not appear likely. I commented on the question of M.A.T. recruitment trips to minority colleges in my letter of September 6. That is, because of the small size of the program the Director of the M.A.T. Program is unable at the present time to make any recruiting trips. He does interview candidates who have applied in response to catalogs and brochures mailed to all institutions, minority and nonminority alike.

According to the Report (page 5 of Part II), College procedures for arranging off-campus student housing are deficient in three respects: (1) We must obtain "written assurance from each owner, lessor or renting party who lists off-campus housing through the College that he or she will make said housing available without regard to race, color, or national origin"; (2) we must verify that "comparable off-campus housing is available to members of both sexes when said housing is listed through the College; and (3) students must be advised of the policy that housing is available without regard to race, color, or national origin, and of their rights and recourse if they believe discrimination has occurred."

During the OCR Review Team's exit interview in February, 1974 we discussed the need to obtain written assurance from off-campus landlords that housing will be made available on a nondiscriminatory basis. We agreed at that interview to use the forms the Review Team offered to send us. On March 1, 1974, the College Director of the Equal Employment Opportunity Program wrote Ms. Watson as follows:

"As soon as we receive your recommended equal rights form for landlords and employers we shall require compliance by all who utilize the College facilities."

To date we have not received the forms. When they arive we will seek to obtain the signature of each off-campus landlord before such housing is listed here. With regard to the second point—assuring that comparable off-campus housing is available to members of both sexes—the Deans' Office, which is responsible for arranging such housing, systematically reviews listings to insure comparability. They have found no evidence of one sex being offered more or better housing than the other. Should this occur in the future, that office will place housing wanted advertisements to bring offerings into balance.

To address the last finding in the area of student housing, all material connected with such listings will contain the following statement:

"Reed College admits students and provides services, benefits, and equal opportunity in employment and education without regard to race, color, religion, sex, or national origin. Specifically, the listing of off-campus housing is included in the services provided. In the event you believe a landlord is discriminating because of race, color, or national origin, please advise the Dean or the Director of Equal Opportunity (ext. 376) immediately."

I pointed out in my letter of September 6 the Report erred in the facts of student employment on campus and, based on those errors, arrived at an unjustified conclusion of discrimination in the College's use of student labor. Contrary to the statements in the Report (page 8 of Part II), women have been hired to work in the heating plant since 1970 and the night supervisor position in the Sports Center has been open to women since November, 1970. Your letter of September 25 notes that the Report has been corrected with regard to employment in the heating plant. However, the letter also implies remedial action may still be required in the Sports Center night supervisor position. In fact, as I explained in my letter of September 6, the Director of the Equal Opportunity Program became aware of the situation in the Sports Center last fall. He instructed the Director of Physical Education as follows:

November 9, 1973.

Memorandum
Subject: EEO sports center complaint, resolution.

A review of the facts demonstrates that:

1. The basic requirements of the Sports Center student supervisor's position are honesty and responsibility. The primary specific tasks are opening the Center for evening activities, periodically patrolling the Center to make certain it is being used correctly and no unauthorized visitors are present (e.g., high school students), terminating activities at the close of the evening, and locking the Center for the night. On rare occasion other special actions may be required to resolve special situations.

2. None of the requirements of the position appear beyond the capabilities of a woman.

3. The position has been reserved for men, and women have been told this was a man's position.

4. Two of the three supervisors occupied these positions last year. The other position was filed after fall break by a student whose only previous experience was during the fall break.

The above facts were reviewed with Marvin Levich, Provost, and it was agreed that the third supervisor's position would be opened for applications by all interested students and that the best qualified student would be hired, regardless of sex. Mr. Barta will review the qualifications of applying students and his employment recommendation with Mr. Whitehead prior to the final employment decision.

In the future, all student employment in the Sports Center will be available without regard to sex unless there are specific approved exceptions.

This has been discussed with Mr. Barta and accepted by him.

CARLETON WHITEHEAD.

At that time an announcement was made that women as well as men would be considered as supervisor, and in fact, a woman is now employed in that position. The important point here, I believe, is that the College took remedial action before the visit of the Review Team.

All campus employment has been carefully reviewed and no instances of sexual or any other kind of discrimination have been found. There have been no complaints of sexual discrimination. The Financial Aid Office, which has become the focal point for student employment—both Work Study and non-Work Study—does not, as a matter of policy, list jobs by gender. That office is alert to the nondiscriminatory provisions of the relevant legislation; their work is monitored by the Director of the Equal Opportunity Program. Since we can find no evidence of discrimination, and since the OCR requirement to submit a plan to overcome the effects of past discrimination in student employment was based on erroneous assumptions, we fail to see the need for such a plan or indeed, what it would contain.

Lastly, we believe the recommendation for seminars with campus hiring officials by the Equal Employment Opportunity Officer is more suitable to a large university than the Reed campus. With respect to off-campus employment, we will require such employers to affirm their compliance with prohibitions against discrimination on the basis of race, color, national origin or sex as soon as the forms to be provided by your office are received. A statement of the relevant legislation will be displayed prominently in the office responsible for such employment. I would like to point out that we have not found a single instance of discrimination in our own thorough examination of off-campus employment.

As I indicated in my letter of September 6, there are no Physical Education courses restricted to students of one sex. The Physical Education Handbook, distributed to all new and returning students states, "All of our activities are coeducational, open to both men and women." I believe, therefore, the College has fully responded to the required action, that is, "to take affirmative steps to offer all physical education courses to students of both sexes and to apprise students of the policy of nonsegregation in such courses."

In your letter of September 25, 1974 you state: "If both men and women have in fact been participating in all courses, we would appreciate receiving statistics on enrollment by sex for each course for the past three years." I believe this request results from a misunderstanding of my letter of September 6. In that letter I acknowledged that "there were limitations on men participating in what were considered to be courses designed especially for women." Men and women have not been participating in all courses for the reasons stated in my letter. This lack of participation situation was corrected, however, in November, 1973, and there are no restrictions on enrollment for members of either sex in the courses in question.

The Report continues: "The College must establish an internal procedure for the prompt and equitable hearing of student complaints alleging discrimination on the basis of race, color, national origin, and sex." I believe the Judicial Board as authorized under the Community Constitution is well suited to deal with possible complaints of discrimination. The procedures (under Article VI of the Constitution) are carefully spelled out:

ARTICLE VI.—THE JUDICIAL BOARD

Section 1.—The Senate Judicial Board shall investigate all cases of possible violations of the Honor Principle and Reed Community rules and shall make recommendations to the Senate as to how such cases shall be acted upon by the Reed Community.

"*Section 2.*—The Senate Judicial Board shall consist of five members of the student body, selected in accordance with Article III of the By-Laws of the Reed Community.

"*Section 3.*—The portfolio of the Senate Judicial Board shall be reported to the Senate at each of the meetings of the Senate.

"*Section 4.*—The Senate shall take only one of the following actions on a Judicial Board recommendation: approval, disapproval, or separate action.

"A. A Judicial Board recommendation to the Senate shall receive Senate approval when at least a majority of the Senators present at a Senate meeting vote to approve the recommendation of the Judicial Board and at least a majority of the Senators are present when the vote to approve is taken.

"B. A Judicial Board recommendation to the Senate shall receive Senate disapproval when a vote to approve the recommendation of the Judicial Board fails and at least a majority of Senators are present when the vote to approve is taken.

"C. For the Senate to take separate action on a Judicial Board recommendation, an affirmative vote of at least a majority plus two of the membership of the Senate is required on the motion to take separate action.

"D. The Senate shall not take separate action on the first recommendation that the Judicial Board makes on any case.

"E. Senate disapproval of a Judicial Board recommendation shall automatically place the Honor Case under consideration in the portfolio of the Judicial Board again unless the Senate subsequently votes to take separate action on the Honor Case.

"*Section 5.*—Any person who has been declared a potential honor violator by the Judicial Board shall be informed of the complete nature of the complaint against him as soon as possible.

"*Section 6.*—Any person involved in an Honor Case as a complainant or as a potential honor violator shall be given a hearing before the Judicial Board if he so desires.

"*Section 7.*—Neither the Honor Principle nor any of the Community rules shall be so construed as to require any person to answer any questions put to him by a Judicial Board member in the course of a Judicial Board investigation or hearing."

Finally, in response to the question raised in the last paragraph of the Report, the College official responsible for assuring compliance with Title VI and Title IX legislation is the Director, Equal Opportunity Program.

I hope the foregoing is helpful in clarifying Reed College's performance in this important area.

Sincerely,

PAUL E. BRAGDON, *President*.

[From Forbes, Sept. 15, 1974]

ATTACHMENT B

THE COMING SHAKEOUT IN HIGHER EDUCATION

If economics alone calls the tune, many U.S. colleges and universities are not going to survive.

Gone are the barricades and the posters, the nightsticks, the obscenities, the blood. But now the nation's colleges and universities face a new crisis, less headline-worthy, but perhaps more lasting. To put it bluntly, many of our colleges and universities are going broke.

The U.S. possesses an educational plant scaled to the proposition that higher learning is one of the great growth industries. And it *was:* Between 1952 and 1962 the number of students doubled, then more than doubled again between 1962 and 1972. Today there are more than 9.3 million students in nearly 3,000 institutions with annual expenditures of over $32 billion. Colleges and universities consume more than one-third of the $90 billion-plus that the U.S. spends annually on education.

In the Fifties and Sixties, the smallish private colleges and universities, which had traditionally absorbed about half the U.S.' students, were no longer able to handle the growth. Higher education was a politically popular goal, however, so the state legislatures opened wide the purse strings, and the big public institutions filled the gap. The most spectacular example is the State University of New York. Put together in little more than a decade, partly from scratch and partly through the acquisition of a number of private institutions, SUNY is already the biggest such system in the U.S., boasting 384,899 students and a budget of $600 million. With competition like that, the private colleges inevitably lost ground, and now serve less than 25% of the market.

WITH A BUMP

Now the overall growth of college enrollments has suddenly slowed. In the Sixties enrollments were rising at 9% a year; in the early Seventies the increase dropped to below 5%. This fall it will probably not exceed 3%. If present trends continue, by 1980 the growth will halt entirely and thereafter enrollments will begin to decline. (A serious recession could, of course, make the situation worse.)

The sheer numbers are not yet so bad, but the trends are alarming. Only 43% of the U.S.' 18- and 19-year-olds were in college last year, *vs.* 50% as recently as 1969. Demand is continuing to boom in the vocationally oriented professional schools—dentistry, medicine, law, journalism—but enrollments in graduate schools as a whole are down 25% over the past five years. At the lower end of the educational scale, enrollments are also rising rapidly in the vocationally oriented two-year colleges. Elsewhere demand is soft. A good third of the 121 state universities and land-grant colleges expect enrollment declines this fall. From close to 100% of capacity, our educational plant is probably running at only 94% of capacity today—a serious drop in a leveraged industry with high fixed costs.

"It is an overbuilt plant for however far you can see into the future," says John Everett, president of New York City's New School for Social Research. "And I say you ought to start now to turn some of these country institutions into old folks' homes—total dormitory-type, retirement villages. With very little physical change, everything people need is there. If you look at the longevity curve and the birthrate curve, that's what the U.S. is going to use these places for."

But the birthrate is not yet the problem. The slackening growth rate is. One explanation of what has happened is simple: With the Vietnam war ended, fewer students are hiding from the draft behind the walls of ivy. Another explanation is less obvious: We may be witnessing the beginning of the end of America's long love affair with higher education. Witness the increasingly vocational orientation of the students and the growing proportion of students at two-year colleges.

CUTTING COSTS

Whatever the reasons, the colleges and universities have had to do what any business must do when sales fall off: They have begun cutting costs (*see p. 120*). Since personnel absorbs 85% of the cost in higher education, this has meant cutting faculty—including, horror of horrors, tenured teachers: 88 at the University of Wisconsin, 100 at New York University, 104 at Southern Illinois University. Whole programs, whole departments have been cut: the dental school at St. Louis University; the criminology school at Berkeley, along with the schools of demography and design. All this is taking place in an economy where thousands of Ph. Ds are looking for appropriate jobs.

The budget stringency shows in small ways, too: a broken window plugged with plywood at Ohio University; the grass grown tall on the Midway at the University of Chicago, graffiti unerased on a column at Columbia.

For the moment, at least, the cutbacks, in combination with higher tuition, seem to have erased the horrendous deficits that were yawning for many educational institutions. Columbia University, for example, lost $72 million between 1966 and 1973. Stanford lost $4.3 million in five years.

But the easy remedies have already been used. Those remaining entail certain risks. Education is a highly leveraged business. Costs drop only slightly, if at all, as enrollments decline. "A small shift in the full-time enrollment has a very big budget impact," says Hans H. Jenny, vice president of finance and budgets at Ohio's College of Wooster, a widely respected liberal arts institution. "When you prepare a budget, you never know until September how many students you will have, and how much income they'll bring in. And when you're short a hundred students, you're talking about 100 times almost $4,000 a year—$400,000 It makes it very difficult to plan."

"The old lock-step system of four years of high school followed by four years of college has broken down," says the New School's John Everett. "They're dropping out of this place, that place, showing up all over. You used to be able to say, by experience, this many of your freshman class would some back as sophomores: this many sophomores would come back as juniors. You used to have regular attrition charts, and you knew where you could fill in with transfers. It just blows all that."

INFLATION CUTS DEEP

Higher education is one of the hardest-hit victims of inflation. Lacking any real potential for productivity gains, it must pass on to its paying customers almost the entire burden of its rising costs. According to a higher education cost-of-living index devised by Hans Jenny and the University of Michigan's G. Richard Wynn, educational costs over the past decade have risen nearly twice as fast as the consumer price index. Tuitions, it is true, have risen as well—5% a year in public institutions, 7.5% a year in private ones—but that's not enough to offset the rise in costs.

"After discounting the effects of inflation," says Jenny, "we are now spending less per student than we did four years ago. How long can we go on spending less and less and charging the student more and more?"

Despite their call on tax revenues, the public institutions have been very nearly as vulnerable as the private ones. In California, state support has not kept pace with enrollment, much less inflation. At City University of New York, neither the state nor the city has ever adequately funded the open-admissions program that nearly doubled CUNY's enrollment in under five years, though the program was prematurely forced on the university for political reasons.

In Wisconsin, state support of education has always been among the most generous in the U.S. But the romance is ending. The legislature has decreed a 7.5% increase in educational "productivity" over a two-year period—a move that will cut $21.5 million out of the university's budget at a time when costs are rising.

Wisconsin is comparatively lucky. Its total enrollment is still growing slightly. The real damage is being done to public institutions like Ohio University. This old and highly regarded liberal arts-oriented regional research university has seen its enrollment drop more than 25% in three years—by 5,000 students, to around 13,500. Ohio University admittedly brought a large part of its problem upon itself. In the Sixties it more than doubled its enrollment, drawing its enlarged student body not only from Ohio but from nearby states like New York and New Jersey. It was the growth-for-growth's-sake syndrome. "For years," says OU's former president, Claude Sowle, "out-of-state students were supported at the same level of subsidy from the state as in-state students. But the big push the university made to attract out-of-state students got the legislature rather angry, and they wiped out the subsidy." Result: The gap between in-state and out-of-state tuitions moved from zero to $1,200 and OU's out-of-state students dropped from nearly 30% of the student body to 18%.

Besides closing five of its 45 dormitories, Ohio U has reduced the faculty by 104 since 1971 and plans to let another 70 go by 1975.

OU's ordeal is not yet at an end. The latest outbreak of student violence provoked Sowle himself—one of the more able young administrators around—to resign after five years in office. "There is no more difficult position in the country than being a university president," he says. "You've got so many constituencies to deal with—faculty, students, administrative people, nonacademic employees, the town, alumni, parents, the legislature, the governor and the general public. Sometimes you imagine they're all behind you, but then you look around, and nobody's there."

With tax money to fall back on, Ohio University and most other state institutions obviously will somehow endure. But private institutions, particularly those without big endowments and national reputations, may not. Take Pennsylvania's Wilkes College, which over the last 25 years has transformed itself from a small community college serving the Wilkes-Barre area into a four-year liberal arts school with over 2,000 students. In financial terms, Wilkes has been well run. Unlike many such schools, Wilkes carefully husbanded its modest $3.-million endowment and scrupulously financed its ambitious building program without borrowing any substantial sums of money as so many private colleges had.

But financial prudence is not enough. Last year Wilkes opened in the fall with 2,250 students, down from its 1971 peak of 2,593 and had budgeted for a modest surplus. Before the year was out it had lost 200 students, and wound up the year with a $124,000 deficit, the first such deficit within memory.

Wilkes' administration raised the tuition $150, to $2,000 a year, and has budgeted for an $18,000 surplus next year. But Thomas H. Kiley, chairman of the Wilkes board and head of the local First National Bank of Eastern Pennsylvania, is worried about the future.

"We have an overload of faculty," he says, "and this is the problem of many independent colleges. The student/faculty ratio is 15 to 1, and that's a luxury ratio. We should be at 18 or 19 to 1, to be real healthy. Survival is probably at 17 to 1. The question is: Are we going to be strangled by tenure?" And Wilkes is typical of dozens, even hundreds of four-year private colleges.

What makes the labor problem so inflexible, of course, is the tenure system under which a faculty employee, after a period of probation, cannot be dismissed except for gross incompetence or moral turpitude. This is a terrible burden in a time of rapidly rising costs and rapidly falling student enrollments.

College teachers have reacted to these economic pressures much as bricklayers or coal miners do. They have organized. Over the past five years, the number of faculty members under collective bargaining (not necessarily all of them union members) has gone from 10,000 to 80,000—one-eighth of the total—on 315 campuses, most of them public, in 21 states. This is almost certain to put even greater upward pressure on costs.

CAN EDUCATION BE "MANAGED"?

Quite clearly, higher education is on a collision course between flat or declining enrollments and runaway costs. Barring a miraculous end to inflation, the best way out would seem to be better educational productivity. But how do you measure "productivity" in education, especially in higher education?

"There is nothing in education," says New York University's President James M. Hester, "equivalent to the profit-making objective to provide a measure of achievement."

The most elementary index of educational efficiency and productivity is the student/faculty ratio. If you want to improve academic productivity, you can obviously increase the size of classes, eliminate courses or even departments where enrollment is low, decrease the size of the staff. But doesn't that reduce the effectiveness of your teaching? Nobody is sure. Says the New School's John Everett: "Not one study has ever shown there is any difference in learning—meaning the information that can be sent back on tests to a grader—between classes of 300, which they have had at Berkeley, and classes of ten."

Everett is, of course, talking about test results rather than quality of education: there is, after all, no way to measure *quality* in education. But there is plenty of reason to believe that class size can be increased to some degree without sacrificing either quality or quantity. After a solid decade of deficits, Brunswick, Me.'s prestigious Bowdoin College raised its enrollment by a third (to 1,250), without adding a single teacher. Tuition income was thereby enhanced without any corresponding increase in costs, but to accomplish this Bowdoin had to sacrifice its student/faculty ratio, which rose from 9.5 to 12. "We lay very strong stress here on teaching," says President Roger Howell, Jr., "but I don't think the quality of education has been hurt. If we cut any further, however, it would be." Here, then, is one area where productivity can be improved.

SHARING THE BURDEN

Like the society it reflects, higher education in the U.S. bears an increasingly heavy burden of welfare costs. Just as the society is committed to providing equal opportunity among income classes, so are the colleges and universities. This has meant increasing the subsidization of lower-income, primarily minority, students. Between 1967 and 1973, Hans Jenny and Richard Wynn calculate, student aid at a group of liberal arts colleges rose from 19.9% of tuition and fees to 32.3%. Most of the institutions increased their student aid without the endowment or gift income to support it. As a result, more than 30% of student aid now comes out of general funds—not out of scholarships of various sorts, that is, but straight out of tuition. The more affluent parents thus are subsidizing the less affluent.

In a sense, this student aid is simply good business. Few students today want to attend a country-club school or one with a homogeneous student body. Thus student aid is the price to be paid for diversity and for a student body selected for ability rather than for family wealth.

But this is rough on the middle class. "The larger the percentage of students who receive aid," says Wooster's Hans Jenny, "the larger will be the addition to student charges for those who receive no discount. I have to charge the student who is not subsidized $300 or $400 more so I can subsidize 38% of the students in the institution. And every private institution has this problem."

"What everybody worries about," says Bowdoin's Howell, "is pricing yourself out of a particular market. We're not terribly worried about the bottom of the market and we're certainly not priced out at the top. The real problem is the people in between." So, like other schools, Bowdoin is stretching the parameters of aid. Says Howell: "In the right set of circumstances, a man can qualify for aid with a parental income of $30,000. In fact, a third of our students receiving aid come from families with incomes in excess of $15,000 a year."

TWO-TIER PRICE SYSTEM

One of the great anomalies in higher education is the two-price system. A family paying full charges must spend $5,115 a year to send a student to Columbia, $3,400 of it for tuition alone. A few miles downtown the student can attend City University of New York for a fee of only $95 a year. This is an extreme contrast, but the fact remains that it costs in general about twice as much to attend a private college as a state one. Including room and board, it cost a student around $3,100 a year in 1972 to attend the average private college; the figure for the average public institution was about $1,400.

This disparity in charges has little to do with efficiency. It is a simple matter of subsidy. "Basically," says Eldon T. Smith, executive secretary of the National Council of Independent Colleges & Universities, "it costs just about as much to educate a student in a public institution as it does in a private one." Private colleges, with their emphasis on personalized education, do tend to have lower student/faculty ratios—12 to 1 in private, *v.* 20 to 1 in public. But this cost differential accounts for only a tiny part of the differences between the *charges* at public and private institutions. The bulk comes from the state's subsidy to public institutions. At public institutions, undergraduate tuition and fees contribute only 35% of instructional cost; the general taxpayer puts up the rest. At private institutions, tuition and fees yield something like 75%; endowment income and philanthrophe support account for the balance. Thus, at the University of Wisconsin freshman tuitions and fees are $485 a year for out of state residents, 25% of the cost. At Wilkes, they are $2,000, or 75% of the cost.

The competitive disadvantage is quite obvious.

Even so, at the U.S.' prestige schools—the Ivy League schools, the eastern liberal arts colleges in general—enrollments have held firm, and applications are coming in at the highest level in history. As in any other market today, there are people willing to pay for quality—and, rightly or wrongly, quality is what they think they are getting at the prestige schools.

For example, Columbia, by no means the most prestigious of the Ivy League schools, had 3,400 applicants for the 725 openings in its freshman class. Little Bowdoin had over 4,000 applications for 350 openings. At Cornell, Connecticut and Vermont, there are six applications for every freshman opening. The picture is less rosy at the nonprestige schools. At Wilkes the ratio is 1.5 to 1, at the land-grant colleges, 1.3 to 1.

Obviously the earliest victims of the educational recession will be those private colleges that lack either the endowment, the prestige or both needed to stay in business against subsidized competition from public institutions "Because the name is not known," says Ralph Huitt, general secretary of the National Association of State Universities & Land Grant Colleges, "people just don't feel that going to this little private college will give them an advantage over going to a community college."

Nearly 150 such private colleges have closed their doors in the last five years. The biggest percentage losses have been among women's colleges, hit both by inflation and the competition of men's colleges that have gone coeducational. There were 259 of these women's colleges a decade ago. The number is now down to 193. Hundreds of other four-year private liberal arts colleges are in danger. Especially vulnerable are the Catholic schools that sprang up over the past decade and the black schools that have been losing their best prospects to predominantly white schools. "Education has fallen in priority in the nation," says Andrew Billingsley, vice president for academic affairs at Howard University, the U.S.' most prestigious black university. "The black college has always been at the bottom for resources. It will suffer even more."

692

PUBLIC SOLUTION

The taxpayer is already paying a price for this decline of private education. In states like New York, Texas, Kansas and Ohio, a number of private colleges have already disappeared into the state systems. Temple, Pittsburgh and the University of Cincinnati are already semi-taxpayer-supported. And the trend is unlikely to stop there.

"Partial public support of private institutions is already with us," says John C. Weaver, president of the University of Wisconsin. "At some of the big private universities, half of their operating funds are public money right now." Weaver lists Stanford, Harvard and MIT as being among those that are, basically, already living off the taxpayer.

Says Columbia's President William T. McGill: "It costs us $20,000 a year to educate a full-time medical student, and what's our tuition—$3,000? So we've become increasingly dependent on public funds—a staggering $50 million for the medical school alone. We can see," McGill goes on, "a gap of $35 million opening up between our university's current resources and what we will need by 1980. Those resources will be found, but the question is, what portion will be public resources? We do not think the intellectual health of a research university would be improved for us to drift into quasipublic operation. But clearly we seem to be headed in that direction."

It is certainly cheaper—to the taxpayer—to run an institution off private money than off public. For $10 million in various kinds of state aid, says NYU President James Hester, New York State keeps NYU and its $200-million-a-year university and medical school operation alive. "If NYU were a public institution," Hester estimates, "it would cost the taxpayers an additional $100 million a year."

In a few states, private institutions are getting direct support along the lines of the so-called Bundy money pioneered in New York, a fixed amount paid to institutions for every academic degree they award. In addition, many states are making tuition grants available to students in private institutions, generally on the basis of their parents' income. In combination the two seem the most promising means of maximizing aid and minimizing the opportunities for state interference in the private institutions.

Unfortunately, except in places like New York or Pennsylvania, there isn't very much taxpayer money available and not much likely to materialize any time soon. Education is no longer a high-priority political item.

THE VICTIMS

In any case, the state institutions will survive, although with possibly truncated budget. So, most likely, will the prestigious private colleges and, in one form or other, the great private universities. What is most immediately threatened is some 1,400 four-year private colleges that carry only 15% of the U.S. total enrollment. Does this matter? Shakeouts, after all, have occurred in businesses before. The weak units get squeezed out. The industry emerges the better for it.

The answer is: Yes, it does matter. The big taxpayer-supported schools are not really more efficient than the small private schools. Says Wooster's Hans Jenny: "The difference in the *cost* of educating a student at a state university and at a private institution is small. But the difference in *price* is very large.

A fair analogy is the way government-subsidized competition squeezed and continues to squeeze the railroads. Trucks and buses are not inherently more efficient; they were made so by federal financing of the highways. As New York State's vast state system grew, its private system of college contracted: Twenty-eight private colleges have closed in New York State since 1968 when the State University was expanding most rapidly.

With the closing of these smaller schools, a good deal of the diversity of the U.S. educational system is being lost. Maybe the schools that have already closed are not all that important. But now some of the better private schools are in trouble. And such schools, because of their very size, offer something the giant institutions cannot really provide: the close social and intellectual relationships of a small community, where student/faculty contacts are warm and intimate and where education becomes as much a matter of social behavior as of patterned instruction.

Indeed, it is not impossible that the extreme alienation that swept across the academic world in the late Sixties stemmed in large measure from the fact that educational institutions had grown too large and too impersonal. At least one Canadian public institution, the University of Toronto, has been so concerned about the problem of becoming too large that instead of growing, it sets up new institutions and then spins them off as they mature.

"The kind of thing we stand for," says Rhoda Dorsey, president of Goucher College, a small, highly respected women's institution near Baltimore, "takes time and personal attention, and you don't get in classes of 500 people. We exist because we think there are students who still want what we give. Now that is a gamble. If the students don't want it, then we are going to be out of business. We are not going to turn ourselves into a factory for diplomas. It all boils down to the value society places on individual development and achievement. All the private institutions that are run this way run the risk of being charged with being elitist, and in a sense they are, because their reputation is based on their having standards." And not simply grades, but standards of intellectual discipline as well.

Harold Williams, former head of the Norton Simon Inc. executive committee and now dean of the School of Management at the University of California (Los Angeles), recognizes that there is waste and inefficiency in higher education, but he cautions against letting economics alone make the decisions about which institutions will survive and which fail. Says he: "To justify our tremendous investment in higher education in straight business terms is not possible because the strengths are nonquantifiable. Sure, we've got to spend our education dollars more effectively. But it's like advertising in a way. Half the money you spend is wasted. Only you don't know which half. And just try to do without it."

Unless the public makes a choice, however, economics *will* dictate the decisions. What will survive will be the giant public schools and the prestigious private ones. The precious and irreplaceable middle ground will gradually disappear.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Pre-Hire Inquiries—¶ 4030

ISSUED BY THE EQUAL EMPLOYMENT OPPORTUNITY COMMISSION, JANUARY 13, 1966, AND AMENDED MAY 27, 1968

Some state fair employment practice laws expressly prohibit inquiries on applications for employment concerning the applicant's race, color, religion or national origin, and state Commissions have determined that such direct inquiries, as well as the elicitation of indirect indicia, such as former name, past residences, names of relatives, place of birth, citizenship, education, work and military experience, organizational activities, references and photographs, may be unlawful.

Title VII of the Civil Rights Act of 1964 does not expressly prohibit pre-employment inquiries concerning a job applicant's race, color, religion or national origin. The legislative history of the statute is silent as to the Congressional intent on the subject.

Although Title VII does not make pre-employment inquiries concerning race, color, religion or national origin *per se* violations of law, the Commission's responsibility to promote equal employment opportunity compels it to regard such inquiries with extreme disfavor. Except in those infrequent instances where religion or national origin is a bona fide occupational qualification reasonably necessary for the performance of a particular job, an applicant's race, religion and the like are totally irrelevant to his or her ability or qualifications as a prospective employee, and no useful purpose is served by eliciting such information. The Commission is also mindful that such inquiries traditionally have been used to deprive individuals of employment opportunities and to discriminate in ways now proscribed by Title VII.

Accordingly, in the investigation of charges alleging the commission of unlawful employment practices, the Commission will pay particular attention to the use by the party against whom charges have been made of pre-employment inquiries concerning race, religion, color or national origin, or other inquiries which tend directly or indirectly to disclose such information. The fact that such questions are asked may, unless otherwise explained, constitute evidence of discrimination, and will weigh significantly in the Commission's decision as to whether or not Title VII has been violated.

Pre-employment inquiries which are made in conformance with instructions from, or the requirements of, an agency or agencies of the local, State, or Federal Government in connection with the administration of a fair employment practices program will not constitute evidence of discrimination under Title VII.[1]

ATTACHMENT D

RULES ON EMPLOYMENT INQUIRES ¶ 27,050

The following is the full text of a statement of policy and specific rulings on lawful and unlawful employment inquiries under the Oregon Fair Employment Practices Act, Oregon Revised Statutes, Sections 659.010 to 659.115 and 659.990. The statement and rulings were issued by the Fair Employment Practices Division of the Bureau of Labor.

[RE-STATEMENT OF THE LAW]

The Oregon Fair Employment Practices Act demonstrates the desire of the people of Oregon to translate into action the words of the Oregon constitution, which declare "that all men, when they form a social compact, are equal in right."

This law guarantees to everyone *equality of opportunity* in employment regardless of his race, religion, color, or national origin. It does not restrict the right of an employer to define the qualifications necessary for satisfactory job performance. It merely requires that the same standards of qualification be applied equally to all persons.

The Oregon Fair Employment Practices Act applies by its terms only to employers of more than five persons, employment agencies, and labor organizations. The term "employer" does not include "a club exclusively social, or a fraternal, charitable, educational or religious association or corporation, if such a club, association or corporation is not organized for private profit" (Section 659.010(6)). The prohibition contained in the law with respect to labor organizations (Section 659.030(2)) is that they may not, because of the race, religion, color, or national origin of any individual, exclude or expel from their membership such individual or discriminate in any way against any of their members or against any employer or any individual employed by an employer.

The law provides (Section 659.030(3)) that it is an unlawful employment practice "for any employer or employment agency to print or circulate or cause to be printed or circulated any statement, advertisement or publication, or to use any form of application for employment or to make any inquiry in connection with prospective employment which expresses directly or indirectly any limitation, specification or discrimination as to race, religion, color or national origin, or any intent to make any such limitation, specification or discrimination unless based upon a bona fide occupational qualification."

The above stated prohibition with respect to employers and employment agencies applies to oral inquiries as well as forms of application for employment. In both respects, the prohibition is aimed at inquiries made of prospective employes prior to employment. The terms "race" and "color" are deemed to be synonymous. Discrimination against Negroes because they are Negroes is classed as discrimination because of color.

[CONSTRUCTION OF TERM "DIRECTLY OR INDIRECTLY"]

An inquiry, in order to fall within the statutory prohibition contained in the law [Section 659.030 (3)], must express "directly or indirectly" any limitation, specification, or discrimination as to race, religion, color, or national origin. Obviously, a direct prohibited inquiry is one which asks a question, the answer to which, on its face, discloses the applicant's race, religion, color, or national origin, for example: (1) "What is your religion?" or (2) "What is your national origin?" or "Where were you born?" An indirect prohibited inquiry is one which does not ask a direct question as to applicant's race, religion, color, or national origin, but is one the answer to which will probably disclose the applicant's race, religion, color, or national origin, for example: (1) "What religious holidays do you observe?" The answer to this inquiry by any Jewish applicants would be "I observe Yom Kippur, the Jewish day of atonement, and Rosh Hashana, the Jewish New Year." The answer would, therefore, reveal the applicant's religion. (2) "If you have changed your name, what was your original name?" An applicant of Polish descent, whose original name was Pulaski and who has changed his name to Post, would, in answering this inquiry, probably disclose his national origin.

---

[1] Last paragraph added in May 27, 1968 revision of statement.

The fundamental basis of the statutory prohibition is that race, religion, color, or national origin have no place in the consideration of an applicant's qualifications and, therefore, have no place on an application form or during oral interviews. Applicants may not be encouraged to volunteer answers to prohibited inquiries.

An example of an item on an employment application form legitimate on its face, but undoubtedly unlawful, is a requirement that an applicant produce proof of age in the form of a birth certificate or baptismal record. A birth certificate or baptismal record discloses place of birth, ancestry, or religion. Consequently, the production of such documents may not be required by prospective employers or employment agencies. Such requirements for the purpose of establishing age to insure compliance with the state and federal child labor laws is not based on a bona fide occupational qualification. In lieu of requiring the production of a birth certificate or baptismal record, it is suggested that employers require an applicant to state his age and submit proof thereof in the form of a Certificate of Age or Work Permit issued by the Wage and Hour Commission. These suggested alternative documents do not reveal the applicant's place of birth, ancestry, or religion, yet they do furnish satisfactory proof of the applicant's age and may be obtained by persons of any age from the Bureau of Labor.

Following are rulings as to whether certain employment inquiries are lawful or unlawful:

Subject	Lawful employment inquiries	Unlawful employment inquiries
Name	Have you ever worked for this company under a different name?[1] Maiden name of a married woman applicant.[1]	Original name of an applicant whose name has been changed by court order or otherwise.
Address or duration of residence.	Applicant's place of residence Previous address in United States How long a resident of this State or city?	How long a resident of the United States? Birthplace of applicant.[2] Birthplace of applicant's parents, spouse, or other relatives. Requirement that applicant submit birth certificate, naturalization, or baptismal record.
Age	Requirement that an applicant state his age and submit proof thereof in the form of a certificate of age or work permit. These documents are issued to persons of any age by the Bureau of Labor.	Requirement that an applicant produce proof of age in the form of a birth certificate or baptismal record.
Creed or religion	An applicant may be told, "This is a 6-day job. We work Monday through Saturday."	Whether an applicant for employment regularly attends a house of worship. Inquiry into an applicant's religious denomination, religious affiliations, parish, church, pastor, or religious holidays observed. Applicant may not be told "This is a Catholic (Protestant or Jewish) organization."
Race or color		Questions which directly or indirectly indicate race, complexion, or color of skin.
Photographs		Requirement that an applicant for employment affix a photograph to his employment application form. Request that applicant, at his option, submit his photograph. Requirement for photograph after interview but before hiring.

See footnotes at end of table, p. 699.

Subject	Lawful employment inquiries	Unlawful employment inquiries
Citizenship	Are you a citizen of the United States? If not a citizen of the United States, does applicant intend to become a citizen of the United States? If you are not a U.S. citizen, have you the legal right to remain permanently in the United States? Do you intend to remain permanently in the United States?	Of what country are you a citizen? Whether an applicant is naturalized or a native-born citizen; the date when the applicant acquired citizenship. Requirement that applicant produce his naturalization papers or declaration of intention. Whether applicant's parents or spouse are naturalized or native-born citizens of the United States; the date when such parents or spouse acquired such citizenship.
National origin	Inquiry into applicant's—	(a) Lineage. (b) Ancestry. (c) National origin. (d) Descent. (e) Nationality of applicant, his parents or his spouse.
Languages	Inquiry into languages applicant reads, speaks or writes fluently.	What is your mother tongue? Language commonly used by applicant. Inquiry into how applicant acquired ability to read, write or speak a foreign language
Education	Inquiry into the academic, vocational or professional education of an applicant and the public and private schools he has attended.[1]	
Experience	Inquiry into work experience	
Character	Have you ever been convicted of any crime? If so, when, where, and disposition of case.	
Relatives	Name of applicant's father, mother, spouse, or children. Address (within the United States) of applicant's father or mother, spouse or children.[1] Names of applicant's relatives already employed by this company.[1] Do you live with your parents? If not, with whom do you live? What dependents have you?	Names of any other relatives of applicant, other than parents, spouse or children. Address of any relative of applicant, other than address within the United States. Maiden name of applicant's wife or mother.
Notice in case of emergency	Name, address, and relationship of person to be notified in case of accident or emergency.	Name and address of next of kin.
Military experience	Inquiry into an applicant's military experience in the Armed Forces of the United States or in a State militia. Inquiry into applicant's service in particular branch of U.S. Army, Navy, etc.	Inquiry into an applicant's general military experience.
Organizations	Inquiry into the organizations of which an applicant is a member, excluding organizations the name or character of which indicates the race, religion, color or national origin of its members.	List all clubs, societies and lodges to which you belong.
References	Who suggested that you apply for a position here?	

---

[1] The inquiries that are starred are inquiries which have been ruled to be lawful because they are based on a bona fide occupational qualification although they may indirectly express a limitation or specification as to race, color, or national origin. The remainder of the lawful inquiries have been ruled to be lawful because they do not "express directly or indirectly any limitation, specification or discrimination as to race, religion, color or national orgin, or any intent to make any such limitation, specification or discrimination." (Sec. 659 030(3), law against discrimination.)

[2] Where an inquiry, herein ruled "unlawful" is required because, in the particular circumstances, an employer or employment agency deems race, religion, color, or national origin to be a bona fide occupational qualification, application may be made for a ruling; e.g., where an inquiry as to birthplace or related informationi s required for security reasons, as in work on particular types of government contracts, it is recommended that application be made to the Commissioner of Labor for a ruling that such inquiry is lawful.

Note: When an employment application form contains prohibited questions we do not deem the following legend, stamped on the blank to be in compliance with the law: "To conform with the Oregon State law against discrimination, ignore all questions relating to race, religion, color, or national origin." No questions prohibited may lawfully appear on the application form. It is impossible to deal here with all employment inquiries which might be construed as violations. The questions above are offered simply for your assistance.

Memorandum
To: Vice President/Provost Marvin Levich
From: Subcommittee on Affirmative Actions of the Faculty Advisory Committee

A subcommittee of the Faculty Advisory Committee has reviewed practices of appointment and promotion of faculty members to evaluate the employment situation of women on the teaching staff. The small size of the total faculty and the considerable fluctuation in the number of women employees from year to year must be taken into account in interpreting these data (see attached). We conclude that Reed College has over the years fulfilled its commitment to equitable treatment of women faculty both in its procedure of appointments and in concern for imposing the same standards for promotion for both men and women of equivalent merit.

ATTACHMENT F

Reed College and SEU, Local No. 49

July 1, 1973.

PREFACE

This agreement, resulting from collective bargaining between Reed College and the Service Employees Union, Local No. 49, is for the purpose of promoting good relations between the College and the Union, and between the College and the employees represented by the Union, and of making clear the basic provisions upon which such relations depend. It is the intent of both the College and the Union to work together to establish and to maintain proper and acceptable terms and conditions of employment.

The College recognizes the right of employees to organize and to bargain collectively and assures them that, in their exercise of such right, they shall be free from any and all restraint, interference, and coercion.

The Union recognizes the peculiar circumstances inherent in educational institutions which operate on different schedules at different times of the year and which have residential facilities in varying degrees throughout the year.

The Union recognizes the right of the College to give work to worthy and deserving students, since such employment frequently is a crucial means by which such students may obtain an education.

Employees shall feel free to consult with the Union concerning matters within the framework of this agreement. The Union is the instrument of the employees and was organized by them to serve their needs.

AGREEMENT

This Agreement, made and entered into this 1st day of July, 1973, by and between Reed College, of Portland, Oregon, hereinafter designated as the Employer, and the Service Employees Union, Local No. 49, AFL–CIO, of Portland, Oregon, hereinafter designated as the Union, for the purpose of governing their mutual business relations by fixing the following scales of wages, schedule of hours and regulations affecting the members of the organization of the Union, to-wit:

ARTICLE ONE—RECOGNITION

Section 1.1—The Employer agrees to recognize the Union as the sole and exclusive bargaining agent for the employment of all persons coming under the jurisdiction of Service Employees Union, Local No. 49, with respect to wages, hours and working conditions, adjustment of grievances existing under the Contract, and all other pertinent matters.

Section 1.2—Inclusions:

Employees who because of length of service or special assignments may have job titles with the prefix "Senior" or "Leadman".

Section 1.3—Exclusions:

1. Superintendents and foremen who have the right to hire and fire, to enforce discipline, or to promote or demote employees.
2. Reed College students. (It is understood that a regular employee dismissed by the Employer will not be replaced by student labor.)
3. All donated work of any kind whatsoever.
4. Gymnasium attendants.

ARTICLE TWO—UNION SECURITY

Section 2.1—It shall be a condition of employment that all employees of the Employer covered by this Agreement who are members of the Union in good standing on the effective date of this Agreement, shall remain members in good standing, and those who are not members on the effective date of this Agreement, become and remain members in good standing of the Union. It shall also be a condition of employment that all employees covered by this Agreement and hired on or after its effective date, shall, on or after the thirty-first (31st) day following the beginning of such employment, become and remain members in good standing of the Union.

ARTICLE THREE—ACCESS OF UNION BUSINESS REPRESENTATIVES

Section 3.1—The Business Representative for the Union shall have access to all properties covered by this Agreement to discharge his duties as representative of the Union, excepting the Administrative offices and resident rooms and excepting laboratories and classrooms when in active academic use. In these exceptions the Business Representative shall have access if accompanied by the Controller of the College, or his representative, and only if the occupant is willing.

Section 3.2—It is understood that the Union will set up the ordinary shop machinery for collective bargaining.

ARTICLE FOUR—EMPLOYMENT

Section 4.1—When needing new employees in covered classifications, the Employer shall notify the Union, which will provide such available applicants as it can: the Employer agrees to interview and seriously consider for employment such applicants.

Section 4.2—The Employer shall notify the Union within seventy-two (72) hours of first employment, of any new employees in covered classifications.

Section 4.3—The Employer shall send to the Union each month a list of the names of newly hired employees and of those who have terminated their employment during the same period.

Section 4.4—Students shall not be used as relief for regular employees *except in emergencies*.

Section 4.5—It is agreed that all employees covered by this Agreement shall be recognized as combination workmen and may be required to work at any type of work as the need may arise.

Section 4.6—The Employer shall be the sole judge of the qualifications of all employees and shall have the sole right to hire and discharge any employees.

Except in cases of immorality, use of alcoholic beverages, dishonesty, untidiness, absenteeism, tardiness, failure to get along with the students, insubordination, or similar conduct, two (2) weeks' notice or two (2) week's pay in lieu thereof shall be given in cases of dismissal. Absolute proof of these exceptions shall not be necessary to constitute grounds for dismissal, but only a moral certitude as to the facts. If an employee feels that he has been unjustly terminated he shall have the right within fifteen (15) days to a hearing before a Board which is to be established under Article V.

No employee or applicant for employment covered by this Agreement shall be discriminated against because of Union membership or Union activities.

The Union agrees that employees covered hereby shall be admitted to membership without discrimination because of race creed, color, or national origin. It is understood that the Employer is an Equal Opportunity Employer and that qualified applicants for employment shall be referred by the Union to the Employer without regard to race, creed, color, or national origin.

The normal policies of the College regarding retirement for age shall apply to employees covered hereby.

Reductions of force will be based on seniority within each classification (janitor, watchman, etc.).

ARTICLE FIVE—SETTLEMENT OF DISPUTES

Section 5.1—All difficulties arising out of the interpretation of this Agreement, or its application between the parties hereto, shall be taken up for settlement within five (5) days notice in writing of the complaint. The Union will be represented by one Business Representative, and the Employer by one authorized agent. If the above parties are unable to agree, the matter shall be referred to one umpire selected by the Union and the Employer who shall be a competent and disinterested person, and who shall have the deciding vote in the matter at issue. The decision of the aforesaid, or the umpire, shall be final and binding upon all concerned. Each party shall pay one-half (½) of the costs of the third representative or umpire. There shall be no interruptions of work by the Employer or by the employees, pending, during, or after such final adjustment.

Section 5.2—The Employer and the Union, realizing that a college is different in its operation from industries because of the type of service rendered to the community, and for humanitarian reasons, agree that there shall be no lockouts on the part of the Employer, nor suspensions of the work on the part of employees, it being one of the purposes of this Agreement to guarantee that there shall be no strikes, picketing, or work stoppage, and that all disputes shall be settled by adjustment between parties, as herein provided.

ARTICLE SIX—HOLIDAYS

Section 6.1—The following shall be recognized as holidays: New York's Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, Christmas Day.

Section 6.2—If other official college holiday time is granted to non-academic employees generally by the Employer, it shall apply also to employees covered by and under this Agreement.

Section 6.3—Employees working on such an official college holiday shall be granted, at their option, either (1) compensatory time off during the week preceding or following the holiday, for which they will receive their full regular pay, or (2) extra pay, at their regular rate, for the time worked on such a holiday.

Section 6.4—Schedules of watchmen will ordinarily include work on holidays as part of their regular duties and for regular pay without overtime, for the necessary protection of college property during such periods. Watchmen working on holidays shall be granted, at their option, either (1) an adjustment of their schedules so that they will have total time off, without reduction of regular pay, equal to the total official holiday time received by other covered employees (but such time off will not necessarily coincide with the holiday dates themselves, or (2) extra pay, at their regular rate, for the time worked on holidays.

ARTICLE SEVEN—VACATIONS

Section 7.1—All employees who have been continually in the employ of the Employer for a period of:

Six (6) months may take one (1) week's annual vacation with pay.

One (1) year shall receive two (2) weeks' vacation with pay.

Five (5) years shall receive three (3) weeks' vacation with pay.

Ten (10) years shall receive four (4) weeks' vacation with pay.

Section 7.2—In the event of termination of employment prior to six (6) months, no vacation is accrued. In the event of termination after six (6) months, an employee shall receive one-twelfth (1/12) of a two week vacation per month of employment.

Section 7.3—Vacations shall be taken at times desired by employees as far as practicable but the final allotment of vacation period is reserved by the Employer to insure orderly and efficient operation of the institution.

Section 7.4—Vacation pay shall be based upon the employee's regular schedule of hours of work per week and his regular rate of pay at the time the vacation is taken.

ARTICLE EIGHT—HOURS OF WORK

Section 8.1—Eight (8) hours shall constitute a day's work and forty (40) hours shall constitute a week's work. All work in excess of eight (8) hours in any one (1) day or forty (40) hours in any one (1) week shall constitute overtime and shall be paid for at the rate of time and one-half (1½). The forty hour week shall be worked in five (5) consecutive days.

Section 8.2—Work schedules shall provide for an additional one-half (½) hour each day, on the employees' own time, for lunch or supper.

Section 8.3—No employee shall be called for less than four (4) hours work in any one (1) day. Any employee called back after the regular shift, if he has already worked eight (8) hours, shall receive at least two (2) hours' pay at the overtime rate which shall be time and one-half (1½).

Section 8.4—No employee shall be required to work a split shift unless it is mutually agreed upon by the employee, the Union and the Employer.

Section 8.5—From time to time an individual may work for the college in both the classifications of janitor and watchman. The Employer shall not require any individual to do so. If he does, he qualifies for overtime pay according to total hours worked in one classification, not in both added together.

Section 8.6—Any working time requiring overtime pay must be requested and approved in advance by the Supervisor.

ARTICLE NINE—SICK LEAVE

Section 9.1—Employees shall be entitled to a maximum of twelve (12) working days sick leave annually. This is accumulated at the rate of one (1) day per month, effective when hired, but no sick leave is granted during the first six (6) months of employment, and the accumulation shall extend over a period of two and one-half (2½) years to a total of thirty (30) days.

Section 9.2—An employee who terminates after two and one-half (2½) years of employment shall be entitled to the following sick leave:

From July 1, 1973, to June 30, 1974, ½ of accumulated sick leave.
From July 1, 1974, to June 30, 1975, ⅔ of accumulated sick leave.
From July 1, 1975, to June 30, 1976, all accumulated sick leave.

Section 9.3—Employees are expected to give two (2) weeks written notice of intended termination. Failure to give such notice may result in loss of any earned sick leave pay. The Employer agrees to be reasonable and observe cases of hardship.

Section 9.4—Sick leave is not allowed for any illness induced by the excessive use of alcoholic beverages, drugs, negligence, or a violation of law.

Section 9.5—Sick leave is defined to include emergency leave of up to three (3) days for attendance at the funeral in the event of a death in an employee's immediate family. However, when such funeral attendance involves extensive travel, up to five (5) days sick leave may be granted.

Section 9.6—The immediate family is defined as father, mother, brother, sister, wife, husband, children, mother-in-law, father-in-law, and grandparents.

Section 9.7—The Employer may require proof of sickness or death.

ARTICLE TEN—BENEFITS

Section 10.1—The normal college policies covering benefit plans for non-academic employees, who are not administrative officers of the College, shall apply to employees covered hereby. Benefit plans include social security, retirement program, health and hospitalization plan including major medical, state industrial accident insurance, tuition remission, salary continuation insurance, mortgage loans, and the Portland Teachers Credit Union. Employees may initiate participation in the College retirement program if they have not reached age sixty-two (62) at the time of application and are otherwise eligible according to the general policy on retirement for members of the college staff. The Employer shall notify the Union when changes in benefit plans are made.

ARTICLE ELEVEN—PAYDAYS

Section 11.1—Employees covered by this Agreement will be paid every other Thursday (commencing July 2, 1970) for the two week period ending the previous Friday.

ARTICLE TWELVE—REDUCTION OF PAY

Section 12.1—No employee shall receive a reduction in pay by reason of the adoption of this agreement.

ARTICLE THIRTEEN—WAGE RATES

Section 13.1—The Employer agrees to pay the employees covered hereby, and the Union agrees that its members will accept wages for the various classifications, continued in the schedule of minimum wages attached hereto as Appendix A, and by the reference, made a part hereof.

ARTICLE FOURTEEN—TERM OF AGREEMENT

This Agreement shall be in full force and effect during the period from July 1, [illegible]973, to and including June 30, 1976.

[illegible]ither party desiring to change, modify, or terminate this Agreement may do so [illegible] giving written notice to the other party of its intent to do so, at least sixty (60) days prior to the 30th day of June, 1976. In the event such notice is not given this Agreement shall continue in effect for the ensuing year, and annually thereafter, until a notice, as aforesaid by the party desiring the change, is given the other party not less than sixty (60) days prior to any succeeding anniversary date (June 30). Effective date of any modification or change, after notice, as aforesaid, shall be the first day of May in the year in which such notice is given, unless otherwise mutually agreed.

Dated at Portland, Oregon, as of the ——— day of ——————, 1973

For the employer: Reed College

For the union: Service Employees Union, Local No. 49

TROY WATTS, *President.*

MARTELL F. BLAKE,
Secretary-Treasurer.

Appendix A—of Agreement as of July 1, 1973, between Reed College and the Service Employees Union, Local No. 49.

From July 1, 1973, to and including June 30, 1976, the following schedule of minimum salaries and wages shall be in effect beginning with the effective date indicated:

	Effective July 1, 1973	Effective July 1, 1974	Effective July 1, 1975
Janitor and janitress: For starting period not to exceed 3 mo (per week)	$109.72	$117.72	$123.72
Janitor and janitress: After not more than 3 mo (per week)	112.02	120.02	126.02
Watchman: For starting period not to exceed 3 mo (per week)	112.02	120.02	126.02
Watchman: After not more than 3 mo (per week)	113.18	121.18	127.18
Leadman or lady (per week)	117.80	125.80	131.80
Forelady (per week)	120.10	128.10	134.10
Janitor or watchman on hourly rates (per hour)	2.74	2.94	3.00

Mr. O'HARA. Our next witness is John Bunzel, who is president of California State University, San Jose, Calif.

Dr. Bunzel has won his reputation in this field as a student of these problems.

The committee has been looking forward to hearing from him.

Dr. Bunzel?

TESTIMONY OF JOHN BUNZEL, PRESIDENT, CALIFORNIA STATE UNIVERSITY, SAN JOSE, CALIF.

Mr. BUNZEL. Mr. Chairman, thank you for those nice comments. I have been following these hearings with some very deep interest. I have been involved in this area for some 2 to 3 years.

I have heard some of the testimony that has been presented here, not only by Mr. Shanker, whom I heard this morning, but by other witnesses.

I feel somewhat like Zsa Zsa Gabor's fifth husband. I know what to do. But I don't know how to make it interesting.

I appreciate very much the invitation to appear before this committee. Both as a private citizen and as an educator I have been an active participant for more years than I care to remember in the struggle against discrimination and unequal treatment, and I am delighted to reaffirm this commitment today.

I also welcome the opportunity to join with you and others who are examining recent efforts of the Government to forbid discrimination and insure equal treatment not only in our colleges and universities but everywhere—specifically, the policy and program of affirmative action.

In other forums during the past several years I have engaged in public debates and written about affirmative action and the purposes and consequences implicit in its requirements for higher education. My comments today will be more general as I try to address myself to a central question: Is affirmative action, in terms of what it requires and encourages, both implicitly and explicitly, consistent with the principle of equality?

Executive Order 11246 prohibits discrimination, commands equal treatment, and requires affirmative action to eliminate the former and accomplish the latter. But to no one's surprise such terms as "discrimination," "equal treatment," and "affirmative action" do not lend themselves to unanimous interpretation or straightforward application. The result is that the program of affirmative action developed within the Federal bureaucracy has been adopted and claimed by various individuals and groups for a wide range of purposes.

I will pass over the administrative and practical problems which I am certain have already been identified before this committee. I would simply say that educators around the country are still troubled by the uneven compliance activity of the Department of Health, Education, and Welfare and, within the Department, the Office of Civil Rights and its 10 regional branches. The Labor Department's regulations clearly modeled for industrial employment are so sweeping and universal that all contractors, except the construction industry, are lumped together. But surely it is recognized that a university is not a coal mine or a steel industry or General Motors. Simply stated, the regulations do not easily or precisely fit the special character and conditions of the academic world.

There are other problems. One cannot be certain, but there is reason to believe that the standards for approval of affirmative action plans submitted by colleges and universities have become more rigorous and strict. Some programs previously approved apparently do not meet the current requirements. As of April 1974 less than 20 plans from the 4-year institutions of higher education had been approved by OCR. Furthermore, the proliferation of antidiscrimination policies and enforcement procedures has created a situation in which the standards established by one agency may be in conflict with another—or, equally troublesome, may be subject to inconsistent interpretations.

My principal concerns, however, are with the confusion in meaning and direction of affirmative action/equal opportunity policy.

Consider the issue of "goals" and "timetables." The Civil Service Commission, it appears, looks upon goals and timetables as a way of measuring an employer's success in administering an employment program that does not violate the principle of "merit." Other agencies seem to view goals and timetables simply as a device to measure the number of women and minorities recently hired.

The difference is more than one of emphasis or degree. It reaches a fundamental question: Is affirmative action a program and process intended to provide, now and in the future, equal opportunity and treatment to everyone without regard to race, color, religion, sex, or national origin, or is it a program designed to bring about as rapidly as possible the same distribution of results as would have occurred had there been no past discrimination in this country?

The latter view is result oriented. It leads to a pronounced tendency to consider race and sex by those who must choose among applicants. It is also much more likely to result in discrimination against whites and males. Why? Because—according to this view—the best test, indeed the only real test, for determining whether discrimination is being remedied is a results test that will show if women and minorities are being hired in sufficient numbers. But it is realistic to believe that these results can be achieved without using race or sex as a criterion in making decisions about whom to hire?

Consider still another example of where the basic difficulty lies in the ambiguity of Federal policy and its purposes. The prohibition of employment practices in title VII of the Civil Rights Act which would deprive or tend to deprive someone of employment opportunities or otherwise adversely affect his status is much too vague. What has happened is that any practice which adversely affects someone in the preferred groups is taken to be a practice which discriminates because of that individual's race, color, religion, sex, or national origin. This is the sophistry which renders the policy dangerous.

I think it is fair to say that every thoughtful and fair-minded American agrees with title VI of the Civil Rights Act which states that "no person in the United States shall, on the ground of race, color or national origin, be . . . subjected to discrimination under any program or activity receiving Federal financial assistance—in short, the elemination of discrimination—because of in employment everywhere, and the encouragement of positive action to accomplish that elimination. But I would point out to the members of this committee that it is neither necessarily nor logically true to say that a practice or policy which adversely affects is one which does so because of race, color, religion, sex, or national origin.

The fact is that the courts and the compliance agencies have almost succeeded in eliminating the concept "because of" or "on the grounds of" from our understanding of discrimination and discriminatory practices. This elimination has far-reaching consequences. In principle and practice the intent of the law and Federal policy has been shifted from the elimination of "discrimination because of" and equal treatment to a race-conscious practice of preferring some groups over others that is necessarily a step into discrimination in employment. I think the Congress must decide whether this is indeed its intention.

A similar point can be made with respect to the concept of underutilization. The claim is frequently heard that statistical underrepresentation of women and minorities in employment is irrefutable proof of sexual and racial discrimination. For some people it is a seemingly powerful argument because they automatically equate discrimination with underrepresentation. In their view the fact that women and minorities are underrepresented proves they are the victims of discrimination.

But does it? Are we really entitled to conclude that because of the statistical underrepresentation of women and minorities on the faculty of a university there is clear-cut evidence of discrimination? I submit that underutilization is not in itself discriminatory, nor is it necessarily or conclusively a sign of past or present discriminatory practices. I am not arguing that underrepresentation never provides evidence relevant to the discovery of discrimination. Of course it might. But does it constitute prima facie evidence of discrimination?

I believe Congress should be urged to consider the establishment of guidelines which would treat underutilization as an evidentiary problem in which the burden is upon the Government to demonstrate in the particular case that the underrepresentation in question is a consequence of deliberate discrimination.

It should be noted that goals and timetables are tied to the concept of underutilization and the requirement to eliminate it. It should also be noted that goals and timetables must in practice be the functional equivalent of quotas, and are necessarily a form of preferential treatment.

Thus one is led back to a major question: Is the intent of Congress to eliminate deliberate discrimination, "discrimination—because of," or is this merely a legal fiction masking the real intent of forcing employers everywhere to hire and promote more women and members of certain minority groups regardless of whether there has been real discrimination or not? Is the aim of Federal policy to eliminate discrimination and thereby promote equal opportunity, or is it to force a dramatic equalization of economic conditions for a selected segment of the society?

I was an early and strong supporter of the Civil Rights Act of 1964. It was a big step because it moved this country forward in its efforts to eliminate discrimination in our society. As identified in the act, discrimination was not a misunderstood term. Nor was its approach to discrimination statistical or based upon a mass of data or a numbers game. In title VII its point of departure was the particular action of a given employer with respect to anyone who applied for a job. Each job applicant, regardless of race or gender, must be treated as an individual and human being and judged in terms of his or her talents and qualifications. At bedrock, the act was a call to all Americans to stop thinking in terms of common stereotypes.

Affirmative action is not the legal and policy offspring of the Civil Rights Act It has a different angle of vision and in crucial respects points in a different direction. In the hands of some of its most ardent defenders, affirmative action would have a university try to hire so many from this group or that group, or from one sex rather than another. Title VII says only that an employer must not refuse to hire some one because of his or her membership in one group or another or in one sex or another.

Affirmative action encourages a policy of preferential treatment for women and minority group members—and for some affirmative actionists the real mandate is a preferential policy of proportional employment. In this view, arithmetic proportionality becomes the defining principle of equal treatment—and since certain preferred groups are not, by this definition, treated equally, they must be hired in arithmetic proportion. The syllogism is admittedly inexact, but the point, I think, is made.

Title VII does not approach the problem of discrimination in terms of proportions or ratios or percentages. These was no requirement in the Civil Rights Act that an employer must maintain a racial balance in the work force. That would have required an employer to hire or refuse to hire on the basis of race which was strictly prohibited. Title VII said an employer would be guilty of discrimination if whites were hired when they were less able and qualified than available blacks.

The point of title VII can be put another way. It prohibits discrimination not against blacks or women, but on grounds of race or sex.

Professor Howard Sherain has drawn attention to the "classic" analogy given in justification of affirmative action: If you have two runners and one is shackled, the one without the shackles will go further obviously. If after the race begins, the shackles are removed from the second runner, he will still be behind if the race continues. How do we help the now unshackled runner catch up?

Title VII removed the "shackles" from the black and female "runners." Affirmative action wants to let them "catch up." But as Professor Sherain points out, affirmative action under Executive Order 11246 does not bring the black or female "runner" to a position of "equal treatment" with the white, male "runner." It deals not with treatment but with results. "The affirmative action of 11246," Professor Sherain says, "tells the scorekeeper that he must 'make a good faith effort' to insure that the black runners and the female runners win at least *x* percent of the races."

The true character of affirmative action policy must be seen against the backdrop of some significant changes underway to redefine equality in America. In higher education as well as in other areas of society, the principle of universal access has been accompanied by a shift from privilege to right, from equal opportunity to equal representation, from equality of individual opportunity to equality of group achievement. Further, traditional notions of equality of opportunity are under attack by those who want the Federal Government to enlarge its role in shifting the emphasis from an equality of opportunity through equal access to a positive and interventionist responsibility to bring about an identity of outcomes—in short, an equality of results.

The transformation is one of enormous proportions. I am concerned that the means by which this shift in values will be accomplished in higher education is the strategy of a quota mentality which seeks, for example, to award faculty appointments not on the basis of individual achievement and merit but in terms of group attribution.

I do not believe the Government should be in the business of treating groups of certain ancestral background differently from those of other backgrounds. The trouble with quotas under any name or guise is that they put into practice the pernicious belief that jobs—or any other rewards—should be assigned and equalized on the basis of the new ascriptive principle of group identity rather than on the individual's ability and accomplishment. As I have suggested earlier, the logic of equal results for a group is proportionate representation and preferential treatment, and the strategy for group representation is a quota system.

Affirmative action in practice has moved from eliminating discrimination to increasing the representation of certan groups over a specified period of time. My quarrel is with a preferential policy aimed at proportionate employment of preferred groups which is supposed to mean equal opportunity. We are apparently asked to believe that equal opportunity means some fixed percentage of the results, and that equality does not mean equal rights. I am not persuaded.

My own values lead me to support a program of affirmative action that has as its major goal the elimination of all kinds of discrimination and accepts the principle that an individual's worth has a higher moral claim than his color, his sex, his group or class identity, or his origins. I also believe that there is no such thing as black justice or brown justice or female justice. There is only justice. Justice wears her blindfold that she may recognize no favorites, but she holds a scale in which merit is weighed.

Mr. BUNZEL. Thank you.

Mr. O'HARA. Thank you very much, Dr. Bunzel.

I was very impressed in your statement by one of the questions you raised that has to do with the intent of Congress in enacting title VII of the Civil Rights Act.

I have looked at the act many times, of course. During your testimony I dragged out my copy and looked at it again. I didn't believe that the congressional language was as broad as was suggested in your testimony although perhaps the interpretation has been that broad.

I look at section 703A–2 and 703C–2. Section 703 sets up unlawful employment practices, 703A for employers, 703C for labor organizations, 703A–2 applies to employers:

> An unlawful employment practice to limit, segregate, or classify employees and applicants for employment in any way which would deprive or tend to deprive any individual of employment opportunities or otherwise adversely affect his status as an employee because of such an individual's race, color, religion, sex or national origin.

Although the law talks in terms of depriving an individual of employment opportunities and talks in terms of adversely affecting his status as an employee, the employer may not limit, segregate, or classify his employees in a manner that does that because of such individual's race, color, sex, and so forth.

So I think the intent of the Congress at least is pretty clear. Wouldn't you agree?

Mr. **Bunzel.** I do, Mr. Chairman. As a matter of fact, what I was trying to suggest is that title VII does argue that discrimination "because of", whether it is job classification or other discrimination because of a person's race, color, and so on, is prohibited.

But I am afraid what has happened in many of the discussions with some of the Federal officials is that some of the guidelines are inconsistent. The whole concept of discrimination "because of" has been minimized. What is now being put forward is that we have got to do something more positive.

God knows we all feel there is a positive need to move to eliminate discrimination. But do we move positively and affirmatively when certain kinds of discrimination in favor of some are justified because certain groups in the past have suffered?

There is a conflict between equality of opportunity here and the desire to achieve equality of results.

So we have almost reached the point, it seems to me, in many of these debates and discussions where people must be treated unequally in order to achieve equality. I don't believe that was the intent of the Civil Rights Act.

I think this is sometimes the intent of those who talk in the affirmative action arena.

I think there has been some change and some slippage from this point of view.

I have had discussions and I have been in meetings where in point of fact the predominant tendency has been to move away from being hung up, as it were, on simply eliminating discrimination "because of" and moving to something that would be more productive of results.

Can a democratic society justify this kind of discrimination? Some of us are old enough to remember—and I have heard Mr. Shanker this morning talk about it—when veterans of the Second World War were coming back to campus. I happen to have been one of them at the time.

One of our major concerns at the university 25 or 30 years ago that I attended was to disabuse that university from the practice of requiring pictures for identification on application forms and disabuse the university of requiring an applicant to identify himself by race or religion and to get away from the pernicious practice of the quota system which was used to include and exclude certain groups.

We won that battle in higher education. My concern now is that for what I presume to be higher moral values we are back to a practice of a quota mentality. It bothers me.

Mr. **O'Hara.** I can see you are hopelessly out of date, Dr. Bunzel. That is your problem and mine. We are suffering from something of a generation gap.

Mr. **Bunzel.** Very possibly.

Mr. **O'Hara.** Because I went to school at the same time. That was my objective, to make sure that by George you wouldn't get pictures, you wouldn't get information as to race or religion of the applicant and so forth. You had to treat applicants without regard to those irrelevant factors.

No one thought that you would have to do those things now. I know Michigan State had an article about the experience they had when all those students had to identify themselves with respect to their ethnic background, religion, and so forth.

Mr. **Bunzel.** We had that experience at San Jose State University. Several years ago the regional office of HEW asked for a compliance review or what was to be a compliance review.

The first request—these are more than requests, Mr. Chairman—they call them "requests" and we follow them—was that faculty and staff be identified by race and so on for HEW purposes on computer cards.

This raised a variety of questions which I am sure you are familiar with. There has crept into the academic world now what is known as the "eyeballing" technique. The assumption is made—and I have made this assumption—that a faculty member should not be ordered to divulge his race or religion or what have you if he or she chooses not to.

The position we took was that we would give an option to an individual, that it was the individual's choice whether or not that background information was something that that person wanted to divulge.

But we are told, "We need the data. If we can't get it that way, then I think perhaps you ought to do it in another way."

One of the ways, for example, is to ask the dean or the department chairman to eyeball his faculty members and make an eyeball definition or classification, by race, with or without the knowledge perhaps of members of his own department.

This raises some interesting questions too. Some of these have not been entirely resolved.

The question is a tangled one of means and ends. Then there was the question of whether there are any limits to the right of discovery of a compliance agency. That is a legal question. Fortunately, I am not a lawyer.

Mr. O'Hara. Dr. Bunzel, I know you are well aware, but I thought it might be well in the hearing record to get our agreement on what the actual intent of Congress was.

But here again the executive branch treats the enactments of Congress as an expression of pious hope which they are free to disregard if in their superior wisdom they think it would be beneficial.

Mr. **Bunzel.** We have noticed that.

Mr. O'Hara. Yes. Over a period of time the realization crept in on me that that is what was happening.

Mr. Bunzel. Mr. Chairman, you mentioned title VII. Section J, there was an interpretive memorandum by Senators Clark and Case in their floor management of this act in the Senate.

I am quoting from what they said.

> There is no requirement in Title VII that any employer maintain a racial balance in his work force. On the contrary, any deliberate attempt to maintain a racial balance, whatever such a balance may be, would involve a violation of Title VII because maintaining such a balance would require an employer to hire or refuse to hire on the basis of race.

I think you are quite correct. The intent was pretty clear.

Mr. O'HARA. Very clear. I take the position that in the name of administering these laws we are witnessing violations of title VII and title VI of the Civil Rights Act of 1964 by the imposition or indirect imposition of quotas.

I have finally figured out the difference between goals and quotas. Goals are set forth or hoped for results. You use quotas to reach the goals. So there is a difference.

Mr. BUNZEL. Yes.

Mr. O'HARA. They are not requiring quotas, you understand. They are only setting goals and if anybody is requiring quotas it is the employer who is doing that.

Mr. BUNZEL. It is quite a piece of legerdemain that has taken place.

Mr. O'HARA. Yes.

Mr. BUNZEL. When the question gets down to the chairman of a department at a university we now talk in a given context, that goals must be set.

So the conversation is likely to be, "Well, HEW is mandating that over a period of time—while we may not be able to make it we have to more or less have some goals."

So what happens in practice is that you have personnel committees saying "Maybe this time we ought to be looking for someone who is this or that" rather than saying "We have a position open that happens to be in the department of History, a position in English History. We ought to try to find the best person available for this job."

There is a story that I was told several years ago, which I am also told is not apocryphal, that one of the regional officers of HEW was told a similar story about an individual department looking for, say, a specialist in English history.

They found that there was a minority or a woman available in American history. The chairman of the department was told about this person.

The chairman said, "We are looking for somebody with a specialty in English history."

The rejoinder was, "Well, retrain her."

This notion may not be typical. But it is the kind of thing which suggests a lack of sensitivity to what a university is and is not.

One of the things it is not is a training program. If the Congress were to appropriate a great many more funds for the universities to become training programs in these areas, we might be able to consider some of those problems. I don't think it is very likely.

Mr. O'HARA. One last comment and then we will give Mr. Dellenback a question.

I notice an unfortunate tendency on the part of those associated with higher education—and there was a little of it that crept into your testimony—to say,

> Well, as far as the Labor Department Contract Compliance business goes, they are trying to apply to universities criteria that have been designed for industry. These criteria may be all right for industry but not for universities.

I hesitate at that a little because even though there are great differences I don't think that it is legitimate to say, "well, it is OK for a pox to be visited on someone else's house but not ours." I hope you will be careful about that.

Mr. Bunzel. I agree with you. But I would put it this way. Perhaps we are saying the same thing. I do not believe that higher education should ask for any exemption from or to be given a special treatment under present Federal policy.

I don't believe there is anything in a university's constitutional makeup, structure, or purpose that would suggest that we should be removed from national policy guidelines.

But my point would be that in the application of policy, those criteria which apply to the construction industry are not necessarily the same as those which are to be applied to universities.

Mr. O'Hara. You are not saying that the criteria that are now applied to the construction industry are now OK?

Mr. Bunzel. No, I am not suggesting that.

One thing that has gone through my mind, and I haven't developed it in all candor, Mr. Chairman, is whether or not with respect to the universities in these cases First Amendment rights should be considered with what that implies with regard to confidential files and a variety of things that are particularly characteristic of an academic community.

I haven't developed this. But I am teased by the notion. I think there is some merit to it, that there are a variety of values which attach to an academic community which make it neither better nor worse than the construction industry but make it different.

Mr. O'Hara. Thank you very much, Mr. Bunzel, for your testimony. It is very useful.

Mr. Dellenback?

Mr. Dellenback. Thank you, Mr. Chairman.

Dr. Bunzel, with regard to affirmative action, are you saying there should not be changes made in present practices or policy?

I suspect that you are troubled, and I know the chairman of the subcommittee is troubled, by certain procedures that higher educational institutions have practiced in selecting employees.

We had prior testimony that they failed to fully look at the available resources for employees. There is what has been referred to by various witnesses as the old boy practice of calling up a friend and asking if he knows anybody who is available. There is evidence of discrimination in salary practices and promotion practices.

I don't read your testimony as being critical of efforts to rectify these results—or am I wrong?

Mr. Bunzel. As a matter of fact I am delighted you raised this question because you are right. Two years ago this coming October I wrote an article in Change magazine on this same subject. If I may just quote a paragraph from it, it will go directly to the point you are making because you are quite correct. The higher education community has been derelict. The reason why I have been a supporter of affirmative action in terms of the need for vigorous recruitment efforts is that this has been an area that has simply not been given enough attention.

I said that what I thought we needed to do was to have an unprecedented search for qualified women and minorities, specifically.

We are doing this at our university at the departmental level to get right down to where it happens.

> Procedures should be established to include a current and realistic estimate of the pool of qualified people from which candidates will be drawn. The department must constantly strive to achieve the best faculty possible.
>
> All too often a departmental search is woefully incomplete and confined only to familiar channels that fail to inform women and minority groups of the existence of those jobs.
>
> To this end the administration should obligate the departments to demonstrate that they have reached out in their search for women and minorities.

I think that the major obligation that I shared, and shared long before it became known as affirmative action, is for departments in the academic community to make certain that they are not following simply the "old buddy" technique, that when they are looking for someone it ought to be broadcast widely and professionally and the search should be genuine. There is no way that an appointment will be approved until it has been demonstrated to the academic vice president at our university that in fact a full faith search was conducted for that opening and that includes written telephone call notes, all memorandums and letters to document the search, not just to make the assertion that it took place. It must be documented.

Mr. DELLENBACK. I am pleased to hear that. That is what I would have surmised from what I know about you. I didn't find any contradiction of that in your testimony, but I wanted to be sure that your position was clear on the record when you made the point of distinguishing as to what affirmative action is doing, or is not doing in seeking to add people to the mass and what it means to have discrimination "because of" versus simple discrimination.

You are not saying that these other activities that are being done under the name of affirmation action are not good things.

Mr. BUNZEL. Absolutely not. I appreciate that opportunity.

Mr. DELLENBACK. I go on record myself as saying very strongly that it is clear to me as we have sat through days of testimony that there are evidences of discrimination in the worst sense. I don't mean by this, however, that every institution is involved.

On page 3, I think you pose the fundamental question as to whether affirmative action is a program intended to provide equal opportunity and treatment for everyone, or whether it is a program designed to bring about as rapidly as possible the same distribution of results as would have occurred had there been no past discrimination.

You put your finger on an abuse of affirmative action.

Like the chairman, I am sorely troubled when I look at the Equal Employment Opportunity Act and see the following very clearly articulated:

"Nothing contained in this title shall be interpreted to require an employer, employment agency, labor organization, subject to this title, to grant preferential treatment to any individual or to any group because of race, color, religion, sex, or national origin."

I reaffirm my own feeling that when we deal with this kind of legislation, we mean that we are not saying there should be a granting of preferential treatment or that we require any granting of preferential treatment.

Congress has not yet done everything it should do to bring about real equality of opportunity. I am sorely troubled by some things that exist in this Nation as far as minorities are concerned. I think we have obligations that we have not met. But I also think that this particular law should not be abused and twisted to reach the results that we want to reach. I think your emphasis on that point of distinction is very valuable to us.

We found in dealing with some of the agents of the enforcement departments that they don't seem very clear on that point of distinction. I know from talking to some people in my district that they come close to requiring whatever semantic phrase they happen to use.

I find your emphasis on that point very helpful and we very much appreciate you being here with us.

Mr. BUNZEL. Thank you.

Mr. DELLENBACK. You can now comment on what I have said about what you have said.

Mr. BUNZEL. It is a real tangled problem area that we are dealing with here. It is difficult to put into a short statement everything that one wants to say. I have thought about this as you have. We share a mutual concern about some very serious questions.

In the past I have tried to balance my concerns about some of the inefficiencies and policies and practices now.

I see a terribly important and indeed an urgent need.

I think I would simply say in closing that affirmative action is to me not simply a question of enforcement. I understand that.

But the kind of affirmative action program that I have in mind would be substantial and very significant. I think the Federal Government, for example, and I have written about this before, ought to provide help for fellowship programs for people before they become incapacitated students.

We need to rescue good minds at the high school level before they become dull and ill-equipped to go on to college. This Nation, I think, would be willing to pay for an educational program that would benefit the handicapped in the full and profound sense of the term, by which I mean giving equally on a nondiscriminatory basis a chance to overcome poverty, a bad family situation, and the like.

I think the most promising hope in all of this lies in a combination of longer term efforts by introducing minority students at the earliest possible stage to the opportunities available to them in medicine, law, and so-on, so that the ranks of the truly qualified will be legitimately expanded.

I am sure other witnesses have made the same point here.

If one were to take it on a statistical basis over a period of time and simply use random figures, you could get the qualified applicant pool increased in this way. We are going to be doing far more, without discriminating against anybody, to reach the kinds of results that we all want.

Mr. DELLENBACK. I appreciate that very much.

Thank you.

Thank you, Mr. Chairman.

Mr. O'HARA. Thank you very much, Dr. Bunzel.

Mr. BUNZEL. Thank you, Mr. Chairman.

I appreciate it.

Mr. O'HARA. Our final witness today is an old friend, one of the most effective citizens to appear before our committee. He has appeared before this committee and others on many occasions, Clarence Mitchell, who is director of the Washington bureau of the National Association for the Advancement of Colored People.

Mr. Mitchell?

TESTIMONY OF CLARENCE MITCHELL, DIRECTOR, WASHINGTON BUREAU, NATIONAL ASSOCIATION FOR THE ADVANCEMENT OF COLORED PEOPLE

Mr. MITCHELL. Thank you very much, Mr. Chairman.

I am in possession of a written statement which I would like to read. But before I do it I want to offer something for the record which refers to the exchanges between you, Mr. Dellenback, and the previous witness.

You know, I was raised in the Episcopal Church. I got married to a Methodist. We have a system in our Methodist church where on Sunday the people can come up to the altar rail for the purpose of saying prayers, either asking for something or being thankful for something. I usually go up to give thanks. But the next time I go I am going to be petitioning for a greater supply of forbearance than I now have because I just think it is incredible that the history of title VII can be twisted and distorted the way it has been distorted in the exchanges that have taken place within that.

I want to offer for the record proof that it was the intent of the Congress of the United States when title VII was enacted and subsequently strengthened in 1972 to take cognizance of and to give its blessing to affirmative action programs.

As you know, Mr. Chairman, you and I were comrades in arms in the work of title VII and when we got to 1972 on the amendments we did something which we had an opportunity to do.

It isn't often in American law, as you know, when a statute is passed that the courts to interpret the meaning of that statute, they rely upon the legislative history established by debates, as established by the committee hearings. Then the courts announce what they believe is the effective law.

Sometimes many years pass before legislative bodies have the opportunity to change what the case law has enunciated or to affirm what the case law has enunciated.

In 1972, we had what I have said was an unusual opportunity because we had an opportunity to affirm or reject what the courts were saying about the meaning of title VII with respect to affirmative action.

Columbia University Human Rights Law Review officials were good enough to give me an opportunity to submit an article in volume 5 of the Law Review with respect to the amendments to the 1972 act.

On page 329 of that article I quote from the observations of Senators Williams and Javits with respect to the provision of 706G in which they say "the provision of this subsection 706G, the provisions of this subsection 706G, are intended to give the courts wide discretion in exercising their equitable powers to fashion the most complete relief possible." In dealing with 706G the courts have stressed that the scope of relief under that section of the act is intended to make the victims of unlawful discrimination whole and that the attainment of this objective rests not only elimination of the particular employment practice complained of but also requires that persons aggrieved by the consequences and effects of the unlawful employment practice be so far as possible restored to a position where they would have been had it not been for the unlawful discrimination.

Then I say further:

> In this connection it should be observed that there was some effort during the consideration of the bill to amend it in such a manner as to prevent the courts from establishing goals and affirmative action plans of employment. These efforts were unsuccessful and in this respect the courts are still free to take such action in this area as equity may require.

I carefully included the footnotes from whence those references are drawn. I offer for exhibit purposes that article because if there is any one clear thing that emerged from our experience in 1964 and 1972, we were dealing with title VII.

It was the overwhelming intent of the Congress of the United States to give the disadvantaged people, whether they were blacks, Mexican Americans, women or anybody else, a realistic remedy, not something on paper which said, "Yes, we are going to stop discrimination."

It was the intent of Congress to give the courts of this country—and I certainly think to the executive agencies of this country—the right to take such positive action as would give realistic results, not just paper compliance.

That is one of the great frustrations of the victims of discrimination, winning the case and not getting the remedy.

You were there, Mr. Chairman. I was there. I say, my recollection of what was the intention of Congress is unlike what you have just said. I will contend that.

Mr. O'HARA. I thank the gentleman for his observation.

Let me first give unanimous consent that the article to which you refer, to which I look forward to reading, will be entered in the record of the hearing. Without objection it is so ordered.

I respectfully dissent from any theory of legislative interpretation that says that failure of the Congress to adopt a particular bill or amendment would be construed as the congressional approval of the opposite.

I don't think, for instance, our failure to adopt equal employment opportunity legislation when it was first presented to Congress meant that we were in favor of discrimination in employment.

I don't think our failure to adopt an antilynching amendment on the occasions it was presented indicated we were in favor of lynching.

I don't think that our failure to adopt an amendment which you say was proffered—and I am sure you are correct although I don't recall it—in 1972 with respect to limitations on affirmative action programs means that necessarily we were in favor of all the ways in which those were being carried out.

Mr. MITCHELL. I didn't say that. As you will see if you look at the source that I refer to in the footnotes, you will find that the Congress did more than simply reject an amendment which was designed to kill affirmative-action programs.

The Congress expressly approved the court decisions and made an actual statement that had to do with affirmative action. In other words, Congress didn't just say "we are against those who are offering amendments." The Congress identified certain specific cases, one of which I think had to do with the Philadelphia plan, in which it said that these "cases are cases which we accept and believe are court law."

Mr. O'Hara. I think some Member of the House or Senate indicated that in a statement.

Mr. Mitchell. No, this was in the official—I have indicated in my points of reference where you can find this for yourself, Mr. Chairman.

Mr. O'Hara. I will be happy to look at that.

Mr. Mitchell. This is in the official report, conference report, of the House and Senate, which was subsequently accepted by both bodies, the House and Senate.

If there was any guidelines for courts as to what was the legislative intent of Congress I don't think it would have been clearer.

Mr. O'Hara. I will look at that.

Mr. Dellenback. Will the chairman yield?

Mr. O'Hara. I yield.

Mr. Dellenback. I am so respectful of the witness that I made a multiple trudge back and forth from another committee in order to be here to hear you.

But I am troubled, because of my great respect for you, about your disagreement with comments we said earlier.

Without seeking to go through the full legal argument at this time, I would make just two points.

I will read your article myself. But you know, and we know as lawyers, that legislative intent is a valuable tool to a court only in the event of an ambiguity. I think this is a misunderstanding of many people who follow Congress, and also many people within the Congress.

If a statute is clear on its face, legislative intent is very questionable to a court in seeking to interpret the statute because the language speaks for itself. Therefore, much of the dialog that takes place in the body of the Senate, or in committees, or in the body of the House is, in my opinion as a lawyer, highly questionable as to really writing legislation.

Second, you have referred in the Equal Employment Opportunity Act of 1972 to section 706. You refer very cogently to subsection 5G; 5G deals with engagement in an unlawful employment practice. Then it says what happens in those events.

If we look back to section 703 which focuses on what unlawful employment practices are, it is there that it explicitly says what constitutes unlawful employment practice, and there is to be no requirement in the title that says certain things must be done relative to granting preferential treatment.

So, as a matter of legal construction, we don't even get to a matter of interpretation of section 706, 5G, until we have first built into the law the structure of what is an unlawful employment practice.

We are bottoming our argument again on the thesis that I was referring to with an earlier witness. I don't seek to make a full legal argument. I don't want to take advantage of saying the last thing. I will read your monograph on this.

Mr. Mitchell. When I referred to the previous section, to put the subsequent statement in proper context, the statement which I read was trying to make two things clear. One is Congress gave to the courts extensive latitude in exercising their equity powers to correct discrimination.

Using that power, the courts, fully cognizant of that language which you and the chairman have read, about not doing anything to overcome imbalance and that sort of thing, fully cognizant, as you will see from reading the decision, nevertheless upheld the right of employers to engage in affirmative action programs and pursuant to the exercise of that right the courts got into trouble with a lot of people, some of them in Congress.

The next thing I read was Congress answer to those people who are saying, "Well, the courts went too far in giving affirmative action." I didn't spell out the language. I gave the reference where you can see it.

But the fact is that the Congress, being aware of the fact that the courts had distinguished between the restraint imposed with respect to quotas and things of that sort and the need to give a truly effective remedy had sanctioned affirmative action.

It was the purpose of the report, it was the purpose of those who voted to approve the report, to say, "Yes, these decisions of the court or the courts are consonant with the intent of Congress."

I think that what is happening is that when the executive agencies of Government attempt either to follow the path that the courts have chared for them or follow what Congress clearly approved in 1972, along come people that say, "Well, they are doing something contrary to what we intended because there is another part of the statute which says you can't have quotas and that sort of thing."

I know what we were trying to do in that period. Nobody wanted quotas. I don't want quotas if quotas imply a ceiling.

But what we were trying to do in that period and I think we succeeded is to devise language which would make it clear we wouldn't want quotas that would impose a ceiling but which would give latitude for establishing a floor above which we could reach decisions that would truly right the wrongs and truly give redress to people who actually are the victims of discrimination.

With that, if it is agreeable, I will go forward with my written testimony.

I am Clarence Mitchell, director of the Washington bureau of the National Association for the Advancement of Colored People. It is customary to express appreciation for an opportunity to present testimony to the committees of Congress. Today, I cannot say that it is pleasing to be here.

I sense that these hearings are harbingers of more of the emotional storms that now threaten our courts as they attempt to uphold the right of black children to attend integrated public schools.

In that connection, Mr. Chairman, there are seven members of this subcommittee all of whom voted for the Esch amendment to the Elementary and Secondary Education Act, which amendment in its original form would have permitted the reopening of closed cases in the area of school desegregation.

It is difficult to believe, because of the philosophy that they have every right to hold, that these members can look objectively at the things which are now before your subcommittee with respect to higher education.

We have noted in his letter of July 22, 1974, to the Honorable Caspar Weinberger, Secretary of the Department of Health, Education, and Welfare, Chairman James G. O'Hara stated that "generally speaking, our present focus is on what an institution must be and do in order to qualify for participation in federally financed programs."

Also an important purpose of these hearings is to "look at antidiscrimination activities of postsecondary educational institutions and any requirements, direct or indirect, which Federal agencies may suggest or impose, under statute, or by regulation or guideline, which bear on the question of an institution's compliance with titles VI and VII of the Civil Rights Act, applicable Executive orders and separately title IX of the Education Amendments of 1972."

I assume by Executive orders and title IX amendments you are referring there to the requirements that there be no discrimination on the basis of sex.

Because I have read the testimony of Chairman John Powell of the Equal Employment Opportunity Commission I am not including any statistics in this testimony.

Also I am sure that the committee knows about many of the so-called practices and recommendations that have emerged as a result of your inquiry.

Casting aside all pretenses of modesty, I want this committee to know that I am perhaps one of the best witnesses it could have on the unconscionable, cruel, and totally destructive racial policies of American educational institutions, starting at the kindergarten level and going through to the highest levels in the academic field.

Because I have known so well the snobbery, the discrimination and the racist practices in American education, I believe it is important for me to urge this committee not to tinker with the present laws that are designed to protect minorities against discrimination in higher education.

If one begins in the State of Minnesota, goes west to California, returns east by the southern route up the Atlantic coast, it is not difficult to see that the virus of racial discrimination continues to infect institutions of higher learning.

I would just like to say with respect to Macalester, when Mr. Arthur College in St. Paul, the University of Minnesota, the location of which is shared by the cities of Minneapolis and St. Paul.

I would just like to say with respect to Macalester, when Mr. Arthur Flemming, now Chairman of the Civil Rights Commission, was president of that college he instituted a program which was designed to try to accomplish a better inclusion of black and minority students in the university and the college life.

He left. Now as of this day I am told Macalester College is trying to wreck that program and trying to use Federal funds in a manner contrary to the way they are supposed to use them as spelled out in their agreement with HEW.

There is a black student who is the president of the student body of that school. He came to me for help to save the program. I tried to give him help. Evidently it wasn't adequate because the black students took over the administration building and sat in it to show their objection to the things that were being done to the program.

I would say that that is only the beginning of things that we are going to face in this country if we continue to try to undermine the benefits that have been gained for persons who are the victims of discrimination under law.

Over 30 years ago, when I was living in the Twin City area, a friend of mine who is now a distinguished skin specialist, was a medical student at the University of Minnesota Medical School. He was one of the few blacks who had been able to gain admission to the medical school.

As I understand it, as of now there is a dispute raging in the medical school of the University of Minnesota, where, upon investigation by the Minneapolis Urban League, it has been found that the medical school unfairly discriminated against six black medical students at the University of Minnesota Medical School. Thus, it would seem that there has not been much change in the medical school admission policy.

We also have complaints against the University of California. In fact our organization is planning extensive suits against the University of California.

We have disputes against the University of Maryland. There is now a case before the U.S. district court against the University of Maryland. The NAACP has filed with the Equal Employment Opportunity Commission a complaint against the University of Maryland for outrageous discrimination in faculty selection.

It is my opinion that those who want to preserve the old patterns of racial discrimination in American education are the chief supporters of unfair attacks on educational institutions that seek to bring racial justice to the campus.

By that I mean that there have been those who have come out in the press saying that the universities such as Harvard and Yale or others, who have tried to embark on affirmative action programs, have actually recruited people who did not meet the standard normally used in selecting faculty members.

I say that such allegations are just efforts to preserve the status quo, efforts on the part of those who want to follow the system which is set forth in this publication, "Anti-Bias Regulations of Universities," by Mr. Richard Lester.

Mr. Lester said something which the chairman put his finger on which I, too, thought unacceptable. The chairman pointed out that running through a lot of the arguments of these people who are saying HEW should be restricted in its efforts to halt discrimination in faculty selection, is the notion that there should be a different standard in the academic world from what we find in the world of industry.

On page 23 running through to page 29 of Mr. Lester's publication, called "Anti-Bias Regulations of Universities," which was a report prepared for the Carnegie Commission on Higher Education, he says a lot of interesting things about how institutions of higher learning select faculty members.

The gist of it is that, as the chairman or maybe it was Mr. Dellenback indicated, "Members of the club" go around and make checks on who might be available. Then the "club members" make a decision on whether these people are eligible for appointment.

Also there is a statement in here which is on page 23 which says "faculty assessment of an assistant professor for promotion to a tenure basis is based on a 5-to-7 year period of experience which ends in a decision either to promote or to terminate."

What industry could survive with that kind of a system where you keep an employee on 5 or 7 years before you decide he is going to accumulate enough seniority not to be peremptorily fired? That is what it amounts to.

I don't know of any labor union in the country which would stand for a system where after a person had accumulated 5 or 7 years of seniority he could be peremptorily fired.

Then Mr. Lester says on page 23, "civil rights rulemakers and compliance enforcers need to recognize that graduate study leading to a Ph. D. degree is not the qualifying experience for a tenured position at a major university. The testing period is usually in the first 5 to 6 years after completing the requirements for a Ph. D.

"It is in those years when one demonstrates whether he or she has the intellectual capacity, the ingenuity, the originality, discipline, and career dedication to make the outstanding contribution necessary to be a leading teacher-scholar in one's age group in a disciplinary field."

If we followed that kind of reasoning it wouldn't do any good to have these pools that Mr. Shanker and the other gentleman from San Jose who also talked in terms of establishing pools from which you could draw people who are capable of being qualified members of the faculties of these universities.

Such proposals are based on an elitist concept which is to say that if you are not a member of "the club," if you don't meet the standards set by the club members, then that is just too bad. We will not let you in as a faculty member.

Another interesting thing that is revealed in Mr. Lester's study is this. As those of us who are lawyers know, it is often possible to have a conflict between decisions in the various circuits of the U.S. judicial system.

Those conflicts are resolved when the matter reaches the Supreme Court. But until they are resolved the law of the circuit prevails.

Mr. Lester makes an attack on the HEW because there may be differences of interpretation in some regions as to what a given rule means; just as there are differences in judicial opinions between courts.

I would think in fairness if we want to be at all respectful of our system of government in this country you don't attack people because they have honest differences of opinion. You take those differences to the final source, which in this case I assume would be the Secretary of HEW or the Chairman of the Equal Employment Opportunity Commission to get those differences resolved. That is the way we do it in the judicial system of this country. I think this is the only sound way to get uniformity.

But what is worse, in Mr. Lester's own study he points out that there are variables in faculty selection among the universities of this country so that it would probably not be possible to write a single rule which would satisfy all of the different methods of selection.

It would seem to me that in many instances handling of affirmative action requires a case-by-case approach in order that on the basis of experience we can find whether there are ways of taking into consideration all these variables that apparently exist, as Mr. Lester says, in the academic system, and try to formulate a program which would deal fairly with persons who are subjected to those variables.

Our organization, meeting at its national convention in New Orleans, La., in July passed a resolution commending the University of Washington for its action of admitting black students to its law school. The text of the resolution is as follows:

"We commend the officials of the law school of the University of Washington for their courageous efforts to increase the number of qualified black students in that institution, thereby representing concerted efforts to end discrimination instead of empty rhetoric and meaningless theorizing.

"This action of the law school was challenged by a white student in the case of *De Funis* v. *Odegaard.*

"We condemn unfair tests and other biased methods that are widely used to cover up policies of excluding blacks and other minorities from admission to professional schools in general and law schools in particular.

"We assert that mere written tests alone are not reliable in projecting whether those taking such tests will be successful in professional schools or as members of a profession in later life. By including factors in addition to written tests the law school at the University of Washington performed an outstanding public service.

"We call upon those who believe in equal opportunity to follow the example of the University of Washington Law School and seek ways to accomplish positive results with affirmative action programs.

"We issue a stern rebuke to all who seek to short circuit positive programs to end discrimination in fact by raising the phony emotion-charged issue that the means to end 200 years of oppression is 'reverse discrimination.'"

I want to interject here again, Mr. Chairman, that your comment about making more places available is a thought that we share because, as the *De Funis* case illustrated, there were 1,700 people eligible for admission but they only had 200-and-some places.

We should not be required to choose among eligibles. This Nation should have means and money so that all 1,700 eligibles could get in. It was not a choice between white eligibles and black ineligibles. Everybody was eligible.

Those who talk loosely about the *De Funis* case try to say that black ineligibles replaced white eligibles. As a matter of fact when the rules of admission were clarified and made more realistic it was not only the black students who got in but some white students also got in who would not have been able to get in if the new rules had not been applied.

But those who attack the *De Funis* case don't bring that up. Anybody who doubts it, should read the Supreme Court of Washington's decision. It is crystal clear there.

Our organization was one of the groups that filed briefs in the defense of the university. I personally support the University of Washington for what it has done in trying to increase the number of black law students. I condemn unequivocally those who have dragged this matter into the courts and who by so doing have created a climate which undoubtedly will lead to a major confrontation between minorities if new cases of this kind are filed.

A great many of the black people of America believe that they are being denied access to faculty jobs and to student enrollment in many institutions because those already in such institutions operate on a concept of elitism and a philosophy of scarcity.

A great many of the black people in this Nation believe that there are groups of white people who falsely think that they alone can be trusted to carry out the responsibility of education in our colleges and universities.

There is a widespread belief among my people that the use of tests and other devices in the field of higher education are designed to screen out a majority of eligible blacks and to admit only a token few who meet the vague and unspecified personality requirements that have no relation to their ability or potential ability as scholars. As I have said, these are the views of many blacks in America and I say without qualification that they are my views also.

In the cities of Baltimore, Md., and Boston, Mass., we are now seeing the evil harvest of hate which has been stimulated by unfair attacks on the courts and government agencies that use the constitutionally sanctioned remedy of pupil transportation to end segregation in public schools.

If anyone wants to know what inspired the words of hate directed against Senator Edward Kennedy when he sought to talk with a voice of reason in his own State as Boston prepared to eliminate long-standing racial segregation in its public schools, it is only necessary to study the debates and the rhetoric that appear in the Congressional Record when the issue of pupil transportation has been before the House and Senate.

Out of the welter of words and emotion-triggering phrases there has emerged the code term of "forced busing."

To whites this has come to mean "we do not want black children in our schools or in our neighborhoods and we do not want white children sent to schools that are located in black neighborhoods."

In other words those who use the term "forced busing" are saying "we are against transportation of pupils in public schools even if it means maintaining unlawful and grossly unfair racial segregation in the public schools."

The mobs in Boston and the defiant white parents in Baltimore have taken their cue from the Congress. What Congress has stated in fierce words has been translated into clubs, bricks, vandalism, and violence in the streets of those cities that seek to achieve desegregation of the public schools.

I want to leave with this committee today a picture that is on the front page of the Baltimore Evening Sun of Tuesday, September 24, 1974. A little child is carrying a sign saying, "We are not going to Cherry Hill."

Cherry Hill is a black neighborhood. The signbearers are all white.

I would like also to submit the front page of the Baltimore Afro-American, which is a black newspaper, in which a white mother is shown transferring her child from the Booker T. Washington Junior High School.

I live in Baltimore, as some of you know. That school is one block from my home. I say if it was so bad that these white children aren't supposed to go there, why did I have to send my children to that school? Why is it that hundreds of black children are still going to that school?

If we really want to do equity in this country we ought to tear down the schools if they are unfit.

But if it is assumed that the black children can go to an inferior school then I don't see any reason why the whites should say, "oh, no, we don't want to go to it," because it is an inferior school or some other reason.

Mr. O'HARA. Without objection the newspapers to which the witness has referred will be included as exhibits before the committee.

Mr. MITCHELL. Thank you.

As we look at the chaos, anarchy, and hate that has been generated by unfair attacks on efforts to desegregate the public schools we are aware of the fact that there is arising a new form of destructive mischief in the field of higher education.

There has been coined a new term, innocent on its face, but deadly in its application. This new term is "reverse discrimination." It is a term used by those who wish to protect the status quo that we in the NAACP must face each time we seek to change the biased patterns in faculty selection or in admissions to colleges and universities.

We know from bitter experience that those who employ this term are no different from the framers of the so-called southern manifestoes against the 1954 school desegregation decision, the captains of so-called massive resistance to school desegregation and the propounders of numerous high-sounding but scoff-law phrases of "interposition" and "10th amendment guarantees."

It is my opinion that the atmosphere in the country at this time has been contaminated by phrases like "forced busing" and "reverse discrimination." Any efforts at this time to revise the laws that have been passed by Congress to protect blacks, other minorities, and women against discrimination would result in a long backward move into the laissez-faire period when the Government of the United States looked the other way as institutions of higher learning arrogantly maintained all white faculties, all white student bodies, all white teams in sports and at the same time shoveled Federal money collected from all of the taxpayers into their university treasuries.

I have a book here which, when I get another copy, I will present to you personally. It is written by Dr. Buell Gallagher who was the youngest college president in the Nation's history when he began as the president of a college in Alabama in 1932, at the age of 29.

He has a very distinguished academic career. He was president of City College of New York during the tumultuous days when all sorts of wild things were happening.

He points out on page 204 of his book, which is called "Campus in Crisis," that the high schools of this Nation have followed a so-called tracking system in which they have consigned blacks and other minorities to an inferior status.

He says the same danger exists in the proliferation of a tracking system at the postsecondary level. He points out that by using that system in California all or a great majority of upper-level people on the upper-level track get into the main part of the university whereas he says at the State colleges and the junior colleges—I don't know whether San Jose follows either one of those categories——

Mr. O'HARA. It is a State college.

Mr. MITCHELL. Blacks and other minorities get into the lower part of the spectrum. Then Dr. Gallagher points out that in the city of New York the same kind of system is now being applied which results in the blacks, Puerto Ricans, and others being shunted into the less desirable parts of the higher education system. Those who pass these tests or have some other kind of qualification get up into the higher levels.

I say that is wrong. I say it is snobbery. It is elitism. I am convinced after 30 or 40 years of dealing with American industry and with institutions of higher learning and even the Congress itself as well as the Federal Government, that tests are the best means of discriminating against people that I can think of.

We have either got to get rid of the tests or make some provision for having them fairer. I would not want to say that the whole Congress is guilty of extensive discrimination in employment, but the Washington Post came out the other day with a story about Members who are submitting discriminatory job orders.

I guess some thought that this was a new development. I knew that all along that Congress is one of the worst discriminators. But I always felt about Congress' practice that the people could get political redress in the districts from which Members of Congress come. I hoped the people would obtain that redress if their Members did not hire staffs on a nondiscriminatory basis.

I can't think of any kind of a test that would be devised that would introduce fair employment practices in the Congress of the United States with respect to staff and other personnel to be hired, because I am sure whatever test would be devised would come out in such a way as the same discriminatory pattern would continue.

Our organization fought the battle against this kind of unfairness that I have described in the universities from Maryland to Missouri, from Missouri to Oklahoma, from Oklahoma to Texas, from Texas to North Carolina, and in dozens of other places where we knew that blacks were being denied fair treatment.

We had one case where we had to go to court in Oklahoma just to get the black person who had been admitted the right not to sit behind a pillar that separated him from the rest of the class. Also, he was denied access to the cafeteria, except on a segregated basis. We corrected that, too.

I was present when we won the University of Maryland Law School case in 1935. Mr. Justice Marshall was then the plaintiff's lawyer in that case.

The suggestion was made after the case had been won that the black student sit two seats away from the other students. Needless to say, we didn't accept that.

But this is the kind of thinking which has existed in American universities and still exists.

The fight I refer to was a lonely, costly but exhilarating battle. Our opponents used the full arsenal of State power against us. We did not have the support of the Government of the United States when we fought that war.

It was almost as if an invading enemy had attacked the citizens of one part of our country and the Government of the United States had stood by while the embattled residents defended themselves against vastly superior forces.

It was only after we got title VI of the 1964 Civil Rights Act and more recently after we were able to get amendments giving the Equal Employment Opportunity Commission jurisdiction over discrimination of education institutions that we have been joined by the Government of the United States.

As I have read the questions addressed to Chairman Powell of the EEOC and as I have listened to the observations of some of the Members of the House, I detect the ominous implications that usually precede efforts to water down or destroy worthwhile legislation.

I would be dishonest and unfair to this committee if I did not say to you that I believe the end product of these hearings will be an effort to foreclose opportunities for black citizens in the field of higher education and to prevent them from becoming members of the faculties of institutions of higher learning.

Because I believe so strongly that efforts to restrict or exclude blacks from institutions of higher learning will be met with indignation and outright resistance on the part of some of the victims, I earnestly urge that this subcommittee work to make more funds and more places available for all Americans as students and faculty members at our institutions of higher learning.

Much of the current controversy about efforts to discriminate in higher education today is due to the lack of money with which to provide adequate opportunities for qualified people.

There is also a continuing effort of some in the academic field to place as many obstacles as possible in the paths of blacks and other minorities who seek to enter the areas of learning as students or wish to serve as faculty members.

Accordingly, even when there are resources to increase educational opportunities and chances to be employed, tests and so-called peer review standards are used to continue a kind of class discrimination in the field of higher education.

We must end these restrictions. We now have workable laws that can help and do the job. However many of these laws are so recent in origin that they have not yet made a real impact on the problem.

Let us provide a reasonable time period in which these statutes and regulations can be tested. I earnestly hope that this subcommittee, on top of whatever else it may do, does not seek to alter the language and implementation of statutes now in effect.

In a time when emotions are less dangerous and when sanity returns to the communities of our country we can then consider revisions that will improve and give additional protection to the rights of the victims of discrimination.

Hopefully that may be in the next Congress. But whatever else may be said, this year of 1974 is not the year in which the Congress should revise the laws that have made it possible for the disadvantaged to make some small progress in the field of higher education.

Mr. O'Hara. Thank you, Mr. Mitchell.

Mr. Mitchell, I was dismayed by your statement at the bottom of page 3 with regard to the *De Funis* case in which you assert that you condemn unequivocally those who have dragged this matter into the courts and who by so doing have created a climate which undoubtedly will lead to a major confrontation between minorities if new cases of this kind are filed.

I gather you are referring to Mr. De Funis and others who are similarly situated, and who believe that their rights have been violated on the basis of race or color.

You are suggesting that citizens who believe that their constitutional rights have been violated because of their race or color ought not to go to the courts because that would stir things up. Is that your position?

Mr. MITCHELL. No; that is not my position. I think you were there the day the *De Funis* case was argued. I know I was. The plain implication of those who were responsible for bringing that case to court was that even though the De Funis problem was then moot and he had been given redress, they were working to get other cases because they didn't like the system that the university had used to try to get fairness in the selection of students.

They were not alone, those who made that statement. There is even now a continuing effort to discredit affirmative action. That is what I am attacking.

Those who are interested in this kind of action pretend that there is a black inferior person versus a white superior person and this is what they are against.

Mr. O'HARA. Your statement seemed to be a little broader than that. I just wanted to clarify that you were not suggesting that someone who feels his rights have been violated ought to avoid the courts for fear of stirring up——

Mr. MITCHELL. No. I am talking about the kind of litigation which I think our judicial system is against.

I say that the issue in the *De Funis* case is in the nature of a frivolous, divisive issue.

The Washington minority is really making an effort to get a change in the admission practices so that they will be more realistic and not simply based upon tests.

If anyone reads the Washington Supreme Court decision in the *De Funis* case it will be clear that those who set the standards took into consideration the fact that Mr. De Funis and persons similarly situated had taken the entrance examination a number of times.

It was said that by repeating the process of taking that examination one improves one's grade. For that reason the grade of Mr. De Funis was weighted accordingly.

For all we know if you did that with the blacks who are supposed to be so dumb they too after taking the test a couple of times might have gotten better scores.

Mr. O'HARA. I wasn't present that day when they had the *De Funis* case. I am not familiar with all the facts. It was another day when I saw you over there. So I am not going to get into the *De Funis* case, particularly the facts in that case.

But this whole business of testing, what you are saying, "Well, at least with regard to law school admissions let us quit relying on such kinds of things as grade point averages, test grades, and let us use some personal judgment and subjective evaluation."

But when it comes to hiring faculty members I hear witnesses like yourself who think that the present method is all right and they say, "Well, we have a pool of Ph. D.'s and it contains *x* percent female and *y* percent black and therefore since more or less all Ph. D.'s are equal, a fair hiring system would produce exactly those percentages."

They say, "rely on the slip of paper and don't look beyond it."

Mr. Mitchell. I am not saying that. I am saying with respect to De Funis. I am agreeing with you that there is a pool of eligibles. As a matter of fact, 1,700 of them. Part of the means for becoming eligible was getting a certain score on the test.

The university considered that and found that these blacks had qualified by the test. But the minority didn't stop there. Other factors were added. For example, academic records at undergraduate school. Papers which had been written. Community service and matters related to the law, things of that sort. These were all taken into consideration.

I am not saying that the University of Washington performed a perfect job. But I am saying it performed a good-faith job which deserves commendation and we ought to build on that. If somebody can come up with something better we can consider it. On the matter of selection of faculty, this publication by Mr. Lester shows that they don't consider all Ph. D.'s equal.

They consider Ph. D.'s as a kind of cannon fodder to throw into the university battleground. Only the guys who meet the "old school ties" standard of writing books and other things, whatever it is that college professors do, these are the people who are retained.

The only thing about that is—and I am sure you know this, Mr. Chairman, from the University of Michigan and I know I know it from the University of Minnesota and the Maryland University—that they have these big-name professors and they are not the ones who teach in the classroom. It is a rare thing for a student to be exposed to inspirational comments from these big-name people.

And yet these academicians would have us believe that the reason they exclude a lot of these Ph. D.'s, the reason some of these blacks are not accepted is because they don't have the same eminence as these people who are listed as faculty members but really don't teach the classes.

Mr. O'Hara. Mr. Mitchell, this whole business of the testing, I notice you address in your statement the proposition that the use of tests and other devices in higher education is designed to screen out the majority of eligible blacks and unspecified personality requirements which have no relation to their ability as scholars.

I think that is a pretty vague and sweeping statement.

Mr. Mitchell. It is not vague. It is sweeping.

Mr. O'Hara. We have testimony from the law school aptitude examination fellow, had him go through all this material about validating their testing and so forth. As a matter of fact their tests are pretty reliable indicators of success in law school. Not perfect, but as indicators go, quite good.

I hear the allegation all the time that it is a phony, that it is a fraud, that it screens out minority kids.

I would like to see someone—and I think your organization is a prime candidate—produce a test that would predict success in law school that would not be.

Mr. Mitchell. My personal belief—and I am sure it is shared by many people in the law profession—is that it is almost impossible to devise a test which will fairly predict what a given individual will do.

In fact, Mr. Justice Douglas alluded to that when he was giving his opinion in the *De Funis* case. He referred to some eminent scholar saying that he thought the only way you could find out whether a person is going to be a good lawyer is to put him in school, teach him law, and see what he does. I don't think that is unfair. I don't imagine Abraham Lincoln would have been able to be a lawyer if he had been required ot take one of these tests that are given today.

But I don't agree with that experience in the area of testing. Right now pursuant to the provisions of the 1972 law with respect to equal employment I am sure there are various people who are trying to find a way of validating tests.

One of the things which emerged is this: That there is a test which is given in industry. That tests always showed that the black people who take it do about 10 percent below what the whites do.

But those who give the test in industry make allowance for that. Accordingly, if a white makes 70 and a black makes 60, they are rated as equal and both given a chance.

On the actual job the blacks are equal and often do better than the whites who have made higher grades on the test.

So my question is, Why give the test in the first place if it is that unreliable?

The answer given is, "We have got to have something. So we use the test even though it is not reliable."

I think that is the philosophy of most of the tests that are given. Those who give them know that they aren't always reliable. They know they can be misleading. But they have got to have something. So they give an unreliable test.

If we follow that practice in medicine and say, "well, the patient is sick. This medicine may kill him. But we have got to give him something," we would have a whole lot of business for undertakers in this country.

We are burying a whole lot of talent by these tests, which are really not reliable.

Mr. O'Hara. Mr. Mitchell, I agree there are some bad tests. But there are also some pretty good ones.

Mr. Mitchell. I just haven't seen any.

Mr. O'Hara. The results of which have been pretty well validated. I don't think they ever ought to be the exclusive determinant in admissions policy, for instance. But I think that when you have a test that has been validated there is nothing whatsoever wrong with the use of it.

Mr. Mitchell. In the hearing when Mr. Powell was here there was quite an exchange about hiring policemen. It so happens that in my lifetime when I was young I was interested in why the test given to members of the police force in Baltimore City always a large number of whites and no blacks. Blacks didn't pass.

This was supposedly a perfectly valid and indeed very simple test. Then we got a Governor who was a Republican, Governor Harry Nice, who met with some of us and said, "I will not appoint a police commissioner who will permit the continued exclusion of blacks from the police force."

I don't know what happened. But the blacks began to pass the test.

I had a more recent experience with the bar examination in the State of Maryland. I tried to assist some of the students who were having trouble with the bar examination. We had extensive meetings with the bar examiners.

One of the bar examiners was so moved that he resigned and a black bar examiner was appointed. Again, I don't know what happened. But quite a number of blacks passed the following year. The next year a number of blacks failed. It appeared that the black bar examiner and one of the white bar examiners seemed to be following a system of grading which apparently was producing an equal number of blacks and whites.

But there was one white member who was apparently following a system which resulted in a disproportionate number of blacks failing. That of course brought down the number of those who had passed the total test.

I state to you respectfully, Mr. Chairman, that I have not in all my years of contact with industry and schools, the merit system examinations, found an examination that I believe is really a valid measure of an individual's potential.

Mr. O'HARA. I think as a matter of fact that there are some tests, Mr. Mitchell, that are pretty good, depending on what you are aiming at.

The LSAT, to use an example again, is aiming at predicting success in completing law school. It is pretty good. It doesn't pretend to tell you who is going to be a good lawyer 20 years after they finish law school. But I don't think anyone could devise a test that would do that.

Mr. MITCHELL. You see? There is an important point. Are we trying in the professions to produce people who can finish a course? Or are we trying to produce people who will get out and serve after they graduate?

I think the present system is designed merely to get people through the professional schools but not consider whether they may be really worthwhile in service to the community which is what the real thing ought to be.

Mr. O'HARA. There are other points you made here that concern me.

At the bottom of page 4 and the top of page 5 you suggest that the violence in Boston and Baltimore would not have been present were it not for the arguments against busing by Members of Congress.

You come to the conclusion on page 5 that "the mobs in Boston and the defiant white parents in Baltimore have taken their cue from the Congress."

Do you really think that had it not been for congressional arguments against desegregation plans like the one in Boston that there would be no resentment?

Mr. MITCHELL. There might have been resentment. But there wouldn't have been the overt acts. In Baltimore the school board devised a plan. What gave dissident parents hope was the fact that there had been incorporated into the Elementary and Secondary Education Act language which is a modification of the Esch amendment.

Throughout the whole controversy people were saying, "what if they applied the standard of the Esch amendment?"

In other words the Esch amendment, which would have permitted the reopening of cases—indeed, there is a lady who is running for the U.S. Senate over there who said she thought her opponent, the incumbent Senator, was wrong and he should have voted for the Esch amendment.

She said, if she had been a Member of Congress, she would have voted for the Esch amendment, which, as you know, in its original form would have permitted the reopening of closed cases.

It can be documented that because of things which have been said over here, you hear them in rallies, you see them in the signs that are printed.

I think the people have gotten the impression that somehow or other if they make enough noise and create enough of a disturbance they won't have to obey the law.

Mr. O'Hara. I would disagree with your analysis of Congress as being way out in front of the people in this matter. Congress in fact is behind the people.

Mr. Mitchell. That is what is bad. You see, Mr. Chairman, what we are criticizing some of the White House occupants for is that they don't have enough vision to look ahead and lead the country on bold paths on economic matters. I think that is what people are elected to do, not to be behind the people or abreast of the people but in front, leading the people.

What has happened in this busing situation, it is true, Congress has gotten behind them.

Mr. O'Hara. You and I strongly disagree on that subject. I don't think the actions of the Congress really inspired the opposition. I think the opposition was there and would have been there no matter what the Congress did.

I finally would like to take a strong exception to the suggestion on page 5 that

> We know from bitter experience that those who employ the term "reverse discrimination" are no different from the framers of the so-called southern manifestoes against 1954 school desegregation decision.

Do you really believe that?

Mr. Mitchell. Yes, I do. We knew—and by "we" I mean you and I, Mr. Chairman—in those days what they were really after. They were really after trying to keep the Supreme Court decision from being implemented.

I say I see the same thing happening with respect to the term "forced busing" and "reverse discrimination," a catchword which, as I said, is innocent on its face but can be thrown around by irresponsible people and be defined in any way that they want to define it.

To some "reverse discrimination" means putting all the qualified whites out and putting all unqualified blacks in. This is the kind of thing which plays upon emotions and gets people in a position where they believe that they can turn back the clock.

Mr. O'Hara. Mr. Mitchell, I very strongly disagree with that. The decision was that students should be assigned to schools without regard to their race and should not be transported to a distant school because of their race.

Now if people take that same position today you say that they are in the same position as those who opposed integration back in 1954.

I really can't see how someone who has been consistent in their position all over the years has now become a racist.

Mr. MITCHELL. I read now from the *Swann* case of the Supreme Court, May 15, 1971. The Supreme Court says that,

> In the companion *Davis* case the Mobile School Board has argued that the Constitution requires that teachers be assigned on a color-blind basis. It also argues that the Constitution prohibits district courts from using their equity power to order assignments of teachers in order to achieve a particular degree of faculty desegregation.
>
> We reject that contention.

Then they say other things which would indicate that it is within the equity power of the courts to use transportation to correct discrimination.

In the second *Brown* decision, the Supreme Court said that if the assignment of teachers, if the pairing of schools, if a number of things will achieve a constitutional remedy, then all are acceptable.

Mr. O'HARA. Mr. Mitchell, there was quite a shift in the Court between *Brown* and *Swann* in terms of its position.

Some of us think the Court should have stayed with *Brown*. I don't think that that makes us segregationists. I just want to take exception to that, Mr. Mitchell.

We are going to celebrate the 200th anniversary of the convening of Congress in 2 minutes. I know you want to join with me in celebrating the fact that our Republic is strong enough to have survived 200 years of the Congress.

Mr. MITCHELL. As long as you and I are around we will help keep it surviving.

Mr. O'HARA. The subcommittee will stand adjourned.

[Whereupon, at 12:30 p.m., the subcommittee adjourned.]

[From Columbia Human Rights Law Review, vol. 5, no. 2, Fall, 1973, pp. 311 et seq.]

AN ADVOCATE'S VIEW OF THE 1972 AMENDMENTS TO TITLE VII

(By Clarence Mitchell[1])

Stories in the New York *Times*, the Washington *Post* and other daily papers on August 15, 1973, carried the historic news that the United States Department of Justice had filed anti-discrimination suits against the police departments of Chicago, Illinois, and Buffalo, New York. In both suits the police departments were charged with failing or refusing to recruit and hire blacks, Spanish-surnamed persons, and women on the equal basis with white men of non-Spanish origin. Both departments were also charged with using tests and establishing other qualifications for hiring and promotion that are discriminatory and have no demonstrated value to predict the ability of applicants to perform the required job. Earlier, in a news release dated July 9, 1973, Attorney General Elliot L. Richardson said the Department had filed "nine suits against municipal governments—four of these suits involve large urban fire departments in Boston,

---

[1] Mr. Mitchell is the Director of the Washington Bureau of the NAACP and a member of the Maryland Bar and was a major force behind the passage of the 1972 amendments to Title VII of the Civil Rights Act of 1964.

Chicago, Dallas, and Los Angeles." [2] And on January 7, 1974, the Justice Department accepted a consent decree requiring the Maryland State Police force to hire women and more blacks as state troopers.

These actions of the Justice Department are based on the Attorney General's new authority to sue public employers. The 1972 Amendments to Title VII of the 1964 Civil Rights Act provide that the Federal Government now has jurisdiction to handle complaints of discrimination in federal, state and local government employment.[3] This power to attack discrimination in public employment, in itself is likely to have a dramatic impact on employment policies throughout the Nation. It will come as a surprise to many that in their own home communities their taxes are being used to help finance public departments and services that discriminate in their hiring practices. The new vulnerability of governments to suit under Title VII should do much to heighten public awareness of the extensive and insidious aspects of bias against women, blacks and other minorities in public employment.

It was reported in the New York *Times* of September 18, 1973 that the Equal Employment Opportunity Commission (EEOC), in what was described as the most extensive concerted action in its eight year history, had notified General Motors, Ford Motor Co., General Electric, Sears, the United Auto Workers, the International Union of Electrical, Radio and Machine Workers, the United Electrical Workers Union, and others in the auto and electrical industries that charges of job discrimination on a "national scale" had been filed against them. "The prime interest of the Equal Employment Opportunity Commission is to negotiate a voluntary settlement in each instance," stated then Commission Chairman William Brown. "If settlement cannot be reached, however, the commission will consider taking cases to court." [4] The authority to institute court proceedings against employers and unions discriminating in their employment and organizational practices considerably strengthens the ability of the EEOC to achieve compliance with the provisions of Title VII of the 1964 Civil Rights Act. This additional weapon with which the federal government may attack job discrimination was also contained in the 1972 Amendments to Title VII.[5]

Other significant changes in the fabric of Title VII made by the 1972 Amendments increase its effectiveness in remedying job discrimination. The most important of the recent changes will be dealt with in this article. First, however, it is useful to survey some of the background that led to the passage of this legislation.

I. The Historical Background

During World War II, in spite of severe manpower shorages, there was overwhelming discrimination against black, Spanish-ancestry, Indian and many other minority group job seekers. In Philadelphia, Pennsylvania, for example, it was necessary to use the army to operate public transportation when white operators staged a wild-cat strike because blacks were employed to run streetcars. Under the leadership of A. Phillip Randolph, president of the Brotherhood of Sleeping Car Porters, a national coalition of leaders and organizations threatened to march on Washington in 1941 if the government failed to act against employment discrimination. President Franklin D. Roosevelt issued Executive Order 8802 on June 25, 1941, establishing a National Fair Employment Practice Committee.[6]

---

[2] Department of Justice press release, August 14, 1973. The release stated that the Chicago and Buffalo suits are the first filed by the Justice Department to enforce the employment discrimination section of the Equal Employment Opportunity Act against police departments. The Department also said that the Chicago suit is the first to be filed to enforce the equal employment opportunity regulations of the Law Enforcement Assistance Administration.

> "Since the passage of the March 1972 amendments to the Civil Rights Act of 1964, the Employment Section of the Civil Rights Division of the Department of Justice has filed seven lawsuits against municipal governments: the fire departments of Los Angeles, Boston, Chicago and Dallas; the police departments of Buffalo and Dallas; and the City of Montgomery for which a consent order has been entered. In addition, a motion to add parties was made and granted in the case captioned *United States v. Frazer, et al.*, 317 F. Supp. 1079 (M.D. Ala., 1970). This case, originally involving the Alabama Merit System and seven state departments, has now been expanded to cover all state agencies in Alabama. Under the 1972 amendments, the Education Section has also filed seven complaints against school districts regarding the employment of teachers."

Letter from J. Stanley Pottinger, Assistant Attorney General, Civil Rights Division, U.S. Department of Justice, to the Columbia Human Rights Law Review, Nov. 21, 1973. (Available upon request.)

[4] N.Y. Times, Sept. 18, 1972, at 1.

[5] 42 U.S.C. § 2000e–6 ,Supp. II, 1972).

The Committee's authority was based on the President's war powers. The Committee had broad jurisdiction over war and war-supporting industries, as well as over complaints against federal agencies of employment discrimination based on racial, religious and national origin grounds. After the agency had been successfully operating for approximately four years, its existence was challenged on technical grounds by Southern members of Congress. These congressmen argued that the Committee should cease operation in 1946 unless a law granting it permanent status were enacted, since the war powers jurisdiction of the Committee's existence was ineffective after the war ended. A bill to keep the Committee alive died—what was to become a familiar death for civil rights legislation—bottled up in the House Rules Committee and filibustered on the floor of the Senate.[7] There then began a long and persistent series of efforts to enact legislation establishing a national fair employment committee. Simultaneously, civil rights advocates waged a successful campaign to keep the idea alive by encouraging the establishment by executive orders of agencies having jurisdiction over employment policies of government contractors and federal agencies. President Harry S Truman issued an order covering employment by government contractors.[8] This order was reaffirmed in the Eisenhower and Kennedy administrations.[9] The efforts to establish by legislation a fair employment commission were finally successful in 1964 when Title VII of the Civil Rights Act was passed, creating the Equal Employment Opportunity Commission.[10] The agency was given broad jurisdiction over private employers and labor unions, but not over federal, state and local government employment.[11] The Commission was authorized to make findings of fact and to attempt conciliation of disputes involving discrimination, but was not given any enforcement powers. As part of a compromise to avert a Senate filibuster, "the statute left enforcement of the act to the United States Department of Justice and private litigants.[12]

The effort to gain enforcement powers for the Commission itself and to broaden its jurisdiction continued in each Congress until 1972. In 1966, for example, the House passed H.R. 10065,[13] which included a provision empowering the Commission to issue cease and desist orders. Time pressures in the Senate, however, forced a choice between action on this bill and action on proposed fair housing legislation establishing for the first time the duty of the federal government to protect the right to rent or buy property without racial discrimination. It was felt by those who supported both pieces of legislation that the housing act was the more essential, and effort was concentrated on its passage at the expense of the employment law amendments. Four years later the Senate did pass S. 2453,[14] granting cease and desist enforcement powers to the EEOC, but a similar House bill died when the House Rules Committee blocked consideration of the bill.[15] The bill that became law in 1972 closely followed in most respects the language and objectives of H.R. 1746, introduced by Representative Augustus Hawkins (D-Calif.) and sixteen of his colleagues in the House.[16] S. 2515, a similar bill, was sponsored by Senators Harrison Williams (D-N.J.), Jacob Javits (R.-N.Y.), and thirty-two other Senators.[17]

[8] President Truman on July 26, 1948, issued Executive Order 9980 barring discrimination in federal agencies because of race, color, religion, or national origin. The order created a Fair Employment Board in the Civil Service Commission to implement the President's objectives in this field. Also, on December 3, 1951, Mr. Truman issued Executive Order 10308 forbidding discrimination by government contractors. Mr. Truman also established an eleven member Committee on Government Contract Compliance to study the "rules, procedures and practices of contracting agencies of government" in obtaining conformance with the non-discrimination clause in government contracts. The substance of these orders remained in effect, through executive orders and policy statements issued by Presidents Eisenhower, Kennedy, Johnson and Nixon and the passage of EEOC legislation by Congress in 1964 and 1972.

[9] On August 13, 1953, President Eisenhower issued Executive Order 10479. Executive Order 10925 was signed by President Kennedy on March 6, 1961.

(1972), were Mr. Hawkins (for himself), Mr. Reid of New York, Mr. Bingham, Mrs. Chisholm, Mr. Clay, Mr. Collins of Illinois, Mr. Conyers, Mr. Corman, Mr. Dellums, Mr. Dent, Mr. Diggs, Mr. Metcalf, Mrs. Mink, Mr. Mitchell, Mr. Nix, Mr. Rangel and Mr. Stokes.

II. THE CONTROVERSY OVER ENFORCEMENT POWER

The major dispute in the Senate affecting enactment of the 1972 Amendments concerned the mode of enforcement of Title VII: whether the agency should be given power to issue cease and desist orders, requiring affected parties to obey its decisions; or whether the EEOC should be required to take disputes into court if unable to get the desired results by conciliation. Civil rights groups, for the most part, supported the idea of giving the EEOC power to issue its own orders, as had the Johnson administration previously. The Nixon administration and other both pro and anti-fair employment groups supported court enforcement. In fairness it should be noted that, although the dispute was very bitter at the time the bill was under consideration, not all of those favored court enforcement were against the principle of federally enforced employment. Senator James Allen (D-Ala.), co-leader along with Senator Sam Ervin (D-N.C.) of the filibuster against the amending bill stated: "The EEOC has managed to get along without cease and desist authority for seven years. Why cannot it limp along without that authority now?"[18] This view was representaitve of those opposed to the very existence of the EEOC, much less to any extension of its enforcement power. On the other hand, Senator Peter Dominick (R-Col.), who led the forces favoring the court-enforcement approach, did not favor allowing the EEOC continuing to "limp along," but felt that the Commission was already clogged by a large backlog of complaints and that even more administrative delay would result.[19] He further objected that the Commission would be acting as judge, jury and prosecutor—and not on an impartial basis—if it were able to issue cease and desist orders without first seeking court approval. As to administrative delay, Senator Javits replied that the federal district courts had jammed calendars too. In response to Senator Dominick's second point, an amendment was adopted during debate on the floor of the Senate establishing an independent general counsel in the EEOC so that its prosecutorial arm would be separate from its judicial arm.[20] Senator Williams effectively summarized the viewpoint of those Senators who felt that enforcement of Title VII would be best served by granting cease and desist powers to the EEOC.

> In 1964 many believed that compulsory enforcement powers would only be necessary in those rare instances where recalcitrant and persistent violations were encountered. We did not anticipate the extent of discrimination which existed at the time we enacted the legislation, nor did we fully understand its nature. We permitted a fatal flaw to be passed into law. . . .
>
> All of these agencies of government [*e.g.* NLRB, AEC, SEC], to be effective, had to have a machinery for decision. That is equally what seems to be questioned here. This is another area of the application of now proven methods and it is resisted.[21]

The National Labor Relations Board, the Atomic Energy Commission, the Securities and Exchange Commission, and many other federal agencies already have the authority to issue cease and desist orders. The overwhelming majority of state equal employment enforcement bodies also have this power. One problem which permeates all EEOC activities, the U.S. Commission on Civil Rights had reported, is its lack of enforcement powers.[22]

---

[17] S. 2515, 92d Cong., 1st Sess. (1972), was introduced by Mr. Byrd of West Virginia (for Mr. Williams), Mr. Bayh, Mr. Brooke, Mr. Case, Mr. Church, Mr. Cranston, Mr. Eagleton, Mr. Gravel, Mr. Harris, Mr. Hart, Mr. Hartke, Mr. Hughes, Mr. Humphrey, Mr. Inouye, Mr. Jackson, Mr. Javits, Mr. Kennedy, Mr. McGovern, Mr. Magnuson, Mr. Metcalf, Mr. Mondale, Mr. Montoya, Mr. Moss, Mr. Muskie, Mr. Nelson, Mr. Pell, Mr. Percy, Mr. Proxmire, Mr. Ribicoff, Mr. Scott, Mr. Schweiker, Mr. Stevenson and Mr. Tunney.

[18] 118 Cong. Rec. 1813 (1972).

[19] Some of those who opposed giving the EEOC power to issue cease and desist orders were convinced that the administrative enforcement route would create delay and permit the agency itself to drag out the proceedings. Some lawyers experienced in the ways of administrative agencies and handling private equal employment suits at the time were among this group. During fiscal 1970 the EEOC determined that 16,348 cases warranted investigation but completed only 5,090 of them. *See* 188 Cong. Rec. S 1650 (daily ed. Feb. 14, 1972).

[20] The general counsel is to be appointed by the President for a term of four years with the advice and consent of the Senate. His responsibilities include those that the EEOC may prescribe and those provided by law. Under the new section 2000e–4(b), the general counsel conducts all litigation on behalf of the Commission authorized by sections 2000e–5 and 2000e–6. The chairman and general counsel must concur on the appointment and supervision of regional attorneys under subsection 2000e–4(b)(1).

[21] 118 Cong. Rec. S 1803 (daily ed. Feb. 15, 1972); 118 Cong. Rec. S 1896 (daily ed. Feb. 16, 1972).

Although the court enforcement approach had been decisively defeated in committee and lost twice by narrow margins on the floor of the Senate, it was not until Senator Dominick offered a compromise court-enforcement proposal that the Allen-Ervin filibuster was broken.[23] The Senate voted to invoke cloture, for only the eleventh time in fifty-five years, against the Southern filibuster in opposition to the bill. The cloture vote also reflected, in part, a growing desire on the part of most senators to show that the business of that body could be conducted in an orderly way and that obstruction for the purpose of delay would not be tolerated.

The new law provides that the EEOC must determine if reasonable cause exists to believe a charge of discrimination is true "so far as practicable," within one hundred and twenty days from the filing of the charge or the date on which the EEOC was authorized to act on the charge.[24] A suit can be brought by the Commission in federal district court if it is unable to secure "a conciliation agreement acceptable to the Commission."[25] (The House bill had provided for court enforcement if the EEOC has been "unable to obtain voluntary compliance.")[26] Cases are to be heard at the earliest practicable date and are to be expedited in every way. If a judge has not scheduled the case for trial within one hundred and twenty days after the case is filed he may appoint a master, similar to those in bankruptcy proceedings.[27] The bill's final version gave the EEOC the power to use its own staff lawyers in all cases except those before the Supreme Court or those involving state and local governments.[28] In the end, the bill's supporters agreed that this new power combined with greatly broadened coverage made Title VII a potent force against discrimination.[29]

III. THE LOSING BATTLE FOR CONSOLIDATION

Another important point that was lost, because of division among those who should have supported the bill, involved the Contract Compliance Committee established by Executive Order 10308 and successive orders.[30] The NAACP, which spearheaded the drive for the Truman order, had long argued that when a legislative fair employment agency came into being the functions of the Contract Compliance Committee and the enforcement of non-discrimination in federal employment should be under the new agency. This was in part because the Committee had not been highly successful. In the seven years of its existence the Contract Compliance Committee had issued only one debarment order—against a federal contractor with only ten employees.[31] An assessment of federal civil rights efforts by the Civil Rights Commission in the fall of 1971 had labeled the Contract Compliance Committee one of the worst civil rights operations in the federal government and recomended its transfer to the EEOC.[32] In addition, located as it was in the United States Department of Labor, the contract compliance function was necessarily treated as a low priority item by many Department of Labor policymakers. In 1973, the office of Contract Compliance Committee was relegated to the office of Assistant Secretary for Employment Standards, thereby depriving it of the direct access to the Secretary of Labor it had previously enjoyed.[33]

Employees of the contract compliance agency worked with great zeal directly and through their friends in Congress to maintain their independence. As often happens, the top level employees of the Contract Compliance Committee saw consolidation as a threat to their status. In addition, some officials in the Nixon administration insisted that transferring the function to the EEOC would aggravate that agency's backlog of cases. Actually, of course, the expertise of those who had served on the Committee and their staff would have been a strong asset to the EEOC.

---

[22] 118 Cong. Rec. 2394 (1972) (remarks of Senator Williams).

[23] The court enforcement approach lost in committee by a vote of 15 to 2. On the Senate floor, the original Dominick court enforcement amendment lost, 41–43, on January 24 and, 46–48, on January 26. The cloture vote is recorded at 118 Cong. Rec. 1972 (1972).

[24] 118 Cong. Rec. S 3461 (daily ed. Mar. 6, 1972).

[25] 42 U.S.C. § 2000e–6 (Supp. II, 1972).

[26] 118 Cong. Rec. H 1698 (daily ed. Mar. 2, 1972).

[27] 118 Cong. Rec. S 3462 (daily ed. Mar. 6, 1972).

[28] 42 U.S.C. §§ 2000e–4(b)(2) and 2000e–5(f)(1) (Supp. II, 1972).

[29] "The passage of this act in this Congress will give new hope to millions of Americans who have been the victims of discrimination. Passage came after a long struggle involving extended debate in the Senate for several months. The bill that was finally enacted represents in some respects a compromise from the original proposals. However, the final product provides the Equal Employment Opportunity Commission, and the Civil Service Commission with respect to Federal employees, the tools needed to implement an effective enforcement program to secure equal employment opportunity for all our citizens."

Senate Subcommittee on Labor of the Committee on Labor and Public Welfare, 92d Cong., 2d Sess., Legislative History of the Equal Opportunity Act, Foreword (Comm. Print 1972).

[30] *Cf.* note 7 *supra.*

[31] 118 Cong. Rec. 582 (1972).

[32] 118 Cong. Rec. 1387 (1972).

[33] *Cf.* 1968 Congressional Directory 548 and 1973.

Likewise some employees of the Civil Service Commission waged an all out war against transferring the function of policing the federal government's fair employment practices to the EEOC. Chairman Robert E. Hampton and a few others in the Commission were less adamant. Mr. Hampton, after negotiations with Senators Peter Dominick (R-Colo.), Alan Cranston (D-Calif.), and civil rights groups supporting the bill, agreed to lend his support to what is now Section 717 of Title VII.[34] It should be noted that under this section, unlike the provisions affecting state and local governments, complaints against the federal government are filed with the Civil Service Commission or under procedures established by the Civil Service Commission. Also, the final administrative determinations of merit are controlled by the Civil Service Commission. Fortunately, however, those with grievances now have a clear channel to get redress in the courts if they are not satisfied with the administrative decisions.[35]

Finally, a compromise of sorts was worked out under which there was established an "Equal Employment Opportunity Coordinating Council." The statute provides that the council shall be "composed of the Secretary of Labor, the Chairman of the Equal Employment Opportunity Commission, the Attorney General, the Chairman of the United States Civil Rights Commission or their respective delegates." In theory this council is to have "the responsibility for developing and implementing agreements, policies and practices, designed to maximize effort, promote efficiency, and eliminate conflict, competition, duplication and inconsistency among the operations, functions and jurisdictions of the various departments, agencies and branches of the Federal government responsible for the implementation and enforcement of equal employment opportunity, legislation, orders and policies."[36]

So far there is little evidence available to an outsider of coordination between the Labor Department and the Civil Rights Commission. As already noted, administrative changes in the Labor Department have downgraded the role of those working on contract compliance matters. The Civil Service Commission has made several proposals concerning procedures for handling discrimination in the federal government, apparently without awaiting agreement from the EEOC. The Civil Service Commission also helped to launch a "campaign of criticism" against Chairman Brown of the Equal Employment Opportunity Commission. This effort helped to bring about his ouster from office.

As nearly as can be ascertained, the Civil Service Commission does not have much enthusiasm for revising its testing procedures and requirements to eliminate those factors which have no real relationship to qualification for a particular job.[37] That a test, which must be passed before an applicant can be hired or an employee promoted, must be job-related is a requirement imposed on private industry under Title VII as the United States Supreme Court has held in *Griggs* v. *Duke Power Company*, 401 U.S. 424.[38] That a civil service exam should also be nondiscriminatory should be an important element in eliminating discrimination in federal, state and local government employment. Here a President strongly committed to civil rights could force the reluctant elements in the Civil Service Commission and in the Labor Department to participate effectively with the EEOC in a coordinated strategy.[39]

---

[34] 42 U.S.C. § 2000e–16 (Supp. II, 1972).

[35] "The testimony of the Civil Service Commission notwithstanding, the Committee found than an aggrieved federal employee does not have access to the courts. In many cases, the employee must overcome a U.S. Government defense of sovereign immunity or failure to exhaust administrative remedies with no certainty as to the steps required to exhaust such remedies. Moreover the remedial authority of the Commission and the Courts has also been in doubt."

118 Cong. Rec. S 2281 (daily ed. Feb. 22, 1972). *See also* 42 U.S.C. § 2000e–16 (Supp. II, 1972).

[36] 42 U.S.C. § 2000e–14 (Supp. II, 1972) requires that on or before July 1 of each year, the Council shall transmit to the President and to the Congress a report of its activities, together with such recommendations for legislative or administrative changes as it concludes are desirable "to further promote the purpose of this section." Such reports, when available, should be useful to those who maintain a continuing interest in employment policies affecting women and minorities.

[37] This appraisal is based on the personal observations of the author.

[38] "Civil Service selection and promotion techniques and requirements are replete with artificial requirements that place a premium on 'paper' credentials. Similar requirements in the private sectors of business have often proven of questionable value in predicting job performance and have often resulted in perpetuating existing patterns of discrimination (*see, e.g.*, Griggs v. Duke Power Co., 401 U.S. 424 (1971)). The inevitable consequence of this kind of a technique in federal employment, as it has been in the private sector, is that classes of persons who are socio-economically or educationally disadvantaged suffer a very heavy burden in trying to meet such artificial qualifications. It will be incumbent upon the Civil Service Commission to undertake a thorough re-examination of its entire testing and qualification program to ensure that the standards enunciated in the *Griggs* case are fully met."

118 Cong. Rec. S 2281 (daily ed. Feb. 22, 1972) (Senate analysis).

Even though the Justice Department retains a role in enforcement under so-called "pattern or practice" suits, the new law provides for the possibility of transferring that function to the EEOC.[40] The Assistant Attorney General in charge of the Civil Rights Division, J. Stanley Pottinger, has the advantage of personal knowledge and experience in civil rights problems. The number of "pattern or practice" suits filed under his and former Attorney General Richardson's leadership in the Department is impressive. Unfortunately, should future appointees possess no knowledge of or sympathy for enforcement of the equal employment statute, much of the present acceleration may be lost or entirely halted. This means that, as provided by the 1972 statute, the pattern or practice function should be transferred to the EEOC. This would still leave the tasks of taking court action against state and local governments and of handling matters before the Supreme Court in the Justice Department.[41]

IV. RESISTANCE TO COMPREHENSIVE COVERAGE

In addition to the troubles proponents of the bill had to face in pushing for a solution to the government contract and Civil Service Commission problems, they faced considerable resistance from a small number of Senators on extension of the coverage of Title VII to educational institutions, state and local governmental units, and hospitals.

Educational institutions were originally exempted from coverage under the 1964 Act.[42] The following excerpt from the Senate Committee Report underscores the importance of including the 4.3 million employees of such institutions within the protection of the Act:

> There are at present over 120,000 educational institutions, with approximately 2.8 million teachers and professional staff members and another 1.5 million non-professional staff members. Yet all of these employees are, in effect, without an affective federal remedy in the area of employment discrimination.
>
> The presence of discrimination in the Nation's educational institutions is no secret. Many of the most famous and best remembered civil rights cases have involved discrimination in education. This discrimination, however, is not limited to the students alone. Discriminatory practices against faculty, staff and other employees are also common. The practices complained of parallel the same kinds of illegal actions which are encountered in other sectors of business, and include illegal hiring policies, testing provisions which

---

[39] The author has elsewhere expressed strong criticism to agencies of the Equal Employment Opportunity Coordinating Council on proposed guidelines on testing and other employment selection procedures. In letters to the constituent agencies of the Council, he stated:

> "The NAACP is very concerned about what seems to be an intention to limit the effect of the proposed guidelines by incorporating the definition of "employer" set out in Section 701 of the Equal Employment Opportunity Act. On its face, at least, this would not be inclusive enough to cover Federal agencies. It is noted that, in Sec. 3(a) on page 9 of the draft there are the words. "Employers who are required by the United States Civil Service Commission to meet merit principles are expected to validate their employee selection standards in accord with these guidelines.
>
> ". . . [W]e insist that the guidelines must make it crystal clear that Federal agencies are covered as a matter of law. It is not enough to say that they are "*expected* to validate their employment selection standards in accord with these guidelines." Discrimination is so extensive and enduring in Federal employment that soft or inconclusive statements about the duty of those operating under the merit system will not do."

[40] 42 U.S.C. § 2000e–6(e) provides that subsequent to "the date of enactment of the Equal Employment Opportunity Act of 1972, the Commission shall have authority to investigate and act on a charge of a pattern or practice of discrimination." The new law also provides in subsections 2000e–6(c) and 2000e–6(d) for transfer of the entire pattern or practice function from Justice to EEOC "effective two years after the date of enactment of the Equal Employment Opportunity Act of 1972." However, these subsections also provide that the President, with the Senate and House interposing no objection, can prevent the transfer with a reorganization plan.

[41] Referral of cases against a government, governmental agency or political subdivision to the Justice Department for court action is required by § 2000e–5(f)(1) of the 1972 Act. The requirement that the Attorney General "shall conduct all litigation to which the Commission is a party in the Supreme Court" appears in § 2000e–4(b)(2), which is a new subsection of Title VII.

[42] 42 U.S.C. § 2000e–1 (1970).

> tend to perpetuate racial imbalances, and discriminatory promotion and certification techniques.
>
> As in other areas of employment, statistics for educational institutions indicated that minorities and women are precluded from the more prestigious and higher-paying positions, and are relegated to the more menial and lower-paying jobs. While in elementary and secondary school systems Negroes accounted for approximately 10% of the total number of positions, in the higher-paying and more prestigious positions in institutions of higher learning, blacks constituted only 2.2% of all positions, most of these being found in all-black or predominantly black institutions. Women are similarly subject to discriminatory patterns. Not only are they generally under-represented in institutions of higher learning, but those few that do obtain positions are generally paid less and advanced more slowly than their male counterparts. Similarly, while women constitute 67% of elementary and secondary school teachers, out of 778,000 elementary and secondary school principals, 78% of elementary school and 94% of secondary school principals are men.
>
> The Committee believes that it is essential that these employees be given the same opportunity to redress their grievances as are available to other employees in the other sectors of business. Accordingly, the Committee has concluded that educational institutions, like other employers in the Nation, should report their activities to the Commission and should be subject to the Act. There is nothing in the legislative background of Title VII, nor does any national policy suggest itself, to support the present exemption. In fact, the Committee believes that the existence of discrimination in educational institutions is particularly critical. It is difficult to imagine a more sensitive area than educational institutions, where the youth of the Nation are exposed to a multitude of ideas and impressions that will strongly influence their future development. To permit discrimination here would, more than in any other area, tend to promote existing misconceptions and stereotypical categorizations which in turn would lead to future patterns of discrimination.[43]

Senator Allen, speaking in opposition to this expansion of coverage, labeled it an "attempt to subvert academic freedom and to violate the First Amendment prohibition guaranteeing free exercise of religion" of church-affiliated schools.[44] However, the strong support for coverage of educational institutions was evidenced by the fact that, when Senator Sam Ervin (D-N.C.) offered an amendment to remove teachers and faculty members of public schools from the bill, it was rejected by a voice vote. Later in the day another Ervin amendment, which would have removed from coverage all employment practices of all educational institutions, was rejected by a vote of 70 to 15.[45]

The inclusion of educational institutions gives women and displaced black educators and administrators a potent new weapon. In the case of black teachers and principals, who are dismissed because of unfair tactics of school boards and school officials acting purportedly to accomplish court ordered school desegregation, use of this provision of the new law should prove highly effective.[46]

The extension of Title VII to cover all governmental units is perhaps the most significant change in the scope of the Act. The Civil Rights Commission had noted that "state and local governments have failed to fulfill their obligation to assure equal job opportunity." [47] Senator Javits stated during debate that "discrimination was particularly acute in the government activities most visible to minority communities—notably education, law enforcement, and the administration of Justice." [48] Coverage under Title VII of state and local government employment, exasperated Senator Ervin however, who terms this expansion of coverage to the more than ten million affected employees "the most drastic assaults on the federal system ever proposed." [49] The Senate accepted one of his amendments for the purpose of clarifying the language of the bill, *i.e.*, to show that it did not apply to elected state and local officials or the persons that they choose as their legal and constitutional advisers. But, when the Senator joined with Senator Allen in another attempt to remove state and local government employees from the bill, the Senate voted 44 to 21 against the Ervin-Allen effort.[50]

[45] 118 Cong. Rec. S 2277 (daily ed. Feb. 22, 1972).

[46] Various legal actions have been instituted to protect the rights of displaced black teachers and administrators prior to passage of Public Law 92–261. The new statutory basis for such suits will greatly strengthen the hand of those unfairly displaced as well as help new job applicants and persons already employed but denied promotions, etc., because they are women or members of a minority group.

Employment and access to professional staffs of hospitals have long been problems for minorities—especially black physicians. Senator Ervin also sought to remove hospitals from coverage. His amendment was specifically aimed at physicians and surgeons. The debate provided one of the highlights of the period during which the measure was on the Senate floor. These excerpts are worth remembering:

Senator Williams: "This amendment ... would be saying affirmatively that hospitals in their selection of physicians and surgeons can discriminate against a person because of race, color, religion, sex, or national origin. As I stand here leading the debate on this measure. I try to think as a young person would who has gone through that long, hard, and expensive trail to be the graduate of a medical school. ... I say that in this Nation, which so badly needs doctors, it would be a terrible crime if, because of ethnic backgrounds, sex, race or religion, the American people were denied the services of that new doctor. That is exactly what this amendment would do. It would take from a doctor the protection that the Constitution gives him and would protect him through this law. I think it would be against all that this country holds itself up to be."

Senator Javits: "My father was an immigrant from Middle Europe in about the late 1880's and I am old enough to know the discrimination which was practiced overtly and blatantly, through many of my adult years in respect to employment.

"One of the things that those discriminated against have resented the most is that they are relegated to the position of the sawers of wood and the drawers of water; that only the blue collar jobs and the ditch digging jobs were reserved for them; and that though they built America, and certainly helped build it enormously in the days of its basic construction, they cannot ascend the high rungs in professional and other life. ... This amendment would look in and fortify the idea that being a doctor or a surgeon is just too good for members of a minority. . . . I hope very much, almost in self respect, that the Senate will decisively reject this amendment."

> *Senator Pastore* (D-R.I.): "I remember in my own state when individuals of certain racial extraction could not gain internship in some of our hospitals. Today they accept them freely. But it was a hard road to recognition. I know the experience of one individual in particular. Today he is one of the great surgeons in this country. At the time I speak of, he was refused an internship in a certain hospital. Later, that very hospital begged him to come there to lecture—but by then he had become world renowned in his profession of medicine.
>
> "All we are saying is that where all qualifications are met, please do not put certain groups under the burden of proving that they are twice as good in order to be considered equal. Equality is equality under any standard, and that is the one test that should be used in America. If you used any other test you violate the very spirit of the Declaration of Independence."

Of course, the written words of this article cannot capture the eloquence of the speakers nor the mood of the occasion on which they were delivered. Suffice it to say that when the three Senators finished speaking there were no further words said by the supporters of the amendment. A brief silence intervened in the galleries and on the Senate floor. Then the amendment was rejected on a voice vote.[51]

V. THE NEW LAW AND RELIGION

Another distinct improvement found in the new law is its definition of "religion," dealt with in a new subsection of the 1972 Act. In giving an analysis of the final action of Senate and House conferees, Senators Williams and Javits said:

> Section 701(j), which is new, defines religion to include all aspects of religious observance, practice and belief, so as to require employers to make reasonable accommodations for employees whose 'religion' may include observances, practices and beliefs such as sabbath observance which differ from the employer's or potential employer's requirements regarding standards, schedules or other business related conditions.
>
> Failure to make such accommodations would be unlawful unless an

[50] 118 Cong. Rec. S 2058 (daily ed. Feb. 17, 1972).

[51] 118 Cong. Rec. 1646–1648 (daily ed. Feb. 14, 1972).

> employer can demonstrate that he cannot reasonably accommodate such beliefs, practices or observances without undue hardship on the conduct of his business. The purpose of this subsection is to provide the statutory basis for EEOC to formulate guidelines on discrimination because of religion such as those challenged in *Dewey v. Reynolds Metals Company*, 429 F. 2d 325 (6th Cir. 1970), *affirmed by an equally divided court*, 402 U.S. 689 (1971).[52]

This tightening of the law with respect to religion apparently would not permit a company acting alone or acting pursuant to agreement with an appropriate bargaining agent to require an employee to work on the employee's sabbath, unless it can be demonstrated that there is no reasonable way for the employer to accommodate the employee or that refusal by an employee to work on his or her sabbath would create "an undue hardship in the conduct of business." Although this aspect of employment problems is often associated with the Jewish faith or such groups as the Seventh Day Adventists, other faiths have similar difficulties, and this addition to the law should be a source of relief to many efficient and valuable employees. One of the revisions presents a problem, however, in that religious institutions may seek to use it to discriminate against members of other faiths or against persons who do not profess any religious faith. Section 702 of the 1972 Act exempts a "religious corporation, association, educational institution, or society with respect to employment of individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its activities."[53] The contrasting viewpoints on this exemption are exemplified by Senator Ervin's remark that the 1964 Act constituted a "laying of the political hands of Caesar on the employment practices of the church of God."[54] Senator Williams, meanwhile, contended that "of all the institutions in this country who should be setting the example of equal employment opportunity, or equal opportunity for that matter in all aspects of life, it is America's religious institutions."[55]

The 1964 law limited this exemption to the carrying on of religious activities of the institutions affected. Arguably, this change may make it possible for a religious group to limit employees of a bank it owns or a building project it has under construction to members of that faith, provided there is no discrimination against employees because of race, color, sex or national origin. On the other hand, there is a danger that the new language may tempt some of the institutions covered by it to exclude blacks, persons of Spanish ancestry or women on the grounds that they are not identified with the faith or the entity controlling employment. It would seem to be difficult for religious institutions to stretch beyond the plain language of the law. Nevertheless, civil rights groups will be watching the effect of this amendment of the statute and will seek appropriate remedial legislation in Congress if the need for such legislation is determined by concrete evidence of impermissible discrimination based on this amendment.

VI. A NOTE ON LABOR PROBLEMS

Problems with respect to membership in labor organizations and with respect to joint labor-management apprenticeship committees also received attention. In commenting on these issues Senators Williams and Javits said of sections 8(a), 8(b), and 8(c)(2):[56]

> These subsections would amend sections 703(a) and 703(c)(2) of the present statute to make it clear that discrimination against applicants for employment and applicants for membership in labor organizations is an unlawful practice. This subsection is merely declaratory of present laws as contained in the decisions of *Phillips v. Martin-Marietta Corp.*, 400 U.S. 542 (1971) [An employer may not, in the absence of business necessity, refuse to hire women with pre-school-age children while hiring men with such children.]; *U.S. v. Sheet Metal Workers International Association, Local 36*, 416 F.2d 123 (8th Cir. 1969) [Employment referral systems established under collective bargaining agreements whereby locals accord priority for work referrals on basis of four priority groups requiring experience which blacks were unable to obtain prior to Civil Rights Act resulted in present and future discrimination and constituted an unlawful employment

[56] 42 U.S.C. § 2000e-2(a) (Supp. II, 1972); 42 U.S.C. § 2000e-2(c) (Supp. II, 1972).

> practice.]; and *Asbestos Workers, Local 53 v. Vogler*, 407 F.2d 1047 (5th Cir. 1969) *[Union's refusal to refer nine individuals for employment as asbestos helpers amounted to unlawful discrimination.]*.
>
> These subsections 8(c)(1) and (2) amend section 704(a) and (b) of the present statute to make clear that joint labor-management apprentice committees are covered by those provisions which relate to discriminatory advertising and retaliation against individuals participating in Commission proceedings.[57]

Importantly, President George Meany and Andrew Biemiller of the AFL-CIO, and President Leonard Woodcock and William Oliver of the United Auto Workers along with other top leaders of the labor movement gave strong and consistent support to the amending provisions of S. 2515 and the Hawkins bill as reported by the House Labor and Education Committee.

VII. Litigation and Remedies Under the New Title VII

In its approach to enforcement of the Equal Employment law, Congress clearly intended to write constructive case law into the new legislation and, thereby, strengthen the impact of such decisions. This is illustrated by the Williams-Javits comment on class action lawsuits. In analyzing the final report of House and Senate conferees, they said:

> In establishing the enforcement provisions under this subsection (706(e)) and subsection 706(f) generally, it is not intended that any of the provisions contained therein shall affect the present use of class action lawsuits under Title VII in conjunction with Rule 23 of the Federal Rules of Civil Procedure. The courts have been particularly cognizant of the fact that claims under Title VII involve the vindication of a major public interest, and that any action under the Act involves considerations beyond those raised by the individual claimant. As a consequence, the leading cases in this area to date have recognized that many Title VII claims are necessarily class action complaints and, accordingly, it is not necessary that each individual entitled to relief be named in the original charge or in the claim for relief. *A provision limiting class action was contained in the House bill and specifically rejected by the conference committee.* (Emphasis supplied.)[58]

Senators Williams and Javits also emphasized that the conferees wanted to be sure that bona fide claims would not be lost on mere technicalities involving filing deadlines or because of a lack of diligence or discernment on the part of the agencies designated to enforce the law. Speaking of the 1972 Act's changes in the filing time requirements they said:

> It is intended by expanding the time period for filing charges in this subsection 706(e) that aggrieved individuals, who frequently are untrained laymen and who are not always aware of the discrimination that is practiced against them, should be given greater opportunity to prepare their charges and file their complaints and that existent but undiscovered acts of discrimination should not escape the effect of the law through a procedural oversight. Moreover, wide latitude should be given individuals in such cases to avoid any prejudice to their rights as a result of government inadvertence, delay or error.[59]

Some controversy had developed over whether complainants should have the right to enter private lawsuits under the new law. Senator Roman Hruska (R-Nebr.) alleged that the effect of permitting a multiplicity of actions to be instituted against a respondent before a number of separate and distinct forums for the same alleged offense would be blackmailing the respondent into a settlement.[60] Nevertheless, this right was retained, and speaking in justification of the retention, Senators Williams and Javits said:

> The retention of the private right of action, as amended, is intended to make clear that an individual aggrieved by a violation of Title VII should

---

[57] 118 Cong. Rec. S. 3461 (daily ed. Mar. 6, 1972).

[58] *See* note 50 *supra*, at 1847.

[59] *Id.* at 1846. Under the 1964 Act charges had to be filed within 90 days after an alleged unlawful employment practice. In cases where the Commission defers to a state agency it was required that charges be filed within 30 days after the aggrieved person received notice that the state or local agency terminated proceedings or within 210 days after the alleged unlawful employment practice occurred, whichever was earlier. 42 U.S.C. § 2000e-5(e) (1970). Under the 1972 amendments charges may be filed within 180 days after the alleged unlawful act. In cases where there is deferral to state or local agencies the time is 300 days after the alleged unlawful act of the party charged or 30 days after termination under state or local proceedings whichever is earlier. 42 U.S.C. § 2000e-5(e) and 5(f) (Supp. II, 1972), *amending* 42 U.S.C. § 2000e-5(e) (1970).

[60] 118 Cong. Rec. S 1458 (daily ed. Feb. 8, 1972).

> not be forced to abandon the claim merely because of a decision by the Commission or the Attorney General as the case may be, that there are insufficient grounds for the Government to file a complaint. Moreover, it is designed to make sure that the person aggrieved does not have to endure lengthy delays if the Commission or Attorney General does not act with due diligence and speed. Accordingly, the provisions described above allow the person aggrieved to elect to pursue his or her own remedy under this title in the courts where there is agency inaction, dalliance or dismissal of the charge, or unsatisfactory resolution.
>
> It is hoped that recourse to the private lawsuit will be the exception and not the rule, and that the vast majority of complaints will be handled through the offices of the EEOC or the Attorney General, as appropriate. However, as the individual's rights to redress are paramount under provisions of Title VII it is necessary that all avenues be left open for quick and effective relief.[61]

Some of the forces opposed to bringing fair employment actions into court under such statutes as the National Labor Relations Act, 42 U.S.C. § 1981, and 42 U.S.C. § 1983, succeeded in getting an amendment in the House bill providing suits under Title VII of the Equal Employment statute would be the exclusive remedy for unlawful employment practices. This was not included in the bill passed by the Senate and was stricken in the House-Senate Conference on the bill.[62]

The new law carefully preserves the rights of attorneys appearing in a private capacity to recover court awarded fees. In all cases, including those involving federal, state and local government complaints, the new law provides that sections 706(f) through 706(k) continue to be applicable. Section 706(k) provides that:

> In any action or proceeding under this subchapter the court, in its discretion, may allow the prevailing party, other than the Commission or the United States, a reasonable attorney's fee as part of the costs, and the Commission and the United States shall be liable for costs the same as a private person.

With respect to federal employment problems, 706(f) through (k) of the 1964 Act are incorporated by reference under section 717(d) of the 1972 Act.

When the respondent is not a federal, state or local government agency, if the Equal Employment Opportunity Commission is unable to secure a conciliation agreement within thirty days from the filing of the charge (or within thirty days after expiration of any period of reference under 706(c) or 706(d)), it may thereafter, as discussed earlier, bring a civil action under section 706(f) against the respondent in an appropriate district court. The Equal Employment Opportunity Commission may process cases to the conciliation stage where state and local government agencies are the parties charged. However, as previously noted, court action in state and local government agency cases must be handled by the United States Department of Justice.[63] Under 706(f) the aggrieved party may intervene in any case brought by the EEOC or the Attorney General.[64] The new law also provides for appointment of counsel.[65] The Williams-Javits analysis of the conference committee action emphasizes the intention of Congress to give wide remedial powers to the courts. The following excerpt from the analysis is on point:

> The provisions of this subsection 706(g) are intended to give the courts wide discretion in exercising their equitable powers to fashion the most complete relief possible. In dealing with the present 706(g) the courts have stressed that the scope of relief under that section of the Act is intended to make the victims of unlawful discrimination whole, and that the attainment of this objective rests not only upon the elimination of the particular employment practice complained of, but also requires that persons aggrieved by the consequences and effects of the unlawful employment practice be, so far as possible, restored to a position where they would have been were it not for the unlawful discrimination.[66]

In this connection it should be observed that there was some effort, during consideration of the bill, to amend it in such a manner as to prevent courts from establishing goals and affirmative action plans of employment.[67] These efforts were unsuccessful and, in this respect, courts are still free to take such action in this area as equity may require.[68] The fate of companies operating under a court- or agency-imposed affirmative action plan was also considered. Under setcion 718, which is new, the 1972 Act providse that:

---

[61] 118 Cong. Rec. S 3462 (daily ed. Mar. 6, 1972).

[62] *Id.*

[63] *See* note 4 *supra.*

[64] 42 U.S.C. § 2000e–5(f)(1) (Supp. II, 1972).

[65] 42 U.S.C. § 2000e–5(f)(1) (Supp. II, 1972) states that "Upon application by complainant and in such circumstances as the court may deem just, the court may appoint an attorney for such complainant and may authorize the commencement of the action without the payment of fees, costs or security."

[66] 118 Cong. Rec. S 3462 (daily ed. Mar. 6, 1972).

> No government contract or portion thereof can be denied, withheld, terminated or superseded by a government agency under Executive Order 11246 or any other order or law without according the respective employer a full hearing and adjudication pursuant to 5 U.S.C. § 554 *et seq.* where such employer has an affirmative action program for the same facility which has been accepted by the Government within the previous twelve months. Such plan shall be deemed to be accepted by the Government if the appropriate compliance agency has accepted such plan and the Office of Federal Contract Compliance has not disapproved of such plan within 45 days. However, an employer who substantially deviates from any such previously accepted plan is excluded from the protection afforded by this section.[69]

Procedures under Executive Order 11246 are handled by the Office of Contract Compliance in the U.S. Department of Labor.[70] The amendment was urged by those who contended that some safeguard was needed to protect those who undertake a plan approved by one agency of government in good faith and then find that the plan is not acceptable to another agency of government.

Another important change involves the availability of injunctive relief. In matters where it is required by the circumstances of the case and the nature of a possible remedy, subsection 706(f)(2)[71] authorizes the Commission or the Attorney General, as the case may be, based upon a preliminary investigation of a charge filed, to bring an action for appropriate temporary or preliminary relief, pending the final disposition of the charge. This will be especially helpful where discriminatory acts result in removal without pay, pending a final decision, as is often the case with employees of government agencies. It will also be valuable in cases where the aggrieved person wins his case only to find that the job or promotion has gone to some other individual during the interim period.[72]

VIII. A NOTE ON LEGISLATIVE STRATEGY

The passage of the 1972 amendments to the Equal Employment Opportunity Act is a monumental achievement for its sponsors. Obviously the measure could not have become law without the skillful handling in the House which made it possible to bring the measure to the floor.

---

[67] 118 Cong. Rec. 1658–1676 (1972).

[68] 42 U.S.C. § 2000e–5(g) (Supp. II, 1972) *amending* 42 U.S.C. § 2000e–5(g) (1970).

[69] 42 U.S.C. § 2000e–17 (Supp. II, 1972).

[70] Exec. Order No. 11,246, 3 C.F.R. 339 (1965).

[71] 42 U.S.C. § 2000e–5(f)(2) (Supp. II, 1972).

[72] The following changes in the law are noted but not discussed in detail in this article:

(1) 42 U.S.C. § 2000e–6 coverage of the Act to employers of fifteen or more persons and labor unions with fifteen or more members from the previous cutoff point of 25 persons.

(2) 42 U.S.C. § 2000e–8(b) of the Civil Rights Act of 1964 is amended to permit EEOC, within the limitations of funds appropriated specifically for the purpose, to contribute funds for research and other projects carried on by state and local equal employment agencies.

(3) 42 U.S.C. § 2000e–8(c) is amended so that, before going to court to seek exemption from record-keeping (because of undue hardship) as they could under the 1964 Act, employers and labor unions must first seek exemption from EEOC. If exemption is denied they may then go into court. This section also permits exchange of information between Federal and state and local agencies. Information from the Federal government is furnished under the condition that it not be made public prior to the instituting of state or local action involving such information.

(4) 42 U.S.C. § 2000e–9. Subpoena power of the EEOC is broadened to permit designated Commission agents, agencies or members to issue subpoenas as necessary for the conduct of an investigation and to take testimony under oath.

(5) 42 U.S.C. § 2000e–4 gives the Chairman the power to appoint staff, except in those instances where he must do so in concurrence with the general counsel. A member of the Commission is permitted to serve until his successor is appointed, but not for more than 60 days when Congress is in session unless the successor has been nominated and his nomination submitted to the Senate, or after adjournment *sine die* of the session of the Senate in which such nomination was submitted.

(6) 42 U.S.C. § 2000e–5(f)(1) permits the EEOC, upon timely application and with permission of the court, to intervene in cases brought by private litigants. Under the 1964 statute the EEOC had no request permission from the Attorney General before seeking to intervene in such cases.

(7) Section 14 of Public Law 92–261 provides that "amendments by this Act to 42 U.S.C. § 2000e–5 of the Civil Rights Act of 1964 shall be applicable with respect to charges pending with the Commission on the date of the enactment of this act and all charges filed thereafter."

In the House there were numerous forces working against the bill and for particular weakening provisions. These combined forces enabled Representative John N. Erlenborn (R-Ill.) to succeed by a vote of 202 to 197 in substituting the language of a weak bill, which he had introduced, for the language in the bill reported out by the House Education and Labor Committee.[73]

At this point, Representative Hawkins, his colleagues in the House, and civil rights groups supporting the bill reported by the Education and Labor Committee had to make an important decision. They had to decide whether to urge that the bill, as revised by the Erlenborn language, be recommitted or that the measure be passed by the House with the expectation of Senate help in passing a stronger bill. Labor, religious and other pro-civil rights groups urged Representative Hawkins to adopt he strategy of passing the bill, even though it lacked many needed revisions and contained a number of harmful amendments. Those familiar with the workings of Congress knew that recommital would end any prospects for obtaining strengthening amendments. On the other hand, past experience had taught the proponents of civil rights that if a good bill can be gotten through the Senate its best features can be preserved in a conference committee with subsequent approval by both bodies of Congress. Representative Hawkins and the vast majority of Democrats and Republicans who generally support civil rights legislation accepted the strategy of passing the bill with the Erlenborn language so that the measure might be kept alive. The bill was then passed by a vote of 285 to 106.[74] Pro-civil rights members of the Senate Labor and Public Welfare Committee moved rapidly to repair the damage done in the Erlenborn substitute, and the bill reported out by that committee was similar in most respects to the Hawkins bill. Without that strategy, agreed upon by House supporers and outside groups, the 1972 amendments would not have passed.

As the above account indicates, the extensive work of members of the Senate defeated many attempts to emasculate the measure. A great part of the work on details was carefully handled by staff members of the Senate Sub-Committee on Labor of the Labor and Welfare Committee, Gerry Feder, counsel, and Donald Elisburg, professional staff member, for the majority and Eugene Mittleman, counsel for the minority. They were joined in the effort by Stephen Blakeslee, Jr., who was then handling Congressional Affairs for the EEOC, but is now on the staff of Senator Richard Schweiker (R-Pa.). It is interesting to note that the Administration maintained a kind of hand-off attitude during the period when the bill was under consideration—especially in the Senate. Mr. Blakeslee's participation was largely on his own initiative with the blessing of William H. Brown, Chairman of the EEOC. Mr. Blakeslee's role was important because, in spite of an aloof attitude at the White House, it was still possible to get the necessary interaction between the executive and legislative branches of government on a day to day basis.

There is every indication that, under the leadership of Chairman Brown, the new provisions of the law have been diligently put into practice. That was an especially difficult task because the Chairman's tenure was very uncertain during and immediately after the 1972 Presidential election.[75] In spite of the efforts of those who were working for his replacement, Chairman Brown worked diligently to implement the new statute. Approximately 150 court cases were filed by the agency during the 1972–1973 period. In an Administration move that has come as a surprise to many, Chairman Brown was replaced. It remains to be seen whether this action on the part of the White House will put a brake on the Commission's work.[76] Vigorous enforcement of the 1972 amendments is essential if their passage is to effectuate a significant advance in the fight for equal employment opportunity. "It is not our purpose to reaffirm existing loopholes," said Senator Williams during the debate. "The basic goal which we are trying to achieve here is the giving of additional meaning to the Civil Rights Act of 1964." [77]

---

[73] 117 Cong. Rec. 32111–32112 (1971).

[74] 117 Cong. Rec. 32113 (1971).

[75] It is difficult for an agency such as EEOC to function in a presidential election year. This was true during 1972. In addition, the Chairman and other high government officials were required to submit their resignation when Mr. Nixon won. The most reliable account of what happened to Chairman Brown is that a number of White House and other government functionaries had combined to get his resignation accepted. Apparently, these plans were unknown to Mr. Nixon because when he learned that there were rumors about Mr. Brown's being dropped, the Chief Executive immediately rejected the resignation.

As the expiration of Chairman Brown's term approached in the summer of 1973, a new combination of White House, Civil Service Commission and political operators began working against his reappointment. Apparently distracted by Watergate, the President bowed to their wishes in what appears to be an offhand manner. Actually, the word about the appointment of a successor chairman was on the wires of the Associated Press even before Mr. Brown knew of it officially.

---

[76] President Nixon nominated John Powell, formerly of the United States Commission on Civil Rights, to be the new Chairman of the Equal Employment Opportunity Commission. After a meeting on December 6, 1973 between the author of this article, Messrs. Melvin Laird and Bryce Harlow, assistants to the President, and Senators Williams and Javits, the Administration promised high level attention for EEOC. In a letter dated December 7, 1973, sent to Senators Williams and Javits, General Alexander M. Haig, Jr., assistant to the President, stated that the President had met with Chairman Powell and had assured him "of this Administration's support of the causes of equal employment and the work of the Equal Employment Opportunity Commission."

APPENDIX

[Public Law 88-352, 88th Congress, H.R. 7152, July 2, 1964]

TITLE VI—NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS

SEC. 601. No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

SEC. 602. Each Federal department and agency which is empowered to extend Federal financial assistance to any program or activity, by way of grant, loan, or contract other than a contract of insurance or guaranty, is authorized and directed to effectuate the provisions of section 601 with respect to such program or activity by issuing rules, regulations, or orders of general applicability which shall be consistent with achievement of the objects of the statute authorizing the financial assistance in connection with which the action is taken. No such rule, regulation, or order shall become effective unless and until approved by the President. Compliance with any requirement adopted pursuant to this section may be effected (1) by the termination of or refusal to grant or to continue assistance under such program or activity to any recipient as to whom there has been an express finding on the record, after opportunity for hearing, of a failure to comply with such requirement, but such termination or refusal shall be limited to the particular political entity, or part thereof, or other recipient as to whom such a finding has been made and, shall be limited in its effect to the particular program, or part thereof, in which such noncompliance has been so found, or (2) by any other means authorized by law: *Provided, however*, That no such action shall be taken until the department or agency concerned has advised the appropriate person or persons of the failure to comply with the requirement and has determined that compliance cannot be secured by voluntary means. In the case of any action terminating, or refusing to grant or continue, assistance because of failure to comply with a requirement imposed pursuant to this section, the head of the Federal department or agency shall file with the committees of the House and Senate having legislative jurisdiction over the program or activity involved a full written report of the circumstances and the grounds for such action. No such action shall become effective until thirty days have elapsed after the filing of such report.

SEC. 603. Any department or agency action taken pursuant to section 602 shall be subject to such judicial review as may otherwise be provided by law for similar action taken by such department or agency on other grounds. In the case of action, not otherwise subject to judicial review, terminating or refusing to grant or to continue financial assistance upon a finding of failure to comply with any requirement imposed pursuant to section 602, any person aggrieved (including any State or political subdivision thereof and any agency of either) may obtain judicial review of such action in accordance with section 10 of the Administrative Procedure Act, and such action shall not be deemed committed to unreviewable agency discretion within the meaning of that section.

SEC. 604. Nothing contained in this title shall be construed to authorize action under this title by any department or agency with respect to any employment practice of any employer, employment agency, or labor organization except where a primary objective of the Federal financial assistance is to provide employment.

SEC. 605. Nothing in this title shall add to or detract from any existing authority with respect to any program or activity under which Federal financial assistance is extended by way of a contract of insurance or guaranty.

Part 80—Nondiscrimination Under Programs Receiving Federal Assistance Through the Department of Health, Education, and Welfare Effectuation of Title VI of the Civil Rights Act of 1964[1]

80.13 Definitions.

Appendix A: Federal financial assistance to which these regulations apply.

Authority: The provisions of this Part 80 issued under sec. 602, 78 Stat. 252; 42 U.S.C. 2000d-1, unless otherwise noted.

Source: The provisions of this Part 80 appear at 29 F.R. 16298, Dec. 4, 1964; 29 F.R. 16988, Dec. 11, 1964; 30 F.R. 35, Jan. 5, 1965, unless otherwise noted.

§ 80.1 PURPOSE

The purpose of this part is to effectuate the provisions of title VI of the Civil Rights Act of 1964 (hereafter referred to as the "Act") to the end that no person in the United States shall; on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance from the Department of Health, Education, and Welfare.

(Sec. 601, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d) [29 FR 16298, Dec. 4, 1964, as amended at 38 FR 17982, July 5, 1973]

§ 80.2 APPLICATION OF THIS REGULATION

This regulation applies to any program for which Federal financial assistance is authorized to be extended to a recipient under a law administered by the Department, including the Federal assisted programs and activities listed in Appendix A of this regulation. It applies to money paid, property transferred, or other Federal financial assistance extended after the effective date of the regulation pursuant to an application approved prior to such effective date. This regulation does not apply to (a) any Federal financial assistance by way of insurance or guaranty contracts, (b) money paid, property transferred, or other assistance extended before the effective date of this regulation, (c) the use of any assistance by any individual who is the ultimate beneficiary under any such program, or (d) any employment practice, under any such program, or any employer, employment agency, or labor organization, except to the extent described in § 80.3. The fact that a type of Federal assistance is not listed in Appendix A shall not mean, if Title VI of the Act is otherwise applicable, that a program is not covered. Federal financial assistance under statutes now in force or hereinafter enacted may be added to this list by notice published in the Federal Register.

(Secs. 602, 604, Civil Rights Act of 1964; 78 Stat. 252, 253; 42 U.S.C. 2000d-1, 2000d-3)

[38 FR 17979, July 5, 1973]

§ 80.3 DISCRIMINATION PROHIBITED

(a) *General.*—No person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program to which this part applies.

---

[1] 38 FR 17979, July 5, 1973.

(b) *Specific discriminatory actions prohibited.*—(1) A recipient under any program to which this part applies may not, directly or through contractual or other arrangements, on ground of race, color, or national origin:

(i) Deny an individual any service, financial aid, or other benefit provided under the program;

(ii) Provide any service, financial aid, or other benefit to an individual which is different, or is provided in a different manner, from that provided to others under the program;

(iii) Subject an individual to segregation or separate treatment in any matter related to his receipt of any service, financial aid, or other benefit under the program;

(iv) Restrict an individual in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service, financial aid, or other benefit under the program;

(v) Treat an individual differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility membership or other requirement or condition which individuals must meet in order to be provided any service, financial aid, or other benefit provided under the program;

(vi) Deny an individual an opportunity to participate in the program through the provision of services or otherwise or afford him an opportunity to do so which is different from that afforded others under the program (including the opportunity to participate in the program as an employee but only to the extent set forth in paragraph (c) of this section);

(vii) Deny a person the opportunity to participate as a member of a planning or advisory body which is an integral part of the program.

(2) A recipient, in determining the types of services, financial aid, or other benefits, or facilities which will be provided under any such program, or the class of individuals to whom, or the situations in which, such services, financial aid, other benefits, or facilities will be provided under any such program, or the class of individuals to be afforded an opportunity to participate in any such program, may not, directly or through contractual or other arrangements, utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, or national origin, or have the effect of defeating or substantially impairing accomplishment of the objectives of the program as respect individuals of a particular race, color, or national origin.

(3) In determining the site or location of a facilities, an applicant or recipient may not make selections with the effect of excluding individuals from, denying them the benefits of, or subjecting them to discrimination under any programs to which this regulation applies, on the ground of race, color, or national origin; or with the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of the Act or this regulation.

(4) As used in this section, the services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any service, financial aid, or other benefits provided in or through a facility provided with the aid of Federal financial assistance.

(5) The enumeration of specific forms of prohibited discrimination in this paragraph and paragraph (c) of this section does not limit the generality of the prohibition in paragraph (a) of this section.

(6)(i) In administering a program regarding which the recipient has previously discriminated against persons on the ground of race, color, or national origin, the recipient must take affirmative action to overcome the effects of prior discrimination.

(ii) Even in the absence of such prior discrimination, a recipient in administering a program may take affirmative action to overcome the effects of conditions which resulted in limiting participation by persons of a particular race, color, or national origin.

(c) *Employment practices.*—(1) Where a primary objective of the Federal financial assistance to a program to which this regulation applies is to provide employment, a recipient may not (directly or through contractual or other arrangements) subject an individual to discrimination on the ground of race, color, or national origin in its employment practices under such program (including recruitment or recruitment advertising, employment, layoff or termination, upgrading, demotion, or transfer, rates of pay or other forms of compensation, and use of facilities), including programs where a primary objective of the Federal financial assistance is (i) to reduce the employment of such individuals or to help them through employment to meet subsistence needs, (ii) to assist such individuals through employment to meet expenses incident to the commencement or continuation of their education or training, (iii) to provide work experience which contributes to the education or training of such individuals, or (iv) to provide remunerative activity to such individuals who because of handcaps cannot be readily absorbed in the competitive labor market. The following, under existing laws, have one of the above objectives as a primary objective:

(*a*) Projects under the Public Works Acceleration Act, Public Law 87–658, 42 U.S.C. 2641–2643.

(*b*) Work-study under the Vocational Education Act of 1963, as amended, 20 U.S.C. 1371–1374.

(*c*) Programs assisted under laws listed in Appendix A as respects employment opportunities provided thereunder, or in facilities provided thereunder, which are limited, or for which preference is given, to students, fellows, or other persons in training for the same or related employments.

(*d*) Assistance to rehabilitation facilities under the Vocational Rehabilitation Act, 29 U.S.C. 32–34, 41a and 41b.

(2) The requirements applicable to construction employment under any such program shall be those specified in or pursuant to Part III of Executive Order 11246 or any Executive order which supersedes it.

(3) Where a primary objective of the Federal financial assistance is not to provide employment, but discrimination on the ground of race, color, or national origin in the employment practices of the recipient or other persons subject to the regulation tends, on the ground of race, color, or national origin, to exclude individuals from participation in, to deny them the benefits of, or to subject them to discrimination under any program to which this regulation applies, the foregoing provisions of this paragraph (c) shall apply to the employment practices of the recipient or other persons subject to the regulation, to the extent necessary to assure equality of opportunity to, and nondiscriminatory treatment of, beneficiaries.

(d) *Indian Health and Cuban Refugee Services.*—An individual shall not be deemed subjected to discrimination by reason of his exclusion from the benefits of a program limited by Federal law to individuals of a particular race, color, or national origin different from his.

(e) *Medical emergencies.*—Notwithstanding the foregoing provisions of this section, a recipient of Federal financial assistance shall not be deemed to have failed to comply with paragraph (a) of this section if immediate provision of a service or other benefit to an individual is necessary to prevent his death or serious impairment of his health, and such service or other benefit cannot be provided except by or through a medical institution which refuses or fails to comply with paragraphs (a) of this section. (Sec. 601, 602, 604, Civil Rights Act of 1964; 78 Stat. 252, 253, 42 U.S.C. 2000d, 2000d–1. 2000d–3) [29 FR 16298, Dec. 4, 1964, as amended at 38 FR 17979, 17982, July 5, 1973]

§ 80.4 ASSURANCES REQUIRED

(a) *General.* (1) Every application for Federal financial assistance to carry out a program to which this part applies, except a program to which paragraph (b) of this section applies, and every application for Federal financial assistance to provide a facility shall, as a condition to its approval and the extension of any Federal financial assistance pursuant to the application, contain or be accompanied by an assurance that the program will be conducted or the facility operated in compliance with all requirements imposed by or pursuant to this part. In the case of an application for Federal financial assistance to provide real property or structures thereon, the assurance shall obligate the recipient, or, in the case of a subsequent transfer, the transferee, of the period during which the real property or structures are used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. In the case of personal property the assurance shall obligate the recipient for the period during which he retains ownership or possession of the property. In all other cases the assurance shall obligate the recipient for the period during which Federal financial assistance is extended pursuant to the application. The responsible Department official shall specify the form of the foregoing assurances for each program, and the extent to which like assurances will be required of subgrantees, contractors and subcontractors, transferees, successors in interest, and other participants in the program. Any such assurance shall include provisions which give the United States a right to seek its judicial enforcement.

(2) Where Federal financial assistance is provided in the form of a transfer of real property or interest therein from the Federal Government the instrument effecting or recording the transfer shall contain a covenant running with the land to assure nondiscrimination for the period during which the real property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. Where no transfer of property is involved but property is improved with Federal financial assistance, the recipient shall agree to include such a covenant to any subsequent transfer of the property. Where the property is obtained from the Federal Government, such covenant may also include a condition coupled with a right to be reserved by the Department to revert title to the property in the event of a breach of the covenant where, in the discretion of the responsible Department official, such a condition and right of reverter is appropriate to the statute under which the real property is obtained and to the nature of the grant and the grantee. In the event a transferee of real property proposes to mortgage or otherwise encumber the real property as security for financing construction of new, or improvement of existing, facilities on such property for the purposes for which the property was transferred, the responsible Department official may agree, upon request of the transferee and if necessary to accomplish such financing, and upon such conditions as he deems appropriate, to forbear the exercise of such right to revert title for so long as the lien of such mortgage or other encumbrance remains effective.

(b) *Continuing State programs.*—Every application by a State or a State agency to carry out a program involving continuing Federal financial assistance to which this regulation applies (including the Federal financial assistance listed in Part 2 of Appendix A) shall as a condition to its approval and the extension of any Federal financial assistance pursuant to the application (1) contain or be accompanied by a statement that the program is (or, in the case of a new program, will be) conducted in compliance with all requirements imposed by or pursuant to this regulation, and (2) provide or be accompanied by provision for such methods of administration for the program as are found by the responsible Department official to give reasonable assurance that the applicant and all recipients of Federal financial assistance under such program will comply with all requirements imposed by or pursuant to this regulation.

(c) *Elementary and secondary schools.*—The requirements of paragraph (a) or (b) of this section with respect to any elementary or secondary school or school system shall be deemed to be satisfied if such school or school system (1) is subject to a final order of a court of the United States for the desegregation of such school or school system, and provides an assurance that it will comply with such order, including any future modification of such order, or (2) submits a plan for the desegregation of such school or school system which the responsible Department official determines is adequate to accomplish the purposes of the Act and this part, at the earliest practicable time, and provides reasonable assurance that it will carry out such plan; in any case of continuing Federal financial assistance the responsible Department official may reserve the right to redetermine, after such period as may be specified by him, the adequacy of the plan to accomplish the purposes of the Act and the regulations in this part. In any case in which a final order of a court of the United States for the desegregation of such school or school system is entered after submission of such a plan, such plan shall be revised to conform to such final order, including any future modification of such order.

(d) *Assurance from institutions.*—(1) In the case of any application for Federal financial assistance to an institution of higher education (including assistance for construction, for research, for special training project, for student loans or for any other purpose), the assurance required by this section shall extend to admission practices and to all other practices relating to the treatment of students.

(2) The assurance required with respect to an institution of higher education, hospital, or any other institution, insofar as the assurance relates to the institution's practices with respect to admission or other treatment of individuals as students, patients, or clients of the institution or to the opportunity to participate in the provision of services or other benefits to such individuals, shall be applicable to the entire institution unless the applicant establishes, to the satisfaction of the responsible Department official, that the institution's prac-

756

tices in the program of the institution for which Federal financial assistance is sought, or the beneficiaries of or participants in such program. If in any such case the assistance sought is for the construction of a facility or part of a facility, the assurance shall in any event extend to the entire facility and to facilities operated in connection therewith.

(Sec. 601, 602, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d, 2000d-1. Sec. 182; 80 Stat. 1209; 42 U.S.C. 2000d-5) [29 FR 16298, Dec. 4, 1964, as amended at 32 FR 14555, Oct. 19, 1967; 38 FR 17980, 17982, July 5, 1975]

§ 80.5 ILLUSTRATIVE APPLICATION

The following examples will illustrate the programs aided by Federal financial assistance of the Department. (In all cases the discrimination prohibited is discrimination on the ground of race, color, or national origin prohibited by Title VI of the Act and this regulation, as a condition of the receipt of Federal assistance).

(a) In Federally assisted programs for the provision of health or welfare services, discrimination in the selection or eligibility of individuals to receive the services, and segregation or other discriminatory practices in the manner of providing them, are prohibited. This prohibition extends to all facilities and services provided by the grantee under the program or, if the grantee is a State, by a political subdivision of the State. It extends also to services purchased or otherwise obtained by the grantee (or political subdivision) from hospitals, nursing homes, schools, and similar institutions for beneficiaries of the program, and to the facilities in which such services are provided, subject, however, to the provisions of § 80.3(e).

(b) In federally-affected area assistance (P.L. 815 and P.L. 874) for construction aid and for general support of the operation of elementary or secondary schools, or in more limited support to such schools such as for the acquisition of equipment, the provision of vocational education, or the provision of guidance and counseling services, discrimination by the recipient school district in any of its elementary or secondary schools in the admission of students, or in the treatment of its students in any aspect of the educational process, is prohibited. In this and the following illustrations the prohibition of discrimination in the treatment of students or other trainees includes the prohibition of discrimination among the students or trainees in the availability or use of any academic, dormitory, eating, recreational, or other facilities of the grantee or other recipient.

(c) In a research, training, demonstration, or other grant to a university for activities to be conducted in a graduate school, discrimination in the admission and treatment of students in the graduate school is prohibited, and the prohibition extends to the entire university unless it satisfies the responsible Department official that practices with respect to other parts or programs of the university will not interfere, directly or indirectly, with fulfillment of the assurance required with respect to the graduate school.

(d) In a training grant to hospital or other nonacademic institution, discrimination is prohibited in the selection of individuals to be trained and in their treatment by the grantee during their training. In a research or demonstration is prohibited with respect to any educational activity and any provision of medical or other services and any financial aid to individuals incident to the program.

(e) In grants to assist in the construction of facilities for the provision of health, educational or welfare services, assurances will be required that services will be provided without discrimination, to the same extent that discrimination would be prohibited as a condition of Federal operating grants for the support of such services. Thus, as a condition of grants for the construction of academic, research, or other facilities at institutions of higher education, assurances will be required that there will be no discrimination in the admission or treatment of students. In case of hospital construction grants the assurance will apply to patients, to interns, residents, student nurses, and other trainees, and to the privilege of physicians, dentists, and other professionally qualified persons to practice in the hospital, and will apply to the entire facility for which, or for a part of which, the grant is made, and to facilities operated in connection therewith. In other construction grants the assurances required will similarly be adapted to the nature of the activities to be conducted in the facilities for construction of which the grants have been authorized by Congress.

(f) Upon transfers of real or personal surplus property for health or educational uses, discrimination is prohibited to the same extent as in the case of grants for the construction of facilities or the provision of equipment for like purposes.

(g) Each applicant for a grant for the construction of educational television facilities is required to provide an assurance that it will, in its broadcast services, give due consideration to the interests of all significant racial or ethnic groups within the population to be served by the applicant.

(h) A recipient may not take action that is calculated to bring about indirectly what this regulation forbids it to accomplish directly. Thus, a State, in selecting or approving projects or sites for the construction of public libraries which will receive Federal financial assistance, may not base its selections or approvals on criteria which have the effect of defeating or of substantially impairing accomplishments of the objectives of the Federal assistance as respects individuals of a particular race, color or national origin.

(i) In some situations, even though past discriminatory practices attributable to a recipient or applicant have been abandoned, the consequences of such practices continue to impede the full availability of a benefit. If the efforts required of the applicant or recipient under § 80.6(d), to provide information as to the availability of the program or activity and the rights of beneficiaries under this regulation, have failed to overcome these consequences, it will become necessary under the requirement stated in (i) of § 80.3(b)(6) for such applicant or recipient to take additional steps to make the benefits fully available to racial and nationality groups previously subject to discrimination. This action might take the form, for example, of special arrangements for obtaining referrals or making selections which will insure that groups previously subjected to discrimination are adequately served.

(j) Even though an applicant or recipient has never used discriminatory policies, the services and benefits of the program or activity it administers may not in fact be equally available to some racial or nationality groups. In such circumstances, an applicant or recipient may properly give special consideration to race, color, or national origin to make the benefits of its program more widely available to such groups, not then being adequately served. For example, where a university is not adequately serving members of a particular racial or nationality group, it may establish special recruitment policies to make its program better known and more readily available to such group, and take other steps to provide that group with more adequate service.

(Sec. 601, 602, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d, 2000d-1) [29 FR 16298, Dec. 4, 1964, as amended at 38 FR 17980, 17982, July 5, 1973]

§ 80.6 COMPLIANCE INFORMATION

(a) *Cooperation and assistance.*—The responsible Department official shall to the fullest extent practicable seek the cooperation of recipients in obtaining compliance with this part and shall provide assistance and guidance to recipients to help them comply voluntarily with this part.

(b) *Compliance reports.*—Each recipient shall keep such records and submit to the responsible Department official or his designee timely, complete and accurate compliance reports at such times, and in such form and containing such information, as the responsible Department official or his designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part. For example, recipients should have available for the Department racial and ethnic data showing the extent to which members of minority groups are beneficiaries of land participants in federally-assisted programs. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations under this part.

(c) *Access to sources of information.*—Each recipient shall permit access by the responsible Department official or his designee during normal business hours to such of its books, records, accounts, and other sources of information, and its facilities as may be pertinent to ascertain compliance with this part. Where any information required of a recipient is in the exclusive possession of any other agency, institution or person and this agency, institution or person shall fail or refuse to furnish this information the recipient shall so certify in its report and shall set forth what efforts it has made to obtain the information. Asserted considerations of privacy or confidentiality may not operate to bar the Department from evaluating or seeking to enforce compliance with this Part. Information of a confidential nature obtained in connection with compliance evaluation or enforcement shall not be disclosed except where necessary in formal enforcement proceedings or where otherwise required by law.

(d) *Information to beneficiaries and participants.*—Each recipient shall make available to participants, beneficiaries, and other interested persons such information regarding the provisions of this regulation and its applicability to the program for which the recipient receives Federal financial assistance, and make such information available to them in such manner, as the responsible Department official finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this regulation.

(Sec. 601, 602, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d, 2000-1) [29 FR 16298, Dec. 4, 1964, as amended at 32 FR 14555, Oct. 19, 1967; 38 FR 17981, 17982, July 5, 1973]

§ 80.7 CONDUCT OF INVESTIGATION

(a) *Periodic compliance reviews.*—The responsible Department official or his designee shall from time to time review the practices of recipients to determine whether they are complying with this part.

(gb) *Complaints.*—Any person who believes himself or any specific class of individuals to be subjected to discrimination prohibited by this part may by himself or by a representative file with the responsible Department official or his designee a written complaint. A complaint must be filed not later than 180 days from the date of the alleged discrimination, unless the time for filing is extended by the responsible Department official or his designee.

(c) *Investigations.*—The responsible Department official or his designee will make a prompt investigation whenever a compliance review, report, complaint, or any other information indicates a possible failure to comply with this part. The investigation should include, where appropriate, a review of the pertinent practices and policies of the recipient, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination as to whether the recipient has failed to comply with this part.

(d) *Resolution of matters.*—(1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, the responsible Department official or his designee will so inform the recipient and the matter will be resolved by informal means whenever possible. If it has been determined that the matter cannot be resolved by informal means, action will be taken as provided for in § 80.8.

(2) If an investigation does not warrant action pursuant to subparagraph (1) of this paragraph the responsible Department official or his designee will so inform the recipient and the complainant, if any, in writing.

(e) *Intimidatory or retaliatory acts prohibited.*—No recipient or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 601 of the Act or this part, or because he has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding or hearing under this part. The identity of complainants shall be kept confidential except to the extent necessary to carry out the purposes of this part, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

(Sec. 601, 602, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d, 2000d-1) [29 FR 16298, Dec. 4, 1964, as amended at 38 FR 17981, 17982, July 5, 1973].

§ 80.8 PROCEDURE FOR EFFECTING COMPLIANCE

(a) *General.*—If there appears to be a failure or threatened failure to comply with this regulation, and if the noncompliance or threatened noncompliance cannot be corrected by informal means, compliance with this part may be effected by the suspension or termination of or refusal to grant or to continue Federal financial assistance or by any other means authorized by law. Such other means may include, but are not limited to, (1) a reference to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law of the United States (including other titles of the Act), or any assurance or other contractual undertaking, and (2) any applicable proceeding under State or local law.

(b) *Noncompliance with § 80.4.*—If an applicant fails or refuses to furnish an assurance required under § 80.4 or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that section Federal financial assistance may be refused in accordance with the procedures of paragraph (c) of this section. The Department shall not be required to provide assistance in such a case during the pendency of the administrative proceedings under such paragraph except that the Department shall continue assistance during the pendency of such proceedings where such assistance is due and payable pursuant to an application therefor approved prior to the effective date of this part.

(c) *Termination of or refusal to grant or to continue Federal financial assistance.*—No order suspending, terminating or refusing to grant or continue Federal financial assistance shall become effective until (1) the responsible Department official has advised the applicant or recipient of his failure to comply and has determined that compliance cannot be secured by voluntary means, (2) there has been an express finding on the record, after opportunity for hearing, of a failure by the applicant or recipient to comply with a requirement imposed by or pursuant to this part, (3) the expiration of 30 days after the Secretary has filed with the committee of the House and the committee of the Senate having legislative jurisdiction over the program involved, a full written report of the circumstances and the grounds for such action. Any action to suspend or terminate or to refuse to grant or to continue Federal financial assistance shall be limited to the particular political entity, or part thereof, or other applicant or recipient as to whom such a finding has been made and shall be limited in its effect to the particular program, or part thereof, in which such noncompliance has been so found.

(d) *Other means authorized by law.*—No action to effect compliance by any other means authorized by law shall be taken until (1) the responsible Department official has determined that compliance cannot be secured by voluntary means, (2) the recipient or other person has been notified of its failure to comply and of the action to be taken to effect compliance, and (3) the expiration of at least 10 days from the mailing of such notice to the recipient or other person. During this period of at least 10 days additional efforts shall be made to persuade the recipient or other person to comply with the regulation and to take such corrective action as may be appropriate.

(Sec. 601, 602, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d, 2000d-1. Sec. 182, 80 Stat. 1209; 42 U.S.C. 2000-5) [29 FR 16298, Dec. 4, 1964, as amended at 32 FR 14556, Oct. 19, 1967; 38 FR 17982, July 5, 1973]

§ 80.9 HEARINGS

(a) *Opportunity for hearing.*—Whenever an opportunity for a hearing is required by § 80.8(c), reasonable notice shall be given by registered or certified mail, return receipt requested, to the affected applicant or recipient. This notice shall advise the applicant or recipient of the action proposed to be taken, the specific provision under which the proposed action against it is to be taken, and the matters of fact or law asserted as the basis for this action, and either (1) fix a date not less than 20 days after the date of such notice within which the applicant or recipient may request of the responsible Department official that the matter be scheduled for hearing or (2) advise the applicant or recipient that the matter in question has been set down for hearing at a stated place and time. The time and place so fixed shall be reasonable and shall be subject to change for cause. The complainant, if any, shall be advised of the time and place of the hearing. An applicant or recipient may waive a hearing and submit written information and argument for the record. The failure of an applicant or recipient to request a hearing for which a date has been set shall be deemed to be a waiver of the right to a hearing under section 602 of the Act and § 80.8(c) of this regulation and consent to the making of a decision on the basis of such information as may be filed as the record.

(b) *Time and place of hearing.*—Hearings shall be held at the offices of the Department in Washington, D.C., at a time fixed by the responsible Department official unless he determines that the convenience of the applicant or recipient or of the Department requires that another place be selected. Hearings shall be held before a hearing examiner designated in accordance with 5 U.S.C. 3105 and 3344 (section 11 of the Administrative Procedure Act).

(c) *Right to counsel.*—In all proceedings under this section, the applicant or recipient and the Department shall have the right to be represented by counsel.

(d) *Procedures, evidence, and record.*—(1) The hearing, decision, and any administrative review thereof shall be conducted in conformity with sections 5-8 of the Administrative Procedure Act, and in accordance with such rules of procedure as are proper (and not inconsistent with this section) relating to the conduct of the hearing, giving of notices subsequent to those provided for in paragraph (a) of this section, taking of testimony, exhibits, arguments and briefs, requests for findings, and other related matters. Both the Department and the applicant or recipient shall be entitled to introduce all relevant evidence on the issues as stated in the notice for hearing or as determined by the officer conducting the hearing at the outset of or during the hearing. Any person (other than a Government employee considered to be on official business) who, having been invited or requested to appear and testify as a witness on the Government's behalf, attends at a time and place scheduled for a hearing provided for by this part, may be reimbursed for his travel and actual expenses of attendance in an amount not to exceed the amount payable under the standardized travel regulations to a Government employee traveling on official business.

(2) Technical rules of evidence shall not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the officer conducting the hearing. The hearing officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(e) *Consolidated or Joint Hearings.*—In cases in which the same or related facts are asserted to constitute noncompliance with this regulation with respect to two or more programs to which this part applies, or noncompliance with this part and the regulations of one or more other Federal departments or agencies issued under Title VI of the Act, the responsible Department official may, by agreement with such other departments or agencies where applicable, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of rules of procedures not inconsistent with this part. Final decisions in such cases, insofar as this regulation is concerned, shall be made in accordance with § 80.10.

(Sec. 602, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d-1) [29 FR 16298, Dec. 4, 1964, as amended at 32 FR 14555 Oct. 19, 1967; 38 FR 17981, 17982, July 5, 1973]

§ 80.10 DECISIONS AND NOTICES

(a) *Decisions by hearing examiners.* After a hearing is held by a hearing examiner such hearing examiner shall either make an initial decision, if so authorized, or certify the entire record including his recommended findings and proposed decision to the reviewing authority for a final decision, and a copy of such initial decision or certification shall be mailed to the applicant or recipient and to the complainant, if any. Where the initial decision referred to in this paragraph or in paragraph (c) of this section is made by the hearing examiner, the applicant or recipient or the counsel for the Department may, within the period provided for in the rules of procedure issued by the responsible Department official, file with the reviewing authority exceptions to the initial decision, with his reasons therefor. Upon the filing of such exceptions the reviewing authority shall review the initial decision and issue its own decision thereof including the reasons therefor. In the absence of exceptions the initial decision shall constitute the final decision, subject to the provisions of paragraph (e) of this section.

(b) *Decisions on record or review by the reviewing authority:* Whenever a record is certified to the reviewing authority for decision or it reviews the decision of a hearing examiner pursuant to paragraph (a) or (c) of this section, the applicant or recipient shall be given reasonable opportunity to file with it briefs or other written statements of its contentions, and a copy of the final decision of the reviewing authority shall be given in writing to the applicant or recipient and to the complainant, if any.

(c) *Decisions on record where a hearing is waived.*—Whenever a hearing is waived pursuant to § 80.9(a) the reviewing authority shall make its final decision on the record or refer the matter to a hearing examiner for an initial decision to be made on the record. A copy of such decision shall be given in writing to the applicant or recipient, and to the complainant, if any.

(d) *Rulings required.*—Each decision of a hearing examiner or reviewing authority shall set forth a ruling on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to this part with which it is found that the applicant or recipient has failed to comply.

(e) *Review in certain cases by the Secretary.*—If the Secretary has not personally made the final decision referred to in paragraphs (a), (b), or (c) of this section, a recipient or applicant or the counsel for the Department may request the Secretary to review a decision of the Reviewing Authority in accordance with rules of procedure issued by the responsible Department official. Such review is not a matter of right and shall be granted only where the Secretary determines there are special and important reasons therefor. The Secretary may grant or deny such request, in whole or in part. He may also review a decision upon his own motion in accordance with rules of procedure issued by the responsible Department official. In the absence of a review under this paragraph, a final decision referred to in paragraphs (a), (b), (c) of this section shall become the final decision of the Department when the Secretary transmits it as such to Congressional committees with the report required under section 602 of the Act. Failure of an applicant or recipient to file an exception with the Reviewing Authority or to request review under this paragraph shall not be deemed a failure to exhaust administrative remedies for the purpose of obtaining judicial review.

(f) *Content of orders.*—The final decision may provide for suspension or termination of, or refusal to grant or continue Federal financial assistance, in whole or in part, to which this regulation applies, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of the Act and this regulation, including provisions designed to assure that no Federal financial assistance to which this regulation applies will thereafter be extended under such law or laws to the applicant or recipient determined by such decision to be in default in its performance of an assurance given by it pursuant to this regulation, or to have otherwise failed to comply with this regulation unless and until it corrects its noncompliance and satisfies the responsible Department official that it will fully comply with this regulation.

(g) *Post-termination proceedings.*—(1) An applicant or recipient adversely affected by an order issued under paragraph (f) of this section shall be restored to full eligibility to receive Federal financial assistance if it satisfies the terms and conditions of that order for such eligibility or if it brings itself into compliance with this part and provides reasonble assurance that it will fully comply with this part. An elementary or secondary school or school system which is unable to file an assurance of compliance with § 80.3 shall be restored to full eligibility to receive Federal financial assistance, if it files a court order or a plan for desegregation which meets the requirements of § 80.4(c), and provides reasonable assurance that it will comply with the court order or plan.

(2) Any applicant or recipient adversely affected by an order entered pursuant to paragraph (f) of this section may at any time request the responsible Department official to restore fully its eligibility to receive Federal financial assistance. Any such request shall be supported by information showing that the applicant or recipient has met the requirements of subparagraph (1) of this paragraph. If the responsible Department official determines that those requirements have been satisfied, he shall restore such eligibility.

(3) If the responsible Department official denies any such request, the applicant or recipient may submit a request for a hearing in writing, specifying why it believes such official to have been in error. It shall thereupon be given an expeditious hearing, with a decision on the record, in accordance with rules of procedure issued by the responsible Department official. The applicant or recipient will be restored to such eligibility if it proves at such hearng that it satisfied the requirements of subparagraph (1) of this paragraph. While proceedings under this paragraph are pending, the sanctions imposed by the order issued under paragraph (f) of this section shall remain in effect.

(Sec. 602, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d-1) [29 FR 16298, Dec. 4, 1964, as amended at 32 FR 14555, Oct. 19, 1967; 38 FR 17981, 17982, July 5, 1973]

§ 80.11 JUDICIAL REVIEW

Action taken pursuant to section 602 of the Act is subject to judicial review as provided in section 603 of the Act.

(Sec. 603, 78 Stat. 253; 42 U.S.C. 2000d-2) [29 F.R. 16298, Dec. 4, 1964, as amended at 82 F.R. 14555, Oct. 19, 1967]

§ 80.12 EFFECT ON OTHER REGULATIONS, FORMS AND INSTRUCTIONS

(a) *Effect on other regulations.*—All regulations, orders, or like directions heretofore issued by any officer of the Department which impose requirements designed to prohibit any discrimination against individuals on the ground of race, color, or national origin under any program to which this regulation applies, and which authorize the suspension or termination of or refusal to grant or to continue Federal financial assistance to any applicant for or recipient of assistance for failure to comply with such requirements, are hereby superseded to the extent that such discrimination is prohibited by this regulation, except that nothing in this regulation shall be deemed to relieve any person of any obligation assumed or imposed under any such superseded regulation, order, instruction, or like direction prior to the effective date of this regulation. Nothing in this regulation, however, shall be deemed to supersede any of the following (including future amendments thereof): (1) The "Standards for a Merit System of Personnel Administration," issued jointly by the Secretaries of Defense, of Health, Education and Welfare, and of Labor, 45 CFR Part 70; (2) Executive Order 11063 and regulations issued thereunder, or any other regulations or instructions, insofar as such Order, regulations, or instructions prohibit discrimination on the ground of race, color, or national origin in any program or situation to which this regulation is inapplicable, or prohibit discrimination on any other ground; or (3) requirements for Emergency School Assistance as published in 35 FR 13442 and codified as 45 CFR Part 181.

(b) *Forms and instructions.*—The responsible Department official shall issue and promptly make available to interested persons forms and detailed instructions and procedures for effectuating this part.

(c) *Supervision and coordination.*—The responsible Department official may from time to time assign to officials of the Department, or to officials of other departments or agencies of the Government with the consent of such departments or agencies, responsibilities in connection with the effectuation of the purposes of Title VI of the Act and this regulation (other than responsibility for review as provided in § 80.10(e)), including the achievements of effective coordination and maximum uniformity within the Department and within the Executive Branch of the Government in the application of Title VI and this regulation to similar programs and in similar situations. Any action taken, determination made, or requirement imposed by an official of another Department or Agency acting pursuant to an assignment of responsibility under this subsection shall have the same effect as though such action had been taken by the responsible official of this Department.

(Sec. 602, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d-1) [29 FR 16298, Dec. 4, 1964, as amended at 32 FR 14555, Oct. 19, 1967; 38 FR 17981, 17982, July 5, 1973]

§ 80.13 DEFINITIONS

As used in this part—

(a) The term "Department" means the Department of Health, Education, and Welfare, and includes each of its operating agencies and other organizational units.

(b) The term "Secretary" means the Secretary of Health, Education, and Welfare.

(c) The term "responsible Department official" means the Secretary or to the extent of any delegation by the Secretary of authority to act in his stead under any one or more provisions of this part, any person or persons to whom the Secretary has heretofore delegated, or to whom the Secretary may hereafter delegate such authority.

(d) The term "reviewing authority" means the Secretary, or any person or persons (including a board or other body specially created for that purpose and also including the responsible Department official) acting pursuant to authority delegated by the Secretary to carry out responsibilities under § 80.10 (a)-(d).

(e) The term "United States" means the States of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and the territories and possessions of the United States, and the term "State" means any one of the foregoing.

(f) The term "Federal financial assistance" includes (1) grants and loans of Federal funds, (2) the grant or donation of Federal property and interests in property, (3) the detail of Federal personnel, (4) the sale and lease of, and the permission to use (on other than a casual or transient basis), Federal property or any interest in such property without consideration or at a nominal consideration, or at a consideration which is reduced for the purpose of assisting the recipient, or in recognition of the public interest to be served by such sale or lease to the recipient, and (5) any Federal agreement, arrangement, or other contract which has as one of its purposes the provision of assistance.

(g) The term "program" includes any program, project, or activity for the provision of services, financial aid, or other benefits to individuals (including education or training, health, welfare, rehabilitation, housing, or other services, whether provided through employees of the recipient of Federal financial assistance or provided by others through contracts or other arrangements with the recipient, and including work opportunities and cash or loan or other assistance to individuals), or for the provision of facilities for furnishing services, financial aid or other benefits to individuals. The services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any services, financial aid, or other benefits provided with the aid of Federal financial assistance or with the aid of any non-Federal funds, property, or other resources required to be expended or made available for the program to meet matching requirements or other conditions which must be met in order to receive the Federal financial assistance, and to include any services, financial aid, or other benefits provided in or through a facility provided with the aid of Federal financial assistance or such non-Federal resources.

(h) The term "facility" includes all or any portion of structures, equipment, or other real or personal property or interests therein, and the provision of facilities includes the construction, expansion, renovation, remodeling, alteration or acquisition of facilities.

(i) The term "recipient" means any State, political subdivision of any State, or instrumentality of any State or political subdivision, any public or private agency, institution, or organization, or other entity, or any individual, in any State, to whom Federal financial assistance is extended, directly or through another recipient, for any program, including any successor, assign, or transferee thereof, but such term does not include any ultimate beneficiary under any such program.

(j) The term "primary recipient" means any recipient which is authorized or required to extend Federal financial assistance to another recipient for the purpose of carrying out a program.

(k) The term "applicant" means one who submits an application, request, or plan required to be approved by a Department official, or by a primary recipient, as a condition to eligibility for Federal financial assistance, and the term "application" means such an application, request, or pain.

(Sec. 602, Civil Rights Act of 1964; 78 Stat. 252; 42 U.S.C. 2000d-1) [29 FR 16298, Dec. 4, 1964, as amended at 32 FR 14555, Oct. 19, 1967; 38 FR 17982, July 5, 1973]

APPENDIX A

FEDERAL FINANCIAL ASSISTANCE TO WHICH THESE REGULATIONS APPLY

Part 1. Assistance other than for State-Administered Continuing Programs

1. Loans for acquisition of equipment for academic subjects, and for minor remodeling (20 U.S.C. 445).

2. Construction of facilities for institutions of higher education (20 U.S.C. 701-758).

3. School Construction in federally-affected and in major disaster areas (20 U.S.C. 631-647).

4. Construction of educational broadcast facilities (47 U.S.C. 390-399).

5. Loan service of captioned films and educational media; research on, and production and distribution of, educational media for the handicapped, and training of persons in the use of such media for the handicapped (20 U.S.C. 1452).

6. Demonstration residential vocational education schools (20 U.S.C. 1321).

7. Research and related activities in education of handicapped children (20 U.S.C. 1441).

8. Educational research, dissemination and demonstration projects; research training; and construction under the Cooperation Research Act (20 U.S.C. 331-332(b)).

9. Research in teaching modern foreign languages (20 U.S.C. 512).

10. Training projects for manpower development and training (42 U.S.C. 2601, 2602, 2610a-2610c).

11. Research and training projects in Vocational Education (20 U.S.C. 1281 (a), 1282-1284).

12. Allowances to institutions training NDEA graduate fellows (20 U.S.C. 461–465).

13. Grants for training in librarianship (20 U.S.C. 1031–1063).

14. Grants for training personnel for the education of handicapped children (20 U.S.C. 1431).

15. Allowances for institutions training teachers and related educational personnel in elementary and secondary education, or post-secondary vocational education (20 U.S.C. 1111–1118).

16. Recruitment, enrollment, training and assignment of Teacher Corps personnel (20 U.S.C. 1101–1107a).

17. Operation and maintenance of schools in Federally-affected and in major disaster areas (20 U.S.C. 236–241; 241–1; 242–244).

18. Grants or contracts for the operation of training institutes for elementary or secondary school personnel to deal with special education problems occasioned by desegregation (42 U.S.C. 2000c–3).

19. Grants for in-service training of teachers and other schools personnel and employment of specialists in desegregation problems (42 U.S.C. 2000c–4).

20. Higher education students loan program (Title II, National Defense Education Act, 20 U.S.C. 421–429).

21. Educational Opportunity grants and assistance for State and private programs of low-interest insured loans and State loans to students in institutions of higher education (Title IV, Higher Education Act of 1965, 20 U.S.C. 1061–1087).

22. Grants and contracts for the conduct of Talent Search, Upward Bound, and Special Services Programs (20 U.S.C. 1068).

23. Land-grant college aid (7 U.S.C. 301–308; 321–326; 328–331).

24. Language and area centers (Title VI, National Defense Education Act, 20 U.S.C. 511).

25. American Printing House for the Blind (20 U.S.C. 101–105).

26. Future Farmers of America (36 U.S.C. 271–391) and similar programs.

27. Science clubs (P.L. 85–875, 20 U.S.C. 2, note).

28. Howard University (20 U.S.C. 121–129).

29. Gallaudet College (31 D.C. Code, Ch. 10).

30. Establishment and operation of a model secondary school for the deaf by Gallaudet College (31 D.C. Code 1051–1053; 80 Stat. 1027–1028).

31. Faculty development programs, workshops and institutes (20 U.S.C. 1131–1132).

32. National Technical Institute for the Deaf (20 U.S.C. 681–685).

33. Institutes and other programs for training educational personnel (Parts D, E & F, Title V, Higher Education Act of 1965) (20 U.S.C. 1119–1119c–4).

34. Grants and contracts for research and demonstration projects in librarianship (20 U.S.C. 1034).

35. Acquisition of college library resources (20 U.S.C. 1021–1028).

36. Grants for strengthening developing institutions of higher education (20 U.S.C. 1051–1054); National Fellowships for teaching at developing institutions (20 U.S.C. 1055), and grants to retired professors to teach at developing institutions (20 U.S.C. 1056).

37. College Work-Study Program (42 U.S.C. 2751–2757).

38. Financial assistance for acquisition of higher education equipment, and minor remodeling (20 U.S.C. 1121–1129).

39. Grants for special experimental demonstration projects and teacher training in adult education (20 U.S.C. 1208).

40. Grant programs for advanced and undergraduate international studies (20 U.S.C. 1171–1176; 22 U.S.C. 2452(b)).

41. Experimental projects for developing State leadership or establishment of special services (20 U.S.C. 865).

42. Grants to and arrangements with State educational and other agencies to meet special educational needs of migratory children of migratory agricultural workers (20 U.S.C. 241e(c)).

43. Grants by the Commissioner of Education to local educational agencies for supplementary educational centers and services; guidance, counseling, and testing (20 U.S.C. 841–844; 844b).

44. Resource centers for improvement of education of handicapped children (20 U.S.C. 1421) and centers and services for deaf-blind children (20 U.S.C. 1422).

45. Recruitment of personnel and dissemination of information on education of handicapped (20 U.S.C. 1433).

46. Grants for research and demonstrations relating to physical education or recreation for handicapped children (20 U.S.C. 1442) and training of physical educators and recreation personnel (20 U.S.C. 1434).

47. Dropout prevention projects (20 U.S.C. 887).

48. Bilingual education programs (20 U.S.C. 880b–880b–6).

49. Grants to agencies and organizations for Cuban refugees (22) U.S.C. 2601(b)(4).

50. Grants and contracts for special programs for children with specific learning disabilities including research and related activities, training and operating model centers (20 U.S.C. 1461).

51. Curriculum development in vocational and technical education (20 U.S.C. 1391).

52. Establishment, including construction, and operation of a National Center on Educational Media and Materials for the Handicapped (20 U.S.C. 1453).

53. Grants and contracts for the development and operation of experimental preschool and early education programs for handicapped (20 U.S.C. 1423).

54. Grants to public or private non-profit agencies to carry on the Follow Through Program in kindergarten and elementary schools (42 U.S.C. 2809(a)(2)).

55. Grants for programs of cooperative education and grants and contracts for training and research in cooperative education (20 U.S.C. 1087a–1087c).

56. Grants and contracts to encourage the sharing of college facilities and resources (network for knowledge) (20 U.S.C. 1133–1133b).

57. Grants, contracts, and fellowships to improve programs preparing persons for public service and to attract students to public service (20 U.S.C. 1134–1134b).

58. Grants for the improvement of graduate programs (20 U.S.C. 1135–1135c).

59. Contracts for expanding and improving law school clinical experience programs (20 U.S.C. 1136–1136b).

60. Exemplary programs and projects in vocational education (20 U.S.C. 1301–1305).

61. Grants to reduce borrowing cost for construction of residential schools and dormitories (20 U.S.C. 1323).

62. Project grants and contracts for research and demonstration relating to new or improved health facilities and services (sec. 304, PHS Act, 42 U.S.C. 242b).

63. Grants for construction or modernization of emergency rooms of general hospitals (Title VI, Part C, PHS Act, 42 U.S.C. 291j).

64. Institutional and special projects grants to schools of nursing (sections 805–808, PHS Act, 42 U.S.C. 296d–296g).

65. Grants for construction and initial staffing of facilities for prevention and treatment of alcoholism (sec. 241–2, Community Mental Health Centers Act (42 U.S.C. 2688 f and g).

66. Grants for construction and initial staffing of specialized facilities for the treatment of alcoholics requiring care in such facilities (sec. 243, Community Mental Health Centers Act, 42 U.S.C. 2688h).

67. Special project grants for training programs, evaluation of existing treatment programs, and conduct of significant programs relating to treatment of alcoholics (sec. 246, Community Mental Health Centers Act, 42 U.S.C. 2688j–1).

68. Grants for construction and initial staff of treatment facilities for narcotic addicts (sec. 251, Community Mental Health Centers Act, 42 U.S.C. 2688m).

69. Special project grants for training programs, evaluation of existing treatment programs, and conduct of significant programs relating to treatment of narcotics addicts (sec. 252, Community Mental Health Centers Act, 42 U.S.C. 2688n–1).

70. Grants for consultation services for Community Mental Health Centers, alcoholism prevention and treatment facilities for narcotic addicts, and facilities for mental health of children (sec. 264, Community Mental Health Centers Act, 42 U.S.C. 2688r).

71. Grants for construction and initial staff of facilities for mental health of children (sec. 271, Community Mental Health Centers Act, 42 U.S.C. 2688u).

72. Special project grants for training programs and evaluation of existing treatment program relating to mental health of children (sec. 272, Community Mental Health Centers Act, 42 U.S.C. 2688x).

73. Grants and loans for construction and modernization of medical facilities in the District of Columbia (P.L. 90–457; 82 Stat. 631–3).

74. Teaching facilities for nurse training (secs. 801–804, Public Health Service Act, 42 U.S.C. 296–296c).

75. Teaching facilities for allied health professions personnel (sec. 791, Public Health Service Act, 42 U.S.C. 295h).

76. Mental retardation research facilities (Title VI, Part D, Public Health Service Act, 42 U.S.C. 295–395e).

77. George Washington University Hospital construction (76 Stat. 83, P.L. 87–460, May 31, 1962).

78. Research projects, including conferences, communication activities and primate or other center grants (sec. 301, 303, 304, and 308, Public Health Service Act, 42 U.S.C. 241, 242a, 242b, and 242f).

79. General research support (sec. 301(d), Public Health Service Act, 42 U.S.C. 241).

80. Mental health demonstrations and administrative studies (sec. 303(a)(2), Public Health Service Act, 42 U.S.C. 242a).

81. Migratory workers health services (sec. 310, Public Health Service Act, 42 U.S.C. 242h).

82. Immunization programs (sec. 317, Public Health Service Act, 42 U.S.C. 247b).

83. Health research training projects and fellowship grants (secs. 301, 433, Public Health Service Act, 42 U.S.C. 242, 289c).

84. Categorical (heart, cancer, etc.) grants for training, traineeship or fellowships (secs. 303, 433, etc., Public Health Service Act, 42 U.S.C. 242a, 289c, etc.).

85. Advanced professional nurse traineeships (sec. 821, Public Health Service Act, 42 U.S.C. 297).

86. Department projects under Appalachian Regional Development Act (40 U.S.C. App. A).

87. Grants to institutions for traineeships for professional public health personnel (sec. 306, Public Health Service Act, 42 U.S.C. 242d).

88. Grants for graduates or specialized training in public health (sec. 309, Public Health Service Act, 42 U.S.C. 242g).

89. Health professions school student loan program (Title VII, Part C, Public Health Service Act, 52 U.S.C. 294–294(k)).

90. Grants for provision in schools of public health of training, consultation and technical assistance in the field of public health and in the administration of state or local public health programs (sec. 309(c)), Public Health Service Act, 42 U.S.C. 242(g)(c)).

91. Project grants for training, studies, or demonstrations looking metropolitan area, or other local area plans for health services (sec. 314(c), Public Health Service Act, 42 U.S.C. 246(c)).

92. Project grants for training, studies, or demonstrations looking toward the development of improved comprehensive health planning (sec. 314(c), Public Health Service Act, 42 U.S.C. 246(c)).

93. Project grants for health services development (sec. 314(e), Public Health Service Act, 42 U.S.C. 246(e)).

94. Institutional and special grants to health professions schools (Title VII, Part E, Public Health Service Act, 42 U.S.C. 295f–295f–4.

95. Improvement grants to centers for allied health professions (sec. 792, Public Health Service Act, 42 U.S.C. 295h–1).

96. Scholarship grants to health professions schools (Title VII, Part F, Public Health Service Act, 42 U.S.C. 295h–1).

97. Scholarship grants to schools of nursing (Title VIII, Part D, Public Health Service Act, 42 U.S.C. 298c–298c–6).

98. Traineeships for advanced training of allied health professions personnel (sec. 793, Public Health Service Act, 42 U.S.C. 295h–2).

99. Contracts to encourage full utilization of nursing educational talent (sec. 868, Public Health Service Act, 42 U.S.C. 298c–7).

100. Grants to community mental health centers for the compensation of professional and technical personnel for the initial operation of new centers or of new services in centers (Community Mental Health Centers Act, Part B, 42 U.S.C. 2688–2688d).

101. Grants for the planning, construction, equipment and operation of multi-county demonstration health projects in the Appalachian region (sec. 202 of Appalachian Regional Development Act, P.L. 89-4, as amended, P.L. 90-103 40 U.S.C. App. 202).

102. Education, research, training, and demonstrations in the fields of heart disease, cancer, stroke and related diseases (secs. 900-10, Public Health Service Act, 42 U.S.C. 299a-j).

103. Assistance to medical libraries (secs. 390-399, Public Health Service Act, 42 U.S.C. 280b-280b-9).

104. Nursing student loans (secs. 822-828, Public Health Service Act, 42 U.S.C. 297a-g).

105. Hawaii leprosy payments (sec. 331, Public Health Service Act, 42 U.S.C. 255).

106. Heart disease laboratories and related facilities for patient care (sec. 412(d), Public Health Service Act, 42 U.S.C. 287a(d)).

107. Grants for construction of hospitals serving Indians (P.L. 85-151, 42 U.S.C. 2005).

108. Indian Sanitation Facilities (P.L. 86-121, 42 U.S.C. 2004a).

109. Research projects relating to maternal and child health services and crippled children's services (42 U.S.C. 712).

110. Maternal and child health special project grants to State agencies and institutions of higher learning (42 U.S.C. 703(2)).

111. Maternity and infant care and family planning services; special project grants to local health agencies and other organizations (42 U.S.C. 708).

112. Special project grants to State agencies and institutions of higher learning for crippled children's services (42 U.S.C. 704(2)).

113. Special project grants for health of school and preschool children (42 U.S.C. 709) and for dental health of children (42 U.S.C. 710).

114. Grants to institutions of higher learning for training personnel for health care and related services for mothers and children (42 U.S.C. 711).

115. Grants and contracts for the conduct of research, experiments, or demonstrations relating to the development, utilization, quality, organization, and financing of services, facilities, and resources of hospitals long-term care facilities, or other medical facilities (sec. 304, Public Health Service Act, as amended by P.L. 90-174, 42 U.S.C. 242b).

116. Health research facilities (Title VII, Part A, Public Health Service Act, 42 U.S.C. 292-292j).

117. Teaching facilities for health professions personnel (Title VII, Part B, Public Health Service Act, 42 U.S.C. 293-293h).

118. Project grants and contracts for research, development, training, and studies in the field of electronic product radiation (sec. 356, Public Health Service Act, 42 U.S.C. 263d).

119. Project grants and contracts for research, studies, demonstrations, training, and education relating to coal mine health (sec. 501, Federal Coal Mine Health and Safety Act of 1969, Public Law 91-173).

120. Surplus real and related personal property disposal (40 U.S.C. 484(k)).

121. Supplementary medical insurance benefits for the aged (Title XXIII, Part B, Social Security Act, 42 U.S.C. 1395j-1395w).

122. Issuance of rent-free permits for vending stands, credit unions, employee associations, etc. (20 U.S.C. 107-107f; 45 C.F.R. Part 20; sec. 25, 12 U.S.C. 1770).

123. Grants for special vocational rehabilitation projects (29 U.S.C. 34(a)(1)).

124. Experimental, pilot or demonstration projects to promote the objectives of Title I, X, XIV, XVI, or XIX or Part A of Title IV of the Social Security Act (42 U.S.C. 1315).

125. Social Security and welfare cooperative research or demonstration projects (42 U.S.C. 1310).

126. Child welfare research, training, or demonstration projects (42 U.S.C. 626).

127. Training projects (Title VI, Older Americans Act, 42 U.S.C. 3041-3042).

128. Grants for expansion of vocational rehabilitation services (29 U.S.C. 34(a)(2)(A)).

129. Grants for construction of rehabilitation facilities (29 U.S.C. 41a(a)–(e)) and for initial staffing of rehabilitation facilities (29 U.S.C. 41a(f)).

130. Project development grants for rehabilitation facilities (29 U.S.C. 41a(g)(2)).

131. Rehabilitation Facility improvement grants (29 U.S.C. 41b(b)).

132. Agreement for the establishment and operation of a national center for deaf-blind youths and adults (29 U.S.C. 42a).

133. Project grants for services for migratory agricultural workers (29 U.S.C. 42b).

134. Grants for initial staffing of community mental retardation facilities (42 U.S.C. 2678–2678d).

135. Grants for training welfare personnel and for expansion and development of undergraduate and graduate social work programs (42 U.S.C. 906, 908).

136. Research and development projects concerning older Americans (42 U.S.C. 3031–3032).

137. Grants to States for training of nursing home administrators (42 U.S.C. 1396g(e)).

138. Contracts or jointly financed. cooperative arrangements with industry (29 U.S.C. 34(a)(2)(B)).

139. Project grants for new careers in rehabilitation (29 U.S.C. 34(a)(2)(C)).

140. Children of low-income families (20 U.S.C. 241a–241m).

141. Grants for training (29 U.S.C. 37(a)(2)).

142. Grants for projects for training services (29 U.S.C. 41b(a)).

143. Grants for comprehensive juvenile delinquency planning (42 U.S.C. 3811).

144. Grants for project planning in juvenile delinquency (42 U.S.C. 3812).

145. Grants for juvenile delinquency rehabilitative services projects (42 U.S.C. 3822, 3842).

146. Grants for juvenile delinquency preventive service projects (42 U.S.C. 3861).

147. Grants for training projects in juvenile delinquency fields (42 U.S.C. 3861).

148. Grants for development of improved techniques and practices in juvenile delinquency services (42 U.S.C. 3871).

149. Grants for technical assistance in juvenile delinquency services (42 U.S.C. 3872).

150. Grants for State technical assistance to local units in juvenile delinquency services (42 U.S.C. 3873).

151. Grants for public service centers projects (42 U.S.C. 2744).

152. Grants to public or private non-profit agencies to carry on the Project Headstart Program (42 U.S.C. 2809(a)(1)).

153. Project grants for new careers for the handicapped (29 U.S.C. 34(a)(2)(D)).

154. Construction, demonstration, and training grants for university-affiliated facilities for persons with developmental disabilities (42 U.S.C. 2661–2666).

Part 2. Continuing Assistance to State Administered Programs

1. Grants to States for public library services and construction, interlibrary cooperation and specialized State library services for certain State institutions and the physically handicapped (20 U.S.C. 851–855).

2. Grants to States for strengthening instruction in academic subjects (20 U.S.C. 441–444).

3. Grants to States for vocational education (20 U.S.C. 1241–1264).

4. Arrangements with State education agencies for training under the Manpower Development and Training Act (42 U.S.C. 2601–2602, 2610a).

5. Grants to States to assist in the elementary and secondary education of children of low-income families (20 U.S.C. 241a–241m).

6. Grants to States to provide for school library resources, textbooks and other instructional materials for pupils and teachers in elementary and secondary schools (20 U.S.C. 821–827).

7. Grants to States to strengthen State departments of education (20 U.S.C. 861–870).

8. Grants to States for community service programs (20 U.S.C. 1001–1011).

9. Grants to States for adult basic education and related research, teacher training and special projects (20 U.S.C. 1201–1211).

10. Grants to State educational agencies for supplementary educational centers and services, and guidance, counseling and testing (20 U.S.C. 841–847).

11. Grants to States for research and training in vocational education (20 U.S.C. 1281(b)).

12. Grants to States for exemplary programs and projects in vocational education (20 U.S.C. 1301–1305).

13. Grants to States for residential vocational education schools (20 U.S.C. 1321).

14. Grants to States for consumer and homemaking education (20 U.S.C. 1341).

15. Grants to States for cooperative vocational education program (20 U.S.C. 1351–1355).

16. Grants to States for vocational work-study programs (20 U.S.C. 1371–1374).

17. Grants to States to attract and qualify teachers to meet critical teaching shortages (20 U.S.C. 1108–1110c).

18. Grants to States for education of handicapped children (20 U.S.C. 1411–1414).

19. Grants for administration of State plans and for comprehensive planning to determine construction needs of institutions of higher education (20 U.S.C. 715(b)).

20. Grants to States for comprehensive health planning (sec. 314(a), Public Health Service Act, 42 U.S.C. 246(a)).

21. Grants to States for establishing and maintaining adequate public health services (sec. 314(d), Public Heath Service Act, 42 U.S.C. 246(d)).

22. Grants, loans, and loan guarantees with interest subsidies for hospital and medical facilities (Title VI, Public Health Service Act, 42 U.S.C. 291 et seq.).

23. Grants to States for community mental health centers construction (Community Mental Health Centers Act, Part A, 42 U.S.C. 2681–2687).

24. Cost of rehabilitation services (Title II, Social Security Act sec. 222(d); 42 U.S.C. 422(d)).

25. Surplus personal property disposal donations for health and educational purposes through State agencies (40 U.S.C. 484(j)).

26. Grants for State and community programs on aging (Title III, Older Americans Act, 42 U.S.C. 3021–3025).

27. Grants to States for panning, provision of services, and construction and operation of facilities for persons with developmental disabilities (42 U.S.C. 2670–2677c).

28. Grants to States for vocational rehabilitation services (29 U.S.C. 32): for innovation of vocational rehabilitation services (29 U.S.C. 33); and for rehabilitation facilities planning (29 U.S.C. 41a(g)(1)).

29. Designation of State licensing agency for blind operators of vending stands (20 U.S.C. 107–107f).

30. Grants to States for old-age assistance (42 U.S.C. 301 et seq.); aid to families with dependent children (42 U.S.C. 601 et seq.); child-welfare services 42 U.S.C. 620 et seq.); aid to the blind (42 U.S.C. 1201 et seq.); aid to the permanently and totally disabled (42 U.S.C. 1351 et seq.); aid to the aged, blind, or disabled (42 U.S.C. 1381 et seq.); medical assistance (42 U.S.C. 1396 et seq.).

31. Grants to States for maternal and child health and crippled children's services (42 U.S.C. 701–707); for special projects for maternal and infant care (42 U.S.C. 708).

32. Grants to States for juvenile delinquency preventive and rehabilitative services (42 U.S.C. 3841).

PART 81—PRACTICE AND PROCEDURE FOR HEARINGS UNDER PART 80 OF THIS TITLE

Subpart A—General Information

Sec.
81.1 Scope of rules.
81.2 Records to be public.
81.3 Use of gender and number.
81.4 Suspension of rules.

Subpart B—Appearance and Practice

81.11 Appearance.
81.12 Authority for representation.
81.13 Exclusion from hearing for misconduct.

Subpart C—Parties

81.21 Parties; General Counsel deemed a party.
81.22 Amici curiae.
81.23 Complainants not parties.

Subpart D—Form, Execution, Service and Filling of Documents

81.31 Form of documents to be filed.
81.32 Signature of documents.
81.33 Filing and service.
81.34 Service—how made.
81.35 Date of service.
81.36 Certificate of service.

Subpart E—Time

81.41 Computation.
81.42 Extension of time or postponement.
81.43 Reduction of time to file documents.
81.83 Official notice.
81.84 Public document items.
81.85 Offer of proof.
81.86 Appeals from ruling of presiding officer.

Subpart F—Proceedings Prior to Hearing

81.51 Notice of hearing or opportunity for hearing.
81.52 Answer to notice.
81.53 Amendment of notice or answer.
81.54 Request for hearing.
81.55 Consolidation.
81.56 Motions.
81.57 Responses to motions and petitions.
81.58 Disposition of motions and petitions.

Subpart G—Responsibilities and Duties of Presiding Officer

81.61 Who presides.
81.62 Designation of hearing examiner.
81.63 Authority of presiding officer.

Subpart H—Hearing Procedures

81.71 Statement of position and trial briefs.
81.72 Evidentiary purpose.
81.73 Testimony.
81.74 Exhibits.
81.75 Affidavits.
81.76 Depositions.
81.77 Admissions as to facts and documents.
81.78 Evidence.
81.79 Cross-examination.
81.80 Unsponsored written material.
81.81 Objections.
81.82 Exceptions to rulings of presiding officer unnecessary.
81.106 Review by the Secretary.
81.107 Service on amici curiae.

Subpart I—The Record

81.91 Official transcript.
81.92 Record for decision.

Subpart J—Posthearing Procedures, Decisions

81.101 Posthearing briefs: proposed findings and conclusions.
81.102 Decisions following hearing.
81.103 Exceptions to initial or recommended decisions.
81.104 Final decisions.
81.105 Oral argument to the reviewing authority.

Subpart K—Judicial Standards of Practice

81.111 Conduct.
81.112 Improper conduct.
81.113 Ex parte communications.
81.114 Expeditious treatment.
81.115 Matters not prohibited.
81.116 Filing of ex parte communications

Subpart L—Posttermination Proceeding

81.121 Posttermination proceedings.

Subpart M—Definitions

81.131 Definitions.

Authority: The provisions of this Part 81 are issued under 5 U.S.C.. 301 and 45 CFR 80.9(d).

Source: The provisions of this Part 81 appear at 32 F.R. 15156, Nov. 2, 1967, unless otherwise noted.

Subpart A—General Information

§ 81.1 SCOPE OF RULES

The rules of procedure in this part supplement §§ 80.9 and 80.10 of this subtitle and govern the practice for hearings, decisions, and administrative review Title VI of the Civil Rights Act of 1964 (sec. 602, 78 Stat. 252) and Part 80 of conducted by the Department of Health, Education, and Welfare, pursuant to this subtitle.

§ 81.2 RECORDS TO BE PUBLIC

All pleadings, correspondence, exhibits, transcripts of testimony, exceptions, briefs, decisions, and other documents filed in the docket in any proceeding may be inspected and copied in the office of the Civil Rights hearing clerk. Inquiries may be made at the Central Information Center, Department of Health, Education, and Welfare, 330 Independence Avenue SW., Washington, D.C. 20201.

§ 81.3 USE OF GENDER AND NUMBER

As used in this part, words importing the singular number may extend and be applied to several persons or things, and vice versa. Words importing the masculine gender may be applied to females or organizations.

§ 81.4 SUSPENSION OF RULES

Upon notice to all parties, the reviewing authority or the presiding officer, with respect to matters pending before them, may modify or waive any rule in this part upon determination that no party will be unduly prejudiced and the ends of justice will thereby be served.

Subpart B—Appearance and Practice

§ 81.11 APPEARANCE

A party may appear in person or by counsel and participate fully in any proceeding. A State agency or a corporation may appear by any of its officers or by any employee it authorizes to appear on its behalf. Counsel must be members in good standing of the bar of a State, Territory, or possession of the United States or of the District of Columbia or the Commonwealth of Puerto Rico.

§ 81.12 AUTHORITY FOR REPRESENTATION

Any individual acting in a representative capacity in any proceeding may be required to show his authority to act in such capacity.

§ 81.13 EXCLUSION FROM HEARING FOR MISCONDUCT

Disrespectful, disorderly, or contumacious language or contemptuous conduct, refusal to comply with directions, or continued use of dilatory tactics by any person at any hearing before a presiding officer shall constitute grounds for immediate exclusion of such person from the hearing by the presiding officer.

Subpart C—Parties

§ 81.21 PARTIES: GENERAL COUNSEL DEEMED A PARTY

(a) The term party shall include an applicant or recipient or other person to whom a notice of hearing or opportunity for hearing has been mailed naming him as respondent.

(b) The General Counsel of the Department of Health, Education, and Welfare shall be deemed a party to all proceedings.

§ 81.22 AMICI CURIAE

(a) Any interested person or organization may file a petition to participate in a proceeding as an amicus curiae. Such petition shall be filed prior to the prehearing conference, or if none is held, before the commencement of the hearing, unless the petitioner shows good cause for filing the petition later. The presiding officer may grant the petition if he finds that the petitioner has a legitimate interest in the proceedings, that such participation will not unduly delay the outcome, and may contribute materially to the proper disposition thereof. An amicus curiae is not a party and may not introduce evidence at a hearing.

(b) An amicus curiae may submit a statement of position to the presiding officer prior to the beginning of a hearing, and shall serve a copy on each party. The amicus curiae may submit a brief on each occasion a decision is to be made or a prior decision is subject to review. His brief shall be filed and served on each party within the time limits applicable to the party whose position he deems himself to support; or if he does not deem himself to support the position of any party, within the longest time limit applicable to any party at that particular stage of the proceedings.

(c) When all parties have completed their initial examination of a witness, any amicus curiae may request the presiding officer to propound specific questions to the witness. The presiding officer, in his discretion, may grant any such request if he believes the proposed additional testimony may assist materially in elucidating factual matters at issue between the parties and will not expand the issues.

§ 81.23 COMPLAINANTS NOT PARTIES

A person submitting a complaint pursuant to § 80.7(b) of this title is not a party to the proceedings governed by this part, but may petition, after proceedings are initiated, to become an amicus curiae.

Subpart D—Form, Execution, Service, and Filing of Documents

§ 81.31 FORM OF DOCUMENTS TO BE FILED

Documents to be filed under the rules in this part shall be dated, the original signed in ink, shall show the docket description and title of the proceeding, and shall show the title, if any, and address of the signatory. Copies need not be signed but the name of the person signing the original shall be reproduced. Documents shall be legible and shall not be more than 8½ inches wide and 12 inches long.

§ 81.32 SIGNATURE OF DOCUMENTS

The signature of a party, authorized officer, employee or attorney constitutes a certificate that he has read the document, that to the best of his knowledge, information, and belief there is good ground to support it, and that it is not interposed for delay. If a document is not signed or is signed with intent to defeat the purpose of this section, it may be stricken as sham and false and the proceeding may proceed as though the document had not been filed. Similar action may be taken if scandalous or indecent matter is inserted.

§ 81.33 FILING AND SERVICE

All notices by a Department official, and all written motions, requests, petitions, memoranda, pleadings, exceptions, briefs, decisions, and correspondence to a Department official from a party, or vice versa, relating to a proceeding after its commencement shall be filed and served on all parties. Parties shall supply the original and two copies of documents submitted for filing. Filings shall be made with the Civil Rights hearing clerk at the address stated in the notice of hearing or notice of opportunity for hearing, during regular business hours. Regular business hours are every Monday through Friday (legal holidays in the District of Columbia excepted) from 9 a.m. to 5:30 p.m., eastern standard or daylight saving time, whichever is effective in the District of Columbia at the time. Originals only of exhibits and transcripts of testimony need be filed. For requirements of service on amici curiae, see § 81.107.

§ 81.34 SERVICE—HOW MADE

Service shall be made by personal delivery of one copy to each person to be served or by mailing by first-class mail, properly addressed with postage prepaid. When a party or amicus has appeared by attorney or other representative, service upon such attorney or representative will be deemed service upon the party or amicus. Documents served by mail preferably should be mailed in sufficient time to reach the addressee by the date on which the original is due to be filed, and should be air mailed if the addressee is more than 300 miles distant.

§ 81.35 DATE OF SERVICE

The date of service shall be the day when the matter is deposited in the U.S. mail or is delivered in person, except that the date of service of the initial notice of hearing or opportunity for hearing shall be the date of its delivery, or of its attempted delivery if refused.

§ 81.36 CERTIFICATE OF SERVICE

The original of every document filed and required to be served upon parties to a proceeding shall be endorsed with a certificate of service signed by the party making service or by his attorney or representative, stating that such service has been made, the date of service, and the manner of service, whether by mail or personal delivery.

Subpart E—Time

§ 81.41 COMPUTATION

In computing any period of time under the rules in this part or in an order issued hereunder, the time begins with the day following the act, event, or default, and includes the last day of the period, unless it is a Saturday, Sunday, or legal holiday observed in the District of Columbia, in which event it includes the next following business day. When the period of time prescribed or allowed is less than 7 days, intermediate Saturdays, Sundays, and legal holidays shall be excluded from the computation.

§ 81.42 EXTENSION OF TIME OR POSTPONEMENT

Requests for extension of time should be served on all parties and should set forth the reasons for the application. Applications may be granted upon a showing of good cause by the applicant. From the designation of a presiding officer until the issuance of his decision such requests should be addressed to him. Answers to such requests are permitted, if made promptly.

§ 81.43 REDUCTION OF TIME TO FILE DOCUMENTS

For good cause, the reviewing authority or the presiding officer, with respect to matters pending before them, may reduce any time limit prescribed by the rules in this part, except as provided by law or in Part 80 of this title.

Subpart F—Proceedings Prior to Hearing

§ 81.51 NOTICE OF HEARING OR OPPORTUNITY FOR HEARING

Proceedings are commenced by mailing a notice of hearing or opportunity for hearing to an affected applicant or recipient, pursuant to § 80.9 of this title.

§ 81.52 ANSWER TO NOTICE

The respondent, applicant or recipient may file an answer to the notice within 20 days after service thereof. Answers shall admit or deny specifically and in detail each allegation of the notice, unless the respondent party is without knowledge, in which case his answer should so state, and the statement will be deemed a denial. Allegations of fact in the notice not denied or controverted by answer shall be deemed admitted. Matters alleged as affirmative defenses shall be separately stated and numbered. Failure of the respondent to file an answer within the 20-day period following service of the notice may be deemed an admission of all matters of fact recited in the notice.

§ 81.53 AMENDMENT OF NOTICE OR ANSWER

The General Counsel may amend the notice of hearing or opportunity for hearing once as a matter of course before an answer thereto is served, and each

774

respondent may amend his answer once as a matter of course not later than 10 days before the date fixed for hearing but in no event later than 20 days from the date of service of his original answer. Otherwise a notice or answer may be amended only by leave of the presiding officer. A respondent shall file his answer to an amended notice within the time remaining for filing the answer to the original notice or within 10 days after service of the amended notice, whichever period may be the longer, unless the presiding officer otherwise orders.

§ 81.54 REQUEST FOR HEARING

Within 20 days after service of a notice of opportunity for hearing which does not fix a date for hearing the respondent, either in his answer or in a separate document, may request a hearing. Failure of the respondent to request a hearing shall be deemed a waiver of the right to a hearing and to constitute his consent to the making of a decision on the basis of such information as is available.

§ 81.55 CONSOLIDATION

The responsible Department official may provide for proceedings in the Department to be joined or consolidated for hearing with proceedings in other Federal departments or agencies, by agreement with such other departments or agencies. All parties to any proceeding consolidated subsequently to service of the notice of hearing or opportunity for hearing shall be promptly served with notice of such consolidation.

§ 81.56 MOTIONS

Motions and petitions shall state the relief sought, the authority relied upon, and the facts alleged. If made before or after the hearing, these matters shall be in writing. If made at the hearing, they may be stated orally; but the presiding officer may require that they be reduced to writing and filed and served on all parties in the same manner as a formal motion. Motions, answers, and replies shall be addressed to the presiding officer, if the case is pending before him. A repetitious motion will not be entertained.

§ 81.57 RESPONSES TO MOTIONS AND PETITIONS

Within 8 days after a written motion or petition is served, or such other period as the reviewing authority or the presiding officer may fix, any party may file a response thereto. An immediate oral response may be made to an oral motion.

§ 81.58 DISPOSITION OF MOTIONS AND PETITIONS

The reviewing authority or the presiding officer may not sustain or grant a written motion or petition prior to expiration of the time for filing responses thereto, but may overrule or deny such motion or petition without awaiting response: *Provided, however,* That prehearing conferences, hearings and decisions need not be delayed pending disposition of motions or petitions. Oral motions and petitions may be ruled on immediately. Motions and petitions submitted to the reviewing authority or the presiding officer, respectively, and not disposed of in separate rulings or in their respective decisions will be deemed denied. Oral arguments shall not be held on written motions or petitions unless the presiding officer in his discretion expressly so orders.

Subpart G—Responsibilities and Duties of Presiding Officer

§ 81.61 WHO PRESIDES

A hearing examiner assigned under 5 U.S.C. 3105 or 3344 (formerly sec. 11 of the Administrative Procedure Act) shall preside over the taking of evidence in any hearing to which these rules of procedure apply.

§ 81.62 DESIGNATION OF HEARING EXAMINER

The designation of the hearing examiner as presiding officer shall be in writing, and shall specify whether the examiner is to make an initial decision or to certify the entire record including his recommended findings and proposed decision to the reviewing authority, and may also fix the time and place of hearing. A copy of such order shall be served on all parties. After service of an order designating a hearing examiner to preside, and until such examiner makes his decision, motions and petitions shall be submitted to him. In the case of the death, illness, disqualification or unavailability of the designated hearing examiner, another hearing examiner may be designated to take his place.

§ 81.63 AUTHORITY OF PRESIDING OFFICER

The presiding officer shall have the duty to conduct a fair hearing, to take all necessary action to avoid delay, and to maintain order. He shall have all powers necessary to these ends, including (but not limited to) the power to:

(a) Arrange and issue notice of the date, time, and place of hearings, or, upon due notice to the parties, to change the date, time, and place of hearings previously set.

(b) Hold conferences to settle, simplify, or fix the issues in a proceeding, or to consider other matters that may aid in the expeditious disposition of the proceeding.

(c) Require parties and amici curiae to state their position with respect to the various issues in the proceeding.

(d) Administer oaths and affirmations.

(e) Rule on motions, and other procedural items on matters pending before him.

(f) Regulate the course of the hearing and conduct of counsel therein.

(g) Examine witnesses and direct witnesses to testify.

(h) Receive, rule on, exclude or limit evidence

(i) Fix the time for filing motions, petitions, briefs, or other items in matters pending before him.

(j) Issue initial or recommended decisions.

(k) Take any action authorized by the rules in this part or in conformance with the provisions of 5 U.S.C. 551–559 (the Administrative Procedure Act).

Subpart H—Hearing Procedure

§ 81.71 STATEMENT OF POSITION AND TRIAL BRIEFS

The presiding officer may require parties and amici curiae to file written statements of position prior to the beginning of a hearing. The presiding officer may also require the parties to submit trial briefs.

§ 81.72 EVIDENTIARY PURPOSE

(a) The hearing is directed to receiving factual evidence and expert opinion testimony related to the issues in the proceeding. Argument will not be received in evidence; rather it should be presented in statements, memoranda, or briefs, as determined by the presiding officer. Brief opening statements, which shall be limited to statement of the party's position and what he intends to prove, may be made at hearings.

(b) Hearings for the reception of evidence will be held only in cases where issues of fact must be resolved in order to determine whether the respondent has failed to comply with one or more applicable requirements of Part 80 of this title. In any case where it appears from the respondent's answer to the notice of hearing or opportunity for hearing, from his failure timely to answer, or from his admissions or stipulations in the record, that there are no matters of material fact in dispute, the reviewing authority or presiding officer may enter an order so finding, vacating the hearing date if one has been set, and fixing the time for filing briefs under § 81.101. Thereafter the proceedings shall go to conclusion in accordance with Subpart J of this part. The presiding officer may allow an appeal from such order in accordance with § 81.86.

§ 81.73 TESTIMONY

Testimony shall be given orally under oath or affirmation by witnesses at the hearing; but the presiding officer, in his discretion, may require or permit that the direct testimony of any witness be prepared in writing and served on all parties in advance of the hearing. Such testimony may be adopted by the witness at the hearing, and filed as part of the record thereof. Unless authorized by the presiding officer, witnesses will not be permitted to read prepared testimony into the record. Except as provided in §§ 81.75 and 81.76, witnesses shall be available at the hearing for cross-examination.

§ 81.74 EXHIBITS

Proposed exhibits shall be exchanged at the prehearing conference, or otherwise prior to the hearing if the presiding officer so requires. Proposed exhibits not so exchanged may be denied admission as evidence. The authenticity of all proposed exhibits exchanged prior to hearing will be deemed admitted unless written objection thereto is filed prior to the hearing or unless good cause is shown at the hearing for failure to file such written objection.

§ 81.75 AFFIDAVITS

An affidavit is not inadmissible as such. Unless the presiding officer fixes other time periods affidavits shall be filed and served on the parties not later than 15 days prior to the hearings; and not less than 7 days prior to hearing a party may file and serve written objection to any affidavit on the ground that he believes it necessary to test the truth of assertions therein at hearing. In such event the assertions objected to will not be received in evidence unless the affiant is made available for cross-examination, or the presiding officer determines that cross-examination is not necessary for the full and true disclosure of facts referred to in such assertions. Notwithstanding any objection, however, affidavits may be considered in the case of any respondent who waives a hearing.

§ 81.76 DEPOSITIONS

Upon such terms as may be just, for the convenience of the parties or of the Department, the presiding officer may authorize or direct the testimony of any witness to be taken by deposition.

§ 81.77 ADMISSIONS AS TO FACTS AND DOCUMENTS

Not later than 15 days prior to the scheduled date of the hearing except for good cause shown, or prior to such earlier date as the presiding officer may order, any party may serve upon an opposing party a written request for the admission of the genuineness and authenticity of any relevant documents described in and exhibited with the request, or for the admission of the truth of any relevant matters of fact stated in the request. Each of the matters of which an admission is requested shall be deemed admitted, unless within a period designated in the request (not less than 10 days after service thereof, or within such further time as the presiding officer or the reviewing authority if no presiding officer has yet been designated may allow upon motion and notice) the party to whom the request is directed serves upon the requesting party a sworn statement either denying specifically the matters of which an admission is requested or setting forth in detail the reasons why he cannot truthfully either admit or deny such matters. Copies of requests for admission and answers thereto shall be served on all parties. Any admission made by a party to such request is only for the purposes of the pending proceeding for the enforcement of any order entered therein, and shall not constitute an admission by him for any other purpose or be used against him in any other proceeding or action.

§ 81.78 EVIDENCE

Irrelevant, immaterial, unreliable, and unduly repetitious evidence will be excluded.

§ 81.79 CROSS-EXAMINATION

A witness may be cross-examined on any matter material to the proceeding without regard to the scope of his direct examination.

§ 81.80 UNSPONSORED WRITTEN MATERIAL

Letters expressing views or urging action and other unsponsored written material regarding matters in issue in a hearing will be placed in the correspondence section of the docket of the proceeding. These data are not deemed part of the evidence or record in the hearing.

§ 81.81 OBJECTIONS

Objections to evidence shall be timely and briefly state the ground relied upon.

§ 81.82 EXCEPTIONS TO RULINGS OF PRESIDING OFFICER UNNECESSARY

Exceptions to rulings of the presiding officer are unnecessary. It is sufficient that a party, at the time the ruling of the presiding officer is sought, makes known the action which he desires the presiding officer to take, or his objection to an action taken, and his grounds therefor.

§ 81.83 OFFICIAL NOTICE

Where official notice is taken or is to be taken of a material fact not appearing in the evidence of record, any party, on timely request, shall be afforded an opportunity to show the contrary.

§ 81.84 PUBLIC DOCUMENT ITEMS

Whenever there is offered (in whole or in part) a public document, such as an official report, decision, opinion, or published scientific or economic statistical data issued by any of the executive departments (or their subdivisions), legislative agencies or committees, or administrative agencies of the Federal Government (including Government-owned corporations), or a similar document issued by a State or its agencies, and such document (or part thereof) has been shown by the offeror to be reasonably available to the public, such document need not be produced or marked for identification, but may be offered for official notice, as a public document item by specifying the document or relevant part thereof.

§ 81.85 OFFER OF PROOF

An offer of proof made in connection with an objection taken to any ruling of the presiding officer rejecting or excluding proffered oral testimony shall consist of a statement of the substance of the evidence which counsel contends would be adduced by such testimony; and, if the excluded evidence consists of evidence in documentary or written form or of reference to documents or records, a copy of such evidence shall be marked for identification and shall accompany the record as the offer of proof.

§ 81.86 APPEALS FROM RULING OF PRESIDING OFFICER

Rulings of the presiding officer may not be appealed to the reviewing authority prior to his consideration of the entire proceeding except with the consent of the presiding officer and where he certifies on the record or in writing that the allowance of an interlocutory appeal is clearly necessary to prevent exceptional delay, expense, or prejudice to any party, or substantial detriment to the public interest. If an appeal is allowed, any party may file a brief with the reviewing authority within such period as the presiding officer directs. No oral argument will be heard unless the reviewing authority directs otherwise. At any time prior to submission of the proceeding to it for decision, the reviewing authority may direct the presiding officer to certify any question or the entire record to it for decision. Where the entire record is so certified, the presiding officer shall recommend a decision.

Subpart I—The Record

§ 81.91 OFFICIAL TRANSCRIPT

The Department will designate the official reporter for all hearings. The official transcripts of testimony taken, together with any exhibits, briefs, or memoranda of law filed therewith shall be filed with the Department. Transcripts of testimony in hearings may be obtained from the official reporter by the parties and the public at rates not to exceed the maximum rates fixed by the contract between the Department and the reporter. Upon notice to all parties, the presiding officer may authorize corrections to the transcript which involve matters of substance.

§ 81.92 RECORD FOR DECISION

The transcript of testimony, exhibits, and all papers and requests filed in the proceedings, except the correspondence section of the docket, including rulings and any recommended or initial decision shall constitute the exclusive record for decision.

Subpart J—Posthearing Procedures, Decisions

§ 81.101 POSTHEARING BRIEFS: PROPOSED FINDINGS AND CONCLUSION

(a) The presiding officer shall fix the time for filing posthearing briefs, which may contain proposed findings of fact and conclusions of law, and, if permitted, reply briefs.

(b) Briefs should include a summary of the evidence relied upon together with references to exhibit numbers and pages of the transcript, with citations of the authorities relied upon.

§ 81.102 DECISIONS FOLLOWING HEARING

When the time for submission of posthearing briefs has expired, the presiding officer shall certify the entire record, including his recommended findings and proposed decision, to the responsible Department official; or if so authorized he shall make an initial decision. A copy of the recommended findings and proposed decision, or of the initial decision, shall be served upon all parties, and amici, if any.

§ 81.103 EXCEPTIONS TO INITIAL OR RECOMMENDED DECISIONS

Within 20 days after the mailing of an initial or recommended decision, any party may file exceptions to the decision, stating reasons therefor, with the reviewing authority. Any other party may file a response thereto within 30 days after the mailing of the decision. Upon the filing of such exceptions, the reviewing authority shall review the decision and issue its own decision thereon.

§ 81.104 FINAL DECISIONS

(a) Where the hearing is conducted by a hearing examiner who makes an initial decision, if no exceptions thereto are filed within the 20-day period specified in § 81.103, such decision shall become the final decision of the Department, and shall constitute "final agency action" within the meaning of 5 U.S.C. 704 (formerly section 10(c) of the Administrative Procedure Act), subject to the provisions of § 81.106.

(b) Where the hearing is conducted by a hearing examiner who makes a recommended decision, or upon the filing of exceptions to a hearing examiner's decision, the reviewing authority shall review the recommended or initial decision and shall issue its own decision thereon, which shall become the final decision of the Department, and shall constitute "final agency action" within the meaning of 5 U.S.C. 704 (formerly section 10(c) of the Administrative Procedure Act) subject to the provisions of § 81.106.

(c) All final decisions shall be promptly served on all parties, and amici, if any.

§ 81.105 ORAL ARGUMENT TO THE REVIEWING AUTHORITY

(a) If any party desires to argue a case orally on exceptions or replies to exceptions to an initial or recommended decision, he shall make such request in writing. The reviewing authority may grant or deny such requests in its discretion. If granted, it will serve notice of oral argument on all parties. The notice will set forth the order of presentation, the amount of time allotted, and the time and place for argument. The names of persons who will argue should be filed with the Department hearing clerk not later than 7 days before the date set for oral argument.

(b) The purpose of oral argument is to emphasize and clarify the written argument in the briefs. Reading at length from the brief or other texts is not favored. Participants should confine their arguments to points of controlling importance and to points upon which exceptions have been filed. Consolidations of appearances at oral argument by parties taking the same side will permit the parties' interests to be presented more effectively in the time allotted.

(c) Pamphlets, charts, and other written material may be presented at oral argument only if such material is limited to facts already in the record and is served on all parties and filed with the Department hearing clerk at least 7 days before the argument.

§ 81.106 REVIEW BY THE SECRETARY

Within 20 days after an initial decision becomes a final decision pursuant to § 81.104(a) or within 20 days of the mailing of a final decision referred to in

§ 81.104(b), as the case may be, a party may request the Secretary to review the final decision. The Secretary may grant or deny such request, in whole or in part, or serve notice of his intent to review the decision in whole or in part upon his own motion. If the Secretary grants the requested review, or if he serves notice of intent to review upon his own motion, each party to the decision shall have 20 days following notice of the Secretary's proposed action within which to file exceptions to the decision and supporting briefs and memoranda, or briefs and memoranda in support of the decision. Failure of a party to request review under this paragraph shall not be deemed a failure to exhaust administrative remedies for the purpose of obtaining judicial review.

§ 81.107 SERVICE ON AMICI CURIAE

All briefs, exceptions, memoranda, requests, and decisions referred to in this subpart J shall be served upon amici curiae at the same times and in the same manner required for service on parties. Any written statements of position and trial briefs required of parties under § 81.71 shall be served on amici.

Subpart K—Judicial Standards of Practice

§ 81.111 CONDUCT

Parties and their representatives are expected to conduct themselves with honor and dignity and observe judicial standards of practice and ethics in a proceedings. They should not indulge in offensive personalities, unseemly wrangling, or intemperate accusations or characterizations. A representative of any party whether or not a lawyer shall observe the traditional responsibilities of lawyers as officers of the court and use his best efforts to restrain his client from improprieties in connection with this proceeding.

§ 81.112 IMPORT CONDUCT

With respect to any proceeding it is improper for any interested person to attempt to sway the judgment of the reviewing authority by undertaking to bring pressure or influence to bear upon any officer having a responsibility for a decision in the proceeding, or his decisional staff. It is improper that such interested persons or any members of the Department's staff or the presiding officer give statements to communications media, by paid advertisement or otherwise, designed to influence the judgment of any officer having a responsibility for a decision in the proceeding, or his decisional staff. It is improper for any person to solicit communications to any such officer, or his decisional staff, other than proper communications by parties or amici curiae.

§ 81.113 EX PARTE COMMUNICATIONS

Only persons employed by or assigned to work with the reviewing authority who perform no investigative or prosecuting function in connection with a proceeding shall communicate ex parte with the reviewing authority, or the presiding officer, or any employee or person involved in the decisional process in such proceedings with respect to the merits of that or a factually related proceeding. The reviewing authority, the presiding officer or any employee or person involved in the decisional process of a proceeding shall communicate ex parte with respect to the merits of that or a factually related proceeding only with persons employed by or assigned to work with them and who perform no investigative or prosecuting function in connection with the proceeding.

§ 81.114 EXPEDITIOUS TREATMENT

Requests for expeditious treatment of matters pending before the responsible Department official or the presiding officer are deemed communications on the merits, and are improper except when forwarded from parties to a proceeding and served upon all other parties thereto. Such communications should be in the form of a motion.

§ 81.115 MATTERS NOT PROHIBITED

A request for information which merely inquires about the status of a proceeding without discussing issues or expressing points of view is not deemed an ex parte communication. Such requests should be directed to the Civil Rights hearing clerk. Communications with respect to minor procedural matters or inquiries or emergency requests for extensions of time are not deemed ex parte communications prohibited by § 81.113. Where feasible, however, such communications should be by letter with copies to all parties. Ex parte communications between a respondent and the responsible Department official or the Secretary with respect to securing such respondent's voluntary compliance with any requirement of Part 80 of this title are not prohibited.

§ 81.116 FILING OF EX PARTE COMMUNICATIONS

A prohibited communication in writing received by the Secretary, the reviewing authority, or by the presiding officer, shall be made public by placing it in the correspondence file of the docket in the case and will not be considered as part of the record for decision. If the prohibited communication is received orally, a memorandum setting forth its substance shall be made and filed in the correspondence section of the docket in the case. A person referred to in such memorandum may file a comment for inclusion in the docket if he considers the memorandum to be incorrect.

Subpart L—Posttermination Proceedings

§ 81.121 POSTTERMINATION PROCEEDINGS

(a) An applicant or recipient adversely affected by the order terminating, discontinuing, or refusing Federal financial assistance in consequence of proceedings pursuant to this title may request the responsible Department official for an order authorizing payment, or permitting resumption, of Federal financial assistance. Such request shall be in writing and shall affirmatively show that since entry of the order, it has brought its program or activity into compliance with the requirements of the Act, and with the Regulation thereunder, and shall set forth specifically, and in detail, the steps which it has taken to achieve such compliance. If the responsible Department official denies such request the applicant or recipient shall be given an expeditious hearing if it so requests in writing and specifies why it believes the responsible Department official to have been in error. The request for such a hearing shall be addressed to the responsible Department official and shall be made within 30 days after the applicant or recipient is informed that the responsible Department official has refused to authorize payment or permit resumption of Federal financial assistance.

(b) In the event that a hearing shall be requested pursuant to subparagraph (a) of this section, the hearing procedures established by this part shall be applicable to the proceedings, except as otherwise provided in this section.

Subpart M—Definitions

§ 81.131 DEFINITIONS

The definitions contained in § 80.13 of this subtitle apply to this part, unless the context otherwise requires, and the term "reviewing authority" as used herein includes the Secretary of Health, Education, and Welfare, with respect to action by that official under § 81.106.

Transition provisions: (a) The amendments herein shall become effective upon publication in the FEDERAL REGISTER.

(b) These rules shall apply to any proceeding or part thereof to which Part 80 of this title as amended effective October 19, 1967 (published in the FEDERAL REGISTER for Oct. 19, 1967), and as the same may be hereafter amended, applies. In the case of any proceeding or part thereof governed by the provisions of Part 80 as that part existed prior to such amendment, the rules in this Part 81 shall apply as if these amendments were not in effect.

Authority: The provisions of this Part 82 issued under sec. 209(a) (1), (5), and (6) of the Executive Order 11246.

Source: The provisions of this Part 82 appear at 37 F.R. 7323, Apr. 13, 1972, unless otherwise noted.

General Information

§ 82.1 AUTHORITY

These rules of procedure supplement, and are established pursuant to, the provisions of 41 CFR 60–1.26(b).

§ 82.2 SCOPE OF RULES

These rules govern the practice and procedure for proceedings conducted by the Department precedent to the imposition of sanctions under section 209(a) (5) and (6) of Executive Order 11246, for violations of Executive Order 11246, and rules, regulations, and orders thereunder.
[38 FR 997, Jan. 8, 1973]

§ 82.3 WAIVER, MODIFICATION

Upon notice to all parties, the hearing officer, the reviewing authority, or the Secretary may, with respect to matters pending before him (or them, in the case of the reviewing authority), modify or waive any rule herein upon a determination that no party will be prejudiced and that the ends of justice will thereby be served.

§ 82.4 DEFINITIONS

(a) "Department" means the Department of Health, Education, and Welfare.

(b) "Notice" means notice of proposed cancellation, termination, or ineligibility.

(c) "Party" means a respondent; the General Counsel of the Department of Health, Education, and Welfare; and any person or organization participating in a proceeding pursuant to section 6(a) of these rules.

(d) "Respondent" means a person or organization against whom sanctions are proposed because of alleged violations of Executive Order 11246, and rules, regulations, and orders thereunder.

(e) "Reviewing Authority" means the Reviewing Authority (Civil Rights) of the Department of Health, Education, and Welfare.

(f) "Secretary" means Secretary of the Department of Health, Education, and Welfare.

[37 FR 7323, Apr. 13, 1972, as amended at 38 FR 997, Jan. 8, 1973]

Appearance and Practice

§ 82.5 PARTICIPATION BY A PARTY

A party may appear in person, or by counsel, and participate fully, pursuant to the procedures set forth in these rules, in any proceeding held pursuant to these rules.

§ 82.6 PARTICIPATION BY INTERESTED PERSONS

(a)(1) To the extent that proceedings hereunder involve employment of persons covered by a collective bargaining agreement, and compliance may necessitate a revision of such agreement, any labor organization which is a signatory to the agreement shall have the right to participate as a party.

(2) Other persons or organizations shall have the right to participate as parties if the final decision could directly and adversely affect them or the class they represent.

(3) Any person or organization wishing to participate as a party under this paragraph shall file and serve upon the hearing officer and all parties a petition within 14 days after the notice has been filed. Such petition shall concisely state: (i) Petitioner's interest in the proceeding, (ii) who will appear for petitioner, (iii) the issues on which petitioner wishes to partcipate, and (iv) whether petitioner intends to present witnesses.

(4) The hearing officer shall promptly determine whether there are objections to the petition. He shall then determine whether each petitioner has the requisite interest in the proceedings, as defined in subparagraphs (1) and (2) of this paragraph, and shall permit or deny participation accordingly. Where petitions to participate as parties are made by individuals or groups with common interests, the hearing officer may request all such petitioners to designate a single representative, or he may recognize one or more of such petitioners to represent all such petitioners; provided that the representative of a labor organization qualifying to participate under subparagraph (1) of this paragraph must be permitted to participate as a party. The hearing officer shall give each petitioner written notice of the decision on his petition, and shall serve such notice on each party. Notice of denials of party participation shall be served on the reviewing authority. If the petition is denied, he shall briefly state the grounds for denial and shall then treat the petition as a request for participation as amicus curiae.

(5) A person or organization whose petition for party participation is denied may appeal the decision to the reviewing authority within 7 days of receipt of the notice of denial. The reviewing authority will make the final decision to grant or deny the petition within 20 days of the date of receipt of the appeal.

(b) (1) Any other interested person or organization wishing to participate as amicus curiae shall file a petition before the commencement of the hearing. Such petition shall concisely state (i) the petitioner's interest in the hearing, (ii) who will represent the petitioner, and (iii) the issues on which petitioner intends to present argument. The hearing officer shall grant the petition if he finds that the petitioner has a legitimate interest in the proceedings, and that such participation will not unduly delay the outcome and may contribute materially to the proper disposition of the issues. The hearing officer shall give the petitioner written notice of his decision on the petition, and shall serve such notice on each party. If the petition is denied, the hearing officer shall briefly state the grounds for such denial.

(2) An amicus curiae is not a party but may participate as provided in this paragraph. An amicus curiae may present a brief oral statement at the hearing, at the point in the proceeding specified by the hearing officer He may submit written statement at such time as the parties submit briefs and exceptions, and hearing, and shall serve a copy on each party. He may also submit a brief or written statement at such time as the parties submits briefs and exceptions, and shall serve a copy on each party.

[37 FR 7323, Apr. 13, 1972, as amended at 38 FR 997, Jan. 8, 1973]

§ 82.7 MISCONDUCT DURING PROCEEDINGS

Disrespectful, disorderly, or contumacious language or contemptuous conduct, refusal to comply with directions, or continued use of dilatory tactics by any person during any part of proceedings before a hearing officer, the reviewing authority, or the Secretary shall constitute grounds for immediate exclusion of such person from the remainder of the proceedings, or for other actions reasonably determined to prevent the future possibility of the proceedings being interrupted, delayed, or disrupted.

Form and Filing of Documents

§ 82.8 FORM

Documents filed pursuant to a proceeding herein shall be dated, the original signed in ink, shall show the docket description and title of the proceeding, and shall indicate the party or amicus filing, and the title, if any, and address of the signatory. Copies need not be signed, but the name of the person signing the original shall be reproduced.

§ 82.9 FILING, SERVICE

All documents submitted in a proceeding shall be filed, and served on all parties. The original and two copies of each document shall be submitted for filing. Filings shall be made with the hearing clerk at the address stated in the notice, during regular business hours. With respect to exhibits and transcripts of testimony, only originals need be filed.

§ 82.10 SERVICE—HOW MADE

Service shall be made by personal delivery of one copy to each person to be served, or by mailing by first-class mail, properly addressed with postage pre-paid. The notice shall be served upon the last known address of the respondent by registered mail, return receipt requested.

[38 FR 997, Jan. 8, 1973]

§ 82.11 DATE OF SERVICE

The date of filing or of service shall be the day when the matter is deposited in the U.S. mail or is delivered in person.

§ 82.12 CERTIFICATE OF SERVICE

The original of every document filed and required to be served upon parties shall be endorsed with a certificate of service signed by the party or amicus curiae making service or by his attorney or representative, stating the persons upon whom service has been made, date of service, and manner of service.

TIME

§ 82.13 COMPUTATION

In computing any period of time under these rules or in an order issued hereunder, the time begins with the day following the act, event, or default, and includes the last day of the period, unless it is a Saturday, Sunday, or legal holiday observed in the District of Columbia, in which event it includes the next following business day. When the period of time prescribed or allowed is less than 7 days, intermediate Saturdays, Sundays, and legal holidays shall be excluded from the computation.

Prehearing Procedures

§ 82.14 NOTICE OF PROPOSED CANCELLATION, TERMINATION OF INELIGIBILITY

Proceedings are commenced by the mailing of a written notice of proposed cancellation, termination, or ineligibility to the last known address of the respondent by registered mail, return receipt requested. The notice shall contain a concise jurisdictional statement, a short and plain statement of the matters furnishing a basis for the imposition of sanctions, an enumeration of the sanctions being requested, and a citation of the provisions of the order and regulations pursuant to which the requested action may be taken. The notice shall also indicate that respondent may request a hearing on the matters alleged.

[38 FR 997, Jan 8, 1973]

§ 82.15 ANSWER TO NOTICE

(a) Within fourteen (14) days from receipt of the notice, respondent may file with the hearing officer, or if no hearing officer has been designated, with the Reviewing Authority, an answer to the notice and may request a hearing. The request for a hearing shall be included as a separate paragraph of the answer.

(b) The answer shall admit or deny specifically and in detail the matters set forth in each allegation of the notice unless respondent is without knowledge, in which case the answer shall so state, and the statement shall be deemed a denial. Matters alleged as affirmative defenses shall be separately stated and numbered.

(c) If respondent fails to file an answer, request a hearing, or otherwise formally contest the allegations in the notice within the 14-day period following receipt of the notice, the matters alleged in the notice are deemed admitted and respondent's opportunity for hearing is deemed waived. The Director, Office for Civil Rights, may then cancel, suspend or terminate any one or more contracts or subcontracts, or parts thereof, held by respondent, or enter an order declaring such contractor or subcontractor ineligible for further contracts, subcontracts, or extensions or other modification of existing contracts, until the contractor or subcontractor has satisfied the Secretary of Labor that it has established and has established and will carry out personnel and employment policies and practices in compliance with the order.

(d) In response to respondent's request for a hearing, respondent shall be advised by the reviewing authority that a hearing officer has been designated and that the matter has been set down for hearing at a stated time and place. The time and place so fixed shall be reasonable and shall be subject to change for cause.

[38 FR 997, Jan. 8, 1973]

§ 82.16 AMENDMENTS

The Department may amend its notice once as a matter of course before an answer is filed, and respondent may amend its answer once as a matter of course not later than 15 days after it is filed. Other amendments of the notice or of the answer to the notice shall be made only by leave of the hearing officer. An amended notice shall be answered within 10 days of its service, or within the time for filing an answer to the original notice, whichever period is longer, unless the hearing officer orders otherwise.

§ 82.17 MOTIONS

Motions and petitions shall state the relief sought, the authority relied upon, and the facts alleged. If made before or after the hearing itself, these matters shall be in writing. If made at the hearing, they may be stated orally; but the hearing officer may require that they be reduced to writing and filed and served on all parties in the same manner as a formal motion. Within 8 days after a written motion or petition is served, or such other time period as the hearing officer, reviewing authority, or Secretary, may fix, any party may file a response to a motion or petition. An immediate oral response may be made to an oral motion.

§ 82.18 DISPOSITION OF MOTIONS

The hearing officer, reviewing authority, or Secretary, may not grant a written motion or petition prior to expiration of the time for filing responses thereto, but may overrule or deny such motion or petition without awaiting response: *Provided, however,* That prehearing conferences hearings and decisions need not be delayed pending disposition of motions or petitions. Oral motions and petitions may be ruled on immediately.

§ 82.19 DEPOSITIONS

Upon such terms as may be just, for the convenience of the parties, or where the ends of justice will be served, the hearing officer may authorize or direct the testimony of any witness to be taken by deposition. Depositions shall be recorded by the official reporter designated for hearings. The party seeking to take a deposition should serve copies of the application on the parties to the proceeding, who should be given an opportunity, along with the deponent, to notify the hearing officer of any objections to the taking of the deposition.

Designation and Responsibilities of Hearing Officer

§ 82.20 DESIGNATION

Hearings shall be held before a hearing officer designated by the reviewing authority. After service of a notice designating a hearing officer to preside, and until such officer makes his decision, motions and petitions shall be submitted to him. In the case of the death, illness, disqualification, or unavailability of the designated hearing officer, another hearing officer may be designated to take his place. Until such replacement has been designated, all motions and petitions shall be submitted to the reviewing authority.

§ 82.21 AUTHORITY AND RESPONSIBILITIES

The hearing officer shall propose findings and conclusions to the reviewing authority on the basis of the record before him. In order to do so, he shall have the duty to conduct a fair and impartial hearing, to take all necessary action to avoid delay, and to maintain order. He shall have all powers necessary to those ends, including, but not limited to, the power to:

(a) Hold conferences, including prehearing conferences, to settle, simplify, or fix the issues in a proceeding, or to consider other matters that may aid in the expeditious disposition of the proceeding.

(b) Require parties to state their position with respect to the various issues in the proceeding.

(c) Direct the parties to exchange their evidentiary exhibits, witness lists, and a narrative summary of their expected testimony prior to the hearing. Where good cause exists, the parties should be afforded the right at any time to amend, by deletion or supplementation, their evidentiary exhibit and witness lists.

(d) Rule on motions, and other procedural items on matters pending before him.

(e) Regulate the course of the hearing and conduct of counsel therein.

(f) Establish rules for media coverage of the proceedings.

(g) Examine witnesses.

(h) Receive, rule on, exclude, or limit evidence at any stage of the proceeding.

(i) Fix time limits for submission of written documents in matters before him.

(j) Take any action authorized by these rules.

Hearing Procedures

§ 82.22 EVIDENTIARY PURPOSE

The hearing is directed to receiving factual evidence and expert opinion testimony related to the issues in the proceeding. A hearing for the reception of evidence will be held only in case issues of fact must be resolved in order to determine whether respondent has failed to comply with one or more applicable requirements of Executive Order 11246, and rules, regulations, and orders thereunder. In case it appears from respondent's answer to the notice of hearing, from his failure timely to answer, or from his admissions or stipulations, that there are no matters of material fact in dispute, the hearing officer or the reviewing authority may enter an order so finding, vacating the hearing date, and fixing the time for filing briefs under § 82.35. Thereafter the proceedings shall go to conclusion in accordance with §§ 82.35 through 82.43. Within 10 days of its issuance, an order vacating the hearing date may be appealed to the reviewing authority, and the reviewing authority shall affirm, modify, or set aside such order within 28 days thereafter.

[38 FR 998, Jan. 8, 1973]

§ 82.23 EVIDENCE

Irrelevant, immaterial, unreliable, and unduly repetitious evidence will be excluded from the record of a hearing. Hearsay evidence shall not be inadmissible as such.

§ 82.24 TESTIMONY

Testimony shall be given orally by witnesses at the hearing, but may, in the discretion of the hearing officer, be prepared in writing and served on all parties to the hearing. A witness shall be available for cross-examination, and, at the discretion of the hearing officer, may be cross-examined without regard to the scope of direct examination as to any matter which is material to the proceeding.

§ 82.25 EXHIBITS

Proposed exhibits shall be exchanged at a prehearing conference, or otherwise prior to the hearing, if the hearing officer so requires. Proposed exhibits not so exchanged may be denied admission as evidence. The authenticity of all proposed exhibits will be deemed admitted unless written objection thereto is filed, or unless good cause is shown for failure to file such written objection.

§ 82.26 ADMISSIONS AS TO FACTS AND DOCUMENTS

Not later than 15 days prior to the date of the hearing except for good cause shown, or not later than 15 days prior to such earlier date as the hearing officer may order, any party may serve upon an opposing party a written request for the admission of the genuineness and authenticity of any relevant documents described in, and exhibited with, the request, or for the admission of the truth of any relevant matters of fact stated in the request. Each of the matters as to which an admission is requested shall be deemed admitted, unless within a period designated in the request (not less than 10 days after service thereof) the party to whom the request is directed serves upon the requesting party a sworn statement either (a) denying specifically the matters as to which an admission is requested or (b) setting forth in detail the reasons why he cannot truthfully either admit or deny such matters.

§ 82.27 OBJECTIONS

Objections to evidence shall be timely, and shall briefly state the ground relied upon.

§ 82.28 EXCEPTIONS TO RULINGS OF HEARING OFFICER NOT NECESSARY

Exceptions to rulings of the hearing officer are unnecessary. It is sufficient that a party, at the time the ruling of the hearing officer is sought, makes know the action which he desires the hearing officer to take, or his objection to an action taken, and the grounds therefor.

§ 82.29 OFFICIAL NOTICE

Whenever a party offers a public document, or part thereof, in evidence, and such document, or part thereof, has been shown by the offeror to be reasonably available to the public, such document need not be produced or marked for identification, but may be offered for official notice as a public document item by specifying the document or relevant part thereof. Official notice may also be taken of other matters, at the discretion of the hearing officer; provided that where official notice is taken or requested to be taken of a fact not appearing in the evidence of record, any party, on timely request, shall be permitted to show the contrary.

787

§ 82.30 OFFER OF PROOF

An offer of proof made in connection with an objection taken to any ruling of the hearing officer excluding proffered oral testimony shall consist of a statement of the substance of the evidence which counsel contends would be adduced by such testimony; and, if the excluded evidence consists of evidence in written form or consists of reference to documents, a copy of such evidence shall be marked for identification and shall accompany the record as the offer of proof.

§ 82.31 INTERLOCUTORY APPEALS

Except as specifically provided in these rules, appeals shall not be made of any ruling of the hearing officer except following the entire hearing and the hearing officer's recommended findings, conclusions, and decision.

§ 82.32 EX PARTE COMMUNICATIONS

The hearing officer shall not consult any person, or party, on any fact in issue unless upon notice and opportunity for all parties to participate. No employee or agent of the Federal Government engaged in the investigation and prosecution of this case shall participate or advise in the rendering of the recommended or final decision, except as witness or counsel in the proceeding.

The Record

§ 82.33 OFFICIAL TRANSCRIPT

The Department will designate the official reporter for all hearings. The official transcripts of testimony and argument, together with any exhibits, briefs, or memoranda of law filed therewith, shall be filed with the hearing clerk. Transcripts may be obtained from the official reporter by the parties and the public at rates not to exceed the applicable rates fixed by the contract between the Department and the reporter. Upon notice to all parties, the hearing officer may authorize such corrections to the transcript as are necessary to accurately reflect the testimony.

§ 82.34 RECORD FOR DECISION

The transcript of testimony, exhibits, and all papers, documents, and requests filed in the proceedings, except the correspondence section of the docket, including rulings and the recommended findings, conclusions, and decision, shall constitute the record for decision.

Posthearing Procedures

§82.35 PROPOSED FINDINGS OF FACT AND CONCLUSIONS

Within 20 days after receipt of the transcript of the testimony, and such additional time as the hearing officer may allow, each party may file proposed findings of fact and conclusions of law, and a proposed order, together with a supporting brief expressing the reasons for such proposals. Such proposals and briefs shall be filed and served on all parties and *amici curiae*. Reply briefs may be submitted within 10 days after receipt of the initial briefs and proposals, and shall be filed and served in like manner.

§ 82.36 RECOMMENDED DECISION OF HEARING OFFICER

Within 30 days after the time for filing reply briefs or, if the parties elect not to file briefs, within 30 days after the receipt of the hearing transcript, the hearing officer shall recommend findings of fact, conclusions of law, and a decision based on the record for decision. These recommendations shall be certified, together with the record for decision, to the reviewing authority for its decision. The recommended findings, conclusions, and decision of the hearing officer shall be served on all parties and amici curiae to the proceeding.

§ 82.37 REVIEWING AUTHORITY JURISDICTION

Following the issuance of the hearing officer's recommended decision, all motions and petitions in the matter should be addressed to the reviewing authority, which shall have the authority to act on them consistent with these regulations, Executive Order 11246, and rules, regulations, and orders thereunder. Such jurisdiction shall continue until the Secretary is requested to review the reviewing authority's decision, the Secretary decides to review such decision on his own motion, or the decision becomes the decision of the Department, whichever comes first.

§ 82.38 EXCEPTIONS TO RECOMMENDED DECISION

Within 20 days after receipt of the hearing officer's recommended decision, all parties to the proceeding shall have an opportunity to submit to the reviewing authority briefs in support of, or in exception to, the recommended findings, conclusions, and decision of the hearing officer. These briefs may be responded to by other parties, within 10 days of their receipt by such parties. Such briefs or exceptions and reply briefs shall be filed and served on all parties and amici curiae to the proceding.

§ 82.39 ORAL ARGUMENT BEFORE THE REVIEWING AUTHORITY

(a) The reviewing authority shall have discretion, at its own initiative and within the limits described in this section, to direct the parties to argue a case orally. Oral argument shall not be directed, or received, except as necessary to clarify the written arguments in briefs in support or exceptions, and replies to these documents (see § 82.38). The reviewing authority shall, within these limits, define the scope and subject matter of the scope and subject matter of oral argument in each case. Where the reviewing authority directs oral argument, it shall have the discretion to extend, up to 30 days, the time for rendering its decision under § 82.40.

(b) Pamphlets, charts, and other written material may be presented at oral argument only if such material is limited to facts already in the record and is served on all parties and filed with the hearing clerk at least 7 days before the argument.

§ 82.40 REVIEWING AUTHORITY'S DECISION

Within 60 days after the time for filing of reply briefs to support briefs and exception briefs, or 90 days from the date of the hearing officers decision if no briefs are filed, the reviewing authority shall render its own decision. This decision may affirm, modify, or set aside, in whole or in part, the recommended findings, conclusions and decision of the hearing officer and shall be based on the record for decision.

§ 82.41 APPEAL TO SECRETARY

(a) Within 20 days of the date of the reviewing authority's decision, any party to the proceeding may request the Secretary to review that decision. Such review is not a matter of right, and may be granted by the Secretary only where he determines that the decision of the reviewing authority raises significant issues of law or public policy. The Secretary may grant or deny such request in whole or in part. The Secretary shall also have discretion to review any decision of the reviewing authority on his own motion. If the Secretary grants the requested review, or if he serves notice of intent to review upon his own motion, each party to the proceeding shall have 20 days, following notice of the Secretary's decision to review, within which to file briefs in exception to the decision of the reviewing authority, or briefs in support of the reviewing authority's decision. The Secretary shall thereafter render the Department's decision. Failure of a party to request review under this paragraph shall not be deemed a failure to exhaust administrative remedies for the purpose of obtaining judicial review.

(b) After the Secretary has been requested to review a matter under paragraph (a) of this section, or has given notice of his intent to review a matter on his own motion, whichever comes first, all motions and petitions shall be addressed to him. He shall act on them consistent with these regulations, Executive Order 11246, and rules, regulations and orders thereunder. Such jurisdiction shall continue until the Secretary issues the decision of the Department.

§ 82.42 FINAL DECISION

The decision of the reviewing authority shall become the decision of the Department in the event no appeal is made by any party within 20 days after the date of the reviewing authority's decision and the Secretary does not notify the parties within 35 days after the date of the reviewing authority's decision that he will otherwise review the decision.

§ 82.43 APPROVAL OF DEPARTMENT DECISION BY DIRECTOR, OFFICE OF FEDERAL CONTRACT COMPLIANCE

No decision of the Department shall become final without the approval of the Director of the Office of Federal Contract Compliance.

PART 83—NONDISCRIMINATION ON THE BASIS OF SEX IN TRAINING PROGRAMS IN ENTITIES FUNDED UNDER TITLES VII AND VIII OF THE PUBLIC HEALTH SERVICE ACT

§ 83.1 ASSURANCES REQUIRED

No grant, loan guarantee, or interest subsidy payment under titles VII or VIII of the Public Health Service Act shall be made to or for the benefit of any entity, and no contract under titles VII or VIII of the Public Health Service Act shall be made with any entity unless the entity furnishes assurances satisfactory to the Director, Office for Civil Rights, that the entity will not discriminate on the basis of sex in the admission of individuals to its training programs.

(Public Health Service Act sec. 215, 58 Stat. 690, as amended, 42 U.S.C. 216) [37 F.R. 10938, June 1, 1972; 37 F.R. 11577, June 9, 1972]

* * * * * * *

TITLE VII—EQUAL EMPLOYMENT OPPORTUNITY[1]

DEFINITIONS

SEC. 701. For the purposes of this title—

(a) The term "person" includes one or more individuals, *governments, governmental agencies, political subdivisions*, labor unions, partnerships, associations, corporations, legal representatives, mutual companies, joint-stock companies, trusts, unincorporated organizations, trustees, trustees in bankruptcy, or receivers.

(b) The term "employer" means a person engaged in an industry affecting commerce who has *fifteen* or more employees for each working day in each of twenty or more calendar weeks in the current or preceding calendar year, and any agent of such a person, but such term does not include (1) the United States, a corporation wholly owned by the Government of the United States, an Indian tribe, or *any department or agency of the District of Columbia subject by statute to procedures of the competitive service (as defined in section 2102 of title 5 of the United States Code), or* (2) a bona fide private membership club (other than a labor organization) which is exempt from taxation under section 501(c) of the Internal Revenue Code of 1954, *except that during the first year after the date of enactment of the Equal Employment Opportunity Act of 1972*, persons having fewer than *twenty-five* employees (and their agents) shall not be considered *employers*.

(c) The term "employment agency" means any person regularly undertaking with or without compensation to procure employees for an employer or to procure for employees opportunities to work for an employer and includes an agent of such a person.

(d) The term "labor organization" means a labor organization engaged in an industry affecting commerce, and any agent of such an organization, and includes any organization of any kind, any agency, or employee representation committee, group, association, or plan so engaged in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours, or other terms or conditions of employment, and any conference, general committee, joint or system board, or joint council so engaged which is subordinate to a national or international labor organization.

---

[1] Includes 1972 amendments made by P.L. 92-261 printed in italic.

(e) A labor organization shall be deemed to be engaged in an industry affecting commerce if (1) it maintains or operates a hiring hall or hiring office which procures employees for an employer or procures for employees opportunities to work for an employer, or (2) the number of its members (or, where it is a labor organization composed of other labor organizations or their representatives, if the aggregate number of the members of such other labor organization) is (A) *twenty-five* or more during the first year after the *date of enactment of the Equal Employment Opportunity Act of 1972, or (B) fifteen* or more thereafter, and such labor organization—

(1) is the certified representative of employees under the provisions of the National Labor Relations Act, as amended, or the Railway Labor Act, as amended;

(2) although not certified, is a national or international labor organization or a local labor organization recognized or acting as the representative of employees of an employer or employers engaged in an industry affecting commerce; or

(3) has chartered a local labor organization or subsidiary body which is representing or actively seeking to represent employees of employers within the meaning of paragraph (1) or (2); or

(4) has been chartered by a labor organization representing or actively seeking to represent employees within the meaning of paragraph (1) or (2) as the local or subordinate body through which such employees may enjoy membership or become affiliated with such labor organization; or

(5) is a conference, general committee, joint or system board, or joint council subordinate to a national or international labor organization, which includes a labor organization engaged in an industry affecting commerce within the meaning of any of the preceding paragraphs of this subsection.

(f) The term "employee" means an individual employed by an employer, *except that the term 'employee' shall not include any person elected to public office in any State or political subdivision of any State by the qualified voters thereof, or any person chosen by such officer to be on such officer's personal staff, or an appointee on the policymaking level or an immediate adviser with respect to the exercise of the constitutional or legal powers of the office. The exemption set forth in the preceding sentence shall not include employees subject to the civil service laws of a State government, governmental agency or political subdivision.*

(g) The term "commerce" means trade, traffic, commerce, transportation, transmission, or communication among the several States; or between a State and any place outside thereof; or within the District of Columbia, or a possession of the United States; or between points in the same State but through a point outside thereof.

(h) The term "industry affecting commerce" means any activity, business, or industry in commerce or in which a labor dispute would hinder or obstruct commerce or the free flow of commerce and includes any activity or industry "affecting commerce" within the meaning of the Labor-Management Reporting and Disclosure Act of 1959, *and further includes any governmental industry, business, or activity.*

(i) The term "State" includes a State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and Outer Continental Shelf lands defined in the Outer Continental Shelf Lands Act.

(j) *The term "religion" includes all aspects of religious observance and practice, as well as belief, unless an employer demonstrates that he is unable to reasonably accommodate to an employee's or prospective employee's, religious observance or practice without undue hardship on the conduct of the employer's business.*

EXEMPTION

SEC. 702. This title shall not apply to an employer with respect to the employment of aliens outside any State, or to a religious corporation, association, *educational institution*, or society with respect to the employment of individuals of a particular religion to perform work connected with the carrying on by such corporation, association, *educational institution*, or society of its *activities*.

DISCRIMINATION BECAUSE OF RACE, COLOR, RELIGION, SEX, OR NATIONAL ORIGIN

SEC. 703. (a) It shall be an unlawful employment practice for an employer—

(1) to fail or refuse to hire or to discharge any individual, or otherwise to discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual's race, color, religion, sex, or national origin; or

(2) to limit, segregate, or classify his employee *or applicants for employment* in any way which would deprive or tend to deprive any individual of employment opportunities or otherwise adversely affect his status as an employee, because of such individual's race, color, religion, sex, or national origin.

(b) It shall be an unlawful employment practice for an employment agency to fail or refuse to refer for employment, or otherwise to discriminate against, any individual because of his race, color, religion, sex, or national origin, or to classify or refer for employment any individual on the basis of his race, color, religion, sex, or national origin.

(c) It shall be an unlawful employment practice for a labor organization—

(1) to exclude or to expel from its membership, or otherwise to discriminate against, any individual because of his race, color, religion, sex, or national origin;

(2) to limit, segregate, or classify its membership, *or applicants for membership* or to classify or fail or refuse to refer for employment any individual, in any way which would deprive or tend to deprive any individual of employment opportunities, or would limit such employment opportunities or otherwise adversely affect his status as an employee or as an applicant for employment, because of such individual's race, color, religion, sex, or national origin; or

(3) to cause or attempt to cause an employer to discriminate against an individual in violation of this section.

(d) It shall be an unlawful employment practice for any employer, labor organization, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs to discriminate against any individual because of his race, color, religion, sex, or national origin in admission to, or employment in, any program established to provide apprenticeship or other training.

(e) Notwithstanding any other provision of this title, (1) it shall not be an unlawful employment practice for an employer to hire and employ employees, for an employment agency to classify, or refer for employment any individual, for a labor organization to classify its membership or to classify or refer for employment any individual, or for an employer, labor organization, or joint labor-management committee controlling apprenticeship or other training or retraining programs to admit or employ any individual in any such program, on the basis of his religion, sex, or national origin in those certain instances where religion, sex, or national origin is a bona fide occupational qualification reasonably necessary to the normal operation of that particular business or enterprise, and (2) it shall not be an unlawful employment practice for a school, college, university, or other educational institution or institution of learning to hire and employ employees of a particular religion if such school, college, university, or other educational institution or institution of learning is, in whole or in substantial part, owned, supported, controlled, or managed by a particular religion or by a particular religious corporation, association, or society, or if the curriculum of such school, college, university, or other educational institution or institution of learning is directed toward the propagation of a particular religion.

(f) As used in this title, the phrase "unlawful employmnt practice" shall not be deemed to include any action or measure taken by an employer, labor organization, joint labor-management committee, or employment agency with respect to an individual who is a member of the Communist Party of the United States or of any other organization required to register as a Communist-action or Communist-front organization by final order of the Subversion Activities Control Board pursuant to the Subversive Activities Control Act of 1950.

(g) Notwithstanding any other provision of this title, it shall not be an unlawful employment practice for an employer to fail or refuse to hire and employ any individual for any position, for an employer to discharge any individual from any position, or for an employment agency to fail or refuse to refer any individual for employment in any position, or for a labor organization to fail or refuse to refer any individual for employment in any position, if—

(1) the occupancy of such position, or access to the premises in or upon which any part of the duties of such position is performed or is to be performed, is subject to any requirement imposed in the interest of the national security of the United States under any any security program in effect pursuant to or administered under any statute of the United States or any Executive order of the President; and

(2) such individual has not fulfilled or has ceased to fulfill that requirement.

(h) Notwithstanding any other provision of this title, it shall not be an unlawful employment practice for an employer to apply different standards of compensation, or different terms, conditions, or privileges of employment pursuant to a bona fide seniority or merit system, or a system which measures earnings by quantity or quality of production or to employees who work in different locations, provided that such differences are not the result of an intention to discriminate because of race, color, religion, sex, or national origin, nor shall it be an unlawful employment practice for an employer to give and to act upon the results of any professionally developed ability test provided that such test, its administration or action upon the results is not designed, intended or used to discriminate because of race, color, religion, sex or national origin. It shall not be an unlawful employment practice under this title for any employer to differentiate upon the basis of sex in determining the amount of the wages or compensation paid or to be paid to employees of such employer if such differentiation is authorized by the provisions of section 6(d) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 206(d)).

(i) Nothing contained in this title shall apply to any business or enterprise on or near an Indian reservation with respect to any publicly announced employment practice of such business or enterprise under which a preferential treatment is given to any individual because he is an Indian living on or near a reservation.

(j) Nothing contained in this title shall be interpreted to require any employer, employment agency, labor organization, or joint labor-management committee subject to this title to grant preferential treatment to any individual or to any group because of the race, color, religion, sex, or national origin of such individual or group on account of an imbalance which may exist with respect to the total number or percentage of persons of any race, color, religion, sex, or national origin employed by any employer, referred or classified for employment by any employment agency or labor organization, admitted to membership or classified by any labor organization, or admitted to, or employed in, any apprenticeship or other training program, in comparison with the total number or percentage of persons of such race, color, religion, sex, or national origin in any community, State, section, or other area, or in the available work force in any community, State, section, or other area.

OTHER UNLAWFUL EMPLOYMENT PRACTICES

SEC. 704. (a) It shall be an unlawful employment practice for an employer to discriminate against any of his employees or applicants for employment, for an employment agency, *or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs,* to discriminate against any individual, or for a labor organization to discriminate against any member thereof or applicant for membership, because he has opposed any practice made an unlawful employment practice by this title, or because he has made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this title.

(b) It shall be an unlawful employment practice for an employer, labor organization, employment *agency, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs,* to print or publish or cause to be printed or published any notice or advertisement relating to employment by such an employer or membership in or any classification or referral for employment by such a labor organization, or relating to any classification or referral for employment by such an employment *agency, or relating to admission to, or employment in, any program established to provide apprenticeship or other training by such a joint labor-management committee* indicating any preference, limitation, specification, or discrimination, based on race, color, religion, sex, or national origin, except that such a notice or advertisement may indicate a preference, limitation, specification, or discrimination based on religion, sex, or national origin when religion, sex, or national origin is a bona fide occupational qualification for employment.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

SEC. 705. (a) There is hereby created a Commission to be known as the Equal Employment Opportunity Commission, which shall be composed of five members, not more than three of whom shall be members of the same political party. *Members of the Commission* shall be appointed by the President by and with the advice and consent of the *Senate* for a term of five *years. Any individual chosen to fill a vacancy shall be appointed only for the unexpired term of the member whom he shall succeed, and all members of the Commission shall continue to serve until their successors are appointed and qualified, except that no such member of the Commission shall continue to serve (1) for more than sixty days when the Congress is in session unless a nomination to fill such vacancy shall have been submitted to the Senate, or (2) after the adjournment sine die of the session of the Senate in which such nomination was submitted.* The President shall designate one member to serve as Chairman of the Commission, and one member to serve as Vice Chairman. The Chairman shall be responsible on behalf of the Commission for the administrative operations of the Commission, and *except as provided in subsection (b)*, shall appoint, in accordance with the *provisions of title 5, United States Code, governing appointments in the competitive service, such officers, agents, attorneys, hearing examiners, and employees as he deems necessary to assist it in the performance of its functions and to fix their compensation in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification and General Schedule pay rates: Provided, That assignment, removal, and compensation of hearing examiners shall be in accordance with sections 3105, 3344, 5362, and 7521 of title 5, United States Code.*

(b)(1) There shall be a General Counsel of the Commission appointed by the President, by and with the advice and consent of the Senate, for a term of four years. The General Counsel shall have responsibility for the conduct of litigation as provided in sections 706 and 707 of this title. The General Counsel shall have such other duties as the Commission may prescribe or as may be provided by law and shall concur with the Chairman of the Commission on the appointment and supervision of regional attorneys. The General Counsel of the Commission on the effective date of this Act shall continue in such position and perform the functions specified in this subsection until a successor is appointed and qualified.

(2) Attorneys appointed under this section may, at the direction of the Commission, appear for and represent the Commission in any case in court, provided that the Attorney General shall conduct all litigation to which the Commission is a party in the Supreme Court pursuant to this title.

(c) A vacancy in the Commission shall not impair the right of the remaining members to exercise all the powers of the Commission and three members thereof shall constitute a quorum.

(d) The Commission shall have an official seal which shall be judicially noticed.

(e) The Commission shall at the close of each fiscal year report to the Congress and to the President concerning the action it has taken; the names, salaries, and duties of all individuals in its employ and the moneys it has disbursed; and shall make such further reports on the cause of and means of eliminating discrimination and such recommendations for further legislation as may appear desirable.

(f) The principal office of the Commission shall be in or near the District of Columbia, but it may meet or exercise any or all its powers at any other place. The Commission may establish such regional or State offices as it deems necessary to accomplish the purpose of this title.

(g) The Commission shall have power—

(1) to cooperate with and, with their consent, utilize regional, State, local, and other agencies, both public and private, and individuals;

(2) to pay to witnesses whose depositions are taken or who are summoned before the Commission or any of its agents the same witness and mileage fees as are paid to witnesses in the courts of the United States;

(3) to furnish to persons subject to this title such technical assistance as they may request to further their compliance with this title or an order issued thereunder;

(4) upon the request of (i) any employer, whose employees or some of them, or (ii) any labor organization, whose members or some of them, refuse or threaten to refuse to cooperate in effectuating the provisions of this title, to assist in such effectuation by conciliation or such other remedial action as is provided by this title;

(5) to make such technical studies as are appropriate to effectuate the purposes and policies of this title and to make the results of such studies available to the public;

(6) to *intervene* in a civil action brought *under section 706* by an aggrieved party *against a respondent other than a government, governmental agency, or political subdivision.*

(*h*) The Commission shall, in any of its educational or promotional activities, cooperate with other departments and agencies in the performance of such educational and promotional activities.

(*i*) All officers, agents, attorneys, and employees of the Commission shall be subject to the provisions of section 9 of the Act of August 2, 1939, as amended (the Hatch Act), notwithstanding any exemption contained in such section.

PREVENTION OF UNLAWFUL EMPLOYMENT PRACTICES

SEC. 706. (*a*) *The Commission is empowered, as hereinafter provided, to prevent any person from engaging in any unlawful employment practice as set forth in section 703 or 704 of this title.*

(*b*) Whenever *a charge is filed by or on behalf of a* person claiming to be aggrieved, or by a member of the Commission, *alleging* that an employer, employment agency, labor *organization, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs,* has engaged in an unlawful employment practice, the Commission shall *serve a notice of the charge* (*including the date, place and circumstances of the alleged unlawful employment practice*) *on* such employer, employment agency, labor *organization, or joint labor-management committee* (hereinafter referred to as the "respondent") *within ten days, and shall make an investigation thereof. Charges shall be in writing under oath or affirmation and shall contain such information and be in such form as the Commission requires. Charges* shall not be made public by the Commission. If the Commission *determines* after such investigation that there is *not* reasonable cause to believe that the charge is true, *it shall dismiss the charge and promptly notify the person claiming to be aggrieved and the respondent of its action. In determining whether reasonable cause exists, the Commission shall accord substantial weight to final findings and orders made by State or local authorities in proceedings commenced under State or local law pursuant to the requirements of subsections* (c) *and* (*d*). *If the Commission determines after such investigation that there is reasonable cause to believe that the charge is true,* the Commission shall endeavor to eliminate any such alleged unlawful employment practice by informal methods of conference, conciliation, and persuasion. Nothing said or done during and as a part of such *informal* endeavors may be made public by the *Commission, its officers or employees, or used as evidence in a subsequent proceeding* without the written consent of the *persons concerned.* Any *person* who *makes* public information in violation of this subsection shall be fined not more than $1,000 or imprisoned *for* not more than one *year, or both. The Commission shall make its determination on reasonable cause as promptly as possible and, so far as practicable, not later than one hundred and twenty days from the filing of the charge or, where applicable under section* (*c*) *or* (*d*) *from the date upon which the Commission is authorized to take action with respect to the charge.*

(*c*) In the case of an alleged unlawful employment practice occurring in a State, or political subdivision of a State, which has a State or local law prohibiting the unlawful employment practice alleged and establishing or authorizing a State or local authority to grant or seek relief from such practice or to institute criminal proceedings with respect thereto upon receiving notice thereof, no charge may be filed under subsection (a) by the person aggrieved before the expiration of sixty days after proceedings have been commenced under the State or local law, unless such proceedings have been earlier terminated, provided that such sixty-day period shall be extended to one hundred and twenty days during the first year after the effective date of such State or local law. If any requirement for the commencement of such proceedings is imposed by a State or local authority other than a requirement of the filing of a written and signed statement of the facts upon which the proceeding is based, the proceeding shall be deemed to have been commenced for the purposes of this subsection at the time such statement is sent by registered mail to the appropriate State or local authority.

(*d*) In the case of any charge filed by a member of the Commission alleging an unlawful employment practice occurring in a State or political subdivision of a State which has a State or local law prohibiting the practice alleged and establishing or authorizing a State or local authority to grant or seek relief from such practice or to institute criminal proceedings with respect thereto upon receiving notice thereof, the Commission shall, before taking any action with respect to such charge, notify the appropriate State or local officials and, upon request, afford them a reasonable time, but not less than sixty days (provided that such sixty-day period shall be extended to one hundred and twenty days during the first year after the effective *date* of such State or local law), unless a shorter period is requested, to act under such State or local law to remedy the practice alleged.

(*e*) A charge under *this section* shall be filed within *one hundred and eighty* days after the alleged unlawful employment practice *occurred and notice of the charge (including the date, place and circumstances of the alleged unlawful employment practice) shall be served upon the person against whom such charge is made within ten days thereafter*, except that in *a* case of an unlawful employment practice with respect to which the person aggrieved has *initially instituted proceedings with a State or local agency with authority to grant or seek relief from such practice or to institute criminal proceedings with respect thereto upon receiving notice thereof*, such charge shall be filed by *or on behalf of* the person aggrieved within *three hundred* days after the alleged unlawful employment practice occurred, or within thirty days after receiving notice that the State or local agency has terminated the proceedings under the State or local law, whichever is earlier, and a copy of such charge shall be filed by the Commission with the State or local agency.

(*f*)(*1*) If within thirty days after a charge is filed with the Commission or within thirty days after expiration of any period of reference under subsection (*c*) *or* (*d*), the Commission has been unable to *secure from the respondent a conciliation agreement acceptable to the Commission*, the Commission *may bring a civil action against any respondent not a government, governmental agency, or political subdivision named in the charge. In the case of a respondent which is a government, governmental agency, or political subdivision if the Commission has been unable to secure from the respondent a conciliation agreement acceptable to the Commission, the Commission shall take no further action and shall refer the case to the Attorney General who may bring a civil action against such respondent in the appropriate United States district court. The person or persons aggrieved shall have the right to intervene in a civil action brought by the Commission or the Attorney General in a case involving a government, governmental agency, or political subdivision. If a charge filed with the Commission pursuant to subsection (b) is dismissed by the Commission, or if within one hundred and eighty days from the filing of such charge or the expiration of any period of reference under subsection (c) or (d), whichever is later, the Commission has not filed a civil action under this section or the Attorney General has notified a civil action in a case involving a government, a governmental agency, or political subdivision, or the Commission has not entered into a conciliation agreement to which the person aggrieved is a party, the Commission, or the Attorney General in a case involving a government, governmental agency, or political subdivision, shall so notify the person aggrieved and within ninety days after the giving of such notice a civil action may* be brought against the respondent named in the charge (A) by the person claiming to be aggrieved, or (B) if such charge was filed by a member of the Commission, by any person whom the charge alleges was aggrieved by the alleged unlawful employment practice. Upon application by the complainant and in such circumstances as the court may deem just, the court may appoint an attorney for such complainant and may authorize the commencement of the action without the payment of fees, costs, or security. Upon timely application, the court may, in its discretion, permit the *Commission*, or the Attorney General in a case involving a government, governmental agency, or political subdivision, to intervene in such civil action *upon certification* that the case is of general public importance. Upon request, the court may, in its discretion, stay further proceedings for not more than sixty days pending the termination, stay further proceedings for not more than sixty days pending the termina*section or further* efforts of the Commission to obtain voluntary compliance.

(2) Whenever a charge is filed with the Commission and the Commission concludes on the basis of a preliminary investigation that prompt judicial action is necessary to carry out the purposes of this Act, the Commission, or the Attorney General in a case involving a government, governmental agency, or political subdivision, may bring an action for appropriate temporary or preliminary relief pending final disposition of such charge. Any temporary restraining order or other order granting preliminary or temporary relief shall be issued in accordance with rule 65 of the Federal Rules of Civil Procedure. It shall be the duty of a court having jurisdiction over proceedings under this section to assign cases for hearing at the earliest practicable date and to cause such cases to be in every way expedited.

(3) Each United States district court and each United States court of a place subject to the jurisdiction of the United States shall have jurisdiction of actions brought under this title. Such an action may be brought in any judicial district in the State in which the unlawful employment practice is alleged to have been committed, in the judicial district in which the employment records relevant to such practice are maintained and administered, or in the judicial district in which the aggrieved person would have worked but for the alleged unlawful employment practice, but if the respondent is not found within any such district, such an action may be brought within the judicial district in which the respondent has his principal office. For purposes of sections 1404 and 1406 of title 28 of the United States Code, the judicial district in which the respondent has his principal office shall in all cases be considered a district in which the action might have been brought.

(4) It shall be the duty of the chief judge of the district (or in his absence, the acting chief judge) in which the case is pending immediately to designate a judge in such district to hear and determine the case. In the event that no judge in the district is available to hear and determine the case, the chief judge of the district, or the acting chief judge, as the case may be, shall certify this fact to the chief judge of the circuit (or in his absence, the acting chief judge) who shall then designate a district or circuit judge of the circuit to hear and determine the case.

(5) It shall be the duty of the judge designated pursuant to this subsection to assign the case for hearing at the earliest practicable date and to cause the case to be in every way expedited. If such judge has not scheduled the case for trial within one hundred and twenty days after issue has been joined, that judge may appoint a master pursuant to rule 53 of the Federal Rules of Civil Procedure.

(g) If the court finds that the respondent has intentionally engaged in or is intentionally engaging in an unlawful employment practice charged in the complaint, the court may enjoin the respondent from engaging in such unlawful employment practice, and order such affirmative action as may be appropriate, which may include, but is not limited to, reinstatement or hiring of employees, with or without back pay (payable by the employer, employment agency, or labor organization, as the case may be, responsible for the unlawful employment practice), or any other equitable relief as the court deems appropriate. Back pay liability shall not accrue from a date more than two years prior to the filing of a charge with the Commission. Interim earnings or amounts earnable with reasonable diligence by the person or persons discriminated against shall operate to reduce the back pay otherwise allowable. No order of the court shall require the admission or reinstatement of an individual as a member of a union, or the hiring, reinstatement, or promotion of an individual as an employee, or the payment to him of any back pay, if such individual was refused admission, suspended, or expelled, or was refused employment or advancement or was suspended or discharged for any reason other than discrimination on account of race, color, religion, sex, or national origin or in violation of section 704(a).

(h) The provisions of the Act entitled "An Act to amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity, and for other purposes," approved March 23, 1932 (29 U.S.C. 101–115), shall not apply with respect to civil actions brought under this section.

(i) In any case in which an employer, employment agency, or labor organization fails to comply with an order of a court issued in a civil action brought under *this section*, the Commission may commence proceedings to compel compliance with such order.

(j) Any civil action brought under *this section* and any proceedings brought under subsection (i) shall be subject to appeal as provided in sections 1291 and 1292, title 28, United States Code.

(k) In any action or proceeding under this title the court, in its discretion, may allow the prevailing party, other than the Commission or the United States, a reasonable attorney's fee as part of the costs, and the Commission and the United States shall be liable for costs the same as a private person.

SEC. 707. (a) Whenever the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of resistance to the full enjoyment of any of the rights secured by this title, and that the pattern or practice is of such a nature and is intended to deny the full exercise of the rights herein described, the Attorney General may bring a civil action in the appropriate district court of the United States by filing with it a complaint (1) signed by him (or in his absence the Acting Attorney General), (2) setting forth facts pertaining to such pattern or practice, and (3) requesting such relief, including an application for a permanent or temporary injunction, restraining order or other order against the person or persons responsible for such pattern or practice, as he deems necessary to insure the full enjoyment of the rights herein described.

(b) The district courts of the United States shall have and shall exercise jurisdiction of proceedings instituted pursuant to this section, and in any such proceeding the Attorney General may file with the clerk of such court a request that a court of three judges be convened to hear and determine the case. Such request by the Attorney General shall be accompanied by a certificate that, in his opinion, the case is of general public importance. A copy of the certificate and request for a three-judge court shall be immediately furnished by such clerk to the chief judge of the circuit (or in his absence, the presiding circuit judge of the circuit) in which the case is pending. Upon receipt of such request it shall be the duty of the chief judge of the circuit or the presiding circuit judge, as the case may be, to designate immediately three judges in such circuit, of whom at least one shall be a circuit judge and another of whom shall be a district judge of the court in which the proceeding was instituted, to hear and determine such case, and it shall be the duty of the judges so designated to assign the case for hearing at the earliest practicable date, to participate in the hearing and determination thereof, and to cause the case to be in every way expedited. An appeal from the final judgment of such court will lie to the Supreme Court.

In the event the Attorney General fails to file such a request in any such proceeding, it shall be the duty of the chief judge of the district (or in his absence, the acting chief judge) in which the case is pending immediately to designate a judge in such district to hear and determine the case. In the event that no judge in the district is available to hear and determine the case, the chief judge of the district, or the acting chief judge, as the case may be, shall certify this fact to the chief judge of the circuit (or in his absence, the acting chief judge) who shall then designate a district or circuit judge of the circuit to hear and determine the case.

It shall be the duty of the judge designated pursuant to this section to assign the case for hearing at the earliest practicable date and to cause the case to be in every way expedited.

(c) Effective two years after the date of enactment of the Equal Employment Opportunity Act of 1972, the functions of the Attorney General under this section shall be transferred to the Commission, together with such personnel, property, records, and unexpended balances of appropriations, allocations, and other funds employed, used, held, available, or to be made available in connection with such functions unless the President submits, and neither House of Congress vetoes, a reorganization plan pursuant to chapter 9, of title 5, United States Code, inconsistent with the provisions of this subsection. The Commission shall carry out such functions in accordance with subsections (d) and (e) of this section.

(d) Upon the transfer of functions provided for in subsection (c) of this section, in all suits commenced pursuant to this section prior to the date of such transfer, proceedings shall continue without abatement, all court orders and decrees shall remain in effect, and the Commission shall be substituted as a party for the United States of America, the Attorney General, or the Acting Attorney General, as appropriate.

(e) Subsequent to the date of enactment of the Equal Employment Opportunity Act of 1972, the Commission shall have authority to investigate and act on a charge of a pattern or practice of discrimination, whether filed by or on be-

half of a person claiming to be aggrieved or by a member of the Commission. All such actions shall be conducted in accordance with the procedures set forth in section 706 of this Act.

EFFECT ON STATE LAWS

SEC. 708. Nothing in this title shall be deemed to exempt or relieve any person from any liability, duty, penalty, or punishment provided by any present or future law of any State or political subdivision of a State, other than any such law which purports to require or permit the doing of any act which would be an unlawful employment practice under this title.

INVESTIGATIONS, INSPECTIONS, RECORDS, STATE AGENCIES

SEC. 709. (a) In connection with any investigation of a charge filed under section 706, the Commission or its designated representative shall at all reasonable times have access to, for the purposes of examination, and the right to copy any evidence of any person being investigated or proceeded against that relates to unlawful employment practices covered by this title and is relevant to the charge under investigation.

(b) The Commission may cooperate with State and local agencies charged with the administration of State fair employment practices laws and, with the consent of such agencies, may, for the purpose of carrying out its functions and duties under this title and within the limitation of funds appropriated specifically for such purpose, *engage in and contribute to the cost of research and other projects of mutual interest undertaken by such agencies, and* utilize the services of such agencies and their employees, and, notwithstanding any other provision of law, *pay by advance or reimbursement* such agencies and their employees for services rendered to assist the Commission in carrying out this title. In furtherance of such cooperative efforts, the Commission may enter into written agreements with such State or local agencies and such agreements may include provisions under which the Commission shall refrain from processing a charge in any cases or class of cases specified in such agreements or under which the Commission shall relieve any person or class of persons in such State or locality from requirements imposed under this section. The Commission shall rescind any such agreement whenever it determines that the agreement no longer serves the interest of effective enforcement of this title.

(c) *Every* employer, employment agency, and labor organization subject to this title shall (1) make and keep such records relevant to the determinations of whether unlawful employment practices have been or are being committed, (2) preserve such records for such periods, and (3) make such reports therefrom, as the Commission shall prescribe by regulation or order, after public hearing, as reasonable, necessary, or appropriate for the enforcement of this title or the regulations or orders thereunder. The Commission shall, by regulation, require each employer, labor organization, and joint labor-management committee subject to this title which controls an apprenticeship or other training program to maintain such records as are reasonably necessary to carry out the purpose of this title, including, but not limited to, a list of applicants who wish to participate in such program, including the chronological order in which applications were received, and *to* furnish to the Commission upon request, a detailed description of the manner in which persons are selected to participate in the apprenticeship or other training program. Any employer, employment agency, labor organization, or joint labor-management committee which believes that the application to it of any regulation or order issued under this section would result in undue hardship may apply to the Commission for an exemption from the application of such regulation or order, *and, if such application for an exemption is denied,* bring a civil action in the United States district court for the district where such records are kept. If the Commission or the court, as the case may be, finds that the application of the regulation or order to the employer, employment agency, or labor organization in question would impose an undue hardship, the Commission or the court, as the case may be, may grant appropriate relief. *If any person required to comply with the provisions of this subsection fails or refuses to do so, the United States district court for the district in which such person is found, resides, or transacts business, shall, upon application of the Commission, or the Attorney General in a case involving a government, governmental agency or political subdivision, have jurisdiction to issue to such person an order requiring him to comply.*

(d) In prescribing requirements pursuant to subsection (c) of this section, the Commission shall consult with other interested State and Federal agencies and shall endeavor to coordinate its requirements with those adopted by such agencies. The Commission shall furnish upon request and without cost to any State or local agency charged with the administration of a fair employment practice law information obtained pursuant to subsection (c) of this section from any employer, employment agency, labor organization, or joint labor-management committee subject to the jurisdiction of such agency. Such information shall be furnished on condition that it not be made public by the recipient agency prior to the institution of a proceeding under State or local law involving such information. If this condition is violated by a recipient agency, the Commission may decline to honor subsequent requests pursuant to this subsection.

(e) It shall be unlawful for any officer or employee of the Commission to make public in any manner whatever any information obtained by the Commission pursuant to its authority under this section prior to the institution of any proceeding under this title involving such information. Any officer or employee of the Commission who shall make public in any manner whatever any information in violation of this subsection shall be guilty of a misdemeanor and upon conviction thereof, shall be fined not more than $1,000, or imprisoned not more than one year.

INVESTIGATORY POWERS

SEC. 710. For the purpose of all hearings and investigations conducted by the Commission or its duly authorized agents or agencies, section 11 of the National Labor Relations Act (49 Stat. 455; 29 U.S.C. 161) shall apply.

NOTICES TO BE POSTED

SEC. 711. (a) Every employer, employment agency, and labor organization, as the case may be, shall post and keep posted in conspicuous places upon its premises where notices to employees, applicants for employment, and members are customarily posted a notice to be prepared or approved by the Commission setting forth excerpts from, or summaries of, the pertinent provisions of this title and information pertinent to the filing of a complaint.

(b) A willful violation of this section shall be punishable by a fine of not more than $100 for each separate offense.

VETERANS' PREFERENCE

SEC. 712. Nothing contained in this title shall be construed to repeal or modify any Federal, State, territorial, or local law creating special rights or preference for veterans.

RULES AND REGULATIONS

SEC. 713. (a) The Commission shall have authority from time to time to issue, amend, or rescind suitable procedural regulations to carry out the provisions of this title. Regulations issued under the section shall be in conformity with the standards and limitations of the Administrative Procedure Act.

(b) In any action or proceeding based on any alleged unlawful employment practice, no person shall be subject to any liability or punishment for or on account of (1) the commission by such person of an unlawful employment practice if he pleads and proves that the act or omission complained of was in good faith, in conformity with, and in reliance on any written interpretation or opinion of the Commission, or (2) the failure of such person to publish and file any information required by any provision of this title if he pleads and proves that he failed to publish and file such information in good faith, in conformity with the instructions of the Commission issued under this title regarding the filing of such information. Such a defense, if established, shall be a bar to the action or proceeding, notwithstanding that (A) after such act or omission, such interpretation or opinion is modified or rescinded or is determined by judicial authority to be invalid or of no legal effect, or (B) after publishing or filing the description and annual reports, such publication or filing is determined by judicial authority not to be in conformity with the requirements of this title.

FORCIBLY RESISTING THE COMMISSION OR ITS REPRESENTATIVES

SEC. 714. The provisions of *sections 111 and 1114*, title 18, United States Code, shall apply to officers, agents, and employees of the Commission in the performance of their official duties. *Notwithstanding the provisions of sections 111 and*

1114 of title 18, United States Code, whoever in violation of the provisions of section 1114 of such title kills a person while engaged in or on account of the performance of his official functions under this Act shall be punished by imprisonment for any term of years or for life.

EQUAL EMPLOYMENT OPPORTUNITY COORDINATING COUNCIL

Sec. 715. There shall be established an Equal Employment Opportunity Coordinating Council (hereinafter referred to in this section as the Council) composed of the Secretary of Labor, the Chairman of the Equal Employment Opportunity Commission, the Attorney General, the Chairman of the United States Civil Service Commission, and the Chairman of the United States Civil Rights Commission, or their respective delegates. The Council shall have the responsibility for developing and implementing agreements, policies and practices designed to maximize effort, promote efficiency, and eliminate conflict, competition, duplication and inconsistency among the operations, functions and jurisdictions of the various departments, agencies and branches of the Federal government responsible for the implementation and enforcement of equal employment opportunity legislation, orders, and policies. On or before July 1 of each year, the Council shall transmit to the President and to the Congress a report of its activities together with such recommendations for legislative or administrative changes as it concludes are desirable to further promote the purposes of this section.

EFFECTIVE DATE

Sec. 716. (a) This title shall become effective one year after the date of its enactment.

(b) Notwithstanding subsection (a), sections of this title other than sections 703, 704, 706, and 707 shall become effective immediately.

(c) The President shall, as soon as feasible after the enactment of this title, convene one or more conferences for the purpose of enabling the leaders of groups whose members will be affected by this title to become familiar with the rights afforded and obligations imposed by its provisions, and for the making plans which will result in the fair and effective administration of this title when all of its provisions become effective. The President shall invite the participation in such conference or conferences of (1) the members of the President's Committee on Equal Employment Opportunity, (2) the members of the Commission on Civil Rights, (3) representatives of State and local agencies engaged in furthering equal employment opportunity, (4) representatives of private agencies engaged in furthering equal employment opportunity, and (5) representatives of employers, labor organizations, and employment agencies who will be subject to this title.

NONDISCRIMINATION IN FEDERAL GOVERNMENT EMPLOYMENT

Sec. 717. *(a) All personnel actions affecting employees or applicants for employment (except with regard to aliens employed outside the limits of the United States) in military departments as defined in section 102 of title 5, United States Code, in executive agencies (other than the General Accounting Office) as defined in section 105 of title 5, United States Code (including employees and applicants for employment who are paid from nonappropriated funds), in the United States Postal Service and the Postal Rate Commission, in those units of the Government of the District of Columbia having positions in the competitive service, and in those units of the legislative and judicial branches of the Federal Government having positions in the competitive service, and in the Library of Congress shall be made free from any discrimination based on race, color, religion, sex, or national origin.*

(b) Except as otherwise provided in this subsection, the Civil Service Commission shall have authority to enforce the provisions of subsection (a) through appropriate remedies, including reinstatement or hiring of employees with or without back pay, as will effectuate the policies of this section, and shall issue such rules, regulations, orders, and instructions as it deems necessary and appropriate to carry out its responsibilities under this section. The Civil Service Commission shall—

(1) be responsible for the annual review and approval of a national and regional equal employment opportunity plan which each department and agency and each appropriate unit referred to in subsection (a) of this section shall submit in order to maintain an affirmative program of equal employment opportunity for all such employees and applicants for employment;

(2) be responsible for the review and evaluation of the operation of all agency equal employment opportunity programs, periodically obtaining and publishing (on at least a semiannual basis) progress reports from each such department, agency, or unit; and

(3) consult with and solicit the recommendations of interested individuals, groups, and organizations relating to equal employment opportunity.

The head of each department, agency, or unit shall comply with such rules, regulations, orders, and instructions which shall include a provision that an employee or applicant for employment shall be notified of any final action taken on any complaint of discrimination filed by him thereunder. The plan submitted by each department, agency, and unit shall include, but not be limited to—

(1) provision for the establishment of training and education programs designed to provide a maximum opportunity for employees to advance so as to perform at their highest potential; and

(2) a description of the qualifications in terms of training and experience relating to equal employment opportunity for the principal and operating officials of each such department, agency, or unit responsible for carrying out the equal employment opportunity program and of the allocation of personnel and resources proposed by such department, agency, or unit to carry out its equal employment opportunity program.

With respect to employment in the Library of Congress, authorities granted in this subsection to the Civil Service Commission shall be exercised by the Library of Congress.

(c) Within thirty days of receipt of notice of final action taken by a department, agency, or unit referred to in subsection 717(a), or by the Civil Service Commission upon an appeal from a decision or order of such department, agency, or unit on a complaint of discrimination based on race, color, religion, sex, or national origin, brought pursuant to subsection (a) of this section, Executive Order 11478 or any succeeding Executive orders, or after one hundred and eighty days from the filing of the initial charge with the department, agency, or unit or with the Civil Service Commission on appeal from a decision or order of such department, agency, or unit until such time as final action may be taken by a department, agency, or unit, an employee or applicant for employment, if aggrieved by the final disposition of his complaint, or by the failure to take final action on his complaint, may file a civil action as provided in section 706, in which civil action the head of the department, agency, or unit, as appropriate, shall be the defendant.

(d) The provisions of section 706(f) through (k), as applicable, shall govern civil actions brought hereunder.

(e) Nothing contained in this Act shall relieve any Government agency or official of its or his primary responsibility to assure nondiscrimination in employment as required by the Constitution and statutes or of its or his responsibilities under Executive Order 11478 relating to equal employment opportunity in the Federal Government.

SPECIAL PROVISIONS WITH RESPECT TO DENIAL, TERMINATION, AND SUSPENSION OF GOVERNMENT CONTRACTS

SEC. 718. No Government contract, or portion thereof, with any employer, shall be denied, withheld, terminated, or suspended, by any agency or officer of the United States under any equal employment opportunity law or order, where such employer has an affirmative action plan which has previously been accepted by the Government for the same facility within the past twelve months without first according such employer full hearing and adjudication under the provisions of title 5, United States Code, section 554, and the following pertinent sections: Provided, That if such employer has deviated substantially from such previously agreed to affirmative action plan, this section shall not apply: Provided further, That for the purposes of this section an affirmative action plan shall be deemed to have been accepted by the Government at the time the appropriate compliance agency has accepted such plan unless within forty-five days thereafter the Office of Federal Contract Compliance has disapproved such plan.

PROVISIONS OF EQUAL EMPLOYMENT OPPORTUNITY ACT OF 1972 WHICH RELATE TO BUT DO NOT AMEND THE CIVIL RIGHTS ACT OF 1964

SEC. 9. (a) Section 5314 of title 5 of the United States Code is amended by adding at the end thereof the following new clause:

"(58) Chairman, Equal Employment Opportunity Commission."

(b) Clause (72) of section 5315 of such title is amended to read as follows:
"(72) Members, Equal Employment Opportunity Commission (4)."

(c) Clause (111) of section 5316 of such title is repealed.

(d) Section 5316 of such title is amended by adding at the end thereof the following new clause:

"(131) General Counsel of the Equal Employment Opportunity Commission."

SEC. 12. Section 5108(c) of title 5, United States Code, is amended by—

(1) striking out the word "and" at the end of paragraph (9);

(2) striking out the period at the end of paragraph (10) and inserting in lieu thereof a semicolon and the word "and"; and

(3) by adding immediately after paragraph (10) the last time it appears therein in the following new paragraph:

"(11) the Chairman of the Equal Employment Opportunity Commission, subject to the standards and procedures prescribed by this chapter, may place an additional ten positions in the Equal Employment Opportunity Commission in GS-16, GS-17, and GS-18 for the purposes of carrying out title VII of the Civil Rights Act of 1964."

SEC. 14. The amendments made by this Act to section 706 of the Civil Rights Act of 1964 shall be applicable with respect to charges pending with the Commission on the date of enactment of this Act and all charges filed thereafter.

CODE OF FEDERAL REGULATIONS TITLE 29, CHAPTER XIV—EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Part
1600 Employee responsibilities and conduct.
1601 Procedural regulations.
1602 Records and reports.
1604 Guidelines on discrimination because of sex.
1605 Guidelines on discrimination because of religion.
1606 Guidelines on discrimination because of national origin.
1607 Guidelines on employee selection procedures.
1610 Availability of records.

PART 1600—EMPLOYEE RESPONSIBILITIES AND CONDUCT

Subpart A—General

Sec.
1600.735-101 Purpose and policy.

1600.735-204 Financial interests.
1600.735-205 Other standards of conduct.

Subpart C—Conduct and Responsibilities of Special Government Employees

1600.735-301 Limitations.

Subpart D—Statement of Employment and Financial Interests

1600.735-402 Time and place for submission of employee statement.
1600.735-403 Review of statement of employment and financial interests.
1600.735-404 Supplementary statements.
1600.735-405 Interests of employees' relatives.
1600.735-406 Information not known by employees.
1600.735-407 Information not required
1600.735-408 Confidentiality of employees' statements.
1600.735-409 Effect of employees' statements on other requirements.
1600.735-401 Employees required to submit statements.

Authority: The provision of this Part 1600 issued under E.O. 11222, 30 F.R. 6469, 3 CFR 1965 Supp.; 5 CFR 735.101 et seq.

Source: The provisions of this Part 1600 appear at 33 FR 4329, Mar. 8, 1968, unless otherwise noted.

SUBPART A—GENERAL

SECTION 1600.735-101. PURPOSE AND POLICY

(a) *Purpose.*—The purpose of this part is to implement Executive Order 11222, May 8, 1965 (3 CFR 1964-1965 Comp., p. 306; 30 FR 6469) and Part 735 of the Civil Service Commission Regulations adopted pursuant thereto (5 CFR Part 735) by defining standards of conduct and related procedures for employees and special Government employees of the EEOC.

(b) *Policy.*—The maintenance of high standards of ethical conduct by Government employees and special Government employees is essential to assure the proper performance of the Government's business and the maintenance of confidence and respect of the citizens in their Government. No public officer can lawfully engage in business activities which are incompatible with the duties of his office.

SECTION 1600.735-102. DEFINITIONS

(a) "Agency" means the Equal Employment Opportunity Commission.

(b) "Employee" means an officer or employee of the Equal Employment Opportunity Commission, but does not include a special Government employee.

(c) "Executive order" means Executive Order 11222 of May 8, 1965.

(d) "Person" means an individual, corporation, company association, firm, partnership, society, joint stock company, or any other organization or institution.

(e) "Special Government employee" means a temporary employee, with or without compensation, appointed to perform for not to exceed 130 days during any period of 365 consecutive days duties on either a full-time or intermittent basis. Such employees are generally consultants or experts.

SECTION 1600.735-103. INTERPRETATIONS AND COUNSELING

The General Counsel shall provide any needed counsel and assistance to all EEOC employees concerning the policy and procedures contained in this part. Field Office Directors shall serve as deputy counselors in their jurisdictions, referring any controversial problems of interpretation to the General Counsel.

SECTION 1600.735-104. DISCIPLINARY AND OTHER REMEDIAL ACTION

An employee or special Government employee of the agency who violates any of the regulations in this part may be disciplined. The disciplinary action may be in addition to any penalty prescribed by law for the violation. In addition to or in lieu of disciplinary action, remedial action to end conflicts or appearance of conflicts of interest may include but is not limited to:

(a) Changes in assigned duties;

(b) Divestment by the employee or special Government employee of his conflicting interest; or

(c) Disqualification for a particular assignment.

SECTION 1600.735-105. APPEAL

Any employee or group of employees who disagree with the provisions of this part have the right to request a review of their complaint through Commission Order 571, August 7, 1972.

SUBPART B—LIMITATIONS ON CONDUCT AND RESPONSIBILITIES OF EMPLOYEES

SECTION 1600.735-201. PROSCRIBED ACTIONS

An employee shall avoid any action, whether or not specifically prohibited by this part which might result in, or create the appearance of:

(a) Using public office for private gain;

(b) Giving preferential treatment to any person;

(c) Impeding Government efficiency or economy;

(d) Losing complete independence or impartiality;

(e) Making a Government decision outside official channels; or

(f) Affecting adversely the confidence of the public in the integrity of the Government.

SECTION 1600.735-202. GIFTS, ENTERTAINMENT, AND FAVORS

(a) *General limitations.*—Employees shall not solicit or accept, directly or indirectly, any gift, gratuity, favor, entertainment, loan, or any other thing of monetary value, from a person who:

(1) Has, or is seeking to obtain, contractual or other business or financial relations with this agency;

(2) Conducts operations or activities that are regulated by this agency;

(3) Has interests that may be substantially affected by the performance or nonperformance of his official duty.

(b) *Exceptions.*—Section 1600.735—202 (a) does not preclude:

(1) Acceptance of a gift, gratuity, favor, entertainment, loan, payment of expenses, fee, compensation, or other things of monetary value incident to obvious family or personal relationships (such as those between the employee and the parents, children, or spouse of the employee) when the circumstances make it clear that it is the family relationship rather than the business of the persons concerned which are the motivating factors;

(2) Acceptance of food and refreshments of nominal value on infrequent occasions in the ordinary course of a luncheon or dinner meeting or other meeting or on an inspection tour where an employee may properly be in attendance;

(3) Acceptance of loans from banks of other financial institutions on customary terms to finance proper and usual activities of employees such as home mortgage loans;

(4) Acceptance of unsolicited advertising or promotional material, such as pens, pencils, note pads, calendars, and other items of nominal intrinsic value, and

(5) Receipt of bona fide reimbursement, unless prohibited by law, for expenses for travel and such other necessary subsistence as is compatible with this part for which no Government payment or reimbursement is made, However, an employee may not be reimbursed, and payment may not be made on his behalf, for excessive personal living expenses, gifts, entertainment, or other personal benefits, or for travel on official business proscribed by Decision B-128527 of the Comptroller General dated March 7, 1967.

(c) *Gifts to superiors.*—An employee shall not solicit contributions from another employee for a gift to an employee in a superior official position. An employee in a superior official position shall not accept a gift presented as a contribution from employees receiving less salary than himself. An employee shall not make a donation as a gift to an employee in a superior official position (5 U.S.C. 7351). However, this does not prohibit a voluntary gift of nominal value or donation in a nominal amount made on a special occasion; i.e., marriage, illness, or retirement.

(d) *Gifts from foreign governments.*—An employee shall not accept a gift, present, decoration, or other thing from a foreign government unless authorized by Congress as provided by the Constitution and in Public Law 89-673, 5 U.S.C. 7342.

§ 1600.735-203 OUTSIDE EMPLOYMENT AND OTHER ACTIVITY

(a) General limitations: An employee shall not engage in outside employment or other activity not compatible with the full and proper discharge of the duties and responsibilities of his Government employment. Incompatible activities include but are not limited to:

(1) Acceptance of a fee, compensation, gift, payment of expense, or any other thing of monetary value in circumstances in which acceptance may result in, or create the appearance of, conflicts of interest; or

(2) Outside employment which tends to impair the mental or physical capacity to perform his Government duties and responsibilities in an acceptable manner.

(3) Receipt by an employee of any salary or anything of monetary value from a private source as compensation for his services to the Government (18 U.S.C. 209).

(b) Employees are encouraged to engage in teaching, lecturing and writing that is not prohibited by law, the Executive order, this part, or the agency regulations. However, an employee shall not, either for or without compensation, engage in teaching, lecturing, or writing, including teaching, lecturing, or writing for the purpose of the special preparation of a person or class of persons for an examination of the Commission or Board of Examiners for the Foreign Service, that depends on information obtained as a result of his Government employment, except when that information has been made available to the general public or will be made available on request, or when the agency head gives written authorization for use of nonpublic information on the basis that the use is in the public interest. In addition, an employee who is a Presidential appointee covered by section 401(a) of the order shall not receive compensation or anything of monetary value for any consultation, lecture, discussion, writing, or appearance the subject matter of which is devoted substantially to the responsibilities, programs, or operations of his agency, or which draws substantially on official data or ideas which have not become part of the body of public information.

(c) [Reserved]

(d) Exceptions: Section 1600.735-203 does not preclude:

(1) Participation in the activities of national or state political parties not proscribed by law.

(2) Participation in the affairs of, or acceptance of an award for, a meritorious public contribution or achievement given by a charitable, religious, professional, social, fraternal, nonprofit educational and recreational, public service, or civil organization.

(3) Outside employment permitted under this part, including payments or reimbursements under § 1600.735—202(b)(5).

(e) Procedure: An employee who engages in outside employment shall obtain this supervisor's approval in advance and shall inform the Personnel Division by memorandum.

§ 1600.735-204 FINANCIAL INTERESTS

An Employee shall not:

(a) Have a direct or indirect financial interest that conflicts substantially, or appears to conflict substantially, with his Government duties and responsibilities; or

(b) Engage in, directly or indirectly, as financial transaction as a result of, or primarily relying on, information obtained through his Government employment.

This does not preclude an employee from having a financial interest or engaging in financial transactions to the same extent as a private citizen not employed by the Government so long as it is not prohibited by law, the Executive order, or these regulations.

§ 1600.735-205 OTHER STANDARDS OF CONDUCT

(a) *Use of Government property.*—An employee shall not directly or indirectly use, or allow the use of, Government property of any kind, including property leased to the Government, for other than officially approved activities. An employee has a positive duty to protect and conserve Government property, including equipment, supplies, and other property entrusted or issued to him.

(b) *Misuses of information.*—For the purpose of furthering a private interest, an employee shall not, except as provided in § 1600.735-203(b), directly or indirectly use, or allow the use of, official information obtained through or in connection with his Government employment which has not been made available to the general public.

(c) *Indebtedness.*—An employee shall pay each just financial obligation in a proper and timely manner, especially one imposed by law such as Federal, State, or local taxes. A "just financial obligation" means one acknowledged by the employee, or reduced to judgment by a court, and "in a proper and timely manner" means in a manner which the agency determines does not, under the circumstances, reflect adversely on the Government as his employer. In the event of dispute between an employee and an alleged creditor, the agency is not required to determine the validity or amount of his disputed debt.

(d) *Gambling, betting, and lotteries.*—An employee shall not participate, while on Government-owned or leased property or while on duty for the Government, in any gambling activity including the operation of a gambling device, in conducting a lottery or pool, in a game for money or property, or in selling or purchasing a number slip or ticket.

(e) *General conduct prejudicial to the Government.*—An employee shall not engage in criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct, or other conduct prejudicial to the Government.

(f) *Miscellaneous statutory provisions.*—Each employee shall acquaint himself with each statute that relates to his ethical and other conduct as an employee of the Government. Attention is specifically directed to the following statutory provisions:

(1) House Concurrent Resolution 175, 85th Congress, 2d session, 72 Stat. B12, the "Code of Ethics for Government Service".

(2) Chapter 11 of Title 18, United States Code, relating to bribery, graft, and conflicts of interest, as appropriate to the employees concerned.

(3) The prohibition against lobbying with appropriated funds (18 U.S.C. 1913).

(4) The prohibitions against disloyalty and striking (5 U.S.C. 7311, 18 U.S.C. 1918).

(5) The prohibition against the employment of a member of a Communist organization (50 U.S.C. 784).

(6) The prohibitions against (1) the disclosure of classified information (18 U.S.C. 798, 50 U.S.C. 783); and (2) the disclosure of confidential information (18 U.S.C. 1905).

(7) The provision relating to the habitual use of intoxicants to excess (5 U.S.C. 7352).

(8) The prohibition against the misuse of a Government vehicle (31 U.S.C. 638a(c)).

(9) The prohibition against the misuse of the franking privilege (18 U.S.C. 1719).

(10) The prohibition against the use of deceit in an examination or personnel action in connection with Government employment (18 U.S.C. 1917).

(11) The prohibition against fraud or false statements in a Government matter (18 U.S.C. 1001).

(12) The prohibition against mutilating or destroying a public record (18 U.S.C. 2071).

(13) The prohibition against counterfeiting and forging transportation requests (18 U.S.C. 508).

(14) The prohibitions against (1) embezzlement of Government money or property (18 U.S.C. 641), (2) failing to account for public money (18 U.S.C. 643), and (3) embezzlement of the money or property of another person in the possession of an employee by reason of his employment (18 U.S.C. 654).

(15) The prohibition against unauthorized use of documents relating to claims from or by the Government (18 U.S.C. 285).

(16) The prohibitions against political activities—in subchapter III of chapter 73 of Title 5, United States Code, and 18 U.S.C. 602, 607, and 608.

(17) The prohibition against an employee acting as an agent of a foreign principal registered under the Foreign Agents Registration Act (18 U.S.C. 219).

SUBPART C—CONDUCT AND RESPONSIBILITIES OF SPECIAL GOVERNMENT EMPLOYEES

§ 1600.735–301 LIMITATIONS

Special Government employees shall be subject to the same standards of conduct prescribed in Subpart B above for other employees, except § 1600.735–203 (a)(3), plus the following:

(a) *Use of Government employment.*—A special Government employee shall not use his Government employment for a purpose that is, or gives the appearance of being, motivated by the desire for private gain for himself or another person, particularly one with whom he has family, business, or financial ties.

(b) *Use of inside information.*—A special Government employee shall not use inside information obtained as a result of his Government employment for private gain for himself or another person either by direct action on his part or by counsel, recommendation, or suggestion to another person, particularly one with whom he has family, business, or financial ties. For the purpose of this section "inside information" means information obtained under Government authority which has not become part of the body of public information. Such employees may teach, lecture, or write in a manner not inconsistent with § 1600.735–203(b) above.

(c) *Coercion.*—A special Government employee shall not use his Government employment to coerce, or give the appearance of coercing, a person to provide financial benefit to himself or to another person, particularly one with whom he has family, business, or financial ties.

(d) *Gifts, entertainment, and favors.*—A special Government employee, while so employed or in connection with his employment, shall not receive or solicit from a person having business with his agency anything of value as a gift, gratuity, loan, entertainment, or favor for himself or another person, particularly one with whom he has family, business, or financial ties.

(e) *Miscellaneous statutory provisions.*—Special Government employees are responsible for a knowledge of statutory obligations as outlined in § 1600.735-205(f).

SUBPART D—STATEMENT OF EMPLOYMENT AND FINANCIAL INTERESTS

§ 1600.735-401 EMPLOYEES REQUIRED TO SUBMIT STATEMENTS

(a) The following categories of employees are determined by the EEOC, subject to the right of appear under § 1600.735-105, to be within the scope of 5 CFR 735-403, 735-404 and therefore they shall submit Statements of Employment and Financial Interests:

(1) Employees paid at a level of the Executive Schedule in Subpchapter II of Chapter 53 of Title 5 United States Code, except the members of the Commission who report under section 401 of Executive Order 11222.

(2) Employees in Grade GS-16 or above of the General Schedule in 5 U.S.C. 5332.

(3) Employees in the Office of Liaison engaged in grant or reimbursement activities classified at GS-13 or above of the General Schedule.

(4) Employees in the Office of Administration engaged in contracting or procurement activities who are classified at GS-13 or above of the General Schedule unless otherwise indicated, i.e., Director of Administration, Chief of Administrative Services. Contract Specialists, and Contract Specialist GS-12.

(b) Each special Government employee shall submit a Statement of Employment and Financial Interests showing all other employment and such financial interests as the agency determines are relevant in the light of the duties he is to perform, except when this requirement is waived under 5 CFR 735.412 (c).

§ 1600.735-402 TIME AND PLACE FOR SUBMISSION OF EMPLOYEE STATEMENT

Statement of Employment and Financial Interests shall be submitted by employees covered by § 1600.735-401 within 60 days after issuance of this part for employees on the rolls at that time and for new employees within 30 days of their entrance on duty. Special Government employees will complete duplicate copies of the forms in appendix A at the time of entrance on duty. All other employees required to file Statements of Employment and Financial Interests will complete duplicate copies of the form in appendix B. The completed original of these forms will be sent to the Director of Personnel in a sealed envelope marked on the outside "Confidential Statement Enclosed." The duplicate copy will be retained by the employee. The Personnel Division shall retain files of the Statements of Employment and Financial Interests.

§1600.735-403 REVIEW OF STATEMENT OF EMPLOYMENT AND FINANCIAL INTERESTS

The Director of Personnel shall review these statements for the purpose of disclosing any conflict of interest or apparent conflict of interest. If such conflict between the interests of an employee or special Government employee and the performance of his services for the Government are found, they shall be brought to the attention of the employee or special Government employee and he shall be granted the opportunity to explain the conflict and attempt to resolve it. If the indicated conflict cannot be resolved, the Director of Personnel should submit a written report with the recommendation for appropriate remedial action to the Chairman through the General Counsel.

§ 1600.735-404 SUPPLEMENTARY STATEMENTS

Changes in, or additions to, the information contained in an employee's Statement of Employment and Financial Interests shall be reported in a supplementary statement as of June 30 each year. If no changes or additions occur, a negative report is required. Notwithstanding the filing of the annual report required by this section, each employee shall at all times avoid acquiring a financial interest that could result, or taking an action that would result, in a violation of the conflicts of interest provisions of 18 U.S.C. 208 or this part.

§ 1600.735-405 INTERESTS OF EMPLOYEES' RELATIVES

The interest of a spouse, minor child, or other member of an employee's immediate household is considered to be an interest of the employee. For the purpose of this section, "member of an employee's immediate household" means those blood relations who are residents of the employee's household.

§ 1600.735–406 INFORMATION NOT KNOWN BY EMPLOYEES

If any information required to be included on a statement of employment and financial interests or supplementary statement, including holdings placed in trust, is not known to the employee but is known to another person, the employee shall request that other person to submit information in his behalf.

§ 1600.735–407 INFORMATION NOT REQUIRED

This subpart does not require an employee to submit on a statement of employment and financial interests or supplementary statement any information relating to the employee's connection with, or interest in a professional society or a charitable, religious, social, fraternal, recreational public service, civil, or political organization or a similar organization not conducted as a business enterprise. For the purpose of this section, educational and other institutions doing research and development or related work involving grants of money from or contracts with the Government are deemed "business enterprises" and are required to be included in an employee's statement of employment and financial interests.

§ 1600.753–408 CONFIDENTIALITY OF EMPLOYEES' STATEMENTS

The agency shall hold each Statement of Employment and Financial Interests, and each supplementary statement, in confidence. The Director of Personnel or other employee authorized to review or retain a statement are responsible for maintaining them in confidence and shall not allow access to, or allow information to be disclosed from, a statement except to carry out the purpose of this part. The agency may not disclose information from a statement except as the Civil Service Commission or the Chairman, EEOC, may determine for good cause shown.

§ 1600.753–409 EFFECT OF EMPLOYEES' STATEMENTS ON OTHER REQUIREMENTS

The Statements of Employment and Financial Interest and supplementary statements are in addition to, and not in substitution for, or in derogation of, any similar requirement imposed by law, order, or regulation. The submission of a statement or supplementary statement by an employee does not permit him or any other person to participate in a matter in which he or the other person's participation is prohibited by law, order, or regulation.

PART 1601—PROCEDURAL REGULATIONS

Sec.

1601.1 Purpose.

SUBPART A—DEFINITIONS

1601.2 Terms defined in Title VII of the Civil Rights Act of 1964, as amended.
1601.3 Title VII, as amended: Commission.
1601.3a Vice Chairman's functions.
1601.4 Region; subregion.

SUBPART B—PROCEDURE FOR THE PREVENTION OF UNLAWFUL EMPLOYMENT PRACTICES

1601.5 Submission of information.
1601.6 Charges by or on behalf of aggrieved persons.
1601.7 Where to make a charge.
1601.8 Forms; jurat.
1601.9 Withdrawal of charge by an aggrieved person.
1601.10 Charges by members of the Commission.
1601.11 Contents; amendment.

Sec.
1601.28 Request for interpretation or opinion; who may file.
1601.29 Contents of request; where to file.
1601.30 Issuance of interpretation or opinion.

SUBPART E—CONSTRUCTION OF RULES

1601.31 Rules to be liberally construed.

SUBPART F—ISSUANCE, AMENDMENT, OR REPEAL OF RULES

1601.32 Petitions.
1601.33 Action on Petition.

Authority: The provisions of this Part 1601 are issued under sec. 713, 78 Stat. 265; 42 U.S.C. 2000e–12.

Source: The provisions of this Part 1601 appear at 30 F.R. 8407, July 1, 1965, unless otherwise noted.

§ 1601.1 PURPOSE

The regulations set forth in this Part 1601 contain the procedures established by the Equal Employment Opportunity Commission for carrying out its responsibilities in the administration and enforcement of Title VII of the Civil Rights Act of 1964. Based upon its experience in the administration of the Act and upon its evaluation of suggestions and petitions for amendments submitted by interested persons in accordance with § 1601.32, the Commisison may from time to time amend and revise these procedures.

Subpart A—Definitions

§ 1601.2. TERMS DEFINED IN TITLE VII OF THE CIVIL RIGHTS ACT OF 1964, AS AMENDED

The terms "person," "employer," employment agency," "labor organization," "employee," "commerce," industry affecting commerce," "State," and religion, as used herein shall have the meanings set forth in section 701 of title VII of the Civil Rights Act of 1964, as amended.
[37 FR 9215, May 6, 1972]

§ 1601.3 TITLE VII, AS AMENDED: COMMISSION

The term "title VII, as amended" as used herein shall mean title VII of the Civil Rights Act of 1964 as amended by the Equal Employment Opportunity Act of 1972. The term "Commission" shall mean the Equal Employment Opportunity Commission or any of its designated representatives.
[37 FR 9215, May 6, 1972]

§ 1601.3A VICE CHAIRMAN'S FUNCTIONS

The member of the Commission designated by the President to serve as Vice Chairman shall act as Chairman in the absence or disability of the Chairman or in the event of a vacancy in that office.
[37 FR 9215, May 6, 1972]

§ 1601.4 REGION; SUBREGION

The term "region" as used herein shall mean that part of the United States or any territory thereof fixed by the Commission as a particular region. The term "subregion" shall mean that area within a region fixed by the Commission as a particular subregion.

SUBPART B—PROCEDURE FOR THE PREVENTION OF UNLAWFUL EMPLOYMENT PRACTICES

§ 1601.5 SUBMISSION OF INFORMATION

The Commission will receive information concerning alleged violations of this title from any person. Where the information discloses that a person is entitled to file a charge with the Commission, the appropriate office will render him assistance in the filing of a charge. In the alternative, a member of the Commission may file a charge based upon the information, in accordance with § 1601.10.

§ 1601.6 CHARGES BY OR ON BEHALF OF AGGRIEVED PERSONS

A charge that any person has engaged in or is engaging in an unlawful employment practice within the meaning of title VII, as amended, may be made by or on behalf of any person claiming to be aggrieved. A charge on behalf of a person claiming to be aggrieved may be made by any person, agency, or organization. Such charge need not identify by name the person on whose behalf it is made. The person making the charge, however, must provide the Commission with the name and address of the person on whose behalf the charge is made. During the Commission investigation, Commission personnel shall verify the authorization of such charge by the person on whose behalf such charge is made. The Commission shall keep such information confidential and in making deferrals to State and local authorities pursuant to §§ 1601.10 and 1601.12 not disclose such information to the State or local authorities except on condition that the identity of the person on whose behalf the charge is made be kept confidential. If this condition is violated by a recipient agency, the Commission may decline to honor subsequent requests for such information. A person filing a charge on behalf of an aggrieved person shall be considered a party to the Commission's proceeding with respect to receiving notice at each stage at which notice is sent to parties.
[37 FR 9215, May 6, 1972]

§ 1601.7 WHERE TO MAKE A CHARGE

A charge may be made at the offices of the Commission in Washington, D.C., or any of its field offices or with any designated representative of the Commission.
[37 FR 9215, May 6, 1972]

§ 1601.8 FORMS; JURAT

Such charge shall be in writing and signed, and shall be sworn to before a notary public, designated representative of the Commission, or other person duly authorized by law to administer oaths, and take acknowledgements. Charge forms are available to all persons from all offices of the Commission. Appropriate assistance in filling out forms will be rendered to aggrieved persons or persons filing charges on their behalf by personnel of the Commission.
[37 FR 9215, May 6, 1972]

§ 1601.9 WITHDRAWAL OF A CHARGE BY AN AGGRIEVED PERSON

A charge filed by or on behalf of an aggrieved person may be withdrawn only by the aggrieved person with the consent of the Commission.
[37 FR 9215, May 6, 1972]

§ 1601.10 CHARGES BY MEMBERS OF THE COMMISSION

Any member of the Commission may file a charge in writing with the Commission. If section 706(d) of title VII should be applicable, the Commission, before taking any action with respect to the charge, shall notify the appropriate State or local 706 Agency, as defined in § 1601.12(c), and offer to refer the charge to it, except for certain section 704(a) charges as provided in § 1601.12(f). The Commission will allow the State or local authority a 10-day period to request an opportunity to act under its law except when EEOC notifies the appropriate authority in writing of a different time period.
[37 FR 9215, May 6, 1972]

§ 1601.11 CONTENTS; AMENDMENT

(a) Each charge should contain the following:

(1) The full name and address of the person making the charge.

(2) The full name and address of the person against whom the charge is made (hereinafter referred to as the respondent).

(3) A clear and concise statement of the facts, including pertinent dates, constituting the alleged unlawful employment practice.

(4) If known, the approximate number of employees of the respondent employer of the approximate number of members of the respondent labor organization, as the case may be.

(5) A statement disclosing whether proceedings involving the alleged unlawful employment practice have been commenced before a State or local authority charged with the enforcement of fair employment practice laws, and, if so, the date of such commencement and the name of the authority.

(b) Notwithstanding the provisions of paragraph (a) of this section, a charge is deemed filed when the Commission receives from the person making a charge a written statement sufficiently precise to identify the parties and to describe generally the action or practices complained of. A charge may be amended to cure technical defects or omissions, including failure to swear to the charge, or to clarify and amplify allegations made therein, and such amendments alleging additional acts which constitute unlawful employment practices directly related to or growing out of the subject matter of the original charge will relate back to the original filing date.

[31 FR 10269, July 29, 1966, as amended at 37 FR 9215, May 6, 1972]

§ 1601.12 DEFERRALS TO STATE AND LOCAL AUTHORITIES

(a) In order to give full weight to the policy of section 706(c) of the Act, which affords State and local fair employment practice agencies that fall within the provisions of that section an opportunity to remedy alleged discrimination concurrently regulated by title VII of the Civil Rights Act of 1964 and State or local law, the Equal Employment Opportunity Commission adopts the following procedures with respect to allegations of discrimination filed with the Commission where there is no evidence that such allegations were earlier presented to an appropriate 706 Agency. It is the intent of the Commission to thereby encourage the maximum degree of effectiveness in the State and local agencies. The Commission shall endeavor to maintain close communication with the State and local agencies with respect to all matters forwarded to such agencies and shall provide such assistance to the State and local agency as is permitted by law and is practicable. It is the experience of the Commission that because of the complexities of the present procedures, persons who seek the aid of the Commission are often confused and even risk loss of the protection of the Act. Accordingly, it is the intent of the Commission to simplify procedures for parties in deferral States and localities and thereby avoid the accidental forfeiture of important Federal rights.

(b) The following procedures shall be followed with respect to cases arising in the jurisdiction of "706 Agencies" to which the Commission defers as further defined in paragraph (c) of this section.

(1) Any document, whether or not verified, received by the Equal Employment Opportunity Commission as provided in § 1601.7, which may constitute a charge cognizable under title VII, shall be deferred to the appropriate 706 Agency, as further defined in paragraph (c) of this section, pursuant to the procedures set forth below.

(i) All such documents shall be dated and time stamped on receipt.

(ii) A copy of the original document shall be transmitted by registered mail, return receipt requested, to the appropriate State or local agency, or, where the State or local agency has consented thereto, by certified mail, by regular mail or by hand delivery.

(iii) The aggrieved party and any person filing a charge on behalf of an aggrieved party shall be notified, in writing, that the document which he sent to the Commission has been forwarded to the State or local agency pursuant to the provisions of section 706(c), and that unless the Commission is notified to the contrary, on the termination of State or local proceedings, or after 60 days have passed, whichever comes first, the Commission will consider the charge to be filed with the Commission and commence processing the case. Where the State or local agency terminates its proceedings within 60 days without notification to the Commission of such action, the Commission will consider the charge to be filed with it on the date the person making the charge was notified of the termination.

(iv) The 60-day period shall be deemed to have commenced at the time such document is mailed or delivered to the State or local authority. On notification of the termination of State proceedings or the expiration of 60 days, whichever comes first, the Commission will consider the charge to be filed with the Commission and will commence processing the case.

(v) In cases where the document is filed with the Commission more than 240 days following the alleged act of discrimination but less than 30 days therefrom, the case shall be deferred pursuant to procedures set forth above: ***Provided, however,*** That unless the Commission is earlier notified of the termination of the State or local proceeding, the Commission will consider the charge to be filed with the Commission on the 299th day following the alleged discrimination and will commence processing the case. Where the State or local agency terminates its proceeding prior to the 299th day following the alleged act of discrimination, without notification to the Commission of such action, the Commission will consider the charge to be filed with it on the date the person making the charge was notified of the termination.

(vi) In any case where the State or local agency has not formally notified the Commission as to the termination of the State or local proceeding, the Commission shall serve the notice required by § 1601.13 within 10 days from the date it is made aware of the termination of such proceedings.

(c) 706 Agency defined: For the purposes of this section and § 1601.10, the term "706 Agency" shall include only those agencies which have applied for formal designation by the Commission in accord with the procedures set forth in paragraph (e) of this section; have been formally designated by the Commission in accord with the procedures set forth in paragraph (g) of this section; and have not had their formal designation withdrawn by the Commission in accord with the procedures set forth in paragraph (k) of this section.

(1) *Provided,* That effective immediately and until July 1, 1973, the Commission will consider the agencies designated by public notice as described in paragraph (d) as Provisional 706 Agencies and procedures for deferral of cases in paragraph (b) of this section and § 1601.10 will be followed with respect to them until that date.

(2) *Provided, further,* That no agency on such provisional list will be considered a 706 Agency for the purposes of according weight to its findings pursuant to § 1601.19d until it has complied with the procedures for application for formal designation and has received such formal designation by the Commission and has been listed in these regulations by formal amendment to paragraph (k) of this section.

(d) Provisional 706 Agencies and Provisional Notice Agencies:

(1) *Provisional 706 agencies.* Until October 1, 1974, the Commission will defer charges alleging employment discrimination on the grounds of race, color, religion, sex, or national origin against covered public or private employers, unless otherwise indicated by public notice, arising in the jurisdiction of provisional 706 agencies. Agencies may be added as provisional 706 agencies by public notice issued by the Commission.

(2) *Provisional notice agencies.* Until October 1, 1974, with respect to the jurisdictions of provisional notice agencies, the Commission will not defer, but will, with respect to charges alleging employment discrimination on the grounds of race, color, religion, national origin, and/or where indicated in the public notice which designated the agency a provisional notice agency, (i) Note: Receipt of said charges and serve notice thereof upon the respondent or respondents; (ii) inform the appropriate agency or person of the receipt of the charge. Agencies may be added as provisional notice agencies by public notice issued by the Commission.

(e) Procedure to apply for designation as a 706 Agency: Any agency desiring to be designated as a 706 Agency may obtain an application form from the Commission (by writing to the EEOC Regional Director having jurisdiction or to the Office of State and Community Affairs, 1800 G Street NW., Washington, DC 20506) and shall sumbit it together with the following materials and information:

(1) A copy of the agency's fair employment practices law and any rules, regulations and guidelines of general interpretation issued pursuant thereto.

(2) A chart of the organization of the agency responsible for administering and enforcing said law.

(3) The amount of funds made available to or allocated by the agency for fair employment purposes.

(4) The identity and telephone number of the agency attorney whom the Commission may contact in reference to any legal questions that may arise in the process of its review of the agency's application.

(5) A statement, on a form to be provided by the Commission, certifying the following:

(i) That the law prohibiting discrimination establishes or authorizes that agency to exercise administrative enforcement authority.

(ii) That the law and administrative practice do not place any excessive burdens on the complainant which might discourage the filing of complaints.

(iii) That the law is comparable in scope to title VII coverage and is administered by the agency so that, in fact, the practices prohibited and remedies required are comparable in scope to the practices prohibited and the remedies required under title VII of the Civil Rights Act of 1964, as interpreted by the United States Supreme Court in the case of "Griggs v. Duke Power," 401 U.S. 424 (1971).

(f) Criteria for the protection of Federal rights: No agency shall be designated or continued as a designated 706 Agency unless the law which it administers:

(1) Protects persons from discrimination on essentially all of the grounds covered by title VII as amended; and

(2) Includes in the practices prohibited essentially all of the practices prohibited by title VII as amended; and

(3) Includes in its coverage of persons by whom such practices are declared illegal, essentially all of the classes of persons as defined under title VII; and

(4) Is administered and interpreted by the agency so that it does, in fact, prohibit the practices prohibited by title VII and does, in fact, require the remedies required by title VII.

Provided, however, No agency shall be denied designation as a 706 Agency on the sole ground that the statute which it enforces omits from the practices prohibited (as that term is used in subparagraph (2) of this paragraph) those practices prohibited by section 704(a) of the Civil Rights Act of 1964: *Provided, further, however,* That the Commission will not defer charges alleging a violation of section 704(a) to any 706 Agency administering legislation omitting such a provision unless such agency (in the application for designation required in paragraph (e) of this section or otherwise) specifically certifies that it interprets its legislation to prohibit the practices prohibited by section 704(a). Unless and until this certificate of section 704(a) coverage is received, the Commission will consider section 704(a) charges in such jurisdiction as filed with the Commission when the written statement required by § 1601.11(b) is received and will serve the notice required by § 1601.13.

(g) Commission determinations: The Commission, after examining the materials and applications required in paragraph (e) of this section and after applying criteria outlined in paragraph (f) of this section, shall make a determination.

(1) If the Commission determines that an agency shall be designated as a 706 Agency, it shall notify the agency that it proposes to issue such designation. Such proposed designation shall be published in the FEDERAL REGISTER and shall provide any person or organization not less than 15 days in which to file written comments with the Commission. If after evaluating any comments so received the Commission is still of the opinion that issuance of the proopsed designation as published in the FEDERAL REGISTER is appropriate, it shall effect such designation by issuance and publication of an amendment to paragraph (k) of this section. Thereafter, the procedure in paragraph (b) of this section and § 1601.10 shall be followed for cases in the jurisdiction of the 706 Agency.

(2) If the Commission determines that any agency shall not be designated as a 706 Agency, it shall notify the applicant agency of its decision and such notice shall provide the reason(s) why it proposes not to designate the agency and shall grant it not less than 15 days to request a conference concerning the matter in accord with paragraph (j) of this section.

(h) Performance standards: The continued designation of a 706 Agency will be dependent upon the 706 Agency's willingness and ability to administer its law in such a manner that, in fact, the practices prohibited and remedies required are comparable in scope to those practices prohibited and remedies required under Federal law and satisfy the performance standards set forth below:

(1) In all cases where the 706 Agency finds cause to credit the allegations of a charge, it shall effectively eliminate the discrimination and, where appropriate, provide for full compensatory and prospective relief consistent with the applicable Federal law.

(2) In all cases where the 706 Agency enters into a conciliation agreement, consent order, or order after public hearing, it shall include in any such agreement or order mechanisms for monitoring compliance with the term thereof and mechanisms for enforcing compliance in the event any terms thereof are not implemented.

(i) Withdrawal of designation: The Commission may upon its own motion, upon the motion of any person or organization, or upon the motion of a Regional Director of the Commission, withdraw the designation as a 706 Agency previously issued to an agency based upon (1) reconsideration of the application and materials and the information referenced in paragraph (e) of this section; or

(2) application of the criteria in paragraph (f) of this section; or (3) consideration of the agency's performance as required in paragraph (h) of this section. Whenever the Commission has reason to believe that such designation as a 706 Agency no longer serves the interest of effective enforcement of title VII, it may, after following the procedures below, including the opportunity for a conference provided for in paragraph (j) of this section, withdraw such designation. Before taking such action it shall notify the 706 Agency of its proposed withdrawal of such designation. Such notification shall set forth the reasons for the proposed withdrawal and provide the agency not less than 15 days to submit data, views, and arguments in opposition and to request a conference in accordance with paragraph (j) of this section. Such proposed withdrawal of designation shall also be published in the FEDERAL REGISTER and shall provide any persons or organizations who take an interest at least 15 days in which to file written comments on the proposal with the Commission and to request a conference. If a request for a conference in accordance with paragraph (j) of this section is not received within the time period provided, the Commission shall evaluate any arguments or comments it has received from the agency and from any persons and organizations who take an interest and if, after such evaluation, the Commission still is of the opinion that designation should be withdrawn because it has determined that such designation no longer serves the interest of effective enforcement of title VII, the Commission shall so notify the agency and effect the withdrawal by the issuance and publication of an amendment to paragraph (k) of this section.

(j) Request for conference: In order to provide a State or local agency full opportunity to present its views whenever, pursuant to paragraph (g) or (i) of this section, a conference is requested within the time allowed by said sections for making such request, the Director of State and Community Affairs or his designee shall hold such a conference. Said conference officer shall issue a preconference order. The order shall indicate the issues to be resolved and any initial procedural instructions which might be appropriate for the particular conference. It shall fix the date, time, and place of the conference. The date shall not be less than 20 days after the date of the order. The date and place shall be subject to change for good cause.

(1) A copy of such preconference order shall be served on the State or local agency and on any person or organization who files a written comment in accordance with paragraph (g) or (i) of this section. The agency and all such persons and organizations shall be deemed to be participants in the conference. After service of the order, or of a notice designating a conference officer and until such officer submits his recommended determination, all communications relating to the subject matter of the conference shall be addressed to him. The conference officer shall have full authority to regulate the course and conduct of the conference. A transcript shall be made of the proceedings at the conference. The transcript and all comments and petitions relating to the proceedings shall be made available for inspection by interested persons.

(2) The conference officer shall prepare his proposed findings and recommended determination, a copy of which shall be served on each participant. Within 20 days after such service any participant may file written exceptions. After the expiration of the period for filing exceptions, the conference officer shall certify the entire record, including his proposed findings and recommended determination and exceptions thereto, to the Commission, which shall review the record and issue a final determination.

(3) Such determination shall become effective by the issuance and publication of an amendment to paragraph (k) of this section.

(k) The designated 706 Agencies are:

(1) Baltimore Community Relations Commission.
Iowa Commission on Civil Rights.
Wisconsin Department of Industry, Labor and Human Relations.
(2) Bloomington Human Rights Commission.
(3) Dade County Fair Housing and Employment Commission.
(4) East Chicago Human Relations Commission.
(5) Gary Human Relations Commission.
(6) Idaho Commission on Human Rights.
(7) Kansas Commission on Civil Rights.
(8) Kentucky Commission on Human Rights.
(9) New York City Commission on Human Rights.
(10) Ohio Civil Rights Commission.
(11) Oklahoma Human Rights Commission.
(12) Philadelphia Commission on Human Relations.

(13) Seattle Human Rights Commission.
(14) Tacoma Human Rights Commission.
(15) Washington State Human Rights Commission.

The Notice Agencies are:

(1) Florida Commission on Human Relations.
(2) South Carolina Human Affairs Commission (Sec. 713(a) (76 Stat. 265 (42 U.S.C. 2000e–12(a))).

I—Provisional 706 Agencies

NOTE 1: Pursuant to § 1601.12(d)(1) as amended and published in the FEDERAL REGISTER Vol. 38, No. 121, June 25, 1973, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) has extended until July 1, 1974, designation of the agencies listed in Chart I below as Provisional 706 Agencies for the purposes of receiving referenced types of charges deferred by the Commission, pursuant to section 706 (c) and (d) of Title VII of the Civil Rights Act of 1964, as amended.

The designations reflected herein were officially adopted by the Commission on April 17, 1972, and extended June 25, 1973. The Commission may, from time to time, amend the designations listed herein by subsequent publications.

NOTE 2: If this list contains two or more agencies whose geographic jurisdiction is concurrent as to a particular charge, the Commission reserves the right to defer the charge to only one of the agencies and to make an administrative determination as to which agency is more appropriate to the effective enforcement of title VII.

II—Provisional Notice Agencies

NOTE. 1: Pursuant to § 1601.12(d)(2) of Title 29 as amended in the FEDERAL REGISTER, Vol. 38, No. 121, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) has extended, until July 1, 1974, designation of the agencies and persons listed in Chart II below as Provisional Notice Agencies. With respect to the referenced types of charges, the Commission will (1) note receipt of said charge and serve notice upon the respondent or respondents, (2) schedule the charge for investigation, and (3) inform the agency or person indicated in this charter of the receipt of the charge.

The designations reflected herein were officially adopted by the Commission on April 17, 1972, and extended on June 25, 1973. The Commission may from time to time, amend the designations listed herein by subsequent public notice.

II—PROVISIONAL NOTICE AGENCIES

State	State law prohibits discrimination on account of race, color, religion, and national origin, and charges alleging violations on these grounds will be forwarded to the agency listed below.	State law bars sex discrimination.	State has enacted a (sex) equal pay statute and agency (or title of person) listed below will be forwarded charges filed alleging violations on those grounds.	State PEP law appears to prohibit discrimination by State or local governments, government agencies, and political subdivisions.

37 FR 9215, May 6, 1972, as amended at 38 FR 16640, June 25, 1973; 38 FR 20829, Aug. 3, 1973; 39 FR 23996, June 28, 1974]

§ 1601.13 SERVICE OF A NOTICE OF CHARGE

Within 10 days after the filing of a charge, the Commission shall furnish the respondent with a notice thereof by mail or in person (including the date, place and circumstances of the alleged unlawful employment practice). Unless otherwise determined by the Commission, the notice shall not indentify the person filing the charge or on whose behalf it was filed. When a charge is received at some other Federal office (EEOC or otherwise) than the appropriate EEOC District office, it shall be forwarded immediately to that District office and notice shall be mailed to the respondent within 10 days after receipt of the charge in that District office, or after termination of any necessary deferral period, as the case may be.

[37 FR 9217, May 6, 1972]

Investigation of a Charge

§ 1601.14 BY WHOM MADE

The investigation of a charge shall be made by the Commission. During the course of such investigation, the Commission may utilize the services of State and local agencies which are charged with the administration of fair employment practice laws or appropriate Federal agencies, and, to the extent relevant, may utilize the information gathered by such agencies. As a part of each investigation, the person making the charge on behalf of the aggrieved person, the aggrieved person, and the respondent shall each be offered an opportunity to submit a statement of its position or evidence with respect to the allegations.

[37 FR 9218, May 6, 1972]

§ 1601.15 DOCUMENTARY EVIDENCE; SUMMONING WITNESSES AND TAKING TESTIMONY

(a) To effectuate the purposes of title VII, as amended, any member of the Commission shall have the authority to issue subpenas requiring the attendance and testimony of witnesses and the production of evidence, including, but not limited to, books, records, correspondence, or documents, in the possession or under the control of the person subpenaed. Any District Director or Deputy District Director of the Commission may issue and sign a subpena on behalf of the Commission. The subpena shall state the name and address of its issuer, identify the person subpenaed, the person to whom and the place, date, and time at which it is returnable. A subpena may be returnable to a duly authorized investigator or other representative of the Commission. No member of the Commission or any District Director or his deputy will issue a subpena upon request of a person filing a charge, a person on whose behalf a charge was filed, or a respondent.

(b) Any person served with a subpena whether ad testificandum or duces tecum who intends not to comply therewith, shall, within 5 days after the date of service of the subpena upon him, petition the Director of Compliance by mail at 1800 G Street NW., Washington, D.C. 20506 (serving a copy upon the District Director who issued the subpena) to revoke or modify the subpena. The petition shall state each ground upon which the petitioner relies. Within 5 days after receipt thereof, so far as practicable, the Director of Compliance shall make a determination upon the petition, stating reasons, which shall be reviewed by the Commission and unless the Commission decides otherwise shall become final 3 days thereafter. The Commission shall serve a copy of the final determination of the petition upon the petitioner. For purposes of this section, service shall be made and proof thereof established pursuant to section 11(4) of the National Labor Relation Act, as amended, 29 U.S.C. 161(4), as made applicable to proceedings hereunder by section 710 of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e-9.

(c) Upon the failure of any person to comply with a subpena issued under this section, the Commission may utilize the procedures of section 11(2) of the National Labor Relation Act as amended, 29 U.S.C. 161(2), to compel enforcement of the subpena.

[37 FR 9218, May 6, 1972]

§ 1601.16 WITNESSES

To effectuate the purposes of Title VII, the Commission may demand in writing that a person appear at a stated time and place within the State in which such person resides, transacts business, or is served with the demand, for the purpose of testifying under oath before the Commission or its representative. If there be noncompliance with any such demand, the Commission may utilize the procedures of section 710(b) of Title VII to compel such person to testify. A transcript of testimony may be made a part of the record of each investigation.

§ 1601.17 PAYMENT OF WITNESS FEES AND MILEAGE

Witnesses who testify as provided above shall be paid the same fees and mileage that are paid witnesses in the courts of the United States.

§ 1601.18 RIGHT TO INSPECT OR COPY DATA

A person who submits data or evidence to the Commission may retain or, on payment of lawfully prescribed costs, procure a copy or transcript thereof, except that a witness may for good cause be limited to inspection of the official transcript of his testimony.

Procedure Following Filing of Charge[1]

NOTE: Amendments made 35 F.R. 3163, February 19, 1970 re charges shall be applicable with respect to charges presently pending in which the investigation had not been completed by February 19, 1970; 35 FR 10110, June 19, 1970.

§ 1601.19 DISMISSAL OF CHARGE

Whereas the allegations of a charge on its face, or as amplified by the statements of the charging party to the Commission, disclose that the charge is not timely filed or otherwise fails to state a valid claim for relief under title VII, the Commission, through the Director of the District Office where the charge is lodged, may dismiss the charge without further action. Where notice of the charge or

---

[1] FR 3163, Feb. 19, 1970.

the charge has been served the aggrieved person, the person making the charge on behalf of such person, where applicable, and the respondent shall be notified in writing of the disposition of the charge, together with the reasons therefor.
[37 FR 20165, Sept. 27, 1972]

§ 1601.19a PREDETERMINATION SETTLEMENT PROCEDURE

At any time subsequent to a preliminary investigation and prior to the issuance of a determination as to reasonable cause, the District Directors, or other designated officers, may engage in settlement discussions. The District Directors, or other designated officers, may make and approve settlements, on behalf of the Commission, in those cases where such authority has been delegated to them by the Commission.
[37 FR 20165, Sept. 27, 1972]

§ 1601.19b DETERMINATION AS TO REASONABLE CAUSE

(a) If the Commission determines that a charge fails to state a valid claim for relief under title VII, or that there is not reasonable cause to believe that a charge is true, the Commission shall dismiss the charge. Where, however, it determines that there is reasonable cause to believe that an unlawful employment practice has occurred or is occurring, it shall endeavor to eliminate such practice by informal methods of conference, conciliation, and persuasion.

(b) The Commission shall promptly notify the aggrieved person, the person making a charge on behalf of such person, where applicable, and the respondent, or, in the case of a charge filed under § 1601.10, the person aggrieved, if known and the respondent of its determination under paragraph (a) of this section. The determination is final when issued; therefore, requests for reconsideration will not be granted. The Commission may, however, on its own motion, reconsider its determination at any time and, when it does so, the Commission shall promptly notify the aggrieved person, the person making the charge on behalf of the aggrieved person, where applicable, and the respondent, or, in the case of a charge filed under § 1601.10, the person aggrieved, if known, and the respondent of its subsequent decision on reconsideration.

(c) Where a member of the Commission has filed a charge under § 1601.10, that member shall not participate in the determination in that case.

(d) The District Directors, or other designated officers, on behalf of the Commissioner, may, upon completioin of an investigation, dismiss charges, make and issue determinations as to reasonable cause, and serve a copy thereof upon the parties, and make and approve conciliation agreements in those cases where such authority has been delegated to them by the Commission. The determination is final when issued; therefore, requests for reconsideration will not be granted. The District Directors, or other designated officers, may, however, on their own motion, reconsider their determination at any time and, when they do so, they shall promptly notify the aggrieved person, the person making the charge on behalf of the aggrieved person, where applicable, and the respondent, or in the case of a charge filed under § 1601.10, the person aggrieved, if known, and the respondent of their subsequent decision on reconsideration.

(e) In making a determination as to whether reasonable cause exists, substantial weight shall be accorded final findings and orders made by designated 706 agencies, as listed in § 1601.12(k) pursuant to the requirements of section 706(b), (c), and (d) of title VII. For the purposes of this section, the following definitions shall apply:

(1) "Final findings and orders" shall mean:

(i) The findings of fact and order incident thereto issued by a 706 Agency after a public hearing on the merits of a charge; or

(ii) The consent order or consent decree entered into by the 706 Agency prior to or during a public hearing on the merits of a charge, if such consent order or decree may be enforced by the courts. *Provided, however,* That no findings and order of a 706 Agency shall be considered the final findings and order for purposes of this section unless the 706 Agency shall have served a copy of such findings and order upon the Commission and upon the persons claiming to be aggrieved; and shall have informed such persons of their rights of appeal, or to request reconsideration, or rehearing or similar rights; and the time for such appeal, reconsideration, or rehearing request shall have expired or the issues on such appeal, reconsideration, or rehearing shall have been fully determined.

(2) "Substantial weight" shall mean that such full and careful consideration shall be accorded to final findings and orders, as defined above, as is appropriate in light of the facts supporting them, when they meet all of the prerequisites set forth below:

(i) The proceedings were fair and regular; and

(ii) The remedies and relief granted are comparable in scope to the remedies and relief required by Federal law; and

(iii) The final findings and order serve the interest of the effective enforcement of title VII.

Provided, That giving "substantial weight to final findings and orders" of a "706 Agency" does not include according weight, for purposes of applying Federal law, to that agency's conclusions of law.

[37 FR 21065, Sept. 27, 1972]

§ 1601.20 CONFIDENTIALITY

Neither a charge, nor information obtained pursuant to section 709(a) of title VII, nor information obtained from records required to be kept or reports required to be filed pursuant to section 709 (c) and (d) of said title, shall be made matters of public information by the Commission prior to the institution of any proceedings under this title involving such charge or information. This provision does not apply to such earlier disclosures to the charging party, the respondent, witnesses, and representatives of interested Federal, State, and local agencies as may be appropriate or necessary to the carrying out of the Commission's functions under the title, nor to the publication of data derived from such information in a form which does not reveal the identity of the charging party, respondent, or person supplying the information.

[36 F.R. 20600, Oct. 27, 1971]

Procedure To Rectify Unlawful Employment Practices

§ 1601.22 CONCILIATION; SETTLEMENTS

In conciliating a case in which a determination of reasonable cause has been made, the Commission shall attempt to achieve a just resolution and to obtain assurances that the respondent will eliminate the unlawful employment practice and take appropriate affirmative action. Disposition of a case pursuant to this section shall be in writing, and notice thereof shall be sent to the parties. Proof of the Commission's functions under the title: *Provided*, That the Commission is closed.

[31 F.R. 10270, July 29, 1966]

§ 1601.23 REFUSAL OF RESPONDENT TO COOPERATE

Should a respondent fail or refuse to confer with the Commission or its representative, or fail or refuse to make a good faith effort to resolve any dispute, the Commission may terminate its efforts to conciliate the dispute. In such event, the respondent shall be notified promptly, in writing, that such efforts have been unsuccessful and will not be resumed except upon the respondent's written request within the time specified in such notice.

§ 1601.24 CONFIDENTIALITY OF ENDEAVORS

Nothing that is said or done during and as part of the informal endeavors of the Commission to eliminate unlawful employment practices by informal methods of conference, conciliation, and persuasion may be made a matter of public information by the Commission, its officers or employees, or used as evidence in a subsequent proceeding without the written consent of the parties concerned. This provision does not apply to such disclosures to the representatives of Federal, State, and local agencies as may be appropriate or necessary to the carrying out of the Commission's functions under the title: *Provided*, That the Commission may refuse to make disclosures to any such agency which does not maintain the confidentiality of such endeavors in accord with this section or in any circumstances where the disclosures will not serve the purposes of the effective enforcement of title VII.

[37 FR 9218, May 6, 1972]

Procedure After Failure of Conciliation

§ 1601.25 NOTICE TO RESPONDENT, PERSON FILING A CHARGE ON BEHALF OF THE AGGRIEVED PERSON AND AGGRIEVED PERSONS

(a) In any instance in which the Commission is unable to obtain voluntary compliance as provided by Title VII, as amended, it shall so notify the repondent, the person filing a charge on behalf of the aggrieved person, the aggrieved person or persons, and any State or local agency to which the charge has been previously deferred pursuant to § 1601.12 or § 1601.10. Notification to the aggrieved person shall include:

(1) A copy of the charge.

(2) A copy of the Commission's reasonable cause or no reasonable cause determination as appropriate.

(3) Advice concerning his or her rights to proceed in court under Section 709(f) (1) of Title VII.

(b) The Commission hereby delegates to its District Directors, Deputy District Directors, and the Director of Compliance, the authority to issue Notices of Right-To-Sue on behalf of the Commission in all cases except those in which a government, governmental agency or political subdivision is named in the charge, pursuant to the procedures set forth in paragraph (a) (2) and (3) of this section.

[39 FR 10123, Mar. 18, 1974]

§ 1601.25a PRELIMINARY OR TEMPORARY RELIEF

In the interest of the expeditious procedure required by section 706(f) (2) of title VII, as amended, the Commission hereby delegates to the District Director the authority, upon the basis of a preliminary investigation, to make the determination on its behalf that prompt judicial action is necessary to carry out the purposes of the Act, and, where the District Director so determines, the Commission or the Attorney General in a case involving a government, governmental agency, or political subdivision, may bring an action for appropriate temporary or preliminary relief pending final disposition of such charge.

[37 FR 9219, May 6, 1972]

§ 1601.25b PROCESSING OF CASES, WHEN NOTICE ISSUES UNDER § 1601.25

(a) The Commission may bring a civil action against any respondent named in a charge, not a government, governmental agency or political subdivision, after thirty (30) days from the date of the filing of a charge with the Commission unless a conciliation agreement acceptable to the Commission has been secured. Where the person claiming to be aggrieved is not a party to such an agreement, the agreement shall not extinguish or in any way prejudice such person's right to proceed in court under section 706(f) (1).

(b) The Commission shall not issue a notice pursuant to § 1601.25 prior to a determination under § 1601.19b or where reasonable cause has been found prior to efforts at concilation with respondent, except as provided in paragraph (c) of this section.

(c) At any time after the expiration of one hundred and eighty (180) days from the date of the filing of a charge or upon dismissal of a charge at any stage of the proceedings, an aggrieved person may demand in writing that a notice issue pursuant to § 1601.25, and the Commission shall promptly issue a notice, and provide copies thereof and copies of the charge to all parties.

(d) Issuance of notice pursuant to paragraph (c) of this section shall suspend further Commission proceedings unless the Field Director determines that it is in the public interest to continue such proceedings, or unless, within twenty (20) days after receipt of such notice, a party requests the Field Director, in writing, to continue to process the case.

[37 FR 9219, May 6, 1972, as amended at 37 FR 20165, Sept. 27, 1972; 38 FR 34810, Dec. 19, 1973]

§ 1601.25c ISSUANCE OF NOTICE IN CASES INVOLVING COMMISSIONER CHARGES

(a) Section 706f(1) of the Civil Rights Act of 1964, as amended, provides that in cases involving Commissioner charges when the Commission has been unable to secure voluntary compliance with the Act, the Commission shall notify any person whom the charge alleges was aggrieved by the alleged unlawful employment practices of his right to sue in a Federal District Court. To come within the purview of this section an individual may either be specifically designated by name or be among the class of persons aggrieved by the practices complained of in the charge. Accordingly, in cases involving Commissioner charges, the Commission will follow the procedures outlined in paragraphs (b), (c), (d), and (e) of this section.

(b) The Commission shall not issue any Notice-of-Right-to-Sue prior to a determination on the merits, except as provided in paragraph (d) of this section. Furthermore, where the Commission has found reasonable cause, the Commission shall not issue such notice prior to failure of the Commission's conciliation efforts except as provided in paragraph (d) of this section.

(c) Where the Commission has found reasonable cause but has been unable to obtain voluntary compliance with title VII, the Commission shall so notify the respondent and all identifiable members of the class aggrieved by the practices complained of in the charge. Notification to aggrieved members of the class shall include the following:

(1) A copy of the charge.

(2) A copy of the Commission decision.

(3) Advice concerning his right to proceed in court under section 706(1) of title VII.

(d) At any time after 180 days have expired since the charge was filed, any member of the class aggrieved by the practices alleged in the charge may demand in writing that a Notice-of-Right-to-Sue issue, and the Commission shall promptly issue such Notice-of-Right-to-Sue, pursuant to paragraph (c) of this section and provide copies thereof and copies of the charge to all parties.

(e) Issuance of a notice pursuant to paragraph (d) of this section does not terminate the Commission's jurisdiction of the proceeding and the case shall continue to be processed.

[37 FR 9219, May 6, 1972]

§ 1601.26 REFERRAL TO THE ATTORNEY GENERAL

If the Commission is unable to obtain voluntary compliance, it may inform the Attorney General of appropriate facts in the case with recommendations for intervention by him in a civil action previously instituted by an aggrieved party under section 706 of Title VII, and the Commission may make public the fact that it has so recommended to the Attorney General. The Commission may further recommend to the Attorney General that he institute a civil action under section 707 of said title involving a pattern or practice of resistance to the full enployment of any of the rights secured by said title.

SUBPART C—NOTICES TO EMPLOYEES, APPLICANTS FOR EMPLOYMENT AND UNION MEMBERS

§ 1601.27 NOTICES TO BE POSTED

(a) Every employer, employment agency, labor organization, and joint labor-management committee controlling an apprenticeship or other training program, as the case may be, shall post and keep posted in conspicuous places upon its premises where notice to employees, applicants for employment, members, and trainees are customarily posted the following notice:

EQUAL EMPLOYMENT OPPORTUNITY
is the Law

DISCRIMINATION IS PROHIBITED

By The Civil Rights Act of 1964
And By Executive Order Number 11246

Title VII of the Civil Rights Act of 1964—Administered by The Equal Employment Opportunity Commission Prohibits discrimination because of Race, Color, Religion, Sex, or National Origin By Employers with 25 or more employees, by Labor Organizations with a hiring hall of 25 or more members, by Employment Agencies, and by Joint Labor-Management Committee for Apprenticeship of Training.

ANY PERSON

who believes he or she has
been discriminated against

SHOULD CONTACT

The Equal Employment Opportunity Commission, 1800 G Street NW., Washington, DC 20506.

OR ANY OF ITS
FIELD OFFICES

Executive Order Number 11246[1]—Administered by The Office of Federal Contract Compliance Prohibits discrimination because of Race, Color, Religion, Sex, or National Origin, and requires affirmative action to ensure equality of opportunity in all aspects of employment. By all Federal Government Contractors and Subcontractors, and by Contracts and Subcontractors, and by Contractors and Subcontractors Performing Work Under a Federally Assisted Constuction Contract, regardless of the number of employees in either case—

ANY PERSON

who believes he or she has
been discriminated against

SHOULD CONTACT

The Office of Federal Contract Compliance, U.S. Department of Labor, Washington, DC 20210.

(b) Copies of such notice may be obtained on request from the Commission.

(c) Section 711(b) of Title VII makes failure to comply with this section punishable by a fine of not more than $100 for each separate offense.

[31 F.R. 9004, June 30, 1966, as amended at 36 F.R. 9068, May 19, 1971]

SUBPART D—INTERPRETATIONS AND OPINIONS BY THE COMMISSION

§ 1601.28 REQUEST FOR INTERPRETATION OR OPINION; WHO MAY FILE

Any interested person desiring a written interpretation or opinion from the Commission may make a request therefor.

§ 1601.29 CONTENTS OF REQUEST; WHERE TO FILE

A request for an "opinion letter" shall be in writing, signed by the person making the request addressed to the Chairman, Equal Employment Opportunity Commission, Washington, D.C., and shall contain:

(a) The names and addresses of the person making the request and of other interested persons.

(b) A statement of all known relevant facts.

(c) A statement of reasons why the interpretation or opinion should be issued.

§ 1601.30 ISSUANCE OF INTERPRETATION OR OPINION

Only (a) a letter entitled "opinion letter" and signed by the General Counsel on behalf of the Commission or (b) matter published and so designated in the FEDERAL REGISTER may be considered a "written interpretation or opinions of the Commission" within the meaning of section 713 of Title VII.

SUBPART E—CONSTRUCTION OF RULES

§ 1601.31 RULES TO BE LIBERALLY CONSTRUED

The rules and regulations in this part shall be liberally construed to effectuate the purpose and provisions of Title VII.

SUBPART F—ISSUANCE, AMENDMENT, OR REPEAL OF RULES

§ 1601.32 PETITIONS

Any interested person may petition the Commission, in writing, for the issuance, amendment, or repeal of a rule or regulation. An original and 12 legibly duplicated (not carbon) copies of such petition shall be filed with the Commission in Washington, D.C., and shall state the rule or regulation proposed to be issued, amend, or repealed, together with a statement of grounds in support of such petition.

---

[1] As amended by Executive Order 11375.

§ 1601.33 ACTION ON PETITION

Upon the filing of such petition, the Commission shall consider the same and may thereupon either grant or deny the petition in whole or in part, conduct an appropriate proceeding thereon, or make fater disposition of the petition. Should the petition be denied in whole or in part, prompt notice shall be given of the denial, accompanied by a simple statement of the grounds unless the denial be self-explanatory.

1602.46 Applicability of State or local law.

Authority: The provisions of this Part 1602 issued under sections 709, 713, 78 Stat. 263, 265; 42 U.S.C. 2000e-8, 2000e-12, unless otherwise noted.

§ 1602.1 GENERAL

(a) Section 709 of Title VII requires the Commission to establish regulations pursuant to which employers, labor organizations, joint labor-management committees, and employment agencies subject to said Title shall make and preserve certain records and shall furnish specified information to aid in the administration and enforcement of the Title.

(b) This Part 1602 sets forth the procedure to be used by the Commission in establishing, amending and revoking such regulations, and by future amendments will set forth regulations so established.

[30 F.R. 8409, July 1, 1965]

§ 1602.2 INITIATING A PROCEEDING

Source: The provisions of this Subpart A appear at 30 F.R. 8409, July 1, 1965; F.R. 2832, Feb. 17, 1966, unless otherwise noted.

The Commission, on its own motion, or upon the petition of an interested person submitted as provided in § 1601.32 of this chapter, may initiate a proceeding to make, amend, or revoke regulations requiring persons subject to Title VII to make or keep records or to provide information in accordance with section 709.

§ 1602.3 NOTICE OF A PROCEEDING

(a) Notice of the institution of a proceeding shall be published in the FEDERAL REGISTER. Such notice shall (1) refer to section 709 as authority for the proposed regulations and direct attention to this Part 1602 governing the procedure; (2) contain the terms or substance of the proposed regulations; and (3) invite interested persons (i) to participate in a public hearing to be held with respect to the proposed regulations, specifying the time and place that such hearing shall commence and information that must be submitted earlier by persons desiring to participate, and (ii) to submit pertinent written data, view, and argument by means other than participation in a hearing, specifying the time and place for such submission.

(b) The Commission may also give additional notice of the initiation of a proceeding as it may deem necessary or appropriate.

§ 1602.4 PROCEDURE GOVERNING PUBLIC HEARINGS

A hearing under § 1602.3 shall be conducted by a member of the Commission or its designed representative who shall have authority to administer oaths and affirmations. Such hearing shall be made available to interested persons upon such terms as the Commission may provide. Matters which the Commission may wish to be made a part of the record shall be presented at the hearing by an attorney designed by the Commission who may call and examine witnesses, and cross-examine witnesses called by other persons. Subject to such limitations as the presiding officer may impose to limit the record to pertinent matters, every interested person shall be afforded the opportunity to offer evidence through witnesses, to cross-examine witnesses called by others, and to present argument. The presiding officer shall dispose of procedural requests, objections and comparable matters. The presiding officer shall also have power to call and examine witnesses, to govern the content of the record, to exclude persons from the hearing room for good cause, and, upon the conclusion of the testimony, to keep the hearing open for a stated reasonable time in order to receive written proposals and supporting reasons.

§ 1602.5 DECISION

After the close of the hearing and the receipt of materials under § 1602.3(a)(3)(ii), the Commission shall carefully consider all matters presented to it and any other matter available, and shall thereafter make a final decision adopting, rejecting, or modifying the proposed regulation. The decision shall be expressed in a document signed by the Chairman of the Commission on behalf of the Commission and shall be published in the Federal Register as an amendment to this Part 1602.

§ 1602.6 EFFECTIVE DATE OF RECORD KEEPING AND REPORTING RULES

Except to the extent that such decision of the Commission relieves a restriction, it shall provide an effective date for the change of not less than 30 days after the date of its publication in the Federal Register unless a shorter time is provided for good cause found and expressed in the document.

SUBPART B—EMPLOYER INFORMATION REPORT

SOURCE: The provisions of this Subpart B appear at 32 F.R. 2833, Feb. 17, 1966, unless otherwise noted.

§ 1602.7 REQUIREMENT FOR FILING OF REPORT

On or before March 31, 1967, and annually thereafter, every employer subject to title VII of the Civil Rights Act of 1964 which meets the 100-employee test set forth in section 701(b) thereof shall file with the Commission or its delegate executed copies of Standard Form 100, as revised (otherwise known as "Employer Information Report EEO–1") in conformity with the directions set forth in the form and accompanying instructions. Notwithstanding the provisions of § 1602.14, every such employer shall retain at all times at each reporting unit, or at company or divisional headquarters, a copy of the most recent report filed for each such unit and shall make the same available if requested by an officer, agent, or employee of the Commission under the authority of section 710 of title VII. Appropriate copies of Standard Form 100 in blank will be supplied to every employer known to the Commission to be subject to the reporting requirements, but it is the responsibility of all such employers to obtain necessary supplies of same prior to the filing date from the Joint Reporting Committee, Federal Depot, 1201 East 10 Street, Jeffersonville, IN 47130.
[37 FR 9219, May 6, 1972]

§ 1602.8 PENALTY FOR MAKING OF WILLFULLY FALSE STATEMENTS ON REPORT

The making of willfully false statements on Report EEO–1 is a violation of the United States Code, Title 18, section 1001, and is punishable by fine or imprisonment as set forth therein.

§ 1602.9 COMMISSION'S REMEDY FOR EMPLOYER'S FAILURE TO FILE REPORT

Any employer failing or refusing to file Report EEO-1 when required to do so may be compelled to file by order of a U.S. District Court, upon application of the Commission.

§ 1602.10 EMPLOYER'S EXEMPTION FROM REPORTING REQUIREMENTS

If an employer is engaged in activities for which the reporting unit criteria described in section 4(c) of the Instructions are not readily adaptable, special reporting procedures may be required. In such case, the employer should so advise by submitting to the Commission or its delegate a specific proposal for an alternative reporting system prior to the date on which the report is due. If it is claimed that the preparation or filing of the report would create undue hardship, the employer may apply to the Commission for an exemption from the requirements set forth in this part.

§1602.11 ADDITIONAL REPORTING REQUIREMENTS

The Commission reserves the right to require reports, other than that designated as the Employer Information Report EEO–1, about the employment practices of individual employers or groups of employers whenever, in its judgment, special or supplemental reports are necessary to accomplish the purposes of Title VII. Any system for the requirement of such reports will be established in accordance with the procedures referred to in section 709(c) of Title VII and as otherwise prescribed by law.

SUBPART C—RECORDKEEPING BY EMPLOYERS

Source: The provisions of this Subpart C appear at 31 F.R. 2833, Feb. 17, 1966, unless otherwise noted.

§ 1602.12 RECORDS TO BE MADE OR KEPT

The Commission has not adopted any requirement, generally applicable to employers, that records be made or kept. It reserves the right to impose recordkeeping requirements upon individual employers or groups of employers subject to its jurisdiction whenever, in its judgment, such records (a) are necessary for the effective operation of the EEO–1 reporting system or of any special or supplemental reporting system as described above; or (b) are further required to accomplish the purposes of Title VII. Such recordkeeping with the procedures referred to in section 709(c), and as otherwise prescribed by law.

§ 1602.13 RECORDS AS TO RACIAL OR ETHNIC IDENTITY OF EMPLOYEES

Employers may acquire the information necessary for completion of Items 5 and 6 of Report EEO–1 either by visual surveys of the work force, or at their option, by the maintenance of post-employment records as to the identity of employees where the same is permitted by State law. In the latter case, however, the Commission recommends the maintenance of a permanent record as to the racial or ethnic identity of an individual for purpose of completing the report form only where the employer keeps such records separately from the employee's basic personnel form or other records available to those responsible for personnel decisions, e.g., as part of an automatic data processing system in the payroll department.

§ 1602.14 PRESERVATION OF RECORDS MADE OR KEPT

(a) Any personnel or employment record made or kept by an employer (including but not necessarily limited to application forms submitted by applicants and other records having to do with hiring, promotion, demotion, transfer, layoff or termination, rates of pay or other terms of compensation, and selection for training or apprenticeship) shall be preserved by the employer for a period of 6 months from the date of the making of the record or the personnel action involved, whichever occurs later. In the case of involuntary termination of an employee, the personnel records of the individual terminated shall be kept for a period of 6 months from the date of termination. Where a charge of discrimination has been filed, or an action brought by the Commission or the Attorney General, against an employer under title VII, the respondent employer shall preserve all personnel records relevant to the charge or action until final disposition of the charge or the action. The term "personnel records relevant to the charge," for example, would include personnel or employment records relating to the aggrieved person and to all other employees holding positions similar to that held or sought by the aggrieved person and application forms or test papers completed by an unsuccessful applicant and by all other candidates for the same position as that for which the aggrieved person applied and was rejected. The date of "final disposition of the charge or the action" means the date of expiration of the statutory period within which the aggrieved person may bring an action in a U.S. District Court or, where an action is brought against an employer either by the aggrieved person, the Commission, or by the Attorney General, the date on which such litigation is terminated.

(b) The requirements of this section shall not apply to application forms and other preemployment records of applicants for positions known to applicants to be a temporary or seasonable nature.

NOTE: The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

[37 FR 9219, May 6, 1972]

SUBPART D—APPRENTICESHIP INFORMATION REPORT

Source: The provisions of this Subpart D appear at 32 FR 10650, July 20, 1967, unless otherwise noted.

§ 1602.15 REQUIREMENTS FOR FILING AND PRESERVING COPY OF REPORT

On or before September 30, 1967, and annually thereafter, certain joint labor-management committees subject to title VII of the Civil Rights Act of 1964 which control apprenticeship programs shall file with the Commission, or its delegate, executed copies of Apprenticeship Information Report EEO-2 in conformity with the directions set forth in the form and accompanying instructions. The committees covered by this regulation are those which (a) have five or more apprentices enrolled in the program at any time during August and September of the reporting year, and (b) represent at least one employer sponsor and at least one labor organization sponsor which are themselves subject to title VII. Every such committee shall retain at all times among the records maintained in the ordinary course of its affairs a copy of the most recent report filed, and shall make the same available if requested by an officer, agent, or employee of the Commission under the authority of section 710 of title VII. It is the responsibility of all such committees to obtain from the Commission or its delegate necessary supplies of the form.

[37 FR 9220, May 5, 1972]

§ 1602.16 PENALTY FOR MAKING WILLFULLY FALSE STATEMENTS ON REPORT

The making of willfully false statements on Report EEO-2 is a violation of the U.S. Code, Title 18, section 1001, and is punishable by fine or imprisonment as set forth therein.

§ 1602.17 COMMISSION'S REMEDY FOR FAILURE TO FILE REPORT

Any person failing or refusing to file Report EEO-2 when required to do so may be compelled to file by order of a U.S. District Court, upon application of the Commission, under authority of section 709(c) of title VII.

[37 FR 9220, May 6, 1972]

§ 1602.18 EXEMPTION FROM REPORTING REQUIREMENTS

If it is claimed that the preparation or filing of Report EEO-2 would create undue hardship, the committee may apply to the Commission for an exemption from the requirements set forth in this part.

§ 1602.19 ADDITIONAL REPORTING REQUIREMENTS

The Commission reserves the right to require report, other than that designated as Report EEO-2, about apprenticeship procedures of joint labor-management committees, employers, and labor organizations whenever, in its judgment, special or supplemental reports are necessary to accomplish the purpose of Title VII. Any system for the requirement of such reports will be established in accordance with the procedures referred to in section 709(c) of Title VII and as otherwise prescribed by law.

SUBPART E—APPRENTICESHIP RECORDKEEPING

Source: The provisions of this Subpart E appear at 32 FR 10660, July 20, 1967, unless otherwise noted.

§ 1602.20 RECORDS TO BE MADE OR KEPT

(a) Every person required to file Report EEO–2 shall make or keep such records as are necessary for its completion under the conditions and circumstances set forth in the instructions accompanying the report, which are specifically incorporated herein by reference and have the same force and effect as other sections of this part.

(b) Every employer, labor organization, and joint labor-management committee subject to Title VII which controls an apprenticeship program (regardless of any joint or individual obligation to file a report) shall, beginning August 1, 1967, maintain a list in chronological order containing the names and addresses of all persons who have applied to participate in the apprenticeship program, including the dates on which such applications where received. (See section 709(c), Title VII, Civil Rights Act of 1964). Such list shall contain a notation of the sex of the applicant and of the applicant's identification as "Negro," "Spanish Surnamed American," "Oriental," "American Indian," or "Other." The methods of making such identification are set forth in the instructions accompanying Report EEO–2, section 7. The words "applied," "applicant" and "application" as used in this section refer to situations involving actual applications only. An applicant is considered to be a person who files a formal application, or in some informal way indicates a specific intention to be considered for admission to the apprenticeship program. A person who casually appears to make an informal inquiry about the program, or about apprenticeship in general, is not considered to be an applicant. The term "apprenticeship program" as used herein refers to programs described in section 8 of the instructions accompanying Report EEO–2.

(c) In lieu of maintaining the chronological list referred to in § 1602.20(b), persons required to compile the list may maintain on file written applications for participation in the apprenticeship program, provided that the application form contains a notation of the date the form was received, the address of the applicant, and a notation of the sex, and the race, color, or national origin of the applicant as described above.

[32 FR 10650, July 20, 1967 as amended by 33 FR 282, Jan. 9, 1968]

§ 1602.21 PRESERVATION OF RECORDS MADE OR KEPT

(a) Notwithstanding the provisions of section 1602.14, every person subject to § 1602.20 (b) or (c) shall preserve the list of applicants or application forms, as the case may be, for a period of 2 years from the date the application was received, except that in those instances where an annual report is required by the Commission calling for statistics as to the sex, and the race, color, or national origin of apprentices, the person required to file the report shall preserve the list and forms for a period of 2 years or the period of a successful applicant's apprenticeship, whichever is longer. Persons required to file Report EEO–2, or other reports calling for information about the operation of an apprenticeship program similar to that required on Report EEO–2, shall preserve any other record made solely for the purpose of completing such reports for a period of 1 year from the due date thereof.

(b) Other records: Except to the extent inconsistent with the law or regulation of any State or local fair employment practices agency, or of any other Federal or State agency involved in the enforcement of an antidiscrimination program in apprenticeship, other records relating to apprenticeship made or kept by a person required to file Report EEO–2, including but not necessarily limited to test papers completed by applicants for apprenticeship and records of interviews with applicants, shall be kept for a period of 2 years from the date of the making of the record. Where a charge of discrimination has been filed, or an action brought by the Attorney General under Title VII, the respondent shall preserve all records relevant to the charge or action until final disposition of the charge or the action. The term "records relevant to the charge," for example, would include applications, forms or test papers completed by an unsuccessful applicant and by all other candidates for the same position as that for which the charging party applied and was rejected. The date of "final disposition of the charge or the action" means the date of expiration of the statutory period within which a charging party may bring an action in a U.S. District Court or, where an action is brought either by a charging party or by the Attorney General, the date on which such litigation is terminated.

SUBPART F—LOCAL UNION EQUAL EMPLOYMENT OPPORTUNITY REPORT

Source: The provisions of this Subpart F appear at 32 F.R. 10651, July 20, 1967, unless otherwise noted.

§ 1602.22 REQUIREMENTS FOR FILING AND PRESERVING COPY OF REPORT

On or before November 30, 1967, and annually thereafter, every labor organization subject to title VII of the Civil Rights Act of 1964 shall file with the Commission or its delegate an executed copy of Local Union Equal Employment Opportunity Report EEO–3 in conformity with the directions set forth in the form and accompanying instructions, provided that the labor organization has 100 or more members at any time during the 12 months preceding the due date of the report and is a "local union" (as that term is commonly understood) or an independent or unaffiliated union. Labor organizations required to report are those which perform, in a specific jurisdiction, the functions ordinarily performed by a local union, whether or not they are so designated. Every local union or a labor organization acting in its behalf, shall retain at all times among the records maintained in the ordinary course of its affairs a copy of the most recent report filed, and shall make the same available if requested by an officer, agent, or employee of the Commission under the authority of section 710 of title VII. It is the responsibility of all persons required to file to obtain from the Commission or its delegate necessary supplies of the form.
[37 FR 9220, May 6, 1972]

§ 1602.23 PENALTY FOR MAKING OF WILLFULLY FALSE STATEMENTS ON REPORTS

The making of willfully false statements on Report EEO–3 is a violation of the United States Code, Title 18, section 1001, and is punishable by fine or imprisonment as set forth herein.

§ 1602.24 COMMISSION'S REMEDY FOR FAILURE TO FILE REPORT

Any person failing or refusing to file Report EEO–3 when required to do so may be compelled to file by order of a U.S. District Court, upon application of the Commission, under authority of section 709(c) of title VII.
[37 FR 9220, May 6, 1972]

§ 1602.26 ADDITIONAL REPORTING REQUIREMENTS

If it is claimed that the preparation or filing of Report EEO–3 would create undue hardship, the labor organization may apply to the Commission for an exemption from the requirements set forth in this part.

§ 1602.26 ADDITIONAL REPORTING REQUIREMENTS

The Commission reserves the right to require reports, other than that designated as Report EEO–3, about the membership or referral practices or other procedures of labor organizations, whenever, in its judgment, special or supplemental reports are necessary to accomplish the purposes of Title VII. Any system for requirement of such reports will be established in accordance with the procedures referred to in section 709(c), and as otherwise prescribed by law.

SUBPART G—RECORDKEEPING BY LABOR ORGANIZATIONS

Source: The provisions of this Subpart G appear at 32 F.R. 10651, July 20, 1967, unless otherwise noted.

§ 1602.27 RECORDS TO BE MADE OR KEPT

Those portions of Report EEO–3 calling for information about union policies and practices and for the compilation of statistics on the race, color, national origin, and sex of members, persons referred, and apprentices, are deemed to be "records" within the meaning of section 709(c), Title VII, Civil Rights Act of 1964. Every local, independent, or unaffiliated union with 100 or more members (or any agent acting in its behalf, if the agent has responsibility for referral of persons for employment) shall make these records or such other records as are necessary for the completion of Report EEO-3 under the circumstances and conditions set forth in the instructions accompanying it, which are specifically incorporated herein by reference and have the same force and effect as other sections of this part.

§ 1602.28 PRESERVATION OF RECORDS MADE OR KEPT

(a) All records made by a labor organization or its agent solely for the purpose of completing Report EEO-3 shall be preserved for a period of 1 year from the due date of the report for which they were compiled. Any labor organization identified as a "referral union" in the instructions accompanying Report EEO-3, or agent thereto, shall preserve other membership or referral records (including applications for same) made or kept by it for a period of 6 months from the date of the making of the record. Where a charge of discrimination has been filed, or an action brought by the Commission or the Attorney General, against a labor organization under title VII, the respondent labor organization shall preserve all records relevant to the charge or action until final disposition of the charge or the action. The date of "final disposition of the charge or the action" means the date of expiration of the statutory period within which the aggrieved person may bring an action in a U.S. District Court or, where an action is brought against a labor organization either by the Commission, the aggrieved person, or by the Attorney General, the date on which such litigation is terminated.

(b) Nothing herein shall relieve any labor organization covered by title VII of the obligations set forth in Subpart E, §§ 1602.20 and 1602.21, relating to the establishment and maintenance of a list of applicants wishing to participate in an apprenticeship program controlled by it.

[37 FR 9220, May 6, 1972]

Subpart H—Records and Inquiries as to Race, Color, National Origin, or Sex

§ 1602.29 APPLICABILITY OF STATE OR LOCAL LAW

The requirements imposed by the Equal Employment Opportunity Commission in these regulations, Subparts D through G, supersede any provisions of State or local law which may conflict with them. Any State or local laws prohibiting inquiries and recordkeeping with respect to race, color, national origin, or sex do not apply to inquiries required to be made under these regulations and under the instructions accompanying Reports EEO-2 and EEO-3.

[32 FR 10652, July 20, 1967]

Subpart I—State and Local Governments Recordkeeping

§ 1602.30 RECORDS TO BE MADE OR KEPT

On or before September 30, 1974, and annually thereafter, every political jurisdiction with 15 or more employees is required to make or keep records and the information therefrom which are or would be necessary for the completion of report EEO-4 under the circumstances set forth in the instructions thereto, whether or not the political jurisdiction is required to file such report under § 1602.32 of the regulations in this part. The instructions are specifically incorporated herein by reference and have the same force and effect as other sections of this part.[1] Such records and the information therefrom shall be retained at all times for a period of 3 years at the central office of the political jurisdiction and shall be made available if requested by an officer, agent, or employee of the Commission under section 710 of title VII, as amended. Although agency data are aggregated by functions for purposes of reporting, separate data for each agency must be maintained either by the agency itself or by the office of the political jurisdiction responsible for preparing the EEO-4 form. It is the responsibility of every political jurisdiction to obtain from the Commission or its delegate necessary instructions in order to comply with the requirements of this section.

[38 FR 12604, May 14, 1973]

---

[1] NOTE: Instructions were published as an appendix to the proposed regulations on Mar. 2, 1973 (38 FR 5662).

§ 1602.31 PRESERVATION OF RECORDS MADE OR KEPT

(a) Any personnel or employment record made or kept by a political jurisdiction (including but not necessarily limited to application forms submitted by applicants and other records having to do with hiring, promotion, demotion, transfer, layoff or termination, rates of pay or other terms of compensation, and selection for training or apprenticeship) shall be preserved by the political jurisdiction for a period of 2 years from the date of the making of the record or the personnel action involved, whichever occurs later. In the case of involuntary termination of an employee, the personnel records of the individual terminated shall be kept for a period of 2 years from the date of termination. Where a charge of discrimination has been filed, or an action brought by the Attorney General against a political jurisdiction under title VII, the respondent political jurisdiction shall preserve all personnel records relevant to the charge or action until final disposition of the charge or the action. The term "personnel record relevant to the charge," for example, would include personnel or employment records relating to the person claiming to be aggrieved and to all other employees holding positions similar to that held or sought by the person claiming to be aggrieved; and application forms or test papers completed by an unsuccessful applicant and by all other candidates for the same position as that for which the person claiming to be aggrieved applied and was rejected. The date of final disposition of the charge or the action means the date of expiration of the statutory period within which a person claiming to be aggrieved may bring an action in a U.S. district court or, where an action is brought against a political jurisdiction either by a person claiming to be aggrieved or by the Attorney General, the date on which such litigation is terminated.

(b) The requirements of this section shall not apply to application forms and other preemployment records of applicants for positions known to applicants to be of a temporary or seasonal nature.

NOTE.—The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

[38 FR 12605, May 14, 1973]

SUBPART J—STATE AND LOCAL GOVERNMENT INFORMATION REPORT

SOURCE: 38 FR 12605, May 14, 1973, unless otherwise noted.

§ 1602.32 REQUIREMENT FOR FILING AND PRESERVING COPY OF REPORT

(a) On or before September 30, 1974 and annually thereafter, certain political jurisdictions subject to title VII of the Civil Rights Act of 1964, as amended, shall file with the Commission or its delegate executed copies of "State and Local Government Information Report EEO-4" in conformity with the directions set forth in the form and accompanying instructions. The political jurisdictions covered by this regulation are (1) those which have 100 or more employees, and (2) those other political jurisdictions which have 15 or more employees from whom the Commission requests the filing of reports. Every such political jurisdiction shall retain at all times a copy of the most recently filed EEO-4 at the central office of the political jurisdiction for a period of 3 years and shall make the same available if requested by an officer, agent, or employee of the Commission under the authority of section 710 of title VII, as amended.

(b) For calendar year 1973, the requirements of paragraph (a) of this section shall be carried out on or before October 31, 1973.

§ 1602.33 PENALTY FOR MAKING OF WILLFULLY FALSE STATEMENTS ON REPORT

The making of willfully false statements on report EEO—4, is a violation of the United States Code, title 18, section 1001, and is punishable by fine or imprisonment as set forth therein.

§ 1602.34 COMMISSION'S REMEDY FOR POLITICAL JURISDICTION'S FAILURE TO FILE REPORT

Any political jurisdiction failing or refusing to file report EEO—4 when required to do so may be compelled to file by order of a U.S. district court, upon application of the Attorney General.

§ 1602.35 POLITICAL JURISDICTION'S EXEMPTION FROM REPORTING REQUIREMENTS

If it is claimed that the preparation or filing of the report would create undue hardship, the political jurisdiction may apply to the Commission for an exemption from the requirements set forth in this part by submitting to the Commission or its delegate a specific proposal for an alternative reporting system prior to the date on which the report is due.

§ 1602.36 SCHOOLS EXEMPTION

The recordkeeping and report-filing requirements of Subparts I and J of this part shall not apply to State or local educational institutions or to school districts or school systems or any other educational functions. The previous sentence of this section shall not act to bar jurisdiction which otherwise would attach under § 1602.30.

§ 1602.37 ADDITIONAL REPORTING REQUIREMENTS

The Commission reserves the right to require reports, other than that designated as the "State and Local Government Information Report EEO—4," about the employment practices of individual political jurisdictions or group of political jurisdictions whenever, in its judgment, special or supplemental reports are necessary to accomplish the purposes of title VII. Any system for the requirement of such reports will be established in accordance with the procedures referred to in section 709(c) of title VII and as otherwise prescribed by law.

SUBPART K—RECORDS AND INQUIRIES AS TO RACE, COLOR, NATIONAL ORIGIN, OR SEX

§ 1602.38 APPLICABILITY OF STATE OR LOCAL LAW

The requirements imposed by the Equal Employment Opportunity Commission in these regulations, subparts I and J, supersede any provisions of State or local law which may conflict with them.

[38 FR 12605, May 14, 1973]

SUBPART L—ELEMENTARY AND SECONDARY SCHOOL SYSTEMS, DISTRICTS, AND INDIVIDUAL SCHOOLS RECORDKEEPING

SOURCE: 38 FR 26719, Sept. 25, 1973, unless otherwise noted.

§ 1602.39 RECORDS TO BE MADE OR KEPT

On or before November 30, 1974, and annually thereafter, every public elementary and secondary school system or district, including every individually or separately administered district within a system, with 15 or more employees and every individual school within such system or district, regardless of the size of the school shall make or keep all records and information therefrom which are or would be necessary for the completion of report EEO—5 whether or not it is required to file such a report under § 1602.41. The instructions for completion of report EEO—5 are specifically incorporated herein by reference and have the same force and effect as other sections of this part.[1] Such records and the information therefrom shall be retained at all times for a period of 3 years at the central office of the elementary or secondary school system or district, or at the individual school which is the subject of the records and the information therefrom, where more convenient, and shall be made available if requested by an officer, agent, or employee of the Commission under sec. 710 of Title VII, as amended. It is the responsibility of every such school system or district, to obtain from the Commission or its delegate necessary instructions in order to comply with the requirements of this section.

§ 1602.40 PRESERVATION OF RECORDS MADE OR KEPT

(a) Any personnel or employment record made or kept by a school system, district, or individual school (including but not necessarily limited to application forms submitted by applicants and other records having to do with hiring, promotion, demotion, transfer, layoff, or termination, rates of pay or other terms of compensation, and selection for training or apprenticeship) shall be preserved by such school system, district, or school, as the case may be, for a period of 2 years from the date of the making of the record or the personnel action involved, whichever occurs later. In the case of involuntary termination of an employee, the personnel records of the individual terminated shall be kept for a period of 2 years from the date of termination. Where a charge of discrimination has been filed, or an action brought against an elementary or secondary school by the Commission or the Attorney General, the respondent elementary or secondary school system, district, or individual school shall preserve similarly at the central office of the system or district or individual school which is the subject of the charge or action, where more convenient, all personnel records relevant to the charge or action until final disposition thereof. The term "personnel record relevant to the charge," for example, would include personnel or employment records relating to the person claiming to be aggrieved and to all other employees holding positions similar to that held or sought by the person claiming to be aggrieved; and application forms or test papers completed by an unsuccessful applicant and by all other candidates for the same position as that for which the person claiming to be aggrieved applied and was rejected. The date of "final disposition of the charge or the action" means the date of expiration of the statutory period within which a person claiming to be aggrieved may bring an action in a U.S. district court or, where an action is brought against a school system, district, or school either by a person claiming to be aggrieved, the Commission, or the Attorney General, the date on which such litigation is terminated.

---

[1] NOTE: Instructions were published as an appendix to the proposed regulations on June 12, 1973 (38 FR 15463).

(b) The requirements of this section shall not apply to application forms and other preemployment records of applicants for positions known to applicants to be a exemplary or seasonal nature.

Notes: The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

SUBPART M—ELEMENTARY-SECONDARY STAFF INFORMATION REPORT

Source: 38 FR 26719, Sept. 25, 1973, unless otherwise noted.

§ 1602.41 REQUIREMENT FOR FILING AND PRESERVING COPY OF REPORT

(a) On or before November 30, 1974, and annually thereafter, certain public elementary and secondary school systems and districts, including individually or separately administered districts within such systems, and individual schools within such systems or districts shall file with the Commission or its delegate executed copies of Eelementary-Secondary Staff Information Report EEO–5 in conformity with the directions set forth in the form and accompanying instructions. The elementary and secondary school systems and districts covered are: (1) Every one of those which have 100 or more employees, and (2) every one of those others which have 15 or more employees from whom the Commission requests the filing of reports. Every such elementary or secondary school system or district shall retain at all times, for a period of 3 years, a copy of the most recently filed report EEO–5 at the central office of the school system or district, or the individual school which is the subject of the report, where more convenient, and shall make the same available if requested by an officer, agent, or employee of the Commission under the authority of sec. 710 of Title VII, as amended. It is the responsibility of the school systems or districts above described in this section to obtain from the Commission or its delegate necessary supplies of the form.

(b) For calendar year 1973, the requirements of paragraph (a) of this section shall be carried out on or before January 15, 1974.

[38 FR 26719, Sept. 25, 1973, as amended at 38 FR 32576, Nov. 27, 1973]

§ 1602.42 PENALTY FOR MAKING OF WILLFULLY FALSE STATEMENTS ON REPORT

The making of willfully false statements on report EEO–5 is a violation of the United States Code, Title 18, section 1001, and is punishable by fine or imprisonment as set forth therein.

§ 1602.43 COMMISSION'S REMEDY FOR SCHOOL SYSTEMS', DISTRICTS, OR INDIVIDUAL SCHOOL'S FAILURE TO FILE REPORT

Any school system, district, or individual school failing or refusing to file report EEO–5 when required to do so may be compelled to file by order of a U.S. district court, upon application of the Commission or the Attorney General.

§ 1602.44 SCHOOL SYSTEMS', DISTRICTS', OR INDIVIDUAL SCHOOLS' EXEMPTION FROM REPORTING REQUIREMENTS

If it is claimed that the preparation or filing of the report would create undue hardship, the school system, district, or individual school may apply to the Commission for an exemption from the requirements set forth in this part by submitting to the Commission or its delegate a specific proposal for an alternative reporting system prior to the date on which the report is due.

§ 1602.45 ADDITIONAL REPORTING REQUIREMENTS

The Commission reserves the right to require reports, other than that designated as the Elementary-Secondary Information Report EEO-5, about the employment practices of private or public individual school systems, districts, or schools, or groups thereof, whenever, in its judgment, special or supplemental reports are necessary to accomplish the purposes of Title VII. Any system for the requirement of such reports will be established in accordance with the procedures referred to in section 709(c) of Title VII and as otherwise prescribed by law.

SUBPART N—RECORDS AND INQUIRIES AS TO RACE, COLOR, NATIONAL ORIGIN, OR SEX

§ 1602.46 APPLICABILITY OF STATES OR LOCAL LAW

The requirements imposed by the Equal Employment Opportunity Commission in these regulations, Subparts L and M of this part, supersede any provisions of State or local law which may conflict with them.

(Sec. 709(c), 78 Stat. 265, 42 U.S.C. 2000e–8(c), 29 CFR 1602.3.) [38 FR 26720, Sept. 25, 1973]

PART 1604—GUIDELINES ON DISCRIMINATION BECAUSE OF SEX

Sec.

1604.1 General principles.
1604.2 Sex as a bona fide occupational qualification.
1604.3 Separate lines of progression and seniority systems.
1604.4 Discrimination against married women.
1604.5 Job opportunities advertising.
1604.6 Employment agencies.
1604.7 Pre-employment inquiries as to sex.
1604.8 Relationship of Title VII to the Equal Pay Act.
1604.9 Fringe benefits.
1604.10 Employment policies relating to pregnancy and childbirth.

Authority: The provisions of this Part 1604 issued under sec. 713(b), 78 Stat. 265, 42 U.S.C. sec. 2000e–12.

Source: 37 FR 6836, April 5, 1972, unless otherwise noted.

§ 1604.1 GENERAL PRINCIPLES

(a) References to "employer" or "employers" in this Part 1604 state principles that are applicable not only to employers but also to labor organizations and to employment agencies insofar as their action or inaction may adversely affect employment opportunities.

(b) To the extent that the views expressed in prior Commission pronouncements are inconsistent with the views expressed herein, such prior views are hereby overruled.

(c) The Commission will continue to consider particular problems relating to sex discrimination on a case-by-case basis.

§ 1604.2 SEX AS A BONA FIDE OCCUPATIONAL QUALIFICATION

(a) The Commission believes that the bona fide occupational qualification exception as to sex should be interpreted narrowly. Labels—"Men's jobs" and "Women's jobs"—tend to deny employment opportunities unnecessarily to one sex or the other.

(1) The Commission will find that the following situations do not warrant the application of the bona fide occupational qualification exception:

(i) The refusal to hire a woman because of her sex based on assumptions of the comparative employment characteristics of women in general. For example, the assumption that the turnover rate among women is higher than among men.

(ii) The refusal to hire an individual based on stereotyped characterizations of the sexes. Such stereotypes include, for example, that men are less capable of assembling intricate equipment; that women are less capable of aggressive salesmanship. The principle of nondiscrimination requires that individuals be considered on the basis of individual capacities and not on the basis of any characteristics generally attributed to the group.

(iii) The refusal to hire an individual because of the preferences of coworkers, the employer, clients or customers except as covered specifically in subparagraph (2) of this paragraph.

(2) Where it is necessary for the purpose of authenticity or genuineness, the Commission will consider sex to be a bona fide occupational qualification, e.g., an actor or actress.

(b) Effect of sex-oriented State employment legislation.

(1) Many States have enacted laws or promulgated administrative regulations with respect to the employment of females. Among these laws are those which prohibit or limit the employment of females, e.g., the employment of females in certain occupations, in jobs requiring the lifting or carrying of weights exceeding certain prescribed limits, during certain hours of the night, for more than a specified number of hours per day or per week, and for certain periods of time before and after childbirth. The Commission has found that such laws and regulations do not take into account the capacities, preferences, and abilities of individual females and, therefore, discriminate on the basis of sex. The Commission has concluded that such laws and regulations conflict with and are superseded by title VII of the Civil Rights Act of 1964. Accordingly, such laws will not be considered a defense to an otherwise established unlawful employment practice or as a basis for the application of the bona fide occupational qualification exception.

(2) The Commission has concluded that State laws and regulations which discriminate on the basis of sex with regard to the employment of minors are in conflict with and are superseded by title VII to the extent that such laws are more restrictive for one sex. Accordingly, restrictions on the employment of minors of one sex over and above those imposed on minors of the other sex will not be considered a defense to an otherwise established unlawful employment practice or as a basis for the application of the bona fide occupational qualification exception.

(3) A number of States require that minimum wage and premium pay for overtime be provided for female employees. An employer will be deemed to have engaged in an unlawful employment practice if:

(i) It refuses to hire or otherwise adversely affects the employment opportunities of female applicants or employees in order to avoid the payment of minimum wages or overtime pay required by State law; or

(ii) It does not provide the same benefits for male employees.

(4) As to other kinds of sex-oriented State employment laws, such as those requiring special rest and meal periods or physical facilities for women, provision of these benefits to one sex only will be a violation of title VII. An employer will be deemed to have engaged in an unlawful employment practice if:

(i) It refuses to hire or otherwise adversely affects the employment opportunities of female applicants or employees in order to avoid the provision of such benefits; or

(ii) It does not provide the same benefits for male employees. If the employer can prove that business necessity precludes providing these benefits to both men and women, then the State law is in conflict with and superseded by title VII as to this employer. In this situation, the employer shall not provide such benefits to members of either sex.

(5) Some States require that separate restrooms be provided for employees of each sex. An employer will be deemed to have engaged in an unlawful employment practice if it refuses to hire or otherwise adversely affects the employment opportunities of applicants or employees in order to avoid the provision of such restrooms for persons of that sex.

§ 1604.3 SEPARATE LINES OF PROGRESSION AND SENIORITY SYSTEMS

(a) It is an unlawful employment practice to classify a job as "male" or "female" or to maintain separate lines of progression or separate seniority lists based on sex where this would adversely affect any employee unless sex is a bona fide occupational qualification for that job. Accordingly, employment practices are unlawful which arbitrarily classify jobs so that:

(1) A female is prohibited from applying for a job labeled "male," or for a job in a "male" line of progression; and vice versa.

(2) A male scheduled for layoff is prohibited from displacing a less senior female on a "female" seniority list; and vice versa.

(b) A Seniority system or line of progression which distinguishes between "light" and "heavy" jobs constitutes an unlawful employment practice if it operates as a disguised form of classification by sex, or creates unreasonable obstacles to the advancement by members of either sex into jobs which members of that sex would reasonably be expected to perform.

§ 1604.4 DISCRIMINATION AGAINST MARRIED WOMEN

(a) The Commission has determined that an employer's rule which forbids or restricts the employment of married women and which is not applicable to married men is a discrimination based on sex prohibited by title VII of the Civil Rights Act. It does not seem to us relevant that the rule is not directed against all females, but only against married females, for so long as sex is a factor in the application of the rule, such application involves a discrimination based on sex.

(b) It may be that under certain circumstances, such a rule could be justified within the meaning of section 703(e)(1) of title VII. We express no opinion on this question at this time except to point out that sex as a bona fide occupational qualification must be justified in terms of the peculiar requirements of the particular job and not on the basis of a general principle such as the desirability of spreading work.

§ 1604.5 JOB OPPORTUNITIES ADVERTISING

It is a violation of title VII for a help-wanted advertisement to indicate a preference, limitation, specification, or discrimination based on sex unless sex is a bona fide occupational qualification for the particular job involved. The placement of an advertisement in columns classified by publishers on the basis of sex, such as columns headed "Male" or "Female" will be considered an expression of a preference, limitation, specification, or discrimination based on sex.

§ 1604.6 EMPLOYMENT AGENCIES

(a) Section 703(b) of the Civil Rights Act specifically states that it shall be unlawful for an employment agency to discriminate against any individual because of sex. The Commission has determined that private employment agencies which deal exclusively with one sex are engaged in an unlawful employment practice, except to the extent that such agencies limit their services to furnishing employees for particular jobs for which sex is a bona fide occupational qualification.

(b) An employment agency that receives a job order containing an unlawful sex specification will share responsibility with the employer placing the job order if the agency fills the order knowing that the sex specification is not based upon a bona fide occupational qualification. However, an employment agency will not be deemed to be in violation of the law, regardless of the determination as to the employer, if the agency does not have reason to believe that the employer's claim of bona fide occupations qualification is without substance and the agency makes and maintains a written record available to the Commission of each such job order. Such record shall include the name of the employer, the description of the job and the basis for the employer's claim of bona fide occupational qualification.

(c) It is the responsibility of employment agencies to keep informed of opinions and decisions of the Commission on sex discrimination.

§ 1604.7 PRE-EMPLOYMENT INQUIRIES AS TO SEX

A pre-employment inquiry may ask "Male ____________, Female ____________"; or "Mr. Mrs. Miss," provided that the inquiry is made in good faith for a nondiscriminatory purpose. Any pre-employment inquiry in connection with prospective employment which expresses directly or indirectly any limitation, specification, or discrimination as to sex shall be unlawful unless based upon a bona fide occupational qualification.

§ 1604.8 RELATIONSHIP OF TITLE VII TO THE EQUAL PAY ACT

(a) The employee coverage of the prohibitions against discrimination based on sex contained in title VII is coextensive with that of the other prohibitions contained in title VII and is not limited by section 703(h) to those employees covered by the Fair Labor Standards Act.

(b) By virtue of section 703(h), a defense based on the Equal Pay Act may be raised in a proceeding under title VIII.

(c) Where such a defense is raised the Commission will give appropriate consideration to the interpretations of the Administrator, Wage and Hour Division, Department of Labor, but will not be bound thereby.

§ 1604.9 FRINGE BENEFITS

(a) "Fringe benefits," as used herein, includes medical, hospital, accident, life insurance and retirement benefits; profit-sharing and bonus plans; leave; and other terms, conditions, and privileges of employment.

(b) It shall be an unlawful employment practice for an employer to discriminate between men and women with regard to fringe benefits.

(c) Where an employer conditions benefits available to employees and their spouses and families on whether the employees is the "head of the household" or "principal wage earner" in the family unit, the benefits tend to be available only to male employes and their families. Due to the fact that such conditioning discriminatorily affects the rights of women employees, and that "head of household" or "principal wage earner" status bears no relationship to job performance, benefits which are so conditioned will be found a prima facie violation of the prohibitions against sex discrimination contained in the Act.

(d) It shall be an unlawful employment practice for an employer to make available benefits for the wives and families of male employees where the same benefits are not made available for the husbands and families of female employees; or to make available benefits for the wives of male employees which are not made available for female employees; or to make available benefits to the husbands of female employees which are not made available for male employees. An example of such an unlawful employment practice is a situation in which wives of male employees receive maternity benefits while female employees receive no such benefits.

(e) It shall not be a defense under title VIII to a charge of sex discrimination in benefits that the cost of such benefits is greater with respect to one sex than the other.

(f) It shall be an unlawful employment practice for an employer to have a pension or retirement plan which establishes different optional or compulsory retirement ages based on sex, or which differentiates in benefits on the basis of sex. A statement of the General Counsel of September 13, 1968, providing for a phasing out of differentials with regard to optional retirement age for certain incumbent employees is hereby withdrawn.

§ 1604.10 EMPLOYMENT POLICIES RELATING TO PREGNANCY AND CHILDBIRTH

(a) A written or unwritten employment policy or practice which excludes from employment applicants or employees because of pregnancy is in prima facie violation of title VII.

(b) Disabilities caused or contributed to by pregnancy, miscarriage, abortion, childbirth, and recovery therefrom are, for all job-related purposes, temporary disabilities and should be treated as such under any health or temporary disability insurance or sick leave plan available in connection with employment. Written and unwritten employment policies and practices involving matters such as the commencement and duration of leave, the availability of extensions, the accrual of seniority and other benefits and privileges, reinstatement, and payment under any health or temporary disability insurance or sick leave plan, formal or informal, shall be applied to disability due to pregnancy or childbirth on the same terms and conditions as they are applied to other temporary disabilities.

(c) Where the termination of an employee who is temporarily disabled is caused by an employment policy under which insufficient or no leave is available, such a termination violates the Act if it has a disparate impact on employees of one sex and is not justified by business necessity.

PART 1605—GUIDELINES ON DISCRIMINATION BECAUSE OF RELIGION

§ 1605.1 OBSERVATION OF THE SABBATH AND OTHER RELIGIOUS HOLIDAYS

(a) Several complaints filed with the Commission have raised the question whether it is discrimination on account of religion to discharge or refuse to hire employees who regularly observe Friday evening and Saturday, or some other day of the week, as the Sabbath or who observe certain special religious holidays during the year and, as a consequence, do not work on such days.

(b) The Commission believes that the duty not to discriminate on religious grounds, required by section 703(a)(1) of the Civil Rights Act of 1964, includes an obligation on the part of the employer to make reasonable accommodations to the religious needs of employees and prospective employees where such accommodations can be made without undue hardship on the conduct of the employer's business. Such undue hardship, for example, may exist where the employee's needed work cannot be performed by another employee of substantially similar qualifications during the period of absence of the Sabbath observer.

(c) Because of the particularly sensitive nature of discharging or refusing to hire an employee or applicant on account of his religious beliefs, the employer has the burden of proving that an undue hardship renders the required accommodations to the religious needs of the employee unreasonable.

(d) The Commission will review each case on an individual basis in an effort to seek an equitable application of these guidelines to the variety of situations which arise due to the varied religious practices of the American people.

(Sec. 713(a), 78 Stat. 265; 42 U.S.C. 2000e-12) [32 F.R. 10298, July 13, 1967]

PART 1606—GUIDELINES ON DISCRIMINATION BECAUSE OF NATIONAL ORIGIN

§ 1606.1 GUIDELINES ON DISCRIMINATION BECAUSE OF NATIONAL ORIGIN

(a) The Commission is aware of the widespread practices of discrimination on the basis of national origin, and intends to apply the full force of law to eliminate such discrimination. The bona fide occupational qualification exception as it pertains to national origin cases shall be strictly construed.

(b) Title VII is intended to eliminate covert as well as the overt practices of discrimination, and the Commission will, therefore, examine with particular concern cases where persons within the jurisdiction of the Commission have been denied equal employment opportunity for reasons which are grounded in national origin considerations. Examples of cases of this character which have come to the attention of the Commission include: The use of tests in the English language where the individual tested came from circumstances where English was not that person's first language or mother tongue, and where English language skill is not a requirement of the work to be performed; denial of equal opportunity to persons married to or associated with persons of a specific national origin; denial of equal opportunity because of membership in lawful organizations identified with or seeking to promote the interests of national groups; denial of equal opportunity because of attendance at schools or churches commonly utilized by persons of a given national origin; denial of equal opportunity because their name or that of their spouse reflects a certain national origin, and denial of equal opportunity to persons who as a class of persons tend to fall outside national norms for height and weight where such height and weight specifications are not necessary for the performance of the work involved.

(c) Title VII of the Civil Rights Act of 1964 protects all individuals, both citizen and noncitizens, domiciled or residing in the United States, against discrimination on the basis of race, color, religion, sex, or national origin.

(d) Where discrimination on the basis of citizenship against a lawfully immigrated alien residing in the United States has the purpose or effect of discriminating against persons of a particular national origin, such person may not be discriminated against on the basis of citizenship, except that it is not an unlawful employment practice for an employer pursuant to section 703(g), to refuse to employ any person who does not fulfill the requirements imposed in the interests of national security pursuant to any statute of the United States or any Executive Order of the President respecting the particular position or the particular premises in question.

(e) In addition, some states have enacted laws prohibiting the employment of noncitizens. Where such laws have the purpose or effect of discriminating on the basis of national origin, they are in conflict with and are, therefore, superseded by Title VII of the Civil Rights Act of 1964, as amended.

(Sec. 713(a), 78 Stat. 265; 42 U.S.C. 2000e–12) [35 FR 421, Jan. 13, 1970; 39 FR 10123, Mar. 18, 1974]

PART 1607—GUIDELINES ON EMPLOYEE SELECTION PROCEDURES

Sec.
1607.1 Statement of purpose.
1607.2 "Test" defined.
1607.3 Discrimination defined.
1607.4 Evidence of validity.
1607.5 Minimum standards for validation.
1607.6 Presentation of validity evidence.
1607.7 Use of other validity studies.
1607.8 Assumption of validity.
1607.9 Continued use of tests.
1607.10 Employment agencies and employment services.
1607.11 Disparate treatment.
1607.12 Retesting.
1607.13 Other selection techniques.
1607.14 Affirmative action.

Authority: The provisions of this Part 1607 issued under sec. 713(a), 78 Stat. 265; 42 U.S.C. 2000e–12.

Source: The provisions of this Part 1607 appear at 35 F.R. 12333, Aug. 1, 1970, unless otherwise noted.

§ 1607.1 STATEMENT OF PURPOSE

(a) The guidelines in this part are based on the belief that property validated and standardized employee selection procedures can significantly contribute to the implementation of nondiscriminatory personnel policies, as required by title VII. It is also recognized that professionally developed tests, when used in conjunction with other tools of personnel assessment and complemented by sound programs of job design, may significantly aid in the development and maintenance of an efficient work force and, indeed, aid in the utilization and conservation of human resources generally.

(b) An examination of charges of discrimination filed with the Commission and an evaluation of the results of the Commission's compliance activities has revealed a decided increase in total test usage and a marked increase in doubtful testing practices which, based on our experience, tend to have discriminatory effects. In many cases, persons have come to rely almost exclusively on tests as the basis for making the decision to hire, transfer, promote, grant membership, train, refer or retain, with the result that candidates are selected or rejected on the basis of a single test score. Where tests are so used, minority candidates frequently experience disproportionately high rates of rejection by failing to attain score levels that have been established as minimum standards for qualification.

It has also become clear that in many instances persons are using tests as the basis for employment decisions without evidence that they are valid predictors of employee job performance. Where evidence in support of presumed relationships between test performance and job behavior is lacking, the possibility of discrimination in the application of test results must be recognized. A test lacking demonstrated validity (i.e., having no known significant relationship to job behavior) and yielding lower scores for classes protected by title VII may result in the reject of many who have necessary qualifications for successful work performance.

(c) The guidelines in this part are designed to serve as a workable set of standards for employers, unions and employment agencies in determining whether their selection procedures conform with the obligations contained in title VII of the Civil Rights Act of 1964. Section 703 of title VII places an affirmative obligation upon employers, labor unions, and employment agencies, as defined in section 701 of the Act, not to discriminate because of race, color, religion, sex, or national origin Subsection (h) of section 703 allows such persons "* * * to give and to act upon the results of any professionally developed ability test provided that such test, its administration or action upon the results is not designed, intended or used to discriminate because of race, color, religion, sex or national origin."

§ 1607.2 "TEST" DEFINED

For the purpose of the guidelines in this part, the term "test" is defined as any paper-and-pencil or performance measure used as a basis for any employment decision. The guidelines in this part apply, for example, to ability tests which are designed to measure eligibility for hire, transfer, promotion, membership, training, referral or retention. This definition includes, but is not restricted to, measures of general intelligence, mental ability and learning ability; specific intellectual abilities; mechanical, clerical and other aptitudes; dexterity and coordination; knowledge and proficiency; occupational and other interests; and attitudes, personality or temperament. The term "test" includes all formal, scored, quantified or standardized techniques of assessing job suitability including, in addition to the above, specific qualifying or disqualifying personal history or background requirements, specific educational or work history requirements, scored interviews, biographical information blanks, interviewers' rating scales, scored application forms, etc.

§ 1607.3 DISCRIMINATION DEFINED

The use of any test which adversely affects hiring, promotion, transfer or any other employment or membership opportunity of classes protected by title VII constitutes discrimination unless: (a) the test has been validated and evidences a high degree of utility as hereinafter described, and (b) the person giving or acting upon the results of the particular test can demonstrate that alternative suitable hiring, transfer or promotion procedures are unavailable for his use.

§ 1607.4 EVIDENCE OF VALIDITY

(a) Each person using tests to select from among candidates for a position or for membership shall have available for inspection evidence that the tests are being used in a manner which does not violate § 1607.3. Such evidence shall be examined for indications of possible discrimination, such as instances of higher rejection rates for minority candidates than nonminority candidates. Furthermore, where technically feasible, a test should be validated for each minority group with which it is used; that is, any differential rejection rates that may exist, based on a test, must be relevant to performance on the jobs in question.

(b) The term "technically feasible" as used in these guidelines means having or obtaining a sufficient number of minority individuals to achieve findings of statistical and practical significance, the opportunity to obtain unbiased job performance criteria, etc. It is the responsibility of the person claiming absence of technical feasibility to positively demonstrate evidence of this absence.

(c) Evidence of a test's validity should consist of empirical data demonstrating that the test is predictive of or significantly correlated with important elements of work behavior which comprise or are relevant to the job or jobs for which candidates are being evaluated.

(1) If job progression structures and seniority provisions are so established that new employees will probably, within a reasonable period of time and in a great majority of cases, progress to a higher level, it may be considered that candidates are being evaluated for jobs at that higher level. However, where job progression is not so nearly automatic, or the time span is such that higher level jobs or employees' potential may be expected to change in significant ways, it shall be considered that candidates are being evaluated for a job at or near the entry level. This point is made to underscore the principle that attainment of or performance at a higher level job is a relevant criterion in validating employment tests only when there is a high probability that persons employed will in fact attain that higher level job within a reasonable period of time.

(2) Where a test is to be used in different units of a multiunit organization and no significant differences exist between units, jobs, and applicant populations, evidence obtained in one unit may suffice for the others. Similarly, where the validation process requires the collection of data throughout a multiunit organization, evidence of validity specific to each unit may not be required. There may also be instances where evidence of validity is appropriately obtained from more than one company in the same industry. Both in this instance and in the use of data collected throughout a multi-unit organization, evidence of validity specific to each unit may not be required: *Provided*, That no significant differences exist between units, jobs, and applicant populations.

§ 1607.5 MINIMUM STANDARDS FOR VALIDATION

(a) For the purpose of satisfying the requirements of this part, empirical evidence in support of a test's validity must be based on studies employing generally accepted procedures for determining criterion-related validity, such as those described in "Standards for Educational and Psychological Tests and Manuals" published by American Psychological Association, 1200 17th Street NW., Washington, D.C. 20036. Evidence of content or construct validity, as defined in that publication, may also be appropriate where criterion-related validity is not feasible. However, evidence for content or construct validity should be accompanied by sufficient information from job analyses to demonstrate the relevance of the content (in the case of job knowledge or proficiency tests) or the construct (in the case of trait measures). Evidence of content validity alone may be acceptable for well-developed tests that consist of suitable samples of the essential knowledge, skills or behaviors composing the job in question. The types of knowledge, skills or behaviors contemplated here do not include those which can be acquired in a brief orientation to the job.

(b) Although any appropriate validation strategy may be used to develop such empirical evidence, the following minimum standards, as applicable, must be met in the research approach and in the presentation of results which constitute evidence of validity:

(1) Where a validity study is conducted in which tests are administered to applicants, with criterion data collected later, the sample of subjects must be representative of the normal or typical candidate group for the job or jobs in question. This further assumes that the applicant sample is representative of the minority population available for the job or jobs in question in the local labor market. Where a validity study is conducted in which tests are administered to present employees, the sample must be representative of the minority groups currently included in the applicant population. If it is not technically feasible to include minority employees in validation studies conducted on the present work force, the conduct of a validation study without minority candidates does not relieve any person of his subsequent obligation for validation when inclusion of minority candidates becomes technically feasible.

(2) Tests must be administered and scored under controlled and standardized conditions, with proper safeguards to protect the security of test scores and to insure that scores do not enter into any judgments of employee adequacy that are to be used as criterion measures. Copies of tests and test manuals, including instructions for administration, scoring, and interpretation of test results, that are privately developed and/or are not available through normal commercial channels must be included as a part of the validation evidence.

(3) The work behaviors or other criteria of employee adequacy which the test is intended to predict or identify must be fully described; and, additionally, in the case of rating techniques, the appraisal form(s) and instructions to the rater(s) must be included as a part of the validation evidence. Such criteria may include measures other than actual work proficiency, such as training time, supervisory ratings, regularity of attendance and tenure. Whatever criteria are used they must represent major or critical work behaviors as revealed by careful job analyses.

(4) In view of the possibility of bias inherent in subjective evaluations, supervisory rating techniques should be carefully developed, and the ratings should be closely examined for evidence of bias. In addition, minorities might obtain unfairly low performance criterion scores for reasons other than supervisor's prejudice, as when, as new employees, they have had less opportunity to learn job skills. The general point is that all criteria need to be examined to insure freedom from factors which would unfairly depress the scores of minority groups.

(5) Differential validity. Data must be generated and results separately reported for minority and nonminority groups wherever technically feasible. Where a minority group is sufficiently large to constitute an identifiable factor in the local labor market, but validation data have not been developed and presented separately for that group, evidence of satisfactory validity based on other groups will be regarded as only provisional compliance with these guidelines pending separate validation of the test for the minority group in question. (See § 1607.9). A test which is differentially valid may be used in groups for which it is valid but not for those in which it is not valid. In this regard, where a test is valid for two groups but one group characteristically obtains higher test scores than the other without a corresponding difference in job performance, cutoff scores must be set so as to predict the same probability of job success in both groups.

(c) In assessing the utility of a test the following considerations will be applicable:

(1) The relationship between the test and at least one relevant criterion must be statistically significant. This ordinarily means that the relationship should

be sufficiently high as to have a probability of no more than 1 to 20 to have occurred by chance. However, the use of a single test as the sole selection device will be scrutinized closely when that test is valid against only one component of job performance.

(2) In addition to statistical significance, the relationship between the test and criterion should have practical significance. The magnitude of the relationship needed for practical significance or usefulness is affected by several factors, including:

(i) The larger the proportion of applicants who are hired for or placed on the job, the higher the relationship needs to be in order to be practically useful. Conversely, a relatively low relationship may prove useful when proportionately few job vacancies are available;

(ii) The larger the proportion of applicants who become satisfactory employees when not selected on the basis of the test, the higher the relationship needs to be between the test and a criterion of job success for the test to be practically useful. Conversely, a relatively low relationship may prove useful when proportionately few applicants turn out to be satisfactory;

(iii) The smaller the economic and human risks involved in hiring an unqualified applicant relative to the risks entailed in rejecting a qualified applicant, the greater the relationship needs to be in order to be practically useful. Conversely, a relatively low relationship may prove useful when the former risks are relatively high.

§ 1607.6 PRESENTATION OF VALIDITY EVIDENCE

The presentation of the results of a validation study must include graphical and statistical representations of the relationships between the test and the criteria, permitting judgments of the test's utility in making predictions of future work behavior. (See § 1607.5(c) concerning assessing utility of a test.) Average scores for all tests and criteria must be reported for all relevant subgroups, including minority and nonminority groups where differential validation is required. Whenever statistical adjustments are made in validity results for less than perfect reliability or for restriction of score range in the test or the criterion, or both, the supporting evidence from the validation study must be presented in detail. Furthermore, for each test that is to be established or continued as an operational employee selection instrument, as a result of the validation study, the minimum acceptable cutoff (passing) score on the test must be reported. It is expected that each operational cutoff score will be reasonable and consistent with normal expectations of proficiency within the work force or group on which the study was conducted.

§ 1607.7 USE OF OTHER VALIDITY STUDIES

In cases where the validity of a test cannot be determined pursuant to § 1607.4 and § 1607.5 (e.g., the number of subjects is less than that required for a technically adequate validation study, or an appropriate criterion measure cannot be developed), evidence from validity studies conducted in other organizations, such as that reported in test manuals and professional literature, may be considered acceptable when: (a) The studies pertain to jobs which are comparable (i.e., have basically the same task elements), and (b) there are no major differences in contextual variables or sample composition which are likely to significantly affect validity. Any person citing evidence from other validity studies as evidence of test validity for his own jobs must substantiate in detail job comparability and must demonstrate the absence of contextual or sample differences cited in paragraphs (a) and (b) of this section.

§ 1607.8 ASSUMPTION OF VALIDITY

(a) Under no circumstances will the general reputation of a test, its author or its publisher, or casual reports of test utility be accepted in lieu of evidence of validity. Specifically ruled out are: assumptions of validity based on test names or descriptive labels; all forms of promotional literature; data bearing on the frequency of a test's usage; testimonial statements of sellers, users, or consultants; and other nonempirical or anecdotal accounts of testing practices or testing outcomes.

(b) Although professional supervision of testing activities may help greatly to insure technically sound and nondiscriminatory test usage, such involvement alone shall not be regarded as constituting satisfactory evidence of test validity.

§ 1607.9 CONTINUED USE OF TESTS

Under certain conditions, a person may be permitted to continue the use of a test which is not at the moment fully supported by the required evidence of validity. If, for example, determination of criterion-related validity in a specific setting is practicable and required but not yet obtained, the use of the test may continue: *Provided:* (a) The person can cite substantial evidence of validity as described in § 1607.7 (a) and (b); and (b) he has in progress validation procedures which are designed to produce, within a reasonable time the additional data required. It is expected also that the person may have to alter or suspend test cutoff scores so that score ranges broad enough to permit the identification of criterion-related validity will be obtained.

§ 1607.10 EMPLOYMENT AGENCIES AND EMPLOYMENT SERVICES

(a) An employment service, including private employment agencies, State employment agencies, and the U.S. Training and Employment Service, as defined in section 701(c), shall not make applicant or employee appraisals or referrals based on the results obtained from any psychological test or other selection standard not validated in accordance with these guidelines.

(b) An employment agency or service which is requested by an employer or union to devise a testing program is required to follow the standards for test validation as set forth in these guidelines. An employment service is not relieved of its obligation herein because the test user did not request such validation or has requested the use of some lesser standard than is provided in these guidelines.

(c) Where an employment agency or service is requested only to administer a testing program which has been elsewhere devised, the employment agency or service shall request evidence of validation, as described in the guidelines in this part, before it administers the testing program and/or makes referral pursuant to the test results. The employment agency must furnish on request such evidence of validation. An employment agency or service will be expected to refuse to administer a test where the employer or union does not supply satisfactory evidence of validation. Reliance by the test user on the reputation of the test, its author, or the name of the test shall not be deemed sufficient evidence of validity (see § 1607.8(a)). An employment agency or service may administer a testing program where the evidence of validity comports with the standards provided in § 1607.7.

§ 1607.11 DISPARATE TREATMENT

The principle of disparate or unequal treatment must be distinguished from the concepts of test validation. A test or other employee selection standard—even though validated against job performance in accordance with the guidelines in this part—cannot be imposed upon any individual or class protected by title VII where other employees, applicants or members have not been subjected to that standard. Disparate treatment, for example, occurs where members of a minority or sex group have been denied the same employment, promotion, transfer or membership opportunities as have been made available to other employees or applicants. Those employees or applicants who have been denied equal treatment, because of prior discriminatory practices or policies, must at least be afforded the same opportunities as had existed for other employees or applicants during the period of discrimination. Thus, no new test or other employee selection standard can be imposed upon a class of individuals protected by title VII who, but for prior discrimination, would have been granted the opportunity to qualify under less stringent selection standards previously in force.

§ 1607.12 RETESTING

Employers, unions, and employment agencies should provide an opportunity for retesting and reconsideration to earlier "failure" candidates who have availed themselves of more training or experience. In particular, if any applicant or employee during the course of an interview or other employment procedure claims more education or experience, that individual should be retested.

§ 1607.13 OTHER SELECTION TECHNIQUES

Selection techniques other than tests, as defined in § 1607.2, may be improperly used so as to have the effect of discriminating against minority groups. Such techniques include, but are not restricted to, unscored or casual interviews and unscored application forms. Where there are data suggesting employment discrimination, the person may be called upon to present evidence concerning the validity of his unscored procedures as well as of any tests which may be used, the evidence of validity being of the same types referred to in §§ 1607.4 and 1607.5. Data suggesting the possibility of discrimination exist, for example, when there are differential rates of applicant rejection from various minority and nonminority or sex groups for the same job or group of jobs or when there are disproportionate representations of minority and nonminority or sex groups among present employees in different types of jobs. If the person is unable or unwilling to perform such validation studies, he has the option of adjusting employment procedures so as to eliminate the conditions suggestive of employment discrimination.

§ 1607.14 AFFIRMATIVE ACTION

Nothing in these guidelines shall be interpreted as diminishing a person's obligation under both title VII and Executive Order 11246 as amended by Executive Order 11375 to undertake affirmative action to ensure that applicants or employees are treated without regard to race, color, religion, sex, or national origin. Specifically, the use of tests which have been validated pursuant to these guidelines does not relieve employers, unions or employment agencies of their obligations to take positive action in affording employment and training to members of classes protected by title VII.

PART 1610—AVAILABILITY OF RECORDS

SUBPART A—PRODUCTION OR DISCLOSURE UNDER 5 U.S.C. 552(A)

Sec.
1610.1 Definitions.
1610.2 Statutory requirements.
1610.4 Purpose and scope.
1610.5 Public reference facilities and current index.
1610.7 Deletion of identifying details.
1610.9 Regional offices.
1610.11 Requests for identifiable records and copies.
Sec.
1610.13 Records of other Agencies.
1610.16 User charges, waiver.
1610.17 Schedule of fees and method of payment for services rendered.
1610.20 Exemptions.
1610.23 Administrative decision and review.

SUBPART B—PRODUCTION IN RESPONSE TO SUBPENAS OR DEMANDS OF COURTS OR COURTS OR OTHER AUTHORITIES

Sec.
1610.30 Purpose and scope.
1610.32 Production prohibited unless approved by the General Counsel.
Sec.
1610.34 Procedure in the event of a demand for production or disclosure.
1610.36 Procedure in the event of an adverse ruling.

Authority: The provisions of this Part 1610 issued under sec. 713(a), 78 Stat. 265; 42 U.S.C. 2000e–12, 5 U.S.C. 552.

Source: The provisions of this Part 1610 appear at 32 F.R. 16261, Nov. 29, 1967 unless otherwise noted.

SUBPART A—PRODUCTION OR DISCLOSURE UNDER 5 U.S.C. 552(A)

§ 1610.1 DEFINITIONS

As used in this part:

(a) "Act" refers to Title VII of the Civil Rights Act of 1964, 42 U.S.C. sec. 2000e et seq.

(b) "Commission" refers to the Equal Employment Opportunity Commission.

§ 1610.2 STATUTORY REQUIREMENTS

5 U.S.C. 552(a)(3) requires each Agency, upon request for identifiable records made in accordance with published rules stating the time, place, fees to the extent authorized by statute, and procedure to be followed, to make such records promptly available to any person. 5 U.S.C. 552(b) exempts specified classes of records from all the public access requirements of 5 U.S.C. 552 and permits them to be withheld.

§ 1610.4 PURPOSE AND SCOPE

(a) This subpart contains the regulations of the Equal Employment Opportunity Commission implementing 5 U.S.C. 552. The regulations of this subpart provide information concerning the procedures by which records may be obtained from all organizational units within the Commission. Official records of the Commission made available pursuant to the requirements of 5 U.S.C. 552 shall be furnished to members of the public only as prescribed by this subpart. Officers and employees of the Commission may continue to furnish to the public informally and without compliance with the procedures prescribed herein, information and records which prior to the enactment of 5 U.S.C. 552 were furnished customarily in the regular performance of their duties. To the extent permitted by other laws, the Commission also will make available records which it is authorized to withhold under 5 U.S.C. 552 whenever it determines that such disclosure is in the public interest.

(b) The Attorney General's memorandum on the Public Information Section of the Administrative Procedure Act, which was published in June 1967 and is available from the Superintendent of Documents, should be consulted in considering questions arising under 5 U.S.C. 552.

§ 1610.5 PUBLIC REFERENCE FACILITIES AND CURRENT INDEX

The Commission will maintain in a public reading area located in the Commission's library at 1800 G Street NW., Washington, D.C. 20506, the materials which are required by 5 U.S.C. 552(a)(2) and 552(a)(4) to be made available for public inspection and copying. The Commission will maintain and make available for public inspection and copying in this public reading area a current index providing identifying information for the public as to any matter which is issued, adopted, or promulgated after July 4, 1967, and which is required to be indexed by 5 U.S.C. 552(a)(2). The Commission in its discretion may, however, include precedential materials issued, adopted, or promulgated prior to July 4, 1967. The Commission will also maintain on file in this public reading area all material published by the Commission in the FEDERAL REGISTER and currently in effect.

§ 1610.7 DELETION OF IDENTIFYING DETAILS

When making available any records pursuant to § 1610.5, the Commission will delete identifying details to the extent required to prevent a clearly unwarranted invasion of personal privacy. To each record from which identifying details shall have been deleted when the record is made available for public inspection and copying, the Commission will attach a written justification for such deletions. A single such justification shall suffice for deletions made in a group of similar or related records. Subject to necessary or appropriate variations in individual instances, the justification will be in substantially the following form:

This record is (These records are) made available for public inspection and copy pursuant to 5 U.S.C. sec. 552(a)(2). As authorized therein, to prevent a clearly unwarranted invasion of personal privacy, identifying details have been deleted.

§ 1610.9 REGIONAL OFFICES

Each office listed below will maintain in a public reading room or area various public materials delaing with the Act and the Commission:

Federal Office Building, Room 7515, 500 Gold Street SW., Albuquerque, N. Mex. 87101. Telephone No.: Area Code 505, 247–0311 Ext. 2061.
1776 Peachtree Street NW., Room 417, Atlanta, Ga. 30309. Telephone No.: Area Code 404, 526–5941.
300 East Eighth Street, Room G 115, Austin, Tex. 78701. Telephone No.: Area Code 512, 476–6411 Ext. 6845.
U.S. Courthouse and Federal Building, Room 1832, 219 South Dearborn Street, Chicago, Ill. 60604. Telephone No.: Area Code, 353–7550.
Engineers' Building, Room 402, 1365 Ontario Street, Cleveland, Ohio 44113. Telephone No.: Area Code, 522–4784.
911 Walnut Street, Room 305, Kansas City, Mo. 64106. Telephone No.: Area Code 816 374–5773.

Federal Office Building, Room 7730, 300 North Los Angeles Street, Los Angeles, Calif. 90012. Telephone No.: Area Code 213, 688–3400.
Masonic Temple Building, 333 St. Charles Avenue, New Orleans, La. 70130. Telephone No.: Area Code 504, 527–2721.
346 Broadway, Suite 701, New York, N.Y. 10013. Telephone No.: Area Code, 264–3642.
Appraisers' Building, Room 126, 630 Sansome Street, San Francisco, Calif. 94111. Telephone No.: Area Code 415, 556–0260.
1016 16th Street NW., Room 104, Washington, D.C. 20036. Telephone No.: Area Code 202, 382–1914.

§ 1610.11 REQUESTS FOR IDENTIFIABLE RECORDS AND COPIES

(a) A request for inspection or copying of a record of the Commission which is neither published in the FEDERAL REGISTER nor customarily made available and which is not available in the public reading area as described in § 1610.5, may be made in person or by mail to the Office of the General Counsel, 1800 G Street NW., Washington, D.C. 20506. Requests may be presented from 9 a.m. to 5:30 p.m., Mondays through Fridays, with the exception of holidays. Telephone inquiries or requests may be made by calling Washington, D.C., telephone number: Area Code 202, 342–7693. Collect calls will not be accepted.

(b) Charges for processing requests will be made in accordance with the schedule set forth in § 1610.17. Such charges are payable in advance.

(c) Each request shall contain a description of the record requested which is sufficiently specific with respect to names, dates, subject matter, and location, to permit the record to be identified and located. A separate request must be submitted for each record requested.

(d) Except where circumstances require special processing, requests will be processed in the order in which they are received. Efforts will be made to make such records available as promptly as is reasonable under the particular circumstances.

(e) No obligation is undertaken by the Commission to compile or creat information or records not already in existence at the time of the request.

(f) Where a requested record cannot be located from the information submitted or is known to have been destroyed or otherwise disposed of, the person making the request will be appropriately notified.

(g) When a requested record has been identified and is available, the person who made the request will be notified as to where and when the record will be available for inspection. Upon payment of the necessary fees, a copy of an available record may be furnished to the requester in person or by mail.

§ 1610.13 RECORDS OF OTHER AGENCIES

Request for records that originated in another Agency and are in the custody of the Commission, will be referred to that Agency for processing, and the person submitting the request shall be so notified. The decision made by that Agency with respect to such records will be honored by the Commission.

§ 1610.16 USER CHARGES, WAIVER

It is the policy of the Equal Employment Opportunity Commission to cooperate with charging parties, their counsel, and private agencies working to eliminate employment discrimination. To the extent practicable that policy will be applied under this part so as to permit requests for inspection or copies of records and information to be met without cost to the charging party, attorney, or group making the request. Fees will be charged, however, in the case of requests which are determined by the General Counsel to involve a burden on staff or facilities significantly in excess of that normally accepted by the agency in handling routine requests for information. While the fees charged for services and copying will in no event exceed those as specified in § 1610.17, the Commission reserves the right to limit the number of copies that will be provided of any document or to require that special arangements for copying be made in the case of records or requests presenting unusual problems of reproduction or handling.

[36 F.R. 20600, Oct. 27, 1971]

§ 1610.17 SCHEDULE OF FEES AND METHOD OF PAYMENT FOR SERVICES RENDERED

(a) Except as provided for in § 1610.16 the following specific fees shall be applicable with respect to services rendered to members of the public under this subpart:

(1) Searching for records, per hour or fraction thereof	$3.60
(2) Other facilitative services and index assistance minimum charge	3.60
(3) Copies made by Xerox or otherwise (per page)	0.05
(4) Certification of each record as a true copy	.75
(5) Certification of each record as a true copy, under the seal of the agency	1.00
(6) For each signed statement of negative result of search for record	1.00

(b) When no specific fee has been established for a service, e.g., legal or research assistance, or the request for a service does not fall under one of the above categories due to the amount, size, or type thereof, the Director of Administration is authorized to establish an appropriate fee pursuant to the criteria established in Bureau of the Budget Circular No. A-25, entitled "User Charges."

(c) When a request for identifiable records is made by mail, it should be accompanied by remittance of the total fee chargeable, as well as a self-addressed stamped envelope, if special mail services are desired.

(d) Fees must be paid in full prior to issuance of requested copies of records. If uncertainty as to the existence of a record, or as to the number of sheets to be copied or certified precludes remitting the exact fee chargeable with the request, the agency will inform the interested party of the exact amount required.

(e) Payment shall be in the form of a check, bank draft, money order. Remittances shall be made payable to the order of the Equal Employment Opportunity Commission.

(f) A receipt for fees paid will be given only upon request. Refund of fees paid for services actually rendered will not be made.

(g) No charge will be made for services performed at the request of other governmental agencies or officers thereof, acting in their official capacities.

[36 F.R. 20600, Oct. 27, 1971]

§ 1610.20 EXEMPTIONS

(a) 5 U.S.C. 552 exempts from all of its publication and disclosure requirements nine categories of records which are described in subsection (b). These categories include such matters as national defense and foreign policy information, investigatory files, internal procedures and communications, materials exempted from disclosure by other statutes, information given in confidence, and matters involving personal privacy. The scope of the exemptions is discussed in the Attorney General's memorandum referred to in § 1610.4(b).

(b) Section 706(a) of the Act provides that the Commission shall not make public charges which have been filed. It also provides that (subsequent to the filing of a charge, an investigation, and a finding that there is reasonable cause to believe that the charge is true) nothing said or done during and as a part of the Commission's endeavors to eliminate any alleged unlawful employment practice by informal methods of conference, conciliation, and persuasion may be made public by the Commission without the written consent of the parties; nor may it be used as evidence in a subsequent proceeding. Any officer or employee of the Commission, who shall make public in any manner whatever any information in violation of section 706(a) shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined not more than $1,000 or imprisoned not more than 1 year.

(c) Section 709 of the Act authorizes the Commission to conduct investigations of charges filed under section 706, engage in cooperative efforts with State and local agencies charged with the administration of State fair employment practices laws, and issue regulations concerning reports and recordkeeping. Subsection (e) of section 709 provides that it shall be unlawful for any officer or employee of the Commission to make public in any manner whatever any information obtained by the Commission pursuant to its authority under section 709 prior to the institution of any proceeding under the Act involving such information. Any officer or employee of the Commission who shall make public in any manner whatever any information in violation of section 709(e) shall be guilty of a misdemeanor and upon conviction thereof shall be fined not more than $1,000 or imprisoned not more than 1 year. The Commission will, however, make available for inspection and copying some tabulations of aggregate industry, area, and other statistics derived from the Commission's reporting programs authorized by section 709(c) of the Act, where such tabulations have been previously compiled by the Commission and are available in documentary form, to the extent that such tabulations do not consist of aggregate data from less than three respondents, and do not reveal the identity of an individual or the dominant respondent in a particular industry or area in any manner.

§ 1610.23 ADMINISTRATIVE DECISION AND REVIEW

(a) The General Counsel shall grant or deny each request made. The denial of each request shall be in writing and shall contain a simple statement of the reasons for the denial. The decision of the General Counsel shall be final, subject only to review as provided in paragraph (b) of this section.

(b) Review of the decision of the General Counsel may be requested by the person submitting the request within 30 days after the date o fthe notice advising him of the decision. The 30-day limitation may be waived for good cause. The filing of a request for review by the Commission may be accomplished by mailing to the Chairman, Equal Employment Opportunity Commission, 1800 G Street NW., Washington, D.C. 20506, by certified mail, a copy of the written denial issued under paragraph (a) of this section and a statement of the circumstances, reasons or arguments advanced for insistence upon disclosure of the originally requested record. The decision of the Commission upon review shall be in writing and shall contain a simple statement of the reasons for the decision. The decision after review will be promptly communicated to the person requesting review, and will constitute the final action of the Commission.

(c) No personal appearance, oral argument or hearing will ordinarily be permitted in connection with an initial request made to the General Counsel or on review of a denial by him. Upon request and a showing of special circumstances, however, this limitation may be waived and an informal conference or appearance arranged with or before the General Counsel or the Commission, as the case may be, or any employee designated by him or it for this purpose.

[32 F.R. 16261, Nov. 29, 1967, as amended at 32 F.R. 16491, Dec. 1, 1967]

SUBPART B—PRODUCTION IN RESPONSE TO SUBPENAS OR DEMANDS OF COURTS OR OTHER AUTHORITIES

§ 1610.30 PURPOSE AND SCOPE

This subpart contains the regulations of the Commission concerning procedures to be followed when a subpena, order, or other demand (hereinafter in this subpart referred to as a "demand") of a court or other authority is issued for the production or disclosure of (a) any material contained in the files of the Commission; (b) any information relating to material contained in the files of the Commission; or (c) any information or material acquired by any person while such person was an employee of the Commission as a part of the performance of his official duties or because of his official status.

§ 1610.32 PRODUCTION PROHIBITED UNLESS APPROVED BY THE GENERAL COUNSEL

No employee or former employee of the Commission shall, in response to a demand of a court or other authority, produce any material contained in the files of the Commission or disclose any information or produce any material acquired as part of the performance of his official duties or because of his official status without the prior approval of the General Counsel.

§ 1610.34 PROCEDURE IN THE EVENT OF A DEMAND FOR PRODUCTION OR DISCLOSURE

(a) Whenever a demand is made upon an employee or former employee of the Commission for the production of material or the disclosure of information described in § 1610.30, he shall immediately notify the General Counsel. If possible, the General Counsel shall be notified before the employee or former employee concerned replies to or appears before the court or other authority.

(b) If response to the demand is required before instructions from the General Counsel are received, an attorney designated for that purpose by the Commission shall appear with the employee or former employee upon whom the demand has been made, and shall furnish the court or other authority with a copy of the regulations contained in this part and inform the court or other authority that the demand has been or is being, as the case may be, referred for prompt consideration by the General Counsel. The court or other authority shall be requested respectfully to stay the demand pending receipt of the requested instructions from the General Counsel.

§ 1610.36 PROCEDURE IN THE EVENT OF AN ADVERSE RULING.

If the court or other authority declines to stay the effect of the demand in response to a request made in accordance with § 1610.34(b) pending receipt of instructions from the General Counsel, or if the court or other authority rules that the demand must be complied with irrespective of the instructions from the General Counsel not to produce the material or disclose the information sought, the employee or former employee upon whom the demand has been made shall respectfully decline to comply with the demand (United States ex rel. Touhy v. Ragen, 340 U.S. 462 (1951)).

PUBLIC LAW 92-318, 92ND CONGRESS, S. 659, JUNE 23, 1972

Education Amendments of 1972

TITLE IX—PROHIBITION OF SEX DISCRIMINATION

SEX DISCRIMINATION PROHIBITED

SEC. 901. (a) No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance, except that:

(1) in regard to admissions to educational institutions, this section shall apply only to institutions of vocational education, professional education, and graduate higher education, and to public institutions of undergraduate higher education;

(2) in regard to admissions to educational institutions, this section shall not apply (A) for one year from the date of enactment of this Act, nor for six years after such date in the case of an educational institution which has begun the process of changing from being an institution which admits only students of one sex to being an institution which admits students of both sexes, but only if it is carrying out a plan for such a change which is approved by the Commissioner of Education or (B) for seven years from the date an educational institution begins the process of changing from being an institution which admits only students of only one sex to being an institution which admits students of both sexes, but only if it is carrying out a plan for such a change which is approved by the Commissioner of Education, whichever is the later;

(3) this section shall not apply to an educational institution which is controlled by a religious organization if the application of this subsection would not be consistent with the religious tenets of such organization;

(4) this section shall not apply to an educational institution whose primary purpose is the training of individuals for the military services of the United States, or the merchant marine; and

(5) in regard to admissions this section shall not apply to any public institution of undergraduate higher education which is an institution that traditionally and continually from its establishment has had a policy of admitting only students of one sex.

(b) Nothing contained in subsection (a) of this section shall be interpreted to require any educational institution to grant preferential or disparate treatment to the members of one sex on account of an imbalance which may exist with respect to the total number or percentage of persons of that sex participating in or receiving the benefits of any federally supported program or activity, in comparison with the total number or percentage of persons of that sex in any community, State, section, or other area: *Provided*, That this subsection shall not be construed to prevent the consideration in any hearing or proceeding under this title of statistical evidence tending to show that such an imbalance exists with respect to the participation in, or receipt of the benefits of, any such program or activity by the members of one sex.

(c) For purposes of this title an educational institution means any public or private preschool, elementary, or secondary school, or any institution of vocational, professional, or higher education, except that in the case of an educational institution composed of more than one school, college, or department which are administratively separate units, such term means each such school, college, or department.

FEDERAL ADMINISTRATIVE ENFORCEMENT

SEC. 902. Each Federal department and agency which is empowered to extend Federal financial assistance to any education program or activity, by way of grant, loan, or contract other than a contract of insurance or guaranty, is authorized and directed to effectuate the provisions of section 901 with respect to such program or activity by issuing rules, regulations, or orders of general applicability which shall be consistent with achievement of the objectives of the statute authorizing the financial assistance in connection with which the action is taken. No such rule, regulation, or order shall become effective unless and until approved by the President. Compliance with any requirement adopted pursuant to this section may be effected (1) by the termination of or refusal to grant or to continue assistance under such program or activity to any recipient as to whom there has been an express finding on the record, after opportunity for hearing, of a failure to comply with such requirement, but such termination or refusal shall be limited to the particular political entity, or part thereof, or other recipient as to whom such a finding has been made, and shall be limited in its effect to the particular program, or part thereof, in which such noncompliance has been so found, or (2) by any other means authorized by law: *Provided, however*, That no such action shall be taken until the department or agency concerned has advised the appropriate person or persons of the failure to comply with the requirement and has determined that compliance cannot be secured by voluntary means. In the case of any action terminating, or refusing to grant or continue, assistance because of failure to comply with a requirement imposed pursuant to this section, the head of the Federal department or agency shall file with the committees of the House and Senate having legislative jurisdiction over the program or activity involved a full written report of the circumstances and the grounds for such action. No such action shall become effective until thirty days have elapsed after the filing of such report.

JUDICIAL REVIEW

SEC. 903. Any department or agency action taken pursuant to section 1002 shall be subject to such judicial review as may otherwise be provided by law for similar action taken by such department or agency on other grounds. In the case of action, not otherwise subject to judicial review, terminating or refusing to grant or to continue financial assistance upon a finding of failure to comply with any requirement imposed pursuant to section 902, any person aggrieved (including any State or political subdivision thereof and any agency of either) may obtain judicial review of such action in accordance with chapter 7 of title 5, United States Code, and such action shall not be deemed committed to unreviewable agency discretion within the meaning of section 701 of that title.

PROHIBITION AGAINST DISCRIMINATION AGAINST THE BLIND

SEC. 904. No person in the United States shall, on the ground of blindness or severely impaired vision, be denied admission in any course of study by a recipient of Federal financial assistance for any education program or activity, but nothing herein shall be construed to require any such institution to provide any special services to such person because of his blindness or visual impairment.

EFFECT ON OTHER LAWS

SEC. 905. Nothing in this title shall add to or detract from any existing authority with respect to any program or activity under which Federal financial assistance is extended by way of a contract of insurance or guaranty.

AMENDMENTS TO OTHER LAWS

SEC. 906. (a) Sections 401(b), 407(a)(2), 410, and 902 of the Civil Rights Act of 1964 (42 U.S.C. 2000c(b), 2000c-6(a)(2), 2000c-9, and 2000h-2) are each amended by inserting the word "sex" after the word "religion".

(b)(1) Section 13(a) of the Fair Labor Standards Act of 1938 (29 U.S.C. 213(a)) is amended by inserting after the words "the provisions of section 6" the following: "(except section 6(d) in the case of paragraph (1) of this subsection)".

(2) Paragraph (1) of subsection 3(r) of such Act (29 U.S.C. 203(r)(1)) is amended by deleting "an elementary or secondary school" and inserting in lieu thereof "a preschool, elementary or secondary school".

(3) Section 3(s)(4) of such Act (29 U.S.C. 203(s)(4)) is amended by deleting "an elementary or secondary school" and inserting in lieu thereof "a preschool, elementary or secondary school".

INTERPRETATION WITH RESPECT TO LIVING FACILITIES

SEC. 907. Notwithstanding anything to the contrary contained in this title, nothing contained herein shall be construed to prohibit any educational institution receiving funds under this Act, from maintaining separate living facilities for the different sexes.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE,
OFFICE OF THE SECRETARY,
Washington, D.C., August 1972.

MEMORANDUM TO PRESIDENTS OF INSTITUTIONS OF HIGHER EDUCATION PARTICIPATING IN FEDERAL ASSISTANCE PROGRAMS

As you may know, on June 23, 1972, the President signed into law the "Education Amendments of 1972" (effective July 1, 1972). Title IX of this Act prohibits sex discrimination in all federally assisted education programs and amends certain portions of the Civil Rights Act of 1964. The Office for Civil Rights, Department of Health, Education, and Welfare, is presently in the process of developing regulations and guidelines to implement Title IX. For your immediate information, however, I have set forth below a brief summary of the pertinent provisions of Title IX, and have attached a copy of the law.

A. BASIC PROVISION

Title IX of the Higher Education Act states:

"No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal Financial assistance . . ."

This sex discrimination provision of Title IX is patterned after Title VI of the Civil Rights Act of 1964 which forbids discrimination on the basis of race, color, and national origin in all federally assisted programs. By specific exemption, the prohibitions of Title VI do not reach employment practices (except where the primary objective of the Federal aid is to provide employment). However, there is no similar exemption for employment in Title IX.

Therefore, effective July 1, as a condition of receiving Federal assistance, your institution must make all benefits and services available to students without discrimination on the basis of sex. As indicated below, there are exemptions to and an deferment in implementing the admissions provision. However, all other requirements of this Title are presently in effect.

B. WHICH INSTITUTIONS ARE COVERED

All educational programs and activities which are offered by any institution or organization and which receive Federal financial assistance by way of grant, loan, or contract other than a contract of insurance or guaranty are covered. Title IX specifically lists the types of educational institutions which are covered. These include public and private preschools, elementary and secondary schools, institutions of vocational education, professional education, and undergraduate and graduate higher education.

C. PROVISIONS CONCERNING ADMISSIONS TO SCHOOLS AND COLLEGES

1. Certain educational institutions covered by Title IX are prohibited from sex discrimination in all of their programs and activities, including admissions to their institutions. These institutions include:

a. Institutions of vocational education (public and private).

b. Elementary and secondary schools other than secondary vocational schools

c. Institutions of graduate higher education (public and private).

d. Public undergraduate institutions of higher education (except those which have been traditionally and continually single-sex).

2. Exemptions from the admissions provisions.

Some educational institutions covered under Title IX are exempted from complying with the prohibition against discrimination in admissions. These institutions are:

a. Private undergraduate institutions of higher education.

b. Elementary and secondary schools other than secondary vocational schools whose primary purpose is to train students in vocational and technical areas.

c. Public institutions of undergraduate higher education which have been traditionally and continually single-sex.

Schools of vocational, professional, graduate higher education, and public undergraduate higher education which are in transition from single-sex institutions to co-educational institutions are exempt from non-discrimination in admissions for specified periods of time provided each is carrying out a plan approved by HEW, under which the transition will be completed. Although all these institutions are exempt from the requirement of immediately admitting students of the previously excluded sex, they are required not to discriminate, as of the effective date of the Act (July 1, 1972), against any admitted students in any educational program or activity offered by the educational institutions.

D. OTHER EXEMPTIONS

1. *Religious Institutions.*—Institutions controlled by religious organizations are exempt if the application of the anti-discrimination provision is not consistent with the religious tenets of such organizations.

2. *Military Schools.*—Those educational institutions whose primary purpose is the training of individuals for the military services of the United States or the Merchant Marine are exempt.

E. PROVISION RELATING TO LIVING FACILITIES

The Act allows institutions receiving Federal funds to maintain separate living facilities for persons of different sexes.

F. WHO ENFORCES THE ACT

The Federal departments empowered to extend aid to educational institutions have the enforcement responsibility. (The enforcement provisions are virtually identical to those of Title VI of the Civil Rights Act of 1964.) Reviews can be conducted whether or not a complaint has been filed. We presently are in the process of developing procedures under which this agency will represent all Federal agencies in the administration of Title IX, as is presently the case under Title VI of the Civil Rights Act of 1964.

G. WHO CAN FILE CHARGES

Individuals and organizations can challenge any unlawful discriminatory practice in a Federal program or activity by filing a complaint with the appropriate Federal agency. During the review process, names of complainants are kept confidential if possible.

H. WHAT HAPPENS WHEN A COMPLAINT IS FILED

An investigation is conducted, if warranted, and if a violation is found, informal conciliation and persuasion are first used to eliminate the discriminatory practices.

I. FORMAL ENFORCEMENT PROCEDURES

If persuasion fails, the Act provides for formal hearings conducted by the Federal agency(s) involved. Such action can result in the termination or withholding of Federal financial assistance. In some instances, cases can be referred to the Department of Justice with a recommendation that formal legal action be taken. Recipients of Federal monies which have been terminated or withheld can seek judicial review of the final order issued by the agency.

J. PREFERENTIAL TREATMENT

Institutions cannot be required to establish quotas or grant "preferential or disparate" treatment to members of one sex when an imbalance exists with respect to the number of percentage of persons of one sex participating in or receiving the benefits of federally assisted educational programs or activities. This provision is analogous to the racial imbalance provision in Title VI which states that the absence of a racial balance is not in itself proof of discrimination: However, these provisions do not mean that corrective actions may not be required to overcome past discrimination.

K. PROVISION CONCERNING BLIND STUDENTS

Students cannot be denied admission on the grounds of blindness or severely impaired vision to any federally assisted education program or activity. The institution, however, is not required to provide special services for such persons.

We will provide more specific guidance on the requirements of Title IX in the near future. In the interim, should you have any questions relating to this matter, please feel free to write to me.

J. STANLEY POTTINGER,
Director, Office for Civil Rights.

STATEMENT BY CASPAR W. WEINBERGER, SECRETARY OF HEALTH, EDUCATION, AND WELFARE

HEW will publish in the Federal Register on Thursday a regulation setting forth how this Department proposes to enforce the law banning sex discrimination by educational institutions which receive Federal financial aid.

This is the next step, and one I believe is overdue, in our country's continuing effort to assure equality of opportunity for all citizens in pursuing their full potential through education.

The published regulation is not a final order—it is a proposal on which the Department solicits comment from all interested citizens and organizations until October 15, 1974. We will review all comments received, make any indicated changes, and then—as required by the statute—will submit the regulation to the President for his approval. When so approved, the regulation will be published in final form to become effective 30 days from that date of publication.

Because this is a new and complex area, HEW will soon schedule a series of briefings and conferences on the law and the proposed regulation at a number of locations across the country. By this means, we hope to inform individuals, organizations, and the local press as to the substance of the proposed regulation and so to encourage broad public interest and comment.

The proposed regulation forbids discrimination by sex in most educational institutions—colleges, universities, secondary and elementary schools and preschools—which receive Federal funds.

It would cover three major areas: admission, treatment of students, and employment. With respect to admission to educational institutions, the proposed regulation is designed to ensure students equal access—with certain exceptions specified by Congress. With respect to treatment to students and employment, the proposal provides for nondiscrimination and equality of opportunity.

The proposed regulation would affect, among others, virtually all public school systems in the country, as well as almost 2,500 institutions of post-secondary education, currently receiving Federal funds.

By Congressional exemption, the proposed regulation would not apply at all to military schools; nor would it apply to religious schools if that would be inconsistent with the controlling religious tenets of these schools. In addition, Congress exempted, from the admissions requirements only, private undergraduate colleges, non-vocational elementary and secondary schools, and certain public undergraduate schools which have traditionally and continually been single-sex.

The proposed regulation also would prohibit discrimination in employment, on the basis of sex, by educational institutions.

We realize that this Federal effort has raised some understandable apprehensions, but we believe that sex discrimination in Federally assisted educational programs or activities can be eliminated, and eliminated without undue controversy or hardship in the academic community or elsewhere. Congress has decreed that sex discrimination in education cannot be allowed to persist where Federal funds are involved, and we are seeking interest and cooperation in our effort to enforce the law.

The law clearly requires that some inequitable practices will have to be revised or eliminated. We feel that can be accomplished with the cooperation of educational institutions, many of which have already been correcting such inequities. Further, we believe the necessary changes need not be negative and disruptive, but instead can be made so as to reinforce the best traditions of American education.

The regulation, for example, would neither exempt nor disrupt intercollegiate athletics as some have feared; rather the regulation moves in the direction of insuring better opportunities for women in athletic programs.

HEW launches this effort with a basic attitude of cooperation and not coercion. Enforcement will be based on seeking voluntary compliance first. We want the widest possible public understanding of the requirements of the law and the details of the proposed regulation, so that unfounded misapprehensions can be held to a minimum.

Only if voluntary efforts fail will enforcement move to the other two methods provided by the law—either an administrative proceeding to terminate Federal assistance, or other means authorized by law such as referral of a violator to the Department of Justice for court action.

I believe that the requirement and issuance of this proposed regulation in final form is a vital part of this Department's efforts to increase access to and improve opportunities in education for all Americans. I am sure that our educational institutions and all interested organizations will contribute the leadership needed to achieve this move toward equal opportunities for all of America's students.

HEW FACT SHEET

ANNOUNCEMENT

The Department of Health, Education and Welfare is publishing Thursday in the *Federal Register*, a proposed regulation to implement Title IX of the Education Amendments of 1972. That provision, with certain exception, prohibits sex discrimination in education programs or activities which receive Federal financial assistance. The regulation will be administered by the Department's Office for Civil Rights.

Contents

- Public Comments
- Substantive Provisions:
  - Coverage
  - Admission of Students
  - Treatment of Students
  - Employment
  - Enforcement Procedures

PUBLIC COMMENTS

The Department solicits comments on the proposed regulation from interested citizens until October 15, 1974. Copies of all comments will be available for public inspection in Room 3256 N., 330 Independence Avenue, S.W., Washington, D.C. 20201 between 9:00 a.m. and 5:30 p.m. Monday through Friday (except Federal holidays). Copies of selected comments will also be made available for public inspection in the Office of each Regional Director of the Office for Civil Rights during normal business hours before and after October 15. After the comments have been evaluated and appropriate changes have been made, the final regulation, as required by Title IX, will be submitted for approval by the President. When approved, it will be published in final form in the *Federal Register* to become effective thirty days from the date of publication.

PROPOSED 45 C.F.R. PART 86—SUBSTANTIVE PROVISIONS

The proposed regulation covers the following areas with respect to recipients of Federal financial assistance for educational programs or activities:

Coverage;
Admission of students;
Employment; and
Procedures.

COVERAGE

Except for the specific limited exemptions set forth below, the proposed regulation applies to all aspects of all education programs or activities of a school district, institution of higher education, or other entity which receives Federal funds for any of those programs.

With respect to *admissions to educational institutions*, the proposed regulation applies *only* to: vocational, professional and graduate schools, and to institutions of public undergraduate education (except those few public undergraduate schools which have been traditionally and continually single sex).

The proposed regulation *does not cover admission to:* recipient pre-schools, elementary, and secondary schools (except vocational schools), private undergraduate institutions and, as noted above, to those few public undergraduate educational institutions that have been traditionally and continually single sex.

Even institutions whose admissions are exempt from coverage must treat all students nondiscrriminatorily once they have admitted members of both sexes.

Military institutions at both the secondary and higher education level are *entirely exempt* from coverage under Title IX. *Practices in schools run by religious organizations* also are *exempt to the extent compliance would be inconsistent* with religious tenets. Thus, for example, if a religious tenet relates only to employment, the institution would still be prohibited from discrimination against students.

ADMISSIONS

The proposed regulation covers *recruitment as well as all admissions policies and practices* of those recipients *not exempt as to admissions.* It includes specific prohibitions of sex discrimination through separate ranking of applicants, application of sex-based quotas, administration of sex-biased tests or selection criteria, and granting of preference to applicants based on their attendance at particular institutions if the preference results in sex discrimination. The proposed regulation also forbids application in a discriminatory manner of rules concerning marital or parental status, and prohibits discrimination on the basis of pregnancy and related conditions, providing that recipients shall treat disabilities related to pregnancy in the same way as any other temporary disability or physicial condition.

Generally, *comparable efforts* must be made by recipients *to recruit* members of each sex. Where discrimination previously existed, *additional recruitment efforts* directed primarily toward members of one sex *must be undertaken to remedy the effects of the past discrimination.*

Examples

An institution whose admissions are covered by the regulation *may not set quotas* on the number of men or women who will be admitted. Thus, a medical school may not set such quotas, although a private undergraduate school may do so.

An institution whose admissions are covered *may not set different standards* of admission for one sex than for the other. Thus, a graduate school may not require a lower grade point average for men than for women, although a private undergraduate school may do so.

An institution of graduate, professional or vocational education which prior to enactment of Title IX had limited its admissions primarily to members of one sex *must* undertake special efforts to notify and recruit members of the sex previously barred or restricted in order to overcome the effects of past discrimination. Thus, a professional school which previously purposely limited the proportion of females in each entering class to approximately 15% would be required to initiate special recruitment efforts to attract qualified female students. A similar institution whose admissions had not been subject to such a quota arrangement, but had admitted students without discrimination on the basis of sex, would be required only to make comparable efforts to attract members of each sex.

TREATMENT

As stated before, although some schools are exempt from Title IX with regard to admissions, *all* schools must *treat* their admitted students *without discrimination* on the basis of sex. With regard to treatment of students, therefore, the proposed regulation applies to recipient pre-schools, elementary and secondary schools, vocational schools, colleges, and universities at the undergraduate, graduate and professional levels, as well as to other agencies, organizations and persons which receive Federal funds for educational programs and activities.

Specifically, the treatment sections of the regulation cover the following areas:

(1) Access to and participation in course offerings and extracurricular activities, including campus organizations and competitive athletics;

(2) Eligibility for and receipt or enjoyment of benefits, services, and financial aid;

(3) Use of facilities, and comparability of, availability of, and rules concerning housing (except that single-sex housing is permissible).

There is no provision in the regulation which would prohibit discrimination in textbooks and other curricular materials.—As noted in the Preamble to the proposed regulation, the Department recognizes that sex stereotyping in curricula is a serious matter, but has concluded that any specific regulatory provision in this area would raise grave constitutional questions under the First Amendment. The Department assumes that recipients will deal with this problem in the exercise of their general authority and control over curricula and course content. For its part, the Department will increase its efforts, through the Office of Education, to provide research, assistance, and guidance to local educational agencies in eliminating sex bias from curricula and educational material.

ACCESS AND PARTICIPATION GENERALLY

The regulation prohibits discrimination by recipients in granting access to or providing for participation in any course offering or extracurricular activity, including a campus organization or competitive athletics. No classes, including physical education, may be offered separately on the basis of sex.

ATHLETICS

Where selection is based on *competitive skill*, athletics *may* be provided through *separate* teams for males and females or through a single team open to both sexes. Institutions must determine, at least annually, in what sports students desire to participate. If separate teams are offered, a recipient institution may not discriminate on the basis of sex in provision of necessary equipment or supplies; or in any other way, *but equal aggregate expenditures are not required*. The goal of the regulation in the area of competitive athletics is to secure equal opportunity for males and females while allowing schools and colleges flexibility in determining how best to provide such opportunity.

Where athletic opportunities for students of one sex have been limited, an institution *must* make affirmative efforts to inform members of that sex of the availability of equal opportunities and to provide support and training to enable them to participate.

CAMPUS ORGANIZATIONS

Generally, a recipient may not, in connection with its education program or activity, *support or assist* any organization, agency or person which discriminates on the basis of sex. The proposed regulation does not specify in more detail what organization, agencies, or persons could not, if they operated discriminatorily, be supported by a recipient consistent with its obligations under Title IX. It does, however, set out the major criteria to be applied in determining existence of a violation in this area, which are (1) the *substantiality* of the relationship between the recipient and the organization (including financial support and housing), and (2) the *closeness* of the relationship between the organization's functions and the educational program or activity of the recipient.

Examples

A recipient school district may not require boys to take shop and girls to take home economics, exclude girls from shop and boys from home economics, or operate separate home economics or shop classes for boys and girls.

A recipient school district may not require segregation of boys into one health, physical education, or other class, and segregation of girls into another such class.

A recipient vocational or other educational institution may not state in its catalog or elsewhere that a course is solely or primarily for persons of one sex.

A recipient institution which admits male and female students may not provide varsity sports opportunities exclusively or virtually exclusively for male students. However, it is *not* required to provide women access to men's teams if it furnishes women separate opportunities to participate in competitive athletics of comparable types and at comparable levels of competition (*e.g.* varsity, junior varsity, etc.).

A recipient educational institution would be *prohibited from providing financial support* for an all-female hiking club, an all-male language club, or a single-sex honorary society. *However, an organization whose membership was restricted* to members of one sex *could adhere to its restrictive policies*, and operate on the campus of a recipient university, *if it received no support or housing from the university and did not operate in connection with the university's education program or activity.*

BENEFITS, SERVICES, AND FINANCIAL AID

Generally, a recipient subject to the regulation is prohibited from discriminating in making available, in connection with its educational program or activity, any benefits, services, or financial aid. Benefits and services include medical and insurance policies and services for students, counseling, and assistance in obtaining employment. Financial aid includes scholarships, loans, grants-in-aid and work-study programs.

The general prohibition does not apply to administration by a recipient of a scholarship or similar financial assistance program which is restricted to members of one sex *and* is established under a foreign will, trust, or similar legal instrument or by a foreign government.

FACILITIES

Generally, all facilities must be available without discrimination on the basis of sex. As provided in the statute, however, *the regulation permits separate housing based on sex as well as separate locker rooms, toilets and showers.* A recipient may not make available to members of one sex locker rooms, toilets and showers which are not comparable to those provided to members of the other sex. With respect to housing, the regulation requires comparability as to the facilities themselves and nondiscrimination as to their availability and as to the rules under which they are operated, including fees, hours, and requirements for off-campus housing.

Examples

An institution which has one swimming pool *must* provide for use by members of both sexes on a nondiscriminatory basis.

An institution which lists off-campus housing for its students *must ensure* that, *in the aggregate, comparable off-campus housing is available in equal proportion to those members of each sex expressing an interest in it.*

Administration by a recipient institution of different rules based on sex regarding eligibility for living off-campus, curfews, availability of cleaning and janitorial assistance, etc. would violate the regulation.

EMPLOYMENT

All employees in *all* institutions are covered, both full- and part-time, except those in military schools, and in religious schools, to the extent compliance would be inconsistent with the controlling religious tenets. Employment coverage under the proposed regulation generally follows the policies of the Equal Employment Opportunity Commission and the Department of Labor's Office of Federal Contract Compliance. Specifically, the proposal covers:

(a) employment criteria
(b) recruitment
(c) compensation
(d) job classification and structure
(e) fringe benefits

(f) marital or parental status
(g) effect of state or local law or other requirements
(h) advertising
(i) pre-employment inquiries
(j) sex as a *bona fide* occupational qualification.

As to fringe benefits, employers must provide either equal contributions to or equal benefits under pension plans for male and female employees; as to pregnancy, leave and fringe benefits to pregnant employees must be offered in the same manner as are leave and benefits to temporarily disabled employees.

Examples

A recipient employer may not recruit and hire employees solely from discriminatory sources in connection with its educational program or activity.

A recipient employer must provide *equal* pay to male and female employees performing the *same work* in connection with its educational program or activity.

A recipient employer may not discriminate against or exclude from employment any employee or applicant for employment on the basis of pregnancy or related conditions.

ENFORCEMENT PROCEDURE

The proposed regulation includes a general procedural section which includes among other things, compliance reviews, access to information, complaint procedures, administrative termination procedures (hearings), decision, administrative and judicial review and post-termination proceedings. As noted earlier, a more detailed procedural regulation will be issued at a later time.

Should a violation of the statute occur, the Department is obligated to seek voluntary compliance. If attempts to secure voluntary compliance fail, enforcement action may be taken:

(1) by administrative proceedings to terminate Federal financial assistance until the institution ceases its discriminatory conduct; or

(2) by other means authorized by law, including referral of the matter to the Department of Justice with a recommendation for initiation of court proceedings. Under the latter mode of enforcement, the recipient's Federal funds are not jeopardized.

[From the Federal Register, June 20, 1974]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE—OFFICE OF THE SECRETARY

[45 CFR PART 86]

EDUCATION PROGRAMS AND ACTIVITIES RECEIVING OR BENEFITTING FROM FEDERAL FINANCIAL ASSISTANCE

NONDISCRIMINATION ON THE BASIS OF SEX

The Office of Civil Rights of the Department of Health, Education, and Welfare proposes to add Part 86 to the Departmental Regulation to effectuate Title IX of the Education Amendments of 1972 (20 U.S.C. §§ 1681 *et seq.*), except sections 904 and 906 thereof (20 U.S.C. 1684 and 1686), with regard to Federal financial assistance administered by the Department. Title IX provides that "no person in the United States shall on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance," with certain exceptions. Title IX is similar to Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et seq.*) except that Title IX applies to discrimination based on sex, is limited to educational programs and activities, and includes employment.

Subpart A of these proposed regulations (§§ 86.1 through 86.9) includes definitions and provisions concerning: remedial and affirmative actions, required assurances, dissemination of information policies, and other general matters related to discrimination on the basis of sex. The Subpart also explains the effect of state or local laws and other requirements.

Subpart B (§§ 86.11 through 81.16) describes the educational institutions and other entities, whether public or private, which are covered in whole or in part by the proposed regulations. It also includes exemptions as to admissions for certain educational institutions, as set forth in the statute, but it should be noted that these exemptions are limited to admissions. This Subpart defines "admissions," and describes certain educational institutions which are eligible to submit transition plans designed to convert their single-sex admissions processes to nondiscriminatory processes over a stated period of time not to exceed seven years from the date of enactment of Title IX (i.e. by June 24, 1979).

Subpart C (§§ 86.21 through 86.23) sets forth the general and particular prohibitions with respect to nondiscrimination based on sex in admissions policies and admission preferences, including requirements concerning recruitment of students. The regulatory requirements regarding treatment of students and employment (Subparts D and E) are applicable to all educational institutions receiving Federal financial assistance, including those whose admissions are exempt under Subpart C.

Subpart D (§§ 86.31 through 86.38) sets forth the general rules with respect to prohibited discrimination in educational programs and activities. The specific subject matter covered in Subpart D includes discrimination on the basis of sex in academic research, extracurricular and other offerings, housing, facilities, access to programs and activities, financial and employment assistance to students, health and insurance benefits for students, physical education and instruction, athletics, and discrimination based on the marital or parental status of students.

Subpart E (§§ 86.41 through 86.51) sets forth the general rules with respect to employment in educational programs and activities. The specific subject matters covered are discrimination on the basis of sex in hiring and employment criteria, recruitment, compensation, job classification and structure, promotions and termination, fringe benefits and leave, advertising, pre-employment inquiries, and discrimination with respect to marital or parental status. It also includes provisions for exemptions where sex is a *bona fide* occupational qualification.

Subpart F (§§ 86.61 through 86.66) sets forth the procedures which would govern the implementation of the proposed regulations, including procedures for effecting compliance, conducting hearings, rendering decisions and issuing notices. It also includes provisions concerning the applicability of administrative and judicial review. Section 86.11, in Subpart A, provides that the regulations apply "to each education program or activity which receives or benefits from Federal financial assistance" administered by the Department. Under analogous cases involving constitutional prohibitions against racial discrimination, the courts have held that a school district's or college's education functions include any service, facility, activity or program which it operates or sponsors, including athletics and other extracurricular activities. These precedents have been followed with regard to sex discrimination: see Brenden v. Independent School District 742, 477 F. 2d 1292 (8th Cir. 1973).

Section 86.63(c), in Subpart F, provides, as Title IX requires in 20 U.S.C. 1682, that termination or refusal to grant or continue such assistance "shall be limited in its effect to the particular education program or activity" in which noncompliance has been found. The Secretary proposes to interpret section 86.63 (c) consistently with the interpretation of similar language contained in Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d–1). He proposes, therefore, that an education program or activity or part thereof operated by a recipient of Federal financial assistance administered by the Department will be subject to the requirements of this regulation if it receives or benefits from such assistance. This interpretation is consistent with the leading case interpreting the language contained in Title VI, which holds that Federal funds may be terminated under Title VI only upon a finding they "are administered in a discriminatory manner, or if they support a program which is infected by a discriminatory environment * * *" Board of Public Instruction of Taylor County, Florida v. Finch, 414 F. 2d 1068, 1078–79 (5th Cir. 1969).

A more detailed discussion of various sections in each of the Subparts of the proposed Title IX regulations is set forth in the following paragraphs. In certain cases, major issues and the reasons for the proposed decision are discussed.

Subpart A. Section 86.2 generally provides definitions. Of particular note is § 86.2(o) which provides that where an educational institution is composed of more than one school, department or college, admission to which is independent of admission to any other component, each such school, department or college is considered as a separate unit for the purposes of determining whether its admissions are covered by the regulation. Thus, if a private institution is composed of an undergraduate and a graduate college, admissions to the undergraduate college are exempt (see discussion under Subpart B below) but admissions to the graduate school are not.

Section 86.3(a) requires remedial action to overcome the effects of previous discrimination based on sex in a Federally assisted educational program or activity. Remedial action pursuant to § 86.3(a) is restricted to areas of a recipient's educational program or activity which are not exempt from coverage. Section 86.3(b) permits, but does not require, affirmative action to overcome the effects of conditions which have resulted in limited participation by members of either sex. The Department will not require imposition of quotas under either of these sections.

Section 86.4 requires each recipient of Federal financial assistance to submit to the Director an assurance that each of its educational programs and activities receiving or benefiting from such assistance will be conducted in compliance with the regulations.

Subpart B. Section 86.13 of the regulation provides that all public and private military schools that are recipients of Federal financial assistance, whether secondary or post-secondary, are exempt from coverage. Neither the statute nor the regulation applies to U.S. military and merchant marine academies since these schools are Federal entities rather than recipients of Federal assistance.

Section 86.12 provides that the regulation does not apply to religiously controlled institutions to the extent that such application would be inconsistent with the religious tenets of the controlling organization. An educational institution wishing to claim an exemption on the ground of religion must do so in writing to the Director when it files its assurance of compliance pursuant to § 86.4 The institution would be required to set forth the manner and extent to which application of the regulation would not be consistent with the religious tenets of its controlling organization.

The statute covers admissions only in certain institutions: vocational, professional, graduate, and public undergraduate institutions, except such of the latter as from their founding have been traditionally and continually single-sex. The admissions policies of private undergraduate institutions are exempt. Under the statute and § 86.14, the admissions requirements do not apply, in general, to admissions to public or private preschool, elementary and secondary schools. Because the statute mandates such coverage as to vocational schools, however, admission to public or private vocational schools, whether at the junior high school, high school or post-secondary level, are covered by § 86.14(c) and must be nondiscriminatory. With respect to coverage of admissions to institutions of professional and vocational education, the Secretary has interpreted the statute as excluding admissions coverage of professional and vocational programs offered at private undergraduate schools. Thus, admission to programs leading to first degrees in fields such as teaching, engineering, and architecture at such private colleges will be exempt under § 86.14(d). While the admissions section of the statute might be read as including professional degrees wherever they are offered, the statute can also be read as stating, and the legislative history indicates, that admissions to private undergraduate schools were to be totally exempt.

The exemption in § 86.14(d) for admissions to public traditionally and continually single-sex undergraduate institutions will affect only a few institutions. Likewise, section 86.15 of the regulation, concerning transition by single-sex institutions whose admissions are covered by the statute into institutions with nondiscriminatory admissions practices, will affect relatively few institutions.

Subpart C. Subpart C prescribes (subject to the appropriate admissions exemptions) requirements for nondiscrimination in recruitment and admission of students to educational programs and activities. In addition to a general prohibition of discrimination in § 86.21(a), the regulations delineate, in § 86.21(b), specific prohibitions based on sex relating to such practices as ranking of applicants, application of quotas, and administration of tests or selection criteria. Use of tests for admission which are shown to have an adverse impact on members of one sex must be shown to predict validly the successful completion of the educational program or activity in question (§ 86.21(b)(2)). Further, in connection with this prohibition, § 86.22 of the regulation forbids a recipient from giving preference to applicants on the basis of their attendance at particular institutions if the preference results in discrimination on the basis of sex. Such preferences may be permissible under that section, however, if the granting institution can show that the pool of applicants eligible for such a preference includes roughly equivalent numbers of males and females, or if it can show that the total number of applicants eligible to receive the preference is insignificant in comparison to its total applicant pool.

Specific prohibitions in Subpart C also forbid applying rules concerning such matters as marital or parental status in a manner which discriminates in admissions on the basis of sex (§ 86.21(c)(1)). Section 86.21(c)(2) prohibits discrimination on the basis of pregnancy and related conditions, and § 86.21(c)(3) provides that recipients shall treat disabilities related to such conditions in the same manner and under the same policies as any other temporary disability or physical conditions is treated.

The last section of Subpart C, § 86.23, requires generally that comparable efforts be made by educational institutions to recruit members of each sex. Additional recruitment efforts directed primarily toward members of one sex must be undertaken to remedy past discrimination (pursuant to § 86.3(a) in Subpart A), and such additional efforts may also be taken absent past discrimination in order to correct the effects of conditions which have had the effect of limiting the admissions of members of one sex, to the recipient's educational program or activity (pursuant to § 86.3(b)). Finally, a recipient may not, under § 86.23(b), recruit primarily or exclusively at institutions whose student bodies are exclusively or predominantly single-sex if the effect of such recruitment efforts is to discriminate on the basis of sex.

Subpart D. Subpart D concerns the prohibition of discrimination in treatment of students in educational programs and activities. Generally, § 86.31 (a) states that no person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any academic, extracurricular, research, occupational training, or other educational program or activity operated by a recipient and which receives or benefits from Federal financial assistance. This provision is followed by specific prohibitions in § 86.31(b) which include: discriminating on the basis of sex in the application of any rules of appearance, or in the application of rules of domicile and residency (as discussed below), and aiding or perpetuating sex discrimination by assisting any agency, organization or person which discriminates on the basis of sex in providing any aid, benefits, or services to students or employees. Section 86.31(a) does permit an institution to assist its students in seeking admission to an education program which discriminates, if that admissions discrimination would be permissible under Subpart C. For example, a public undergraduate institution may administer an exchange program with a private undergraduate institution which admits only students of one sex because Subpart C permits the private institution to have such an admissions policy.

Section 86.31(b)(6) forbids application by recipients of residency and domicile rules in a manner which discriminates on the basis of sex. For example, many educational institutions base their determinations of eligibility for in-state tuition on domicile; applicable state law may require a married woman to take the domicile of her husband as of the date of marriage, or further require a year of residency to demonstate domicile. If a male student domiciled in State A marries a female student domiciled in State B, and they then move to State B where the woman continues in school and the man begins school, he may not be entitled to in-state tuition in State B until he has lived there for a year. Additionally, as the wife must take her husband's domicile, she will lose her in-state tuition eligibility. If, instead, the woman were from State A and the man from State B, both would have been entitled immediately to in-state tuition in State B. Application of such rules would be prohibited under § 86.31(b)(6). See Samuel v. University of Pittsburgh, et al., F. Supp. (W.D. Pa., No. 71-1202, April 10, 1974).

Section 86.31(b)(7) prohibits a recipient from assisting another party which discriminates on the basis of sex in serving students or employees of that recipient. This section might apply, for example, to financial support by the recipient to a community recreational group or to official institutional sanction of a professional or social organization. Among the criteria to be considered in each case are the substantiality of the relationship between the recipient subject to the regulation and the other party involved, including the financial support by the recipient, and whether the other party's activities relate so closely to the recipient's educational program or activity, or to students or employees in that program, that they fairly should be considered as activities of the recipient itself. (Under § 86.6(c), a recipient's obligations are not changed by membership in any league or other organization whose rules require or permit discrimination on the basis of sex.)

A recipient is required to develop and implement a procedure to ensure that the operator or sponsor of an educational program or activity not operated wholly by such recipient, in which the recipient assists participation by its students and employees, takes no action which the regulation would prohibit the recipient from taking. This requirement would apply, for example, to a college's responsibility to ensure nondiscrimination in teaching assignments of student teachers from its education school in schools not operated by the college. If the recipient finds that such discrimination is taking place and is unable to secure its prompt correction, it is required to end its connection with the operating or sponsoring entity (§ 86.31(c)).

With respect to housing, § 86.32 provides that a recipient may not discriminate in any aspect of the provision of housing except that, as provided in the statute, housing may be separate on the basis of sex. Thus, all rules, fees, and other requirements must not discriminate on the basis of sex, and the housing provided or otherwise made available (*e.g.* through listing) must be proportionate in quantity to the number of applicants for housing of each sex and comparable in quality and cost to the student. Moreover, a recipient must administer rules concerning off-campus housing (*e.g.* rules concerning which students may live off campus) without discrimination. To the extent that it approves, or assists students in obtaining, off-campus housing, it must take whatever steps it believes necessary to assure that the off-campus housing available to members of one sex, when compared to that available to members of the other sex, is proportionate in quantity to the numbers of applicants of each sex as well as comparable in quality and cost.

Separate toilet, locker room and shower facilities on the basis of sex may be provided, but such facilities as are provided must be comparable in quality and number for men and women (§ 86.33).

Section 86.34(a) covers access to course offerings and other aspects of a recipient's educational program or activity. No course offerings may be conducted separately on the basis of sex including health, physical education, industrial arts, business, vocational, technical, home economics, music, and adult education, and no student may be required to participate or be refused participation in any course offering on the basis of sex. Section 86.34(b) provides that local educational agencies, in which admission to individual schools are exempt, nevertheless may not discriminate in admissions to the vocational institutions (see Subpart B). In addition, they may not discriminate in admissions to any other school or educational unit which they operate (*e.g.* a special high school operated for boys) unless they otherwise make available to students of the sex excluded, pursuant to the same policies and criteria of admission, comparable courses, services and facilities. Section 86.34(d) requires use of nondiscriminatory appraisal and counseling materials.

The Department recognizes that sex stereotyping in curricula and educational materials is a serious problem to which Title IX could well apply, but the Department has concluded that specific regulatory provisions in this area would raise grave constitutional problems concerning the right of free speech under the First Amendment to the Constitution, and for that reason the Secretary has not covered this subject matter in the proposed regulation. The Department assumes that recipients will deal with this problem in the exercise of their general authority and control over curricula and course content. For its part, the Department will increase its efforts, through the Office of Education, to provide research, assistance and guidance to local education agencies in eliminating sex bias from curricula and educational materials.

Section 86.35 requires that provision of financial aid, assistance in making outside employment available to students, and employment of students by a recipient must be undertaken in a nondiscriminatory manner.

Section 86.35(a) prohibits different amounts and types of all forms of student financial aid to members of one sex. Section 86.35(a) prohibits a college or university subject to Title IX from assisting private fellowship or scholarship programs which are limited to members of one sex or for which members of each sex are selected separately. There may be appropriate remedial action in this area, including temporarily considering a student's sex in awarding financial aid. This section does not apply to a recipient's assisting in the administration of a scholarship or fellowship program established under a foreign will, trust or similar legal instrument, or by a foreign government, which differentiates between the sexes. The Secretary believes that the statute was not intended to cover such programs. The Secretary is aware of the problems raised by financial aid limited to members of one sex by a domestic bequest, deed of trust, or other instruments and invites comment in this area.

Under § 86.36, recipients may not discriminate in the provision of medical, hospital, accident, or life insurance benefits, services, policies or plans to any of their students, and recipients may not provide such benefits, service, policies or plans or otherwise discriminate, an any manner which would violate the employment sections of the regulation (Subpart E) if the action were to be taken with respect to employees. The section does not, however, prohibit recipients from providing any benefits or services which may be used by a different proportion of students of one sex than of the other, including but not limited to family planning services.

Section 86.37 provides generally that recipients may not apply rules concerning a student's actual or potential parental, family, or marital status in a discriminatory manner, and it provides specific prohibitions regarding discrimination against students on account of pregnancy, childbirth, or pregnancy-related disabilities. A student may not be excluded from regular classes because of pregnancy or related conditions unless she so requests or unless her physician certifies that a different arrangement is necessary. The regulation reflects the principle that disabilities related to pregnancy should be treated like any other disability.

Section 86.38 imposes requirements concerning physical education and athletic programs, which are integral parts of the educational processes of schools and colleges and are fully subject to the requirements of Title IX. See Brenden v. Independent School District 742, 477 F. 2d 1292, 1292–96 (8th Cir. 1973); compare Bucha v. Illinois High School Association, 351 F. Supp. 69 (N.D. Ill. 1972).

Section 86.38(a) provides that physical education classes and athletic programs must be operated without discrimination on the basis of sex. Such activities for which participation or selection is premised on factors other than skill may not be conducted separately on the basis of sex. Athletics for which selection is based on competitive skill may be provided through separate teams for males and females to the extent such teams comply with the requirements of §§ 86.38 (b) through (e), which are summarized below. (The award of scholarships for participation on a single sex team will not be interpreted as a single sex scholarship prohibited by § 86.35(a) so long as the recipient complies with the requirements of § 86.38, providing for equal opportunity in athletics.)

Recipients must determine in what sports students of both sexes desire to participate (§ 86.38(b)). Where athletic opportunities for students of one sex have previously been limited, a recipient must make affirmative efforts to inform students of that sex of the availability of equal opportunities for them, and to provide support and training to enable them to participate in those opportunities (§ 86.38(c)).

Section 86.38(d) requires that a recipient make affirmative efforts to provide athletic opportunities in such sports and through such teams as will most effectively equalize opportunities for members of both sexes, and in so doing consider the determinations of student interest made pursuant to § 86.38(b). The regulation does not require equal aggregate expenditures for athletics for members of each sex nor equal expenditures for each team (§ 86.38(e)).

Subpart E. Subpart E proposes requirements concerning employment which generally follow those of the Equal Employment Opportunity Commission (29 CFR Part 1604), and the Department of Labor's Office of Federal Contract Compliance (41 CFR Part 60). The EEOC administers Title VII of the Civil Rights Act of 1964, which prohibits employment discrimination, and the OFCC is responsible for the coordination of implementation of Executive Order 11246, as amended, which prohibits employment discrimination by Federal contractors. This Department is responsible for administration, pursuant to the OFCC regulations, of the Executive Order as to Federal contractors which are educational institutions. Virtually all recipients subject to Part 86 are also subject to Title VII, and many are also subject to the Executive Order. Where Subpart E of Title IX differs from either the Title VII regulations or those under Executive Order 11246, an employer who complies with this proposed regulation would also be complying with both Title VII and Executive Order, even where the latter provisions differ from each other, with the exception of fringe benefits as discussed in the following paragraph.

Section 86.46(b)(2) of Subpart E follows the Executive Order regulations in requiring that fringe benefit plans provide for either equal periodic benefits to members of each sex, or equal contributions by the employer for members of each sex (§ 86.36 imposes identical requirements for student benefit plans).

The Title VII regulation differs in that it prohibits payment of unequal periodic benefits on the basis of sex, and precludes employers from justifiying unequal periodic benefits on the basis of differences in cost for males and for females. Assuming different life spans at particular ages between the sexes, and assuming equal contributions by all employees, Title VII implicitly requires payment of higher employer contributions for, and the possibility of higher total benefits received by, women. (The Department of Labor is currently considering changes in the Executive Order regulations. One of the proposed changes would result in conforming the fringe benefit requirements with those in effect under Title VII. (See 38 FR 35336-28, December 27, 1973.)

The Secretary has considered a third alternative for possible adoption by the Department. That proposal would mandate the use of premium or rate tables which do not differentiate on the basis of sex, and would thus require both equal contributions and equal periodic benefits. The Secretary invites comment specifically on whether § 86.46(b)(2) should adopt the Executive Order approach, as it does presently, that of Title VII, or the third alternative as set forth above.

The regulation applies to part-time employees (§ 86.41(a)(2)). The Secretary will interpret the section concerning fringe benefits (§ 86.46) to require, where an institution's female permanent employees are disproportionately part-time or its permanent part-time employees are disproportionately female, and the institution does not provide its permanent part-time employees fringe benefits proportionate to those provided full-time employees, that the institution demonstrate that such a manner of providing fringe benefits does not discriminate on the basis of sex. "Permanent" would refer to any employee who is expected to work or has in fact worked at least one academic semester at half-time or half-time equivalent. The Secretary seeks comment on the implications of requiring all institutions to provide permanent part-time employees fringe benefits proportionate to those offered full-time employees, regardless of the relative composition of a particular institution's part-time and full-time work forces or of the ratio of part-time and full-time employment among its female employees.

The Secretary sees no reason for treating disabilities relating to pregnancy differently from other temporary disabilities in the context of educational institutions. Accordingly, § 86.47(b) reflects the more detailed Title VII regulation rather than the Executive Order regulation. Section 86.47(c) also follows the Title VII regulation in requiring not only that disabilities related to pregnancy must be considered a justification for leave, but that where an employer provides for temporary disabilities under its fringe benefit or leave plan, disabilities related to pregnancy must be treated in the same manner as any other temporary disability.

Section 86.47(e) provides that an employee may not be required to commence leave related to pregnancy so long as her physician certifies that she is capable of performing her duties, and that she must be allowed to resume work after such a leave no more than two weeks after her physician certifies that she is capable of doing so, or in the case of an employee who is a teacher, at the beginning of the first academic term after such certification is made. These rules are consistent with the recent holding of the Supreme Court in Cleveland Board of Education v. LaFleur, 94 S.Ct. 791 (1974).

Although LaFleur apparently permits an employer to require that every pregnant teacher commence leave "at some firm date during the last few weeks of pregnancy," *Id.* at 799, n. 13, there is no clear medical evidence as to what such date might be generally appropriate, and the Secretary believes individualized determinations based on the employee's own capacities should be required instead.

Section 86.50(a) departs from both the Title VII and the Executive Order regulations in prohibiting pre-employment inquiries as to an applicant's marital status, as such inquiries are frequently the predicate for discrimination against married women. Section 86.21(c)(4) contains a similar prohibition with regard to pre-admission inquires. Section 86.51 follows the Title VII and Executive Order regulations in providing for consideration of sex in making employment decisions where sex is a "*bona fide* occupational qualification." (The Title VII exemption is provided for by the statute; the Executive Order exemption is intended simply to be consistent with that legislation.) Section 86.41 is included only for consistency with those regulations.

Subpart F. As noted above, Subpart F sets forth the procedures which would govern implementation of the proposed regulations. These procedures are in most respects similar to those contained in the Department's regulation implementing Title VI of the Civil Rights Act of 1964, 45 CFR Parts 80 and 81. Several of the provisions, however, are particularly noteworthy.

The provisioin for amicus participation under Title VI is contained in the procedural rather than the substantive regulation and may be found at 45 CFR 81.22. Amicus participation under Title IX will be included when procedural regulations are issued.

The Office for Civil Rights has previously distributed a Memorandum to Presidents of Institutions of Higher Education Participating in Federal Assistance Programs (August 1972), a Memorandum for Directors of Institutions of Vocational Education Participating in Federal Assistance Programs (May 1973), and a Memorandum for Chief State School Officers and Local School Superintendents (February 1973), all of which describe the basic applicability of Title IX, and the Office for Civil Rights and the Office of Education have jointly distributed a Memorandum for Presidents of Selected Institutions of Higher Education Participating in Federal Assistance Programs (May 1973), which describes the criteria and procedures under which certain formerly single-sex institutions may operate pursuant to a plan for transition to nondiscriminatory admissions. These documents are consistent, with certain minor exceptions, with the provisions of proposed Part 86 (the requirements of Part 86 which correspond to those of the Memorandum for Presidents of Selected Institutions are contained §§ 86.15 and 86.16).

Persons who wish to submit comments, suggestions, or objections pertaining to these regulations may present their views, in writing, to the Director of the Office of Civil Rights of the Department of Health, Education, and Welfare, P.O. Box 2974, Washington, D.C. 20013. The Secretary believes that the comment period should extend for at least thirty days into the autumn academic semester, to enable academic institutions and student and faculty groups to formulate comments, and comments may therefore be submitted through October 15, 1974. Comments received in response to this notice will be available for public inspection in Room 3256, 330 Independence Avenue, SW., Washington, D.C. 20201, between 9 a.m. and 5:30 p.m., Monday through Friday (except Federal holidays) both before and after October 15, 1974, until the regulation is published in final form. Copies of representative comments received by the Director will also be made available for public inspection in the office of each Regional Director of the Office for Civil Rights during normal business hours before and after October 15, 1974. The Regional Directors and their offices are located as follows:

Region I—Mr. John G. Bynoe, RKO General Bldg., 5th Floor, Bulfinch Place, Boston, Massachusetts 02114.

Region II—Mr. Joel Barkan, 26 Federal Plaza, Rm. 3908, New York, New York 10007.

Region III—Mr. Dewey Dodds, Gateway Bldg., 3535 Market Street, Philadelphia, Pennsylvania 19101.

Region IV—Mr. William Thomas, 50 Seventh Street, NE, Rm. 404, Atlanta, Georgia 30323.

Region V—Mr. Kenneth A. Mines, 300 W. Jackson Blvd., 10th Floor, Chicago, Illinois 60606.

Region VI—Ms. Dorothy D. Stuck, 1114 Commerce Street, Dallas, Texas 75202.

Region VII—Mr. Taylor D. August, 12 Grand Bldg., 12th and Grand Avenue, Kansas City, Missouri 64106.

Region VIII—Mr. Gilbert D. Roman, Rm. 11037, Federal Bldg., 1961 Stout Street, Denver, Colorado 80202.

Region IX—Mr. Floyd L. Pierce, 760 Market Street, Rm. 700, San Francisco, California 94102.

Region X—Ms. Mariaina Kiner, 6101 Arcade Plaza Bldg., 1321 Second Avenue, Seattle, Washington 98101.

Comments received before October 15, 1974, will be considered before final action is taken on this proposal. Comments received after that date will be considered until the regulation is prepared in final form. The proposal may be changed in the light of the comments received. In the next several weeks, the Department will hold public forums in various cities to brief the public and media and to enter into a question and answer dialogue with the public about the proposed regulation. It is hoped that these forums will increase public awareness of the issues and assist interested citizens in developing formal comments, to be later submitted to the Department.

This Part 86 is proposed under the authority of section 902 of the Education Amendments of 1972 (20 U.S.C. 1682).

In consideration of the foregoing, it is proposed to add Part 86 to Title 45 of the Code of Federal Regulations to read as set forth below.

Dated: June 14, 1974.

CASPER W. WEINBERGER,
Secretary, Department of Health,
Education, and Welfare.

PART 86—NONDISCRIMINATION ON THE BASIS OF SEX UNDER FEDERALLY ASSISTED EDUCATION PROGRAMS AND ACTIVITIES

SUBPART A—INTRODUCTION

Sec.
86.1 Purpose.
86.2 Definitions.
86.3 Remedial and affirmative action.
86.4 Assurances required.
86.5 Transfers of property.
86.6 Effect of other requirements.
86.7 Effect of employment opportunities.
86.8 Designation of responsible employee.
86.9 Dissemination of policy.

SUBPART B—COVERAGE

86.11 Application.
86.12 Educational institutions controlled by religious organizations.
86.13 Military and merchant marine educational institutions.
86.14 Admissions.
86.15 Educational institutions eligible to submit transition plans.
86.16 Transition plans.
86.17–86.20 [Reserved].

SUBPART C—DISCRIMINATION ON THE BASIS OF SEX IN ADMISSION AND RECRUITMENT PROHIBITED

86.21 Admission.
86.22 Preference in admission.
86.23 Recruitment.
86.24–86.30 [Reserved].

SUBPART D—DISCRIMINATION ON THE BASIS OF SEX IN EDUCATION PROGRAMS AND ACTIVITIES PROHIBITED

86.31 Education programs and activities.
86.32 Housing.
86.33 Comparable facilities.
86.34 Access to education program or activity.
86.35 Financial and employment assistance to students.
86.36 Health and insurance benefits and services.
86.37 Marital or parental status.
86.38 Athletics.
86.39–86.40 [Reserved].

SUBPART E—DISCRIMINATION ON THE BASIS OF SEX IN EMPLOYMENT IN EDUCATION PROGRAMS AND ACTIVITIES PROHIBITED

86.41 Employment.
86.42 Employment criteria.
86.43 Recruitment.
86.44 Compensation.
86.45 Job classification and structure.
86.46 Fringe benefits.
86.47 Marital or parental status.
86.48 Effect of State or local law or other requirements.

86.49 Advertising.
86.50 Pre-employment inquiries.
86.51 Sex as bona-fide occupational qualification.
86.52–86.60 [Reserved].

SUBPART F—PROCEDURES

86.61 Compliance information.
86.62 Conduct of investigations.
86.63 Procedures for effecting compliance.
86.64 Hearings.
86.65 Decisions and notices.
86.66 Judicial review.

AUTHORITY: Section 902 of the Education Amendments of 1972, 86 Stat. 374; 20 U.S.C. 1682.

SUBPART A—INTRODUCTION

§ 86.1 *Purpose.*

The purpose of this part is to effectuate title IX of the Education Amendments of 1972 (except sections 904 and 906 of those Amendments) which is designed to eliminate (with certain exceptions) discrimination on the basis of sex in any education program or activity receiving Federal financial assistance.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.2 *Definitions.*

As used in this part, the term—

(a) "*Title IX*" means title IX of the Education Amendments of 1972, Pub. L. 92–318, 20 U.S.C. 1681 *et seq.*

(b) "*Department*" means the Department of Health, Education, and Welfare.

(c) "*Secretary*" means the Secretary of Health, Education, and Welfare.

(d) "*Director*" means the Director of the Office of Civil Rights of the Department.

(e) "*Reviewing Authority*" means that component of the Department delegated authority by the Secretary to appoint, and to review the decision of, administrative law judges in cases arising under this part.

(f) "*Administrative law judge*" means a person appointed by the reviewing authority to preside over a hearing held under this part.

(g) "*Federal financial assistance*" means any of the following, when authorized or extended under a law administered by the Department:

(1) A grant or loan of Federal funds, including funds made available for:

(i) The acquisition, construction, renovation, restoration, or repair of a building or facility or any portion thereof; and

(ii) Scholarships, loans, grants, wages or other funds extended to any entity for payment to or on behalf of students admitted to that entity, or extended directly to such students for payment to that entity.

(2) A grant of Federal real or personal property or any interest therein, including surplus property, and the proceeds of the sale or transfer of such property, if the Federal share of the fair market value of the property is not, upon such sale or transfer, properly accounted for to the Federal Government.

(3) Provision of the services of Federal personnel.

(4) Sale or lease of Federal property or any interest therein at nominal consideration, or at consideration reduced for the purpose of assisting the recipient or in recognition of public interest to be served thereby, or permission to use Federal property or any interest therein without consideration.

(5) Any other contract, agreement, or arrangement which has as one of its purposes the provision of assistance to any education program or activity, except a contract of insurance or guaranty.

(h) "*Recipient*" means any State or political subdivision thereof, or any instrumentality of a State or political subdivision thereof, any public or private agency, institution, or organization, or other entity, or any person, to whom Federal financial assistance is extended directly or through another recipient and which operates an education program or activity which receives or benefits from such assistance, including any subunit, successor, assignee, or transferee thereof.

(i) "*Applicant*" means one who submits an application, request, or plan required to be approved by a Department official, or by a recipient, as a condition to becoming a recipient.

(j) "*Educational institution*" means a local educational agency as defined by section 801(f) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 881), a preschool, a private elementary or secondary school, or an applicant or recipient of the type defined by paragraph (k), (l), (m), or (n).

(k) "*Institution of graduate higher education*" means an institution which:

(1) Offers academic study beyond the bachelor of arts or bachelor of science degree, whether or not leading to a certificate of any higher degree in the liberal arts and sciences; or

(2) Awards any degree in a professional field beyond the first professional degree (regardless of whether the first professional degree in such field is awarded by an institution of undergraduate higher education or professional education); or

(3) Awards no degree and offers no further academic study, but operates ordinarily for the purpose of facilitating research by persons who have received the highest graduate degree in any field of study.

(l) "*Institution of undergraduate higher education*" means:

(1) An institution offering at least two but less than four years of college level study beyond the high school level, leading to a diploma or an associate degree, or wholly or principally creditable towards a baccalaureate degree; or

(2) An institution offering academic study leading to a baccalaureate degree; or

(3) an agency or body which certifies credentials or offers degrees, but which may or may not offer academic study.

(m) "*Institution of professional education*" means an institution (except an institution of undergraduate higher education which offers a program of academic study that leads to a first professional degree in a field for which there is a national specialized accrediting agency recognized by the United States Commissioner of Education.

(n) "*Institution of vocational education*" means a school or institution (except an institution of professional or graduate or undergraduate higher education) which has as its primary purpose preparation of students to pursue a technical, skilled, or semi-skilled occupation or trade, or to pursue study in a technical field, whether or not the school or institution offers certificates, diplomas, or degrees and whether or not it offers full-time study.

(o) "*Administratively separate unit*" means a school, department or college of an educational institution (other than a local educational agency) admission to which is independent of admission to any other component of such institution.

(p) "*Admission*" means selection for part-time, full-time, special, associate, transfer, exchange, or any other enrollment, membership, or matriculation in or at an education program or activity operated by a recipient.

(q) "*Student*" means a person who has gained admission.

(r) "*Transitition plan*" means a plan subject to the approval of the United States Commissioner of Education pursuant to section 901(a)(2) of the Education Amendments of 1972, under which an educational institution operates in making the transition from being an educational institution which admits only students of one sex to being one which admits students of both sexes without discrimination.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.3 Remedial and affirmative actions.

(a) *Remedial action.* A recipient which has previously discriminated against persons on the basis of sex in an education program or activity shall take such remedial action as is necessary to overcome the effects of such previous discrimination.

(b) *Affirmative action.* In the absence of prior discrimination on the basis of sex in an education program or activity, a recipient may take affirmative action to overcome the effects of conditions which resulted in limited participation therein by persons of a particular sex.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.4 Assurances required.

(a) *General.* Every application for Federal financial assistance for any education program or activity shall as condition of its approval contain or be accompanied by an assurance from the recipient, satisfactory to the Director, that each education program or activity operated by the recipient and to which this part applies will be operated in compliance with this part.

(b) *Duration of obligation.* (1) In the case of Federal financial assistance extended to provide real property or structures thereon, such assurance shall obligate the recipient or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used to provide an education program or activity.

(2) In the case of Federal financial assistance extended to provide personal property, such assurance shall obligate the recipient for the period during which it retains ownership or possession of the property.

(3) In all other cases such assurance shall obligate the recipient for the period during which Federal financial assistance is extended.

(c) *Form.* The Director will specify the form of the assurances required by paragraph (a) of this section and the extent to which such assurances will be required of the applicant's or recipient's subgrantees, contractors, subcontractors, transferees, or successors in interest.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.5 *Transfers of property.*

If a recipient sells or otherwise transfers property financed in whole or in part with Federal financial assistance to a transferee which operates any education program or activity, and the Federal share of the fair market value of the property is not upon such sale or transfer properly accounted for to the Federal Government, both the transferor and the transferee shall be deemed to be recipients, subject to the provisions of subpart B.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.6 *Effect of other requirements.*

(a) *Effect of other Federal provisions.* The obligations imposed by this part are independent of obligations not to discriminate on the basis of sex imposed by Executive Order 11246, as amended; sections 779A and 845 of the Public Health Service Act (42 U.S.C. 295h-9 and 298b-2); title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e *et seq.*); the Equal Pay Act (29 U.S.C. 206 and 206(d)); and any other act of Congress or Federal regulation.

(Secs. 901, 902, 905, Education Amendments of 1972, 86 Stat. 373, 374, 375; 20 U.S.C. 1681, 1682, 1685)

(b) *Effect of State or local law or other requirements.* The obligation to comply with this part is not obviated or alleviated by any State or local law or other requirement which would render any applicant or student ineligible, or limit the eligibility of any applicant or student, on the basis of sex, to practice any occupation or profession.

(c) *Effect of rules or regulations of private organizations.* The obligation to comply with this part is not obviated or alleviated by any rule or regulation of any organization, club, athletic or other league, or association which would render any applicant or student ineligible to participate, or limit the eligibility or participation of any applicant or student, on the basis of sex, in any education program or activity operated by a recipient and which receives or benefits from Federal financial assistance.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.7 *Effect of employment opportunities.*

The obligation to comply with this part is not obviated or alleviated because employment opportunities in any occupation or profession are or may be more limited for members of one sex than for members of the other sex.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.8 *Designation of responsible employee.*

Each recipient shall designate an employee to coordinate its efforts to comply with this part, including any investigation of any complaint communicated to such recipient alleging its noncompliance with this part or alleging any actions which would be prohibited by this part.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.9 *Dissemination of policy.*

(a) *Notification of policy.* (1) Each recipient shall implement specific and continuing steps to notify applicants for admission or employment, students, employees, counselors of applicants for admission or employment, and other participants, beneficiaries, and other interested persons, that it does not discriminate on the basis of sex in the education programs or activities which it operates, and that it is required by title IX and this part not to discriminate in such manner. Such notification shall contain such information, and be made in such manner, as the Director finds necessary to apprise such persons of the protections against discrimination assured them by title IX and this part, but shall state at least that the requirement not to discriminate in education programs and activities extends to employment therein and to admission thereto unless subpart C does not apply to the recipient, and that inquiries concerning the application of title IX and this part to such recipient may be referred to the employee designated pursuant to § 86.9, or to the Director.

(2) Each recipient shall make the initial notification required by paragraph (a)(1) within 90 days of the effective date of this part or of the date this part first applies to such recipient, whichever comes later, which notification shall include publication in: (i) local newspapers; (ii) newspapers and magazines operated by such recipient or by student, alumnae, or alumni groups for or in connection with such recipient; and (iii) memoranda or other written communications distributed to every student and employee of such recipient.

(b) *Publications.* (1) Each recipient shall prominently include a statement of the policy described in paragraph (a) of this section in each announcement, bulletin, catalog, or application form which it makes available to any person of a type described in paragraph (a) of this section, or which is otherwise used in connection with the recruitment of students or employees.

(2) A recipient shall not use or distribute a publication of the type described in this paragraph which suggests, by text or illustration, that such recipient treats applicants, students, or employees differently on the basis of sex except as such treatment is permitted by this part.

(c) *Distribution.* Each recipient shall distribute without discrimination on the basis of sex each publication described in paragraph (b) of this section, and shall apprise each of its admission and employment recruitment representatives of the policy of nondiscrimination described in paragraph (a) of this section, and require such representatives to adhere to such policy.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

SUBPART B—COVERAGE

§ 86.11 *Application.*

Except as provided in this subpart, this Part 86 applies to every recipient and to each education program or activity operated by such recipient which receives or benefits from Federal financial assistance.

§ 86.12 *Educational institutions controlled by religious organizations.*

(a) *Application.* This part does not apply to an educational institution which is controlled by a religious organization to the extent application of this part would not be consistent with the religious tenets of such organization.

(b) *Exemption.* An education institution which wishes to claim the exemption set forth in paragraph (a) of this section, shall do so in writing to the Director when filing the assurance required by § 86.4, setting forth the extent of the requested exemption and enclosing a statement of the religious tenets under which the exemption is claimed and any other information which might aid the Director in determining whether the institution qualifies for such exemption.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.13 *Military and merchant marine educational institutions.*

This part does not apply to an educational institution whose primary purpose is the training of individuals for a military service of the United States or for the merchant marine.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.14 Admissions.*

(a) *Administratively separate units.* For the purposes only of this section, §§ 86.15 and 86.16, and subpart C, each administratively separate unit shall be deemed to be an educational institution.

(b) *Application of subpart C.* Except as provided in paragraphs (c) and (d) of this section, subpart C applies to each recipient. A recipient to which subpart C applies shall not discriminate on the basis of sex in admission or recruitment in violation of that subpart.

(c) *Educational institutions.* Except as provided in paragraph (d) of this section as to recipients which are educational institutions, subpart C applies only to institutions of vocational education, professional education, graduate higher education, and public institutions of undergraduate higher education.

(d) *Public institutions of undergraduate higher education.* Subpart C does not apply to any public institution of undergraduate higher education which traditionally and continually from its establishment has had a policy of admitting only students of one sex.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.15 Educational institutions eligible to submit transition plans.*

(a) *Application.* This section applies to each educational institution to which subpart C applies which:

(1) Admitted only students of one sex as regular students as of June 23, 1972; or

(2) Admitted only students of one sex as regular students as of June 23, 1965, but thereafter admitted as regular students, students of the sex not admitted prior to June 23, 1965.

(b) *Provision for transition plans.* An educational institution to which this section applies shall not discriminate on the basis of sex in admission or recrutment in violation of subpart C unless it is carrying out a transition plan approved by the United States Commissioner of Education as described in § 86.16, which plan provides for the elimination of such discrimination by the earliest practicable date but in no event later than June 23, 1979.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.16 Transition plans.*

(a) *Submission of plans.* An institution to which § 86.15 applies and which is composed of more than one administratively separate unit may submit either a single transition plan applicable to all such units, or a separate transition plan applicable to each such unit.

(b) *Content of plans.* In order to be approved by the United States Commissioner of Education, a transition plan shall:

(1) State the name, address, and Federal Interagency Committee on Education (FICE) Code of the educational institution submitting such plan, the administratively separate units to which the plan is applicable, and the name, address, and telephone number of the person to whom questions concerning the plan may be addressed. The person who submits the plan shall be the chief administrator or president of the institution, or another individual legally authorized to bind the institution to all actions set forth in the plan.

(2) State whether the educational institution or administratively separate unit admits students of both sexes, as regular students, and if so, when it began to do so.

(3) Identify and describe with respect to the educational institution or administratively separate unit any obstacles to admitting students without discrimination on the basis of sex.

(4) Describe in detail the steps necessary to elimniate as soon as practicable each obstacles so identified and indicate the schedule for taking these steps and the individual directly responsible for their implementation.

(5) Include estimates of the number of students; by sex, expected to apply for, be admitted to, and enter each class during the period covered by the plan.

(c) *Nondiscrimination.* No policy or practice of a recipient to which § 86.15 applies shall result in treatment of applicants to or students of such recipient in violation of subpart C unless such treatment is necessitated by an obstacle identified in paragraph (b)(3) of this section and a schedule for eliminating that obstacle has been provided as required by paragraph (b)(4) of this section.

(d) *Effects of past exclusion.* To overcome the effects of past exclusion of students on the basis of sex, each educational institution to which § 86.15 applies shall include in its transition plan, and shall implement, specific steps designed to encourage individuals of the previously excluded sex to apply for admission to such institution. Such steps shall include instituting recruitment programs which emphasize the institution's commitment to enrolling students of the sex previously excluded.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§§ *86.17–86.20* [*Reserved*]

SUBPART C—DISCRIMINATION ON THE BASIS OF SEX IN ADMISSION AND RECRUITMENT PROHIBITED

§ *86.21 Admission.*

(a) *General.* No person shall, on the basis of sex, be denied admission, or be subjected to discrimination in admission, by any recipient to which this subpart applies, except as provided in §§ 86.15 and 86.16.

(b) *Specific prohibitions.* (1) In determining whether a person satisfies any policy or criterion for admission, or in making any offer of admission, a recipient to which this subpart applies shall not:

(i) give preference to one person over another on the basis of sex, by ranking applicants separately on such basis, or otherwise;

(ii) apply numerical limitations upon the number or proportion of persons of either sex who may be admitted; or

(iii) otherwise treat one individual differently from another on the basis of sex.

(2) A recipient shall not administer or operate any test or other criterion for admission which adversely affects any person on the basis of sex unless use of such test or criterion is shown to predict validly successful completion of the education program or activity in question.

(c) *Prohibitions relating to marital or parental status.* In determining whether a person satisfies any policy or criterion for admission, or in making any offer of admission, a recipient to which this subpart applies:

(1) shall not apply any rule concerning the actual or potential parental, family, or marital status of a student or applicant which treats persons differently on the basis of sex;

(2) shall not discriminate against or exclude any person on the basis of pregnancy, childbirth, miscarriage, abortion, or recovery therefrom, or establish or follow any rule or practice which so discriminates or excludes;

(3) shall treat disabilities related to pregnancy, childbirth, miscarriage, abortion, or recovery therefrom in the same manner and under the same policies as any other temporary disability or physical condition; and,

(4) shall not make pre-admission inquiry as to the marital status of an applicant for admission, including whether such applicant is "Ms.," "Miss," or "Mrs." A recipient may make pre-admission inquiry as to the sex of an applicant for admission, but only if such inquiry is made equally of such applicants of both sexes and if the results of such inquiry are not used in connection with discrimination prohibited by this part.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.22 Preference in admission.*

A recipient to which this subpart applies shall not give preference to applicants for admission, on the basis of attendance at any educational institution or other school or entity which admits as students only or predominantly members of one sex, if the giving of such preference has the effect of discriminating on the basis of sex in violation of this subpart.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.23 Recruitment.*

(a) *Comparable recruitment.* A recipient to which this subpart applies shall make comparable efforts to recruit members of each sex, except that such recipient may be required to undertake additional recruitment efforts as remedial action pursuant to § 86.3(a), and may choose to undertake such efforts as affirmative action pursuant to § 86.3(b).

(b) *Recruitment at certain institutions.* A recipient to which this subpart applies shall not recruit primarily or exclusively at educational institutions, schools or entities which admit as students only or predominantly members of one sex, if such actions have the effect of discriminating on the basis of sex in violation of this subpart.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§§ *86.24–86.30* [*Reserved*].

SUBPART D—DICRIMINATION ON THE BASIS OF SEX IN EDUCATION PROGRAMS AND ACTIVITIES PROHIBITED

§ *86.31 Education programs and activities.*

(a) *General.* Except as provided elsewhere in this part, no person shall, on the basis of sex, be excluded from participation in, be denied the benefits of or be subjected to discrimination under any academic, extracurricular, research, occupational training, or other eduation program or activity operated by a recipient which receives or benefits from Federal financial assistance. This subpart does not apply to actions of a recipient in connection with admission of its students to an education program or activity of (1) a recipient to which subpart C does not apply, or (2) an entity, not a recipient, to which subpart C would not apply if the entity were a recipient.

(b) *Specific prohibitions.* Except as provided in this subpart, in providing any aid, benefit, or service to a student a recipient shall not, on the basis of sex:

(1) Treat one person differently from another in determining whether such person satisfies any requirement or condition for the provision of such aid, benefit, or service;

(2) Provide different aid, benefits, or services or provide aid, benefits, or services in a different manner;

(3) Deny any person any such aid, benefit, or service;

(4) Subject any person to separate or different rules of behavior or other treatment;

(5) Discriminate against any person in the application of any rules of appearance;

(6) Apply any rule concerning the domicile or residence of a student or applicant;

(7) Aid or perpetuate discrimination against any person by assisting any agency, organization, or person which discriminates on the basis of sex in providing any aid, benefit or serivce to students or employees; or

(8) Otherwise limit any person in the enjoyment of any right, privilege, advantage, or opportunity.

(c) *Programs not operated by recipient.* (1) This paragraph applies to any recipient which requires participation by any applicant, student, or employee in any education program or activity not operated wholly by such recipient, or which facilitates, permits, or considers such participation as part of or equivalent to an education program or activity operated by such recipient, including participation in educational consortia and cooperative employment and student-teaching assignments.

(2) Such recipient:

(i) Shall develop and implement a procedure designed to ensure that the operator or sponsor of such other education program or activity takes no action affecting any applicant, student, or employee of such recipient which this part would prohibit such recipient from taking; and

(ii) Shall not facilitate, require, permit, or consider such participation if such action occurs.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S. 1681, 1682)

§ *86.32 Housing.*

(a) *Generally.* A recipient shall not on the basis of sex, apply different rules or regulations, impose different fees or requirements, or offer different services or benefits related to housing, except as provided in this section (including housing provided only to married students).

(b) *Housing provided by recipient.*

(1) A recipient may provide separate housing on the basis of sex.

(2) Housing provided by a recipient to students of one sex, when compared to that provided to students of the other sex, shall be as a whole:

(i) Proportionate in quantity to the number of students of that sex applying for such housing; and

(ii) Comparable in quality and cost to the student.

(c) *Other housing.* (1) A recipient shall not, on the basis of sex, administer different policies or practices concerning occupancy by its students of housing other than provided by such recipient.

(2) A reipient which, through solicition, listing, approval of housing, or otherwise, assists any agency, organization, or person in making housing available to any of its students shall take such action as may be necessary to ensure that such housing as is provided to students of one sex, when compared to that provided to students of the other sex, is as a whole: (i) proportionate in quantity and (ii) comparable in quality and cost to the student. A recipient may render such assistance to any agency, organization, or person which provides all or part of such housing to students only of one sex.

(Secs. 901, 902, 907, Education Amendments of 1972, 86 Stat. 373, 374, 375; 20 U.S.C. 1681, 1682, 1686)

§ 86.33 *Comparable facilities.*

A recipient may provide separate toilet, locker room, and shower facilities on the basis of sex, but such facilities provided for students of one sex shall be comparable to such facilities provided for students of the other sex.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374)

§ 86.34 *Access to education program or activity.*[1]

(a) *Course offerings.* A recipient shall not provide any course or otherwise carry out any of its education program or activity separately on the basis of sex, or require or refuse participation therein by any of its students on such basis, including health, physical education, industrial, business, vocational, technical, home economics, music, and adult education courses.

(b) *Local educational agencies.* A recipient which is a local educational agency shall not, on the basis of sex, exclude any person from admission to:

(1) any institution of vocational education operated by such recipient; or

(2) any other school or educational unit operated by such recipient, unless such recipient otherwise make available to such person, pursuant to the same policies and criteria of admission, courses, servcies, and facilities comparable to each course, service, and facility offered in or through such schools.

(c) *Appraisal and counseling materials.* A recipient which uses testing or other materials for appraising or counseling students shall not use different materials for different students on the basis of their sex or use materials which permit or require different treatment of students on such basis.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.35 *Financial and employment assistance to students.*

(a) *Provision of financial assistance.* (1) In providing financial assistance to any of its students a recipient shall not:

(i) On the basis of sex provide different amounts or types of such assistance, limit eligibility for such assistance which is of any particular type or source, apply different criteria, or otherwise discriminate; or

(ii) through solicitation, listing, approval, provision of facilities, or other services assist any foundation, trust, agency, organization, or person which provides assistance to any of such recipient's students in a manner which discriminates on the basis of sex.

(2) This paragraph does not apply to assistance by a recipient in the administration of a scholarship, fellowship, or other financial assistance program which discriminates on the basis of sex and is established under a foreign will, trust, bequest, or similar legal instrument, or by a foreign government.

(b) *Assistance in making available employment.* A recipient which assists any agency, organization, or person in making employment available to any of its students:

---

[1] See last page of this document for proposal clarifying this section—from *Federal Register*, Vol. 39, No. 135, Friday, July 12, 1974.

(1) shall take such action as may be necessary to assure that such employment is made available without discrimination on the basis of sex; and

(2) shall not render such services to any agency, organization, or person which discriminates on the basis of sex in so making available such employment.

(c) *Employment of students.* A recipient which employs any of its students shall not do so in a manner which violates subpart E.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

(d) *Assistance related to athletics.* Notwithstanding the provisions of this section, separate financial assistance for members of each sex may be provided as part of separate athletic teams for members of each sex to the extent consistent with § 86.38.

§ 86.36 Health and insurance benefits and services.

In providing a medical, hospital, accident, or life insurance benefit, service, policy, or plan to any of its students, a recipient shall not discriminate on the basis of sex, or provide such benefit, service, policy, or plan in a manner which would violate subpart E if it were provided to employees of the recipient. This section shall not prohibit a recipient from providing any benefit or service which may be used by a different proportion of students of one sex than of the other, including family planning services.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.37 Marital or parental status.

(a) *Status generally.* A recipient shall not apply any rule concerning a student's actual or potential parental, family, or marital status which treats students differently on the basis of sex.

(b) *Pregnancy and related conditions.* (1) A recipient shall not discriminate against any student, or exclude any student from its education program or activity, including any class or extra-curricular activity, on the basis of such student's pregnancy, childbirth, false pregnancy, miscarriage, abortion, or recovery therefrom, unless:

(i) The student requests voluntarily to participate in a different such program or activity; or

(ii) The student's physician certifies to the recipient that such different participation is necessary for her physical, mental, or emotional well being.

(2) A recipient shall treat disabilities related to pregnancy, childbirth, false pregnancy, miscarriage, abortion, or recovery therefrom in the same manner and under the same policies as any temporary disability in any medical or hospital benefit, service, plan, or policy which such recipient administers, operates, offers, or participates in with regard to students admitted to the entity.

(3) In the case of a recipient which does not maintain a temporary disability policy for its students, or in the case of a student who does not otherwise qualify for leave under such a policy, a recipient shall treat pregnancy as a justification for a leave of absence for a reasonable period of time, the conclusion of which the student shall be reinstated to her original status.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.38 Athletics.

(a) *General.* No person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, be treated differently from another person or otherwise be discriminated against in any physical education or athletic program operated by a recipient, and no recipient shall provide any physical education or athletic program separately on such basis; provided, however, that a recipient may operate or sponsor separate teams for members of each sex where selection for such teams is based upon competitive skill.

(b) *Determination of student interest.* A recipient which operates or sponsors athletics shall determine at least annually, using a method to be selected by the recipient which is acceptable to the Director, in which sports members of each sex would desire to compete.

(c) *Affirmative efforts.* A recipient which operates or sponsors athletic activities shall, with regard to members of a sex for which athletic opportunities previously have been limited, make affirmative efforts to:

(1) Inform members of such sex of the availability for them of athletic opportunities equal to those available for members of the other sex and of the nature of those opportunities, and

(2) Provide support and training activities for members of such sex designed to improve and expand their capabilities and interests to participate in such opportunities.

(d) *Equal opportunity.* A recipient which operates or sponsors athletics shall make affirmative efforts to provide athletic opportunities in such sports and through such teams as will most effectively equalize such opportunities for members of both sexes, taking into consideration the determination made pursuant to paragraph (b) of this section.

(e) *Separate teams.* A recipient which operates or sponsors separate teams for members of each sex shall not discriminate on the basis of sex therein in the provision of necessary equipment or supplies for each team, or in any other manner.

(f) *Expenditures.* Nothing in this section shall be interpreted to require equal aggregate expenditures for athletics for members of each sex.

§§ *86.39–86.40* [*Reserved*]

SUBPART E—DISCRIMINATION ON THE BASIS OF SEX IN EMPLOYMENT IN EDUCATION PROGRAMS AND ACTIVITIES PROHIBITED

§ *86.41* *Employment.*

(a) *General.* (1) No person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination in employment, or recruitment, consideration, or selection therefor, whether full-time or part-time, under any education program or activity operated by a recipient which receives or benefits from Federal financial assistance.

(2) A recipient shall make all employment decisions in any education program or activity operated by such recipient in a manner which furthers equal employment opportunity regardless of sex, and shall not limit, segregate, or classify applicants or employees in any way which could adversely affect any applicant's or employee's employment opportunities or status because of sex.

(3) A recipient shall not enter into any contractual or other relationship which directly or indirectly has the effect of subjecting individuals to discrimination prohibited by this subpart, including relationships with employment and referral agencies, with labor unions, and with organizations providing or administering frange benefits to employees of the recipient.

(b) *Application.* The provisions of this subpart apply to:

(1) Recruitment, advertising, and the process of application for employment;

(2) Hiring, upgrading, promotion, consideration for and award of tenure, demotion, transfer, layoff, termination, right of return from layoff, and rehiring;

(3) Rates of pay or any other form of compensation, and changes in compensation;

(4) Job assignments, classifications and structure, including position descriptions, lines of progression, and seniority lists;

(5) The terms of any collective bargaining agreement;

(6) Granting and return from leaves of absence, pregnancy leave, leave for persons of either sex to care for children or dependents, or any other leave;

(7) Fringe benefits available by virtue of employment, whether or not administered by the recipient;

(8) Selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, selection for tuition assistance, selection for sabbaticals and leaves of absence to pursue training;

(9) Employer-sponsored activities, including social or recreational programs; and

(10) Any other term, condition, or privilege of employment.

(Secs: 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.42* *Employment criteria.*

A recipient shall not administer or operate any test or other criterion for any employment opportunity which adversely affects any person on the basis of sex unless:

(a) Use of such test or other criterion is shown to predict validily successful performance in the position in question; and

(b) Alternative tests or criteria for such purpose, which do not have such adverse effect, are shown to be unavailable.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.43* *Recruitment.*

(a) *Comparable and affirmative recruiting.* If a recipient recruits applicants for employment, either generally or for particular positions, it shall make comparable efforts to recruit members of each sex in all such recruiting, except that a recipient shall make such affirmative attempts to recruit members of a sex which previously had limited employment participation as are necessary to overcome the effects of such limited participation.

(b) *Recruitment patterns.* A recipient shall not recruit primarily or exclusively at entities which furnish as applicants only or predominantly members of one sex if such actions have the effect of discriminating on the basis of sex in violation of this subpart.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.44* *Compensation.*

A recipient shall not make or enforce any policy or practice which, on the basis of sex:

(a) Makes distinctions in rates of pay or other compensation;

(b) Requires any person to perform duties for which compensation is lower than that for performance in a different position:

(1) Entailing similar duties or,

(2) The position description for which is limited to similar duties; or

(c) Makes any person subject to a position description under which compensation is lower than that for performance:

(1) Under a different position description which is limited to similar duties, or

(2) In a different position entailing duties similar to those set forth in such position description.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.45* *Job classification and structure.*

A recipient shall not:

(a) Classify a job as being for males or for females;

(b) Maintain or establish separate lines of progression, seniority lists, career ladders, or tenure systems based on sex; or

(c) Maintain or establish separate lines of progression, seniority systems, career ladders, or tenure systems for similar jobs, position descriptions, or job requirements which operate to classify persons on the basis of sex, unless sex is a bona fide occupational qualification for the positions in question as set forth in § 86.51.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ *86.46* *Fringe benefits.*

(a) *"Fringe benefits" defined.* For purposes of this part, "fringe benefits" means any medical, hospital, accident, life insurance or retirement benefit, service, policy or plan, any profit-sharing or bonus plan, leave, and any other benefit or service of employment not subject to the provisions of § 86.44.

(b) *Prohibitions.* A recipient shall not:

(1) discriminate on the basis of sex with regard to making fringe benefits available to employees or make fringe benefits available to spouses, families, or dependents of employees differently upon the basis of the employee's sex;

(2) administer, operate, offer, or participate in a fringe benefit plan which does not provide either for equal periodic benefits for members of each sex, or for equal contributions to the plan by such recipient for members of each sex; and

(3) administer, operate, offer, or participate in a pension or retirement plan which establishes different optional or compulsory retirement ages based on sex or which otherwise discriminates in benefits on the basis of sex.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.57 *Marital or parental status.*

(a) *General.* A recipient shall not apply any policy or take any employment action:

(1) concerning the potential marital, parental, or family status of an employee or applicant for employment which treats persons differently on the basis of sex; or

(2) which is based upon whether an employee or applicant for employment is the head of household or principal wage earner in such employee's or applicant's family unit.

(b) *Pregnancy.* A recipient shall not discriminate against or exclude from employment any employee or applicant for employment on the basis of pregnancy, or establish or follow any policy or practice which so discriminates or excludes. For the purpose of this subpart, "pregnancy" means the entire process of pregnancy, childbirth, and recovery therefrom, and includes false pregnancy, miscarriage, and abortion.

(c) *Pregnancy as a temporary disability.* A recipient shall treat disabilities caused or contributed to by pregnancy as temporary disabilities for all job-related purposes, including commencement, duration and extensions of leave, payment of disability income, accrual of seniority and any other benefit or service, and reinstatement, and under any fringe benefit offered to employees by virtue of employment.

(d) *Pregnancy leave.* In the case of a recipient which does not maintain a temporary disability policy for its employees, or in the case of an employee with insufficient leave or accrued employment time to qualify for leave under such a policy, a recipient shall treat pregnancy as a justification for a leave of absence without pay for a reasonable period of [illegible] at the conclusion of which the employee shall be reinstated to her original job or to a comparable position, without decrease in rate of compensation or loss of promotional opportunities, or any other right or privilege of employment.

(e) *Inception of and return from pregnancy leave.* In complying with this section, a recipient shall not require any employee to:

(1) Begin leave related to pregnancy so long as the employee's physician certifies in writing that [illegible] is physically capable of performing her duties, provided that a pregnant employee shall notify her employer in writing of her expected date of delivery, at least 120 days prior to such date; or

(2) Return to her employment after a leave related to pregnancy later than two weeks after the employee's physician certifies in writing that she is physically capable of performing her duties, or in the case of any employee in a teaching positon, later than the beginning of the first full academic term commencing after such certification is made.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.58 *Effect of State or local law or other requirements.*

(a) *Prohibitory requirements.* The obligation to comply with this subpart is not obviated or alleviated by the existence of any State or local law or other requirement which imposes prohibitions or limits upon employment of members of one sex which are not imposed upon members of the other sex.

(b) *Benefits.* A recipient which provides any compensation, service, or benefit to members of one sex pursuant to a State or local law or other requirement shall provide the same compensation, service, or benefit to members of the other sex.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.59 *Advertising.*

A recipient shall not in any advertising related to employment indicate preference, limitation, specification, or discriminaton based on sex unless sex is a bona-fide occupational qualification for the particular job in question.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§ 86.60 *Pre-employment inquiries.*

(a) *Marital status.* A recipient shall not make pre-employment inquiry as to the marital status of an applicant for employment, including whether such applicant is "Ms., Miss, or Mrs."

(b) *Sex.* A recipient may make pre-employment inquiry as to the sex of an applicant for employment, but only if such inquiry is made equally of such applicants of both sexes and if the results of such inquiry are not used in connection with discrimination prohibited by this part.

§ 86.51 *Sex as a bona-fide occupational qualification.*

A recipient may take action otherwise prohibited by this subpart provided it is shown that sex is a bona-fide occupational qualification for that action, such that consideration of sex with regard to such action is essential to successful operation of the employment function concerned. A recipient shall not take action pursuant to this section which is based upon alleged comparative employment characteristics or stereotyped characterizations of one or the other sex, or upon preference based on sex of the recipient, employees, students, or other persons, but nothing contained in this section shall prevent a recipient from considering an employee's sex in relation to employment in a locker room, or toilet facility used only by members of one sex.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

§§ 86.52–86.60 [*Reserved*]

SUBPART F—PROCEDURES

§ 86.61 *Compliance information.*

(a) *Cooperation and assistance.* The Director will to the fullest extent practicable seek the cooperation of recipients in obtaining compliance with this part and will provide assistance and guidance to recipients to help them comply voluntarily with this part.

(b) *Compliance reports.* Each recipient shall keep such records and submit to the Director timely, complete and accurate compliance reports at such time, and in such form and containing such information, as the Director may determine to be necessary to enable him or her to ascertain whether the recipient has complied or is complying with this part. For example, recipients shall have available for the Department data showing the extent to which members of the different sexes are students, employees or other beneficiaries of or participants in federally-assisted education programs and activities. In the case of any such program or activity under which one recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations under this part.

(c) *Access to sources of information.* Each recipient shall permit access by the Director during normal business hours to such of its books, records, accounts, and other sources of information, and its facilities, and shall permit the Director to make copies of any such written information, as may be pertinent to ascertain compliance with this part. Where any information required of a recipient is in the exclusive possession of any other agency, institution or person and such agency, institution or person fails or refuses to furnish such information the recipient shall so certify in its report and shall set forth what efforts it has made to obtain the information. Asserted considerations of privacy or confidentiality may not operate to bar the Department from evaluating or seeking to enforce compliance with this part. Information of a confidential nature obtained in connection with compliance evaluation or enforcement will not be disclosed by the Department except where necessary in formal enforcement proceedings or where otherwise required by law.

(Sec. 902, Education Amendments of 1972, 86 Stat. 374; 20 U.S.C. 1682)

§ 86.62 *Conduct of investigation.*

(a) *Periodic compliance reviews.* The Director will from time to time review the practices of recipients to determine whether they are complying with this part.

(b) *Complaints.* Any person who believes himself or herself or any specific class of individuals to be subjected to discrimination prohibited by this part may be himself or herself or by a representative file with the Director a written complaint. A complaint must be filed not later than 180 days from the date of the alleged discrimination, unless the time for filing is extended by the Director, or unless the alleged discrimination took place after June 30, 1972, but prior to the effective date of this part. The Director shall notify each complainant promptly, in writing, that the complaint has been received.

(c) *Investigations.* The Director will make a prompt investigation whenever a compliance review, report, complaint, or any other information indicates a possible failure to comply with this part. The investigation will include, where appropriate, a review of the pertinent practices and policies of the recipient, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination as to whether the recipient has failed to comply with this part.

(d) *Resolution of matters.* (1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, the Director will so inform the recipient and the complainant, if any, and the matter will be resolved by informal means whenever possible. If it has been determined that the matter cannot be resolved by informal means, action will be taken as provided for in § 86.63.

(2) If, after an investigation pursuant to paragraph (c) of this section, it appears that action pursuant to paragraph (d)(1) of this section is not warranted, the Director will so inform each complainant, in writing, and will give each complainant the opportunity to submit additional information, orally or in writing. Such information will be reviewed promptly and the Director will notify the complainant, in writing, of what action appears to be warranted in light of the information.

(3) If after an investigation pursuant to paragraph (c) of this section or after action required by paragraph (d)(2) of this section, it appears that action pursuant to paragraph (d)(1) of this section is not warranted, the Director will so inform the recipient and each complainant, in writing.

(e) *Intimidatory or retaliatory acts prohibited.* Each recipient shall permit the Director to interview any of its students or employees without a representative of such recipient being present. No recipient or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 901 of the Education Amendments of 1972 or this part, or because he or she has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of complainants will be kept confidential by the Department except to the extent necessary to carry out the purposes of this part, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder, or where otherwise required by law.

(Sec. 902, Education Amendments of 1972, 86 Stat. 374, 20 U.S.C. 1682)

§ 86.63 *Procedure for effecting compliance.*

(a) *General.* If there appears to be a failure or threatened failure to comply with this part, and if the noncompliance or threatened noncompliance cannot be corrected by informal means, compliance with this part may be effected by the suspension or termination of or refusal to award or continue Federal financial assistance in accordance with the procedures of paragraph (c) of this section or by any other means authorized by law. Such other means may include, but are not limited to, (1) a referral to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law of the United States, or any assurance or other contractual undertaking, and (2) any applicable proceeding under State or local law.

(b) *Noncompliance with § 86.4.* If an applicant or recipient fails or refuses to furnish an assurance required under § 86.4 or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that section, Federal financial assistance may be refused in accordance with the procedures of paragraph (c) of this section. The Department will not be required to provide assistance in such a case during the pendency of the administrative proceedings under such paragraph except that the Department will continue assistance during the pendency of such proceedings where such assistance is due and payable pursuant to an application therefor approved prior to the effective date of this part.

(c) *Termination of or refusal to grant or to continue Federal financial assistance.* No order suspending, terminating or refusing to award or continue Federal financial assistance will become effective until (1) the Director has advised the applicant or recipient of its failure to comply and has determined that compliance cannot be secured by voluntary means, (2) there has been a finding on the record, after opportunity for hearing, of a failure by the applicant or recipient to comply with a requirement imposed by or pursuant to this part, and (3) 30 days have expired after the Secretary has filed with the committee of the House and the committee of the Senate having legislative jurisdiction over the program involved, a full written report of the circumstances and the grounds for such action. Any action to suspend or terminate or to refuse to award or continue Federal financial assistance shall be limited to the particular political entity, or part thereof, or other applicant or recipient as to whom such a finding has been made and shall be limited in its effect to the particular education program or activity or part thereof in which such noncompliance has been so found.

(d) *Other means authorized by law.* No action to effect compliance by any other means authorized by law will be taken until (1) the Director has determined that compliance cannot be secured by voluntary means, (2) the recipient or other person and the complainant, if any, has been notified of the recipient's failure to comply and of the action to be taken to effect compliance, and (3) the expiration of at least 10 days from the mailing of such notice to the recipient or other person. During this period of at least 10 days additional efforts will be made to persuade the recipient or other person to comply with this part and to take such corrective action as may be appropriate.

(Secs. 902, Education Amendments of 1972, 86 Stat. 374; 20 U.S.C. 1682)

§ *86.64* *Hearings.*

(a) *Opportunity for hearing.* Whenever an opportunity for a hearing is required by § *86.63*(c), responsible notice will be given by registered or certified mail, return receipt requested, to each affected applicant or recipient. This notice will advise such applicant or recipient of the action proposed to be taken the specific provision under which the proposed action against it is to be taken and the matters of fact or law asserted as the basis for this action, and either (1) fix a date not less than 20 days after the date of such notice within which the applicant or recipient may request, by certified or registered mail addressed to the Director, that the matter be scheduled for hearing or (2) advise such applicant or recipient that the matter in question has been set down for hearing at a stated place and time. The time and place so fixed will be subject to change for cause. A copy of this notice will be mailed by certified mail, return receipt requested, to each individual complainant, and to each organization or group which has filed a complaint on behalf of one or more individuals pursuant to § 86.62(b), and each such complainant, organization, or group will be advised of the time and place of the hearing. An applicant or recipient may waive a hearing and submit written information and argument for the record. The failure of an applicant or recipient to request a hearing for which a date has been set shall be deemed to be a waiver of the right to a hearing under section 902 of the Education Amendments of 1972 and § 86.63(c) of this regulation and consent to the making of a decision on the basis of such information as may be filed as the record.

(b) *Time and place of hearing.* Hearings will be held before an administrative law judge designated in accordance with 5 U.S.C. 3105 and 3344. Hearings will be held at the offices of the Department in Washington, D.C., at a time fixed by the Director unless the administrative law judge determines that the convenience of the applicant or recipient or of the Department requires that another place be selected.

(c) *Participation as amicus curiae.* Each individual complainant, and each organization or group which has filed a complaint on behalf of one or more individuals, may petition the administrative law judge for leave to participate as *amicus curiae*, by giving testimony, by filing a brief, or both, in a hearing held pursuant to paragraph (a) of this section in any matter concerning which such complainant, organization, or group, has filed a complaint pursuant to § 86.62(b). Such petition shall be made no more than 20 days after the date of the notice prescribed by paragraph (a) of this section. Leave to participate as *amicus curiae* shall be liberally granted.

(d) *Right to counsel.* In all proceedings under this section, the recipient shall have the right to be represented by counsel.

(e) *Procedures, evidence, and record.* (1) The hearing, decision, and any administrative review thereof shall be conducted in conformity with 5 U.S.C. 554–557 and in accordance with such rules of procedure as are proper (and not inconsistent with this section) relating to the conduct of the hearing, giving of notices subsequent to those provided for in paragraph (a) of this section, taking of testimony, exhibits, arguments and briefs, requests for findings, and other related matters. Both the Department and the recipient shall be entitled to introduce all relevant evidence on the issues as stated in the notice for hearing or as determined by the officer conducting the hearing at the outset of or during the hearing. Any person (other than a Government employee on official business) who, having been invited or requested to appear and testify as a witness on the Government's behalf, attends at a time and place scheduled for a hearing provided by this part, may be reimbursed for his or her travel and actual expenses of attendance in an amount not to exceed the amount payable under the standardized travel regulations to a Government employee traveling on official business.

(2) Technical rules of evidence shall not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the officer conducting the hearing. The hearing officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(f) *Consolidated or joint hearings.* In cases in which the same or related facts are asserted to constitute noncompliance with this part with respect to two or more programs to which this part applies, or noncompliance with this part and the regulations of one or more other Federal departments or agencies issued under title IX, the Director may, by agreement with such other departments or agencies where applicable, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of rules of procedures not inconsistent with this part. Final decisions in such cases, insofar as this regulation is concerned, shall be made in accordance with § 86.65.

(Sec. 902, Education Amendments of 1972, 86 Stat. 374; 20 U.S.C. 1682)

§ 86.65 Decisions and notices.

(a) *Decisions by administrative law judges.* Within 30 days after a hearing is held by an administrative law judge such administrative law judge shall either make an initial decision, if so authorized, or certify the entire record including his or her recommended findings and proposed decision to the reviewing autohrity for a final decision, and a copy of such initial decision or certification shall be mailed to the applicant or recipient and to the complainant, if any. Where the initial decision referred to in this paragraph or in paragraph (c) of this section is made by the administrative law judge, the applicant or recipient or the Department may within 20 days after issuance of the initial decision, file with the reviewing authority exceptions to the initial decision, with his or her reasons therefor. Upon the filing of such exceptions the reviewing authority shall review the initial decision and issue its own decision including the reasons therefor. In the absence of exceptions the initial decision shall constitute the final decision, subject to the provisions of paragraph (e) of this section.

(b) *Decisions on record or review by the reviewing authority.* Whenever a record is certified to the reviewing authority for decision or it reviews the decision of an administrative law judge pursuant to paragraph (a) or (c) of this section, the applicant or recipient shall be given reasonable opportunity to file with it briefs or other written statements of its contentions, and a copy of the final decision of the reviewing authority shall be given in writing to the applicant or recipient and to the complainant, if any.

(c) *Decisions on record where a hearing is waived.* Whenever a hearing is waived pursuant to § 86.64(a) the reviewing authority shall make its final decision on the record or refer the matter to an administrative law judge for an initial decision to be made on the record. A copy of such decision shall be given in writing to the applicant or recipient, and to the complainant, if any.

(d) *Rulings required.* Each decision of an administrative law judge or reviewing authority shall set forth a ruling on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to this part with which it is found that the applicant or recipient has failed to comply.

(e) *Review in certain cases by the Secretary.* If the Secretary has not personally made the final decision referred to in paragraph (a), (b), or (c) of this section, a recipient or applicant or the Department may, within 30 days after issuance of the final decision by the reviewing autohrity, request the Secretary to review such decision. Such review is not a matter of right and will be granted only where the Secretary determines there are special and important reasons therefor. The Secretary's decision to undertake or not to undertake review will be communicated in writing, within 30 days after such request, to each party, including *amicus curiae*, if any. The Secretary may grant or deny such request, in whole or in part. He or she may also review such a decision upon his or her own motion in accordance with rules of procedure issued by the Director. The Secretary's decision to undertake such review will be communicated in writing within 30 days after the issuance of the reviewing authority's decision, to each party, including *amicus curiae*. Failure of an applicant or recipient to file an exception with the reviewing authority or to request review under this paragraph shall not be deemed a failure to exhaust administrative remedies for the purpose of obtaining judicial review.

(f) *Final agency action for purposes of judicial review.* (1) Except as provided in paragraph (f)(2) of this section, a decision under this section will become the final decision of the Department and will constitute final agency action within the meaning of section 704 of title 5 of the United States Code in the following manner:

(i) A decision by an administrative law judge pursuant to paragraph (a) will become final on the 21st day after such decision is made, unless prior to such day review by the reviewing authority has been requested.

(ii) A decision by the reviewing authority pursuant to paragraph (b) of this section will become final on the 31st day following its issuance unless review by the Secretary is requested prior to such day under paragraph (e) of this section, or unless the Secretary undertakes review on his or her own motion prior to such day under paragraph (e) of this section; or on the 31st day following a request that the Secretary review such decision under paragraph (e) of this section, unless the Secretary prior to such day grants such review.

(iii) A decision of the Secretary under paragraph (c) of this section will become final on the day following its issuance.

(2) A decision to terminate or to refuse to grant or continue Federal financial assistance, which would otherwise constitute the final decision of the Department and final agency action pursuant to paragraph (f)(1) of this section, shall not constitute such action until the Secretary transmits it as such to the appropriate Congressional committees with the report required under section 902 of the Education Amendments of 1972.

(g) *Content of orders.* The final decision may provide for suspension or termination of, or refusal to grant or continue Federal financial assistance, in whole or in part, to which this part applies, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of title IX and this part, including provisions designed to assure that no Federal financial assistance to which this part applies will thereafter be extended to the applicant or recipient determined by such decision to be in default in its performance of an assurance given by it pursuant to this part, or to have otherwise failed to comply with this part unless and until it corrects its noncompliance and satisfies the Director that it will fully comply with this part.

(h) *Post-termination proceedings.* (1) An applicant or recipient adversely affected by an order issued under paragraph (f) of this section shall be restored to full eligibility to receive Federal financial assistance if it satisfies the terms and conditions of that order for such eligibility or if it brings itself into compliance with this part and provides reasonable assurance that it will fully comply with this part.

(2) Any applicant or recipient adversely affected by an order entered pursuant to paragraph (g) of this section may at any time request the Director to restore fully its eligibility to receive Federal financial assistance. Any such request shall be supported by information showing that the applicant or recipient has met the requirements of paragraph (h)(1) of this section. If the Director determines that those requirements have been satisfied, he or she will restore such eligibility.

(3) If the Director denies any such request, the applicant or recipient may submit a request for a hearing in writing, specifying why it believes such official to have been in error. It shall thereupon be given an expeditious hearing, with a decision on the record, in accordance with rules of procedure issued by the Director. The applicant or recipient will be restored to such eligibility if it proves at such hearing that it satisfied the requirements of paragraph (h)(1) of this section. While proceedings under this paragraph are pending, the sanctions imposed by the order issued under paragraph (f) of this section shall remain in effect.

(4) The pendency of any proceeding under this paragraph shall not lift or stay the sanctions imposed by the order issued under paragraph (g) of this section.

(Sec. 902, Education Amendments of 1972, 86 Stat. 374; 20 U.S.C. 1682)

§ 86.66 *Judicial review.*

Action taken pursuant to section 902 of the Education Amendments of 1972 is subject to judicial review is provided in section 903 of the Amendments.

(Sec. 902, Education Amendments of 1972, 86 Stat. 374; 20 U.S.C. 1682)

[FR Doc 74-14197 Filed 6-19-74; 8:45 am]

[From the Federal Register, July 12, 1974]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE—OFFICE OF THE SECRETARY

[45 CFR PART 86]

EDUCATION PROGRAMS

NONDISCRIMINATION ON THE BASIS OF SEX

The Department published on June 20, 1974, a notice of proposed rulemaking to add Part 86 to the Departmental regulation to effect Title IX of the Education Amendments of 1972 (20 U.S.C. § 1681 *et seq.*) with regard to Federal financial assistance administered by the Department. The purpose of the present notice is to invite public comment on proposed additional language to clarify § 86.34(a) of the proposed regulation relating to nondiscrimination in course offerings.

As proposed, section 86.34(a) reads as follows:

(a) *Course offerings.* A recipient shall not provide any course or otherwise carry out any of its education program or activity separately on the basis of sex, or require or refuse participation therein by any of its students on such basis, including health, physical education, industrial, business, vocational, technical, home economics, music, and adult education courses.

Immediately after the text of the proposed regulation was made public on June 18, 1974, the Department received numerous inquiries as to whether § 86.34 (a) permitted elementary and secondary schools to present separately to boys and girls brief presentations in the area of sex education. Although the language of the proposed regulation precludes such separation, I have not intended it to do so in the area of sex education. Sex education is perhaps the only area of instruction in which the subject of instruction necessarily deals explicitly with the sexual functions. In view of personal and parental attitudes concerning the subject, and because rights of privacy on these matters, desired by both students and their parents may well be invaded by requiring mixed classes on sex education, school administrators, for reasons not applicable to other subjects, might properly decide that some of or all of such sessions be conducted separately for boys and girls. In order that the public may have an opportunity to comment on specific language in this connection, I hereby give notice that I propose to insert in the final regulation, when published, a proviso at the end of the present text of proposed § 86.34 to read as follows:

Provided, That elementary and secondary schools' sessions involving sex education may be conducted for boys and girls separately.

Comments on the language here proposed will be considered along with other comments on the proposed regulations received before October 15, 1974. Comments received after that date will be considered until the regulation is prepared in final form. The proposal may be changed in light of comments received.

Part 86, together with this proposed change in language thereof, is proposed under the authority of section 902 of the Education Amendments of 1972 (20 U.S.C. 1682).

Dated: July 8, 1974.

CASPAR W. WEINBERGER,
Secretary.

PUBLIC LAW 88-38—EQUAL PAY ACT OF 1963

[29 USC 206(d)]

(d)(1) No employer having employees subject to any provisions of this section shall discriminate, within any establishment in which such employees are employed, between employees on the basis of sex by paying wages to employees in such establishment at a rate less than the rate at which he pays wages to employees of the opposite sex in such establishment for equal work on jobs the performance of which requires equal skill, effort, and responsibility, and which are performed under similar working conditions, except where such payment is made pursuant to (i) a seniority system; (ii) a merit system; (iii) a system which measures earnings by quantity or quality or production; or (iv) a differential based on an other factor other than sex; *Provided*, That an employer who is paying a wage rate differential in violation of this subsection shall not, in order to comply with the provisions of this subsection, reduce the wage rate of any employee.

(2) No labor organization, or its agents, representing employees of and employer having employees subject to any provisions of this section shall cause or attempt to cause such an employer to discriminate against an employee in violation of paragraph (1) of this subsection.

(3) For purposes of administration and enforcement, any amounts owing to any employee which have been withheld in violation of this subsection shall be deemed to be unpaid minimum wages or unpaid overtime-compensation under this Act.

(4) As used in this subsection, the term "labor organization" means any organization of any kind, or any agency or employee representation committee or plan, in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work.

[This publication conforms to the Code of Federal Regulations as of August 31, 1971, the date this reprint was authorized.]

Title 29, Part 800

EQUAL PAY FOR EQUAL WORK

UNDER THE FAIR LABOR STANDARDS ACT

This publication is based on the provisions of the Fair Labor Standards Act before its amendment by Public Law 92-318, effective July 1, 1972, which extends equal pay protection to executive, administrative, and professional employees and outside salesmen and brings pre-school facilities under coverage of the Act. Revision of the publication will be made to conform to the new amendments. Specific questions should be addressed to the nearest Wage-Hour Office.

SUBPART A—GENERAL

INTRODUCTORY

Sec.

800.0 General scope of the Fair Labor Standards Act
800.1 Purpose of this part.
800.2 Significance of official interpretations.
800.3 Reliance on interpretations.
800.4 Matters discussed in this part.

BASIC COVERAGE AND EXEMPTION PROVISIONS AFFECTING APPLICATION OF EQUAL PAY REQUIREMENTS

800.5 Basic coverage as related to the equal pay provisions.
800.6 General coverage of employees "engaged in commerce".
800.7 General coverage of employees "engaged in * * * the production of goods for commerce".
800.8 "Closely related" and "directly essential" activities.

Sec.
800.9 What goods are considered as produced for commerce.
800.10 Coverage is not based on amount of covered activity.
800.11 "Enterprise" coverage.
800.12 Exemptions from section 6 provided by section 13.

SUBPART B—THE EQUAL PAY PROVISIONS

THE STATUTORY PROVISIONS

800.100 Section 6(d) of the Act.
800.101 Effective date of equal pay requirements.

APPLICATION OF PROVISIONS IN GENERAL

800.102 Application to employers.
800.103 Application to establishments.
800.104 Application to employees.
800.105 Employees not subject to provisions.
800.106 Application to labor organizations.

DEFINITIONS PERTINENT TO APPLICATION

800.107 "Employer", "employee", "employ" defined.
800.108 Meaning of "establishment".
800.109 "Labor organization" defined.
800.110 Meaning of "wages".
800.111 Wage "rate".
800.112 Cost or value of noncash items as included in wages.
800.113 Particular types of payments as wages.

EQUALITY OF PAY

800.114 "Male jobs" and "female jobs" generally.
800.115 Inequalities in pay that raise questions under the Act.
800.116 Equality and inequality of pay in particular situations.
800.117–800.118 [Reserved]

THE EQUAL PAY FOR EQUAL WORK STANDARD—GENERALLY

800.119 The job concept in general.
800.120 Effect of differences between jobs in general.
800.121 Job content controlling.
800.122 General guides for testing equality of jobs.
800.123 Determining equality of job content in general.
800.124 Comparing "exempt" and "nonexempt" jobs.

EQUAL SKILL

800.125 Jobs requiring equal skill in performance.
800.126 Comparing skill requirements of jobs.

EQUAL EFFORT

800.127 Jobs requiring equal effort in performance.
800.128 Comparing effort requirements of jobs.

EQUAL RESPONSIBILITY

800.129 Jobs requiring equal responsibility in performance.
800.130 Comparing responsibility requirements of jobs.

SIMILAR WORKING CONDITIONS

800.131 Jobs performed under similar working conditions.
800.132 Determining similarity of working conditions.
800.133.139 [Reserved]

EXCEPTIONS TO EQUAL PAY STANDARD

Sec.
800.133–800.139 [Reserved]
800.141 Establishing application of an exception.
800.142 Sex must not be a factor in excepted wage differentials.
800.143 Establishing absence of sex as a factor.
800.144 Excepted "systems".
800.145 Applications of exceptions illustrated, in general.
800.146 Examples—"red circle" rates, in general.
800.147 Examples—temporary reassignments.
800.148 Examples—training programs.
800.149 Examples—"head of household".
800.150 Examples—temporary and part-time employees.
800.151 Examples—employment cost factors.
800.152–800.159 [Reserved]

RELATION TO OTHER LAWS

800.160 Relation to other equal pay laws.
800.161 Higher State minimum wage.
800.162 Overtime payments required by State law.
800.163 Other laws not applying equally to employment of both sexes.

ENFORCEMENT

800.164 Investigations and compliance assistance.
800.165 Recordkeeping requirements.
800.166 Recovery of wages due; injunctions; penalties for willful violations.

AUTHORITY: The provisions of this Part 800 issued under secs. 1–19, 52 Stat. 1060 as amended; 77 Stat. 56; 29 U.S.C. 201–219.

SOURCE: The provisions of this Part 800 appear at 30 F.R. 11504, Sept. 9, 1965, unless otherwise noted.

SUBPART A—GENERAL

INTRODUCTORY

SECTION 800.0.—GENERAL SCOPE OF THE FAIR LABOR STANDARDS ACT

The Fair Labor Standards Act, as amended, hereinafter referred to as the Act, is a Federal statute of general application which establishes minimum wage, overtime pay, child labor, and equal pay requirements that apply as provided in the Act. All employees whose employment has the relationship to interstate or foreign commerce which the Act specifies are subject to the prescribed labor standards unless specifically exempted from them. Employers having such employees are required to comply with the Act's provisions in this regard unless relieved therefrom by some exemption in the Act. Such employers are also required to comply with specified recordkeeping requirements contained in Part 516 of this chapter. The law authorizes the Department of Labor to investigate for compliance and, in the event of violations, to supervise the payment of unpaid wages or unpaid overtime compensation owing to any employee. The law also provides for enforcement in the courts.

SECTION 800.1.—PURPOSE OF THIS PART

It is the purpose of this Part 800 to make available official interpretations of the Department of Labor with respect to the meaning and application of the equal pay provisions added to the Fair Labor Standards Act by the Equal Pay Act of 1963 (Public Law 88–38). The Equal Pay Act was enacted on June 10, 1963, for the purposes of correcting "the existence in industries engaged in commerce or in the production of goods for commerce of wage differentials based on sex". This law amends the Fair Labor Standards Act by adding a new section 6(d) to its minimum wage provisions.

SECTION 800.2.—SIGNIFICANCE OF OFFICIAL INTERPRETATIONS

The interpretations of the law contained in this part are official interpretations of the Department of Labor with respect to the application under described circumstances of the provisions of law which they discuss. The ultimate decisions on interpretations of the Act are made by the courts. Court decisions supporting interpretations contained in this part are cited where it is believed they may be helpful. On matters which have not been determined by the courts, it is necessary for the Secretary of Labor and the Administrator to reach conclusions as to the meaning and the application of provisions of the law in order to carry out their responsibilities of administration and enforcement (*Skidmore* v. *Swift*, 323 U.S. 134). In order that these positions may be made known to persons who may be affected by them, official interpretations are issued by the Administrator on the advice of the Solicitor of Labor, as authorized by the Secretary (Reorg. Pl. 6 of 1950, 64 Stat. 1263; Gen. Ord. 45A, May 24, 1950, 15 F.R. 3290). As included in the regulations in this part, these interpretations are believed to express the intent of the law as reflected in its provisions and as construed by the courts and evidenced by its legislative history. They indicate the construction of the law which the Secretary of Labor and the Administrator believe to be correct and which will guide them in the performance of their duties under the Act unless and until they are otherwise directed by authoritative decisions of the courts or conclude, upon reexamination of an interpretation, that it is incorrect. References to pertinent legislative history are made in this part where it appears that they will contribute to a better understanding of the interpretations.

SECTION 800.3.—RELIANCE ON INTERPRETATIONS

On and after publication of this part in the Federal Register, the interpretations contained therein shall be in effect and shall remain in effect until they are modified, rescinded, or withdrawn. So long as they remain effective and are not modified, amended, rescinded, or determined by judicial authority to be incorrect, they may be relied upon as provided in section 10 of the Portal-to-Portal Act of 1947 (61 Stat. 84, 29 U.S.C. 251 et seq., discussed in Part 790 of this chapter). In addition, the Supreme Court has recognized that such interpretations of this Act "provide a practical guide to employers and employees as to how the office representing the public interest in its enforcement will seek to apply it" and "constitute a body of experience and informed judgment to which courts and litigants may properly resort for guidance". Further, as stated by the Court: "Good administration of the Act and good judicial administration alike require that the standards of public enforcement and those for determining private rights shall be at variance only where justified by very good reasons." (*Skidmore* v. *Swift*, 323 U.S. 134). This part supersedes and replaces the interpretations previously published in the Federal Register and Code of Federal Regulations as Part 800 of this chapter. Prior opinions, rulings, and interpretations and prior enforcement policies which are not inconsistent with the interpretations in the part or with the Fair Labor Standards Act as amended are continued in effect; all other opinions, rulings, interpretations, and enforcement policies on the subjects discussed in the interpretations in this part are rescinded and withdrawn.

SECTION 800.4.—MATTERS DISCUSSED IN THIS PART

(a) This part primarily discusses the meaning and application of the equal pay provisions in section 6(d) of the Act. These provisions are discussed in some detail in Subpart B. The enforcement provisions applicable to the equal pay requirements are discussed in Subpart B, sections 800.164–800.166. In addition, section 800.5 et seq. of this subpart briefly consider or make reference to the guides for determining what interstate commerce activities will bring employees and employers within the basic coverage of the Act so that its equal pay requirements may apply. The meaning and application of other provisions of the Act are discussed only to make clear their relevance to the equal pay provisions and are not considered in detail in this part.

(b) The interpretations in this part provide statements of general principles applicable to the subjects discussed and illustrations of the application of these principles to situations that frequently arise. They do not and cannot refer specifically to every problem which may be met in the consideration of the provisions discussed. The omission to discuss a particular problem in this part or in interpretations supplementing it should not be taken to indicate the adoption of any position by the Secretary of Labor or the Administrator with respect to such problem or to constitute an administrative interpretation or practice or enforcement policy. Questions on matters not fully covered by this part may be addressed to the Administrator of the Wage and Hour Division, United States Department of Labor, Washington, D.C. 20210, or to any Regional Office of the Division.

(c) Interpretations published elsewhere in this title deal with such subjects as the general coverage of the Act (Part 776 of this chapter), methods of payment of wages (Part 531, Subpart C of this chapter), computation and payment of overtime compensation (Part 778 of this chapter), retailing of goods or services (Part 779 of this chapter), hours worked (Part 785 of this chapter), and child labor provisions (Part 1500 of this title). Regulations on recordingkeeping are contained in Part 516 of this chapter, and regulations defining exempt bona fide executive, administrative, professional employees and outside salesmen are contained in Part 541 of this chapter. Regulations and interpretations on other subjects concerned with the application of the Act are listed in the table of contents to this chapter. Copies of any of these documents may be obtained from any office of the Wage and Hour and Public Contracts Divisions.

Basic Coverage and Exemption Provisions Affecting Application of Equal Pay Requirements

SECTION 800.5.—BASIC COVERAGE AS RELATED TO THE EQUAL PAY PROVISIONS

The equal pay provisions neither extend nor curtail coverage of the Fair Labor Standards Act but simply place within the new requirements those employers and employees who were already subject to the Act's minimum wage requirements (H. Rept. No. 309, 88th Cong., 1st sess., p. 2). The nature of the employment coming within the basic or general coverage of the Act should therefore be clearly understood. The general coverage of the Act extends, and its requirements apply except as otherwise provided by a specific exemption, to every employee who is "engaged in commerce or in the production of goods for commerce" and every employee who is "employed in an enterprise engaged in commerce or in the production of goods for commerce" or "by an establishment" qualifying as such an enterprise, as specified and defined in the statute. What employees are so engaged or employed must be ascertained in the light of the definitions and delimitations set forth in the statute, giving due regard to authoritative interpretations by the courts and to the legislative history of the Act, as amended. In section 800.6 to 800.12, the employment which comes within this basic coverage is briefly outlined. For a more comprehensive discussion and a detailed explanation of the applicable principles, reference should be made to the interpretations on general coverage contained in Part 776 of this chapter.

SECTION 800.6.—GENERAL COVERAGE OF EMPLOYEES "ENGAGED IN COMMERCE"

(a) The minimum wage provisions of the Act have applied since 1938, and continue to apply along with the new equal pay provisions, except as otherwise provided by specific exemptions in the Act, to employees "engaged in commerce". "Commerce" is broadly defined in section 3(b) of the Act. It includes both interstate and foreign commerce and is not limited to transportation across State lines, or to activity of a commercial character. All parts of the movement among the several States or between any State and any place outside thereof of persons or things, tangibles or intangibles, including communication of information and intelligence constitute movement in "commerce" within the statutory definition This includes those parts of any such activity which take place wholly within a single State. In addition, the instrumentalities for carrying on such commerce are so inseparable from the commerce itself that employees working on such instrumentalities within the borders of a single State are, by virtue of the contribution made by their work to the movement of the commerce, "engaged in commerce" within the meaning of the Act.

(b) Consistent with the purpose of the Act to apply the Federal standards "throughout the farthest reaches of the channels of interstate commerce", the courts have made it clear that the employees "engaged in commerce" to whom coverage is extended include every employee employed in the channels of such commerce or in activities so closely related to such commerce as to be considered a part of it as a practical matter. See *Walling* v. *Jacksonville Paper Co.*, 317 U.S. 564; *Overstreet* v. *North Shore Corp.*, 318 U.S. 125; *Mitchell* v. *Volmer*, 349 U.S. 427; *Mitchell* v. *Lublin*, 358 U.S. 207; see also *Borden Co.* v. *Borella*, 325 U.S. 679; and see the discussion, with other pertinent court decisions cited, in Part 776 of this chapter. Engaging "in commerce" includes activities connected therewith such as management and control of the various physical processes, together with the accompanying accounting and clerical activities. Thus, employees engaged in interstate or foreign commerce will typically include, among others, employees in distributing industries such as wholesaling or retailing who sell, transport, handle, or otherwise work on goods moving in interstate or foreign commerce as well as workers who order, receive, guard, pack, ship, or keep records of such goods; employees who handle payroll or personnel functions for workers engaged in such activities; clerical and other workers who regularly use the mails, telephone, or telegraph for communication across State lines; and employees who regularly travel across State lines while working. For other illustrations see Part 776 of this chapter.

SECTION 800.7.—GENERAL COVERAGE OF EMPLOYEES "ENGAGED IN * * * THE PRODUCTION OF GOODS FOR COMMERCE"

(a) The minimum wage provisions of the Act also have applied since 1938 and continue to apply along with the new equal pay provisions, except as otherwise provided by specific exemptions in the Act, to employees "engaged in * * * the production of goods for commerce". The broad meaning of "commerce" as defined in section 3(b) of the Act has been outlined in section 800.6. "Goods" is also comprehensively defined in section 3(i) of the Act, and includes "articles or subjects of commerce of any character, or any part or ingredient thereof" not expressly excepted by the statute. The activities constituting "production" of the goods for commerce are defined in section 3(j) of the Act. These are not limited to such work as manufacturing but include handling or otherwise working on goods intended for shipment out of the State either directly or indirectly or for use within the State to serve the needs of the instrumentalities or facilities by which interstate or foreign commerce is carried on. See *United States* v. *Darby*, 312 U.S. 100; *Alstate Constr. Co.* v. *Durkin*, 345 U.S. 13. Employees engaged in any closely related process or occupation directly essential to such production of any goods, whether employed by the producer or by an independent employer, are also engaged, by definition, in "production". See section 800.8 and the detailed discussion in Part 776 of this chapter. Further, the courts have recognized that an enterprise producing goods for commerce does not accomplish the actual production of such goods solely with employees performing physical labor on them. Thus, in *Borden* v. *Borella*, 325 U.S. 679, it was held that employees engaged in the administration, planning, management, and control of the various physical processes together with the accompanying clerical and accounting activities are, from a productive standpoint and for purposes of the Act, "actually engaged in the production of goods for commerce just as much as are those who process and work on the tangible products" in the manufacturing plants or other producing facilities of the enterprise.

(b) Typically, but not exclusively, employees engaged in the production of goods for interstate or foreign commerce include those who work in manufacturing, processing, and distributing establishments, including wholesale and retail establishments, that "produce" (including handle or work on) goods for such commerce. This includes everyone employed in such establishments, or elsewhere in the enterprises by which they are operated, whose activities constitute "production" of such goods under the principles outlined in paragraph (a) of this section. Thus, employees who sell, process, load, pack, or otherwise handle or work on goods which are to be shipped or delivered outside the State either by their employer or by another firm, and either in the same form or as a part or ingredient of other goods, are engaged in the production of goods for commerce within the coverage of the Act. So also are the office, management, sales, and shipping personnel, and maintenance, custodial, and protective employees who perform, as a part of the integrated effort for the production of the goods for commerce, services related to such production or to such goods or to the plant, equipment, or personnel by which the production is accomplished.

SECTION 800.8.—"CLOSELY RELATED" AND "DIRECTLY ESSENTIAL" ACTIVITIES

As previously noted in section 800.7 an employee is engaged in the production of goods for interstate or foreign commerce within the meaning of the general coverage provisions of the Act even if his work is not an actual and direct part of such production, so long as he is engaged in a process or occupation which is "closely related" and "directly essential" to it. This is true whether he is employed by the producer of the goods or by someone else who provides goods or services to the producer. See in this connection *Kirschbaum* v. *Walling*, 316 U.S. 517, and *Mitchell* v. *Joyce Agency*, 348 U.S. 945, affirming 110 F. Supp. 918. A full discussion of "closely related" and "directly essential" work is contained in

Part 776 of this chapter. Typical of employees covered under these principles are bookkeepers, stenographers, clerks, accountants, and auditors and other office and white-collar workers, and employees doing payroll, timekeeping, and time study work for the producer of goods; employees in the personnel, labor relations, safety and health, advertising, promotion, and public relations activities of the producing enterprise; work instructors for the producers; employees maintaining, servicing, repairing or improving the buildings, machinery, equipment, vehicles or other facilities used in the production of goods for commerce, and such custodial and protective employees as watchmen, guards, firemen, patrolmen, caretakers, stockroom workers and warehousemen; and transportation workers bringing supplies, materials, or equipment to the producer's premises, removing waste materials therefrom, or transporting materials or other goods, or performing such other transportation activities, as the needs of production may require. These examples are illustrative, rather than exhaustive, of the employees who are "engaged in the production of goods for commerce" by reason of performing activities closely related and directly essential to such production.

SECTION 800.9.—WHAT GOODS ARE CONSIDERED AS PRODUCED FOR COMMERCE

Goods (as defined in 3(i) of the Act) are "produced for commerce" if they are "produced, manufactured, mined, handled or in any other manner worked on" in any State for sale, trade, transportation, transmission, shipment, or delivery, to any place outside thereof. Goods are produced for commerce where the producer intends, hopes, expects, or has reason to believe that the goods or any unsegregated part of them will move (in the same or in an altered form or as a part or ingredient of other goods) in interstate or foreign commerce. If such movement of the goods in commerce can reasonably be anticipated by the producer when the goods are produced, it makes no difference whether he himself or the person to whom the goods are transferred puts the goods in interstate or foreign commerce. The fact that goods do move in interstate or foreign commerce is strong evidence that the producer intended, hoped, expected, or had reason to believe that they would so move. Goods may also be produced "for commerce" where they are to be used within the State and not transported in any form across State lines. This is true where the use to which they are put is one which serves the needs of the instrumentalities or facilities by which interstate or foreign commerce is carried on within the State. These principles are discussed comprehensively in Part 776 of this chapter.

SECTION 800.10—COVERAGE IS NOT BASED ON AMOUNT OF COVERED ACTIVITY

The act makes no distinction as to the percentage, volume, or amount of activities of either the employee or the employer which constitute engaging in commerce or in the production of goods for commerce. (Mabee v. White Plains Publishing Co., 327 U.S. 128; United States v. Darby, 312 U.S. 100.) As explained more fully in Part 776 of this chapter, the law is settled that every employee whose activities in commerce or in the production of goods for commerce, even though small in amount, are regular and recurring, is considered "engaged in commerce or in the production of goods for commerce". Also, under the definition in section 3(s) of the act, an enterprise described in any of the four numbered clauses of the subsection is an enterprise "engaged in commerce or in the production of goods for commerce" if, in its activities, some employees are so engaged, "including employees handling, selling, or otherwise working on goods that have been moved in or produced for commerce by any person".

[32 F.R. 2378, February 3, 1967]

SECTION 800.11.—"ENTERPRISE" COVERAGE

The scope of the added coverage on an enterprise basis, which was provided by amendments to the Act, is determined with reference to the special definitions of the term "enterprise" in section 3(r) of the Act and of the term "enterprise engaged in commerce or in the production of goods for commerce" under section 3(s). Under these enterprise coverage provisions, if an enterprise or establishment is an "enterprise engaged in commerce or in the production of goods for commerce" as defined and delimited in section 3(s) of the Act, every employee employed in such enterprise or by such establishment is within the coverage of the minimum wage and the equal pay provisions, except as otherwise specifically provided by the Act. "Enterprise" coverage is discussed comprehensively elsewhere in this chapter. A detailed discussion of the statutory definition of "enterprise" and of enterprise coverage as it relates to enterprises which have retail or service establishments and as it relates to gasoline service establishments is contained in Part 779 of this chapter.

SECTION 800.12.—EXEMPTIONS FROM SECTION 6 PROVIDED BY SECTION 13

The equal pay provisions do not apply to employees exempted from the provisions of section 6 under any provision of section 13(a) of the act. The following employees are among those excluded if their employment fully satisfies all the statutory conditions for exemption: Bona fide executive, administrative, and professional employees, including academic administrative personnel and teachers in elementary and secondary schools, and outside salesmen, as defined in regulations (see Part 541 of this chapter); employees of certain retail or service establishments (see Part 779 of this chapter); employees of certain amusement or recreational establishments (see Act, sec. 13(a)(3)); employees of certain small newspapers (see Act, sec. 13(a)(8)); employees of motion picture theaters (see Act, sec. 13(a)(9)); switchboard operators of independent telephone companies which have fewer than 750 stations (see Act, sec. 13(a)(10)); employees on small farms and certain hand harvest workers paid piece rates (see Part 780 of this chapter).

[32 F.R 2379, February 3, 1967]

SUBPART B—THE EQUAL PAY PROVISIONS

THE STATUTORY PROVISIONS

SECTION 800.100.—SECTION 6(D) OF THE ACT

The Equal Pay Act of 1963 amended section 6 of the Fair Labor Standards Act by adding thereto a new subsection (d) as follows:

> (d) (1) No employer having employees subject to any provisions of this section shall discriminate, within any establishment in which such employees are employed, between employees on the basis of sex by paying wages to employees in such establishment at a rate less than the rate at which he pays wages to employees of the opposite sex in such establishment for equal work on jobs the performance of which requires equal skill, effort, and responsibility, and which are performed under similar working conditions, except where such payment is made pursuant to (i) a seniority system; (ii) a merit system; (iii) a system which measures earnings by quantity or quality of production; or (iv) a differential based on any other factor other than sex: *Provided*, That an employer who is paying a wage rate differential in violation of this subsection shall not, in order to comply with the provisions of this subsection, reduce the wage rate of any employee.
>
> (2) No labor organization, or its agents, representing employees of an employer having employees subject to any provisions of this section shall cause or attempt to cause such an employer to discriminate against an employee in violation of paragraph (1) of this subsection.
>
> (3) For purposes of administration and enforcement, any amounts owing to any employee which have been withheld in violation of this subsection shall be deemed to be unpaid minimum wages or unpaid overtime compensation under this Act.
>
> (4) As used in this subsection, the term "labor organization" means any organization of any kind, or any agency or employee representation committee or plan, in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work.

SECTION 800.101.—EFFECTIVE DATE OF EQUAL PAY REQUIREMENTS

(a) Section 4 of the Equal Pay Act of 1963 provides as follows with respect to the effective date of its amendments to the Fair Labor Standards Act:

> SEC. 4. The amendments made by this Act shall take effect upon the expiration of 1 year from the date of its enactment: *Provided*, That in the case of employees covered by a bona fide collective bargaining agreement in effect at least 30 days prior to the date of enactment of this Act, entered into by a labor organization (as dfined in section 6(d)(4) of the Fair Labor Standards Act of 1938, as amended), the amendments made by this Act shall take effect

upon the termination of such collective bargaining agreement or upon the expiration of 2 years from the date of enactment of this Act, whichever shall first occur.

(b) Under the above provision, on and after June 11, 1965, the equal pay provisions are effective with respect to all employment subject to their terms. On and after June 11, 1964, these provisions were applicable to most such employment. However, their application was deferred as to employees covered by bona fide collective bargaining agreements, which were in effect on May 11, 1963, and which did not terminate until some date after June 11, 1964. As to employees covered by such agreements the provisions became effective on the termination date of the agreement or on June 11, 1965, whichever was the earlier date.

APPLICATION OF PROVISIONS IN GENERAL

SECTION 800.102.—APPLICATION TO EMPLOYERS

The prohibition against discrinmation in wages on account of sex contained in section 6(d)(1) of the Act (see sec. 800.100) is applicable to every employer having employees subject to a minimum wage under the Act. The employer may not discriminate on the basis of sex against such employees in any establishment (see sec. 800.103) in which such employees are employed by him by paying them wages at rates lower than he pays employees of the opposite sex employed in the same establishment for work subject to the equal pay standard—that is, where equal work is performed by such employees and by employees of the opposite sex on jobs the performance of which requires equal skill, effort, and responsibility, and which are performed under similar working conditions. (See secs. 800.119–800.132.) The Act excepts from this general prohibition such differences between the wage rates for such work performed by men and women employed by the employer in the establishment as can be shown to be based on a factor or factors other than sex. (See secs. 800.140–800.151.) It is clear from the proviso included in section 6(d)(1) that where a wage rate differential in violation of the provision is paid, the violation cannot be corrected by reducing the wage rate of any employee.

SECTION 800.103.—APPLICATION TO ESTABLISHMENTS

The prohibition against discrimination in wages on account of sex contained in section 6(d)(1) of the Act applies "within any establishment" in which employees who must be paid a minimum wage under section 6 are employed by an employer. The term "establishment' as used in section 6(d)(1) has the same meaning as it has in section 13(a)(2) and elsewhere in the Act. (See sec. 800.108.) It should be kept in mind, in determining an employer's obligations under the equal pay provisions, that "employer" and "establishment" as used in these and other provisions of the Act are not synonymous terms. An employer may have more than one establishment in which he employs employees within the meaning of the Act. In such cases, the legislative history makes clear that there shall be no comparison between wages paid to employees in different establishments.

SECTION 800.104.—APPLICATION TO EMPLOYEES

As has been seen, there must be compliance by the employer with the equal pay requirements within any establishment in which employees subject to the Act's minimum wage provisions are employed by him. The Act's concern with wage discrimination by an employer on account of sex to the detriment of his employees who are subject to the minimum wage provisions is not limited either by its language or by its legislative history to those employees whose work is performed on the premises of their employer's establishment. The Act speaks of the employment of employees in the establishment rather than of their engagement in work there. Also, the legislative history of the Equal Pay Act makes it clear that coverage under the equal pay provisions is equal to that provided by the other provisions of section 6 of the Fair Labor Standards Act, and that those employers and employees who are subject to the minimum wage provisions will be subject to the new provisions on equal pay. (See S. Rept. No. 176, 88th Cong., 1st sess., p. 2; H. Rept. No. 309, 88th Cong., 1st sess., p. 2.) Congress clearly rejected the concept that the equal pay provisions apply only to work performed inside a physical establishment. Otherwise, those employees, subject to section 6 of the Act, would be incongruously deprived of equal pay protection simply because their work is performed away from the physical premises of the establishment in which they are employed. On the other hand, it is clear from the language of the Act that in each distinct physical place of business where employees of an employer work (including, but not limited to, the employer's own establishments), the obligation of the employer to comply with the equal pay requirements must be determined separately with reference to those of his employees who are employed in that particular establishment. Accordingly, where there are a number of distinct physical places of business in which an employer's employees are employed, compliance with the equal pay provisions must be tested within each establishment by comparing the jobs in which employees are employed in that establishment and the wages paid for work on such jobs when performed by employees of opposite sexes.

[31 F.R. 11720, Sept. 7, 1966, as amended at 32 F.R. 2379, February 3, 1967]

SECTION 800.105.—EMPLOYEES NOT SUBJECT TO PROVISIONS

An employee may be employed in an establishment by an employer subject to the equal pay provisions, and yet not be protected by these provisions. Unless such an employee is one to whom the minimum wage provisions apply, the Act does not afford protection from a discrimination in wages based on sex between such employee and an employee of the opposite sex. This is true both with respect to employees who are not covered under section 6 and with respect to employees to whom section 6 cannot apply by reason of an express exemption in section 13(a). (See sec. 800.12.) More particularly, the equal pay standards have no application with respect to wages paid employees who are neither engaged in or in the production of goods for interstate commerce nor employed in an enterprise which is so engaged.

SECTION 800.106.—APPLICATION TO LABOR ORGANIZATIONS

Section 6(d)(2) of the Act prohibits a labor organization, representing employees of an employer having employees subject to the minimum wage provisions of section 6, from engaging in acts that cause or attempt to cause the employer to discriminate against an employee in violation of the equal pay provisions. Agents of the labor organization are also prohibited from doing so. Thus, such a labor organization and its agents must refrain from strike or picketing activities aimed at inducing an employer to institute or maintain a prohibited wage differential, and must not demand any terms or any interpretation of terms in a collective bargaining agreement with such an employer which would require the latter to discriminate in the payment of wages contrary to the provisions of section 6(d)(1). Section 6(d)(2), together with the special provision in section 4 of the Equal Pay Act of 1963 allowing a deferred effective date for application of the equal pay provisions to employees covered by specified existing collective bargaining agreements (see sec. 800.101) are indicative of the legislative intent that in situations where wage rates are governed by collective bargaining agreements, unions representing the employees shall share with the employer the responsibility for ensuring that the wage rates required by such agreements will not cause the employer to make payments that are not in compliance with the equal pay provisions. Thus, where equal work is being performed within the meaning of the statute, a wage rate differential which exists between male and female employees cannot be justified on the ground that it is a result of negotiation by the union with the employer, for negotiation of such a discriminatory wage differential is prohibited under the terms of the equal pay amendment.

DEFINITIONS PERTINENT TO APPLICATION

SECTION 800.107.—"EMPLOYER", "EMPLOYEE", "EMPLOY" DEFINED

The Act provides its own definitions of "employer", "employee", and "employ", under which "economic reality" rather than technical concepts" determines whether there is employment subject to its terms (Goldberg v. Whitaker House Cooperative, 366 U.S. 28; United States v. Silk, 331 U.S. 704; Rutherford Food Corp. v. McComb, 331 U.S. 722). An "employer", as defined in section 3(d) of the Act, "includes any person acting directly or indirectly in the interest of an employer in relation to an employee but shall not include the United States or any State or political subdivision of a State (except with respect to employees of a State, or a political subdivision thereof, employed (a) in a hospital, institution, or school referred to in the last sentence of subsection (r) of this section, or (b) in the operation of a railway or carrier referred to in such sentence) or any labor organization (other than when acting as an employer), or anyone acting in the capacity of a officer or agent of such labor organization". An "employee" as defined in section 3(e) of the Act "includes any individual employed by an employer" and "employ", as used in the Act, is defined in section 3(g) to include "to suffer or permit to work". It should be noted, as explained in the interpretative bulletin on joint employment, Part 791 of this chapter, that in appropriate circumstances two or more employers may be jointly responsible for compliance with the statutory requirements applicable to employment of a particular employee.

[32 F.R. 2379, February 3, 1967]

SECTION 800.108.—MEANING OF "ESTABLISHMENT"

Although not expressly defined in the Act, the term "establishment" has a well settled meaning in the application of the Act's provisions. It refers to a "distinct physical place of business" rather than to "an entire business or enterprise" which may include several separate places of business. This is consistent with the meaning of the term as it is normally used in business and in government, is judicially settled, and has been recognized in the Congress in the course of enactment of amendatory legislation (Phillips v. Walling, 324 U.S. 490; Mitchell v. Bekins Van & Storage Co., 352 U.S. 1027; 95 Cong. Rec. 12505, 12579, 14877; H. Rept. No. 1453, 81st Cong., 1st sess., p. 25). Each physically separate place of business is ordinarily considered a separate establishment For example, where a manufacturer operates at separate locations a plant for production of its goods, a warehouse for storage and distribution, several stores from which its products are sold, and a central office for the enterprise, each physically separate place of business is a separate establishment. Under certain circumstances, however, two or more portions of a business enterprise, even though located on the same premises and under the same roof, may constitute more than one establishment. This would ordinarily be the case only if these portions of the enterprise are both physically segregated and engaged in operations which are functionally separated from each other and which have separate employees and maintain separate records. The application of these principles is illustrated further and in more detail by the discussion in Part 779 of this chapter of the term "establishment".

[32 F.R. 2379, February 3, 1967]

SECTION 800.109.—"LABOR ORGANIZATION" DEFINED

For purposes of application to labor organizations of the requirements of section 6(d) of the Act and the enforcement of such requirements under sections 16 and 17 (see sec. 800.166), section 6(d)(4) of the Act defines the term "labor organization" as meaning "any organization of any kind, or any agency or employee representation committee or plan, in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work." This is the same definition of "labor organization" that is used in the Labor Management Relations Act, 1947, and will be applied in the same manner.

SECTION 800.110.—MEANING OF "WAGES"

The term "wages" used in section 6(d)(1) of the Act is considered to have the same meaning it has elsewhere in the Act. As a general rule, in determining compliance with the equal pay provisions, the wages paid by the employer will be calculated pursuant to the same principles and procedures as have traditionally been followed in calculating such wages for purposes of determining compliance with the minimum wage provisions of the Act. Wages paid to an employee generally include all payments made to or on behalf of the employee as remuneration for employment. The provisions of section 7(e) of the Act under which some such payments may be excluded in computing an employee's "regular rate" of pay for purposes of section 7 do not authorize the exclusion of any such remuneration from the "wages" of an employee in applying section 6(d) of the Act. Thus, vacation and holiday pay, and premium payments for work on Saturdays, Sundays, holidays, regular days of rest, or other days or hours in excess or outside of the employee's regular days or hours of work, are remuneration for employment and therefore wage payments that must be considered in applying the equal pay provisions of the Act, even though not a part of the employee's "regular rate". On the other hand, payments made by an employer to an employee which do not constitute remuneration for employment are not "wages" to be compared for equal pay purposes under section 6(d) of the Act. Examples are payments related to maternity, and such reasonable payments for reimbursable expenses of traveling on the employer's business as are discussed in section 778.217 of this chapter.

[32 F.R. 2379, February 3, 1967]

SECTION 800.111.—WAGE "RATE"

The term wage "rate" used in section 6(d)(1 of the Act is considered to encompass all rates of wages whether calculated on a time, piece, job, incentive or other basis. The term includes the rate at which overtime compensation or other special remuneration is paid as well as the rate at which straight time compensation for ordinary work is paid. The term also includes the rate at which a "draw", advance, or guarantee is paid against a commission settlement.

SECTION 800.112.—COST OR VALUE OF NON-CASH ITEMS AS INCLUDED IN WAGES

The reasonable cost or fair value of certain perquisites, as provided in section 3(m) of the Act and Part 531 of this chapter is, by definition, a part of the wage paid to an employee for purposes of the Act. Section 3(m), in part provides that the wage paid to any employee includes "the reasonable cost, as determined by the Secretary of Labor, to the employer of furnishing such employee with board, lodging, or other facilities if such board, lodging, or other facilities are customarily furnished by such employer to his employees". As an exception to this rule, section 3(m) provides the cost of board, lodging, or other facilities shall not be included as a part of the wage paid to any employee to the extent it is excluded therefrom under the terms of a bona fide collective-bargaining agreement applicable to the particular employee. A further provision of section 3(m) authorizes the Secretary "to determine the fair value of such board, lodging, or other facilities for defined classes of employees and in defined areas, based on average cost to the employer or to groups of employers similarly situated, or average value to groups of employees, or other appropriate measures of fair value." The statute directs that such evaluations, "where applicable and pertinent, shall be used in lieu of actual measure of cost in determining the wage paid to any employee". As explained in Part 531 of this chapter, it is the above provision of the Act which governs the payment, otherwise than in cash, of wages which the Act requires. Regulations under which the reasonable cost or fair value of such facilities furnished may be computed for inclusion as part of the wages required by the Act are also contained in Part 531 of this chapter.

[32 F.R. 2380, February 3, 1967]

SECTION 800.113.—PARTICULAR TYPES OF PAYMENTS AS WAGES

In addition to the examples referred to in sections 800.110 through 800.112, some further illustrations of the types of payments that must be considered in computing wages and wage rates for purposes of the equal pay provisions may be helpful. The Act requires comparison of the wage rates paid for "work on jobs", which makes relevant all remuneration for employment and not just that portion which constitutes compensation for particular hours of employment or particular work done. Clearly this includes all payments that may be counted as part of the minimum wage rate per hour required under section 6 of the Act, all payments that are part of the employee's regular rate under section 7 of the Act, and all overtime premiums. It includes in addition, however, other payments (such as the holiday and vacation pay previously mentioned in section 800.110) for the employee's work on the job as a whole which may have no direct relation to particular hours or weeks of work; and the inclusion of such payments in the wages compared for equal pay purposes does not depend on whether they can be counted as a part of the wage rate per hour required under section 6 as a minimum wage or whether they constitute part of the regular rate of pay under section 7. In accordance with the foregoing principles, the wages to be considered in determining compliance with the equal pay provisions include, in addition to such payments as hourly and daily wages, sums paid as weekly, monthly, or annual salaries; wages measured by pieces produced or tasks performed; commissions, bonuses or other payments measured by production, efficiency, attendance, or other job-related factors, or agreed to be paid under the employment contract; standby and on-call pay; and extra payments made for hazardous, disagreeable, or inconvenient working conditions. These are illustrative, although not exhaustive, of the types of payments included, when part of the remuneration for employment, in the wages to be compared where employees of opposite sexes are employed in jobs subject to the equal pay standard. On the other hand, the "wages" which are compared for equal pay purposes do not include bona fide gifts or payments in the nature of gifts which would be excluded from the employee's regular rate under section 7(e)(1) of the Act and section 778.212 of this chapter. Likewise, sums paid as discretionary bonuses are not considered wages for equal pay purposes if such payments meet the requirements of section 7(e)(3)(a) of the Act and section 778.211 of this chapter. Study is still being given to some categories of payments made in connection with employment subject to the Act, to determine whether and to what extent such payments are remuneration for employment that must be counted as part of wages for equal pay purposes. These categories of payments include sums paid in recognition of services performed during a given period pursuant to a bona fide profit-sharing plan or trust meeting the requirements of Part 549 of this chapter or pursuant to a bona fide thrift or savings plan meeting the requirements of Part 547 of this chapter, and contributions irrevocably made by an employer to a trustee or third person pursuant to a bona fide plan for providing old-age, retirement, life, accident, or health insurance or similar benefits for employees. (See sections 778.214 and 778.215 of this chapter.)

[32 F.R. 2380, February 3, 1967]

EQUALITY OF PAY

SECTION 800.114.—"MALE JOBS" AND "FEMALE JOBS" GENERALLY

(a) Wage classification systems which designate certain jobs as "male jobs" and other jobs as "female jobs" frequently specify markedly lower rates for the "female jobs". Because such a practice frequently indicates a pay practice of discrimination based on sex, where such systems exist a serious question would be raised as to whether prohibited wage differentials are involved. This position is consistent with that taken by the National War Labor Board which found such systems inherently discriminatory and explained that it is not consistent with the principle of equal pay for equal work to designate certain jobs as "female jobs" and other jobs as "male jobs" and on that ground alone establish rate differentials against the former and in favor of the latter. The Board held that the equal pay principle requires that proper rates be set for all jobs, based upon a fair objective evaluation of duties and functions, irrespective of the sex of the workers assigned to them (General Electric Co. and Westinghouse Electric Corp., Case No. 111-17208-D and 111-17209-D, Dec. 12, 1945).

[32 F.R. 2380, February 3, 1967]

It should be further noted that wage classification systems which designate certain jobs as "male jobs" and other jobs as "female jobs" may contravene Title VII of the Civil Rights Act of 1964 except in those certain instances where sex is a bona fide occupational qualification reasonably necessary to the normal operation of that particular business or enterprise (78 Stat. 241, 256).

[32 F.R. 5737, April 8, 1967]

(b) Section 6(d)(1) prohibits discrimination on the basis of sex in the payment of wages to employees "for equal work *on jobs*" which are equal under the standards which it provides (emphasis supplied). (See the discussion in section 800.119 et seq.) The Legislative history of the Equal Pay Act expressly refers to the War Labor Board experience as furnishing a guide for testing "the relationship between jobs" and determining "equal work" and "equal skills" for purposes of a "practical" administration and application of the Act's "equal pay policy" (See, e.g., S. Rept. 176, 88th Cong. 1st sess., to accompany S. 1409; H. Rept. 309, 88th Cong. 1st sess., to accompany H.R. 6060). Some of the earliest cases confronting the War Labor Board on the application of the "equal pay for equal work" principle involved situations in which women were being hired to replace men as a result of the manpower shortages. The Board consistently ruled that the principle applied to these situations, as well as to situations where male and female employees performed the same work concurrently and interchangeably, and therefore that women assigned "to take the place of men" to perform substantially the same jobs "formerly performed by men" were entitled to the same rate of pay as the men whom they replaced. Rotary Cut Box Shook Industry, 12 W.L.B. Rept. 605, 606, 608; General Electric Co., and Westinghouse Electric Co., supra, at pp. 668–669, 677, 686.

(c) That the Equal Pay Act was intended to encompass situations of this kind is confirmed by the declared purposes and terms of the Act as well as by the legislative history. The statute is intended to eliminate sex as a basis for wage differentials between employees performing equal work on jobs within the establishment, and if the rates paid for the same jobs are lower when occupants of the jobs are of one sex than they are when the jobs are filled by employees of the opposite sex, such discrimination within the establishment is equally in violation of the statutory prohibition whether or not employees of both sexes are employed in such jobs at the same time. Accordingly, where an employee of one sex is hired or assigned to a particular job to replace an employee of the opposite sex, comparison of the newly assigned employee's wage rate with that of the replaced former employee is required for purposes of section 6(d)(1), whether or not the job is performed concurrently by employees of both sexes. For example, if a particular job which in the past has been performed by a male employee becomes vacant and is then filled by a female employee, it would be contrary to the equal pay requirement to pay the female employee a lower wage rate than was paid for the same job when performed by the male employee, even though employees of both sexes may not be performing the job at the same time. Payment of the lower wage rate in such circumstances is a prohibited wage differential. The same principle is involved if all employees of one sex are removed from a particular job (by transfer or discharge) so as to retain employees of only one sex in a job previously performed interchangeably or concurrently by employees of both sexes. If a prohibited sex-based wage differential had been established or maintained in violation of the Act when the same job was being performed by employees of both sexes, the employer's obligation to pay the higher rate for the job cannot be avoided or evaded by the device of confining the job to members of the lower paid sex. Compliance with the Act in such circumstances can be achieved only by increasing the wage rate to the higher rate paid for the job when performed by employees of the opposite sex.

[32 F.R. 2380, February 3, 1967]

SECTION 800.115.—INEQUALITIES IN PAY THAT RAISE QUESTIONS UNDER THE ACT

It is necessary to scrutinize with especial care those inequalities in pay between employees of opposite sexes which may indicate a pattern of discrimination in wage payment that is based on sex. Thus, a serious question would be raised where such an inequality, allegedly based on a difference in job content, is in fact one in which the employee occupying the job purportedly requiring the higher degree of skill, effort, or responsibility receives the lower wage rate. Likewise, because the equal pay amendment was designed to eliminate wage rate differentials which are based on sex, situations will be carefully scrutinized where employees of only one sex are concentrated in the lower grades of the wage scale, and where there does not appear to be any material relationship other than sex between the lower wage rates paid to such employees and the higher rates paid to employees of the opposite sex. Such concentrations in rate range situations may occur also where an employer follows a practice of paying a range of rates to newly hired employees. Differentials in entrance rates will not constitute a violation of the equal pay principle if the factors taken into consideration in determining which rate is to be paid each employee are applied equally to men and women. This would be true, for example, if all persons who have a parent employed by the firm are paid at the highest rate of the rate range whether they are men or women. However, if in a particular establishment all persons of one sex tend to be paid at the lowest rate of the range and employees of the opposite sex hired to perform the same work tend to be paid at the highest rate of the range, and if no specific factor or factors other than sex appear to be associated with the difference in pay, a serious question would be raised as to whether the pay practice involves prohibited wage differentials.

SECTION 800.116.—EQUALITY AND INEQUALITY OF PAY IN PARTICULAR SITUATIONS

(a) *Overtime work.*—Because overtime premiums are a part of wages for purposes of the equal pay provisions, where men and women receive the same straight-time rates for work subject to the equal pay standards, but the men receive an overtime premium rate of twice the straight-time rate while the women receive only one and one-half times the straight-time rate for overtime, a prohibited wage rate differential is being paid. On the other hand, where male and female employees perform equal work during regular hours but employees of one sex only continue working overtime into another work period, work performed during this later period may be compensated at a higher rate where such is required by law or is the customary practice of the employer. However, in such a situation the payment of the higher rate to employees of one sex for all hours worked, including the non-overtime hours when they are performing equal work with employees of the opposite sex, would result in a violation of the equal pay provisions. If male and female employees are performing equal work in the establishment during regular hours but only some of these employees continue working into an overtime period, payment of a higher wage rate for the overtime worked would not be in violation of the equal pay standard so long as it were paid for the actual overtime hours worked by the employees, whether male or female.

(b) *Special assignments.*—The fact that an employee may be required to perform an additional task outside his regular working hours would not justify payment of a higher wage rate to that employee for all hours worked. However, employees who are assigned a different and unrelated task to be performed outside the regular workday may under some circumstances be paid at a different rate of pay for the time spent in performing such additional duty provided such rate is commensurate with the task performed. For example, suppose a male employee is regularly employed in the same job with female employees in the same establishment in work which requires equal skill, effort, and responsibility, and is performed under similar working conditions, except that the male employee must carry money to a bank after the establishment closes at night. Such an employee may be paid at a different rate for the time spent in performing this unrelated task if the rate is appropriate to the task performed and the payment is bona fide and not simply used as a device to escape the equal pay requirements of the Act.

(c) *Vacation or holiday pay.*—Since vacation or holiday pay is deemed to be remuneration for employment included in wages within the meaning of the Act, if employees of one sex receive vacation pay for a greater number of hours than employees of the opposite sex, a prohibited wage rate differential is being paid if their work is subject to the equal pay standard and the differential is not shown to come within any of the specified exceptions.

(d) *Contributions to employee benefit plans.*—If employer contributions to a plan providing insurance or similar benefits to employees are equal for both men and women, no wage differential prohibited by the equal pay provisions will result from such payments, even though the benefits which accrue to the employees in question are greater for one sex than for the other. The mere fact that the employer may make unequal contributions for employees of opposite sexes in such a situation will not, however, be considered to indicate that the employer's payments are in violation of section 6(d), if the resulting benefits are equal for such employees.

(e) *Commissions.*—The establishment of different rates of commission on different types of merchandise would not result in a violation of the equal pay provisions where the factor of sex provides no part of the basis for the differential. For example, suppose that a retail store maintains two shoe departments, each having employees of both sexes, that the shoes carried in the two departments differ in style, quality, and price, and that the male and female sales clerks in the one department are performing "equal work" with those in the other. In such a situation, a prohibited differential would not result from payment of a lower commission rate in the department where a lower price line with a lower markup is sold than in the other department where the merchandise is higher priced and has a higher markup, if the employer can show that the commission rates paid in each department are applied equally to the employees of both sexes in the establishment for all employment in that department and that the factor of sex has played no part in the setting of the different commission rates.

[31 F.R. 6770, May 6, 1966]

SECTIONS 800.117–800.118.—[RESERVED]

THE EQUAL PAY FOR EQUAL WORK STANDARD—GENERALLY

SECTION 800.119.—THE JOB CONCEPT IN GENERAL

Section 6(d)(1) of the Act prohibits an employer from paying to employees of one sex wages at rates lower than he pays employees of the opposite sex for "equal work on jobs" described by the statute in terms of equality of the "skill, effort, and responsibility" required for performance and similarity of the "working conditions" under which they are performed. This descriptive language refers to "jobs". In applying the various tests of equally to the requirements for the performance of such jobs, it will generally be necessary to scrutinize the job as a whole and to look at the characteristics of the jobs being compared over a full work cycle. This will be true because the kinds of activities required to perform a given job and the amount of time devoted to such activities may vary from time to time. As the legislative history makes clear, the equal pay standard provided by the Act is designed to eliminate any wage rate differentials which are based on sex; nothing in the equal pay provisions is intended to prohibit differences in wage rates that are based not at all on sex but wholly on other factors. (See S. Rept. No. 176, 88th Cong. 1st sess., p. 4; H. Rept. No. 309, 88th Cong. 1st sess., p. 2.)

SECTION 800.120.—EFFECT OF DIFFERENCES BETWEEN JOBS IN GENERAL

There is evidence that Congress intended that jobs of the same or closely related character should be compared in applying the equal pay for equal work standard (Daily Congressional Record, House, May 23, 1963, pp. 8686, 8698). Jobs that require equal skill, effort, and responsibility in their performance within the meaning of the Act are usually not identical in every respect (Daily Congressional Record, Senate, May 28, 1963, p. 9219). Congress did not intend that inconsequential differences in job content would be a valid excuse for payment of a lower wage to an employee of one sex than to an employee of the opposite sex if the two are performing equal work on essentially the same jobs in the same establishment. It will be remembered in this connection that the National War Labor Board (to the experience of which attention is directed in the Senate and House Committee Reports) developed a policy of ignoring inconsequential differences in job content in administering equal pay for equal work provisions (Brown & Sharp Manufacturing Co. Case No. 2228–D, Sept. 25, 1942). On the other hand, it is clear that Congress did not intend to apply the equal pay standard to jobs substantially differing in their terms and conditions. Thus, the question of whether a female bookeeper should be paid as much as a male file clerk required to perform a substantially different job is outside the purview of the equal provisions. It is also clear that the equal pay standard is not to be applied where only men are employed in the establishment in one job and only women are employed in a dissimilar job. For example, the standard would not apply where only women are employed in clerk typist positions and only men are employed in jobs as administrative secretaries if the latter really require substantially different duties.

SECTION 800.121.—JOB CONTENT CONTROLLING

Application of the equal pay standard is not dependent on job classifications or titles but depends rather on actual job requirements and performance. For example, the fact that jobs performed by male and female employees may have the same total point value under an evaluation system in use by the employer does not in itself mean that the jobs concerned are equal according to the terms of the statute. Conversely, although the point values allocated to jobs may add up to unequal totals, it does not necessarily follow that the work being performed in such jobs is unequal when the statutory tests of the equal pay standard are applied. Job titles are frequently of such a general nature as to provide very little guidance in determining the application of the equal pay standard. For example, the job title "clerk" may be applied to employees who perform a variety of duties so dissimilar as to place many of them beyond the scope of comparison under the statute. Similarly, jobs included under the title "stock clerk" may include an employee of one sex who spends all or most of his working hours in shifting and moving goods in the establishment whereas another employee, of the opposite sex, may also be described as a "stock clerk" but be engaged entirely in checking inventory. Clearly, the equal pay standard would not apply where jobs require such substantially different duties, even though the job titles are identical. In other situations, including those which exist in the case of job identified by the general title "retail clerks", the facts may show that equal skill, effort, and responsibility are required in the jobs of male and female employees notwithstanding they are engaged in selling different kinds of merchandise. In all such situations, the application of the equal pay standard will have to be determined by applying the terms of the statute to the full factual situation.

SECTION 800.122.—GENERAL GUIDES FOR TESTING EQUALITY OF JOBS

(a) What constitutes equal skill, equal effort, or equal responsibility cannot be precisely defined. In interpreting these key terms of the statute, the broad remedial purpose of the law must be taken into consideration. The terms are considered to constitute three separate tests, each of which must be met in order for the equal pay standard to apply. In applying the tests it should be kept in mind that "equal" does not mean "identical" (Daily Congressional Record, Senate, May 28, 1963, p. 9219). Insubstantial or minor differences in the degree or amount of skill, or effort, or responsibility required for the performance of jobs will not render the equal pay standard inapplicable. On the other hand, substantial differences, such as those customarily associated with differences in wage levels when the jobs are performed by persons of one sex only, will ordinarily demonstrate an inequality as between the jobs justifying differences in pay. In determining whether job differences are so substantial as to make jobs unequal, it is pertinent to inquire whether and to what extent significance has been given to such differences in setting the wage levels for such jobs. Such an inquiry may, for example, disclose that apparent differences between jobs have not been recognized as relevant for wage purposes and that the facts as a whole support the conclusion that the differences are too insubstantial to prevent the jobs from being equal in all significant respects under the law.

(b) To illustrate, where employees of opposite sexes are employed in jobs in which the duties they are required to perform and the working conditions are substantially the same, except that an employee of one sex is required to perform some duty or duties involving a higher skill which an employee of the other sex is not required to perform, the fact that the duties are different in this respect is insufficient to remove the jobs from the application of the equal pay standard if it also appears that the employer is paying a lower wage rate to the employee performing the additional duties notwithstanding the additional skill which they involve. In other situations, where employees of opposite sex are employed in jobs which are equal in the levels of skill, effort, and responsibility required for their performance, it may be alleged that the assignment to employees of one sex but not the other of certain duties requiring less skill makes the jobs too different for comparison under the equal pay provisions. But so long as the higher level of skill is required for the performance of the jobs occupied by employees of both sexes, the fact that some of the duties assigned to employees of one sex require less skill than the employee must have for the job as a whole does not warrant any conclusion that the jobs are outside the purview of the equal pay standard. Such a conclusion would be especially inappropriate if the employees of the sex to whom the less skilled work was assigned received a higher rate of pay. There are, of course, situations in which a review of all the pertinent facts will clearly establish that the male and female employees in question are not performing equal work on jobs which are equal in their requirements of skill, effort, and responsibility, and which are performed under similar working conditions. Where it is clear that this is so, the existence or extent of a wage differential between employees of opposite sexes cannot of itself provide a basis for holding an employer liable for violations under the provisions of section 6(d) of the Act.

SECTION 800.123.—DETERMINING EQUALITY OF JOB CONTENT IN GENERAL

In determining whether differences in job content are substantial in order to establish whether or not employees are performing equal work within the meaning of the Act, the amounts of time which employees spend in the performance of different duties are not the sole criteria. It is also necessary to consider the degree of difference in terms of skill, effort, and responsibility. These factors are related in such a manner that a general standard to determine equality of jobs cannot be set up solely on the basis of a percentage of time. Consequently, a finding that one job requires employees to expend greater effort for a certain percentage of their working time than employees performing another job, would not in itself establish that the two jobs do not constitute equal work. Similarly, the performance of jobs on different machines or equipment would not necessarily result in a determination that the work so performed is unequal within the meaning of the statute if the equal pay provisions otherwise apply. If the difference in skill or effort required for the operation of such equipment is inconsequential, payment of a higher wage rate to employees of one sex because of a difference in machines or equipment would constitute a prohibited wage rate differential. Likewise, the fact that jobs are performed in different departments or locations within the establishment would not necessarily be sufficient to demonstrate that unequal work is involved where the equal pay standard otherwise applies. This is particularly true in the case of retail establishments, and unless a showing can be made by the employer that the sale of one article requires such a higher degree of skill or effort than the sale of another article as to render the equal pay standard inapplicable, it will be assumed that the salesmen and saleswomen concerned are performing equal work. Although the equal pay provisions apply on an establishment basis and the jobs to be compared are those in the particular establishment, all relevant evidence that may demonstrate whether the skill, effort, and responsibility required in the jobs at the particular establishment are equal should be considered, whether this relates to the performance of like jobs in other establishments or not.

SECTION 800.124.—COMPARING "EXEMPT" AND "NONEXEMPT" JOBS

Situations sometimes arise in which it is alleged that lower wages are being paid, in violation of the Act, to a nonexempt employee than to an exempt employee of the opposite sex for equal work on jobs said to be equal within the meaning of the Act. Usually it is necessary in such a case to scrutinize carefully the respective job requirements, working conditions, and pay arrangements before it is possible to reach an informed judgment as to the existence of any violation of the Act. To illustrate, suppose it is alleged that employees of opposite sexes are performing equal work within the meaning of the Act and that a wage discrimination on account of sex exists because one of such employees, but not the other, is paid the minimum compensation on a salary basis which is required for exemption as a bona fide executive or administrative employee and is treated by the employer as such an exempt employee under section 13(a)(1) of the Act and the regulations in 29 CFR Part 541. In such a case, regard must be had to the fact that the regulations define an employee employed in a bona fide executive or administrative capacity in terms of the coexistence of a number of factors, only one of which is the receipt of compensation in a specified minimum amount on a salary basis. The existence of all these factors must be verified to determine whether the employer is correct in treating the employee who receives such salary as exempt. Regard must also be had to the fact that an employee who qualifies for exemption, because all the factors required by the regulations coexist, may be required to work as many hours as the employer may be able to persuade him to work for the stated salary, without any necessity of compliance by the employer with the minimum wage, equal pay or overtime compensation requirements of the Act. This is important because the fact that another employee of the opposite sex doing similar work does not receive the salary requisite for an exemption under the regulations would not in all cases mean that such employee is being paid at a lower rate of pay. In fact, because the nonexempt employee must receive at least the minimum wage for every hour worked and the prescribed additional compensation at the specified multiple of the regular rate for every such hour in excess of the applicable maximum workweek, it is possible, depending on the length of the workweek, that the pay in the nonexempt job may exceed the salary paid in the exempt job for the identical number of hours worked. For these reasons, a comparison of exempt and nonexempt jobs requires careful examination of all the facts and does not lend itself to the application of any general rules.

EQUAL SKILL

SECTION 800.125.—JOBS REQUIRING EQUAL SKILL IN PERFORMANCE

The jobs to which the equal pay standard is applicable are jobs requiring equal skill in their performance. Where the amount or degree of skill required to perform one job is substantially greater than that required to perform another job, the equal pay standard cannot apply even though the jobs may be equal in all other respects. Skill includes consideration of such factors as experience, training, education, and ability. It must be measured in terms of the performance requirements of the job. If an employee must have essentially the same skill in order to perform either of two jobs, the jobs will qualify under the Act as jobs the performance of which requires equal skill, even though the employee in one of the jobs may not exercise the required skill as frequently or during as much of his working time as the employee in the other job. Possession of a skill not needed to meet requirements of the job cannot be considered in making a determination regarding equality of skill. The efficiency of the employee's performance in the job is not in itself an appropriate factor to consider in evaluating skill.

SECTION 800.126.—COMPARING SKILL REQUIREMENTS OF JOBS

As a simple illustration of the principle of equal skill, suppose that a man and a woman have jobs classified as typists. Both jobs require them to spend two-thirds of their working time in typing and related activities, such as proofreading and filing, and the remaining one-third in diversified tasks, not necessarily the same. Since there is no difference in the skills required for most of their work, whether or not these jobs require equal skill in performance will depend upon the nature of the work the employees must actually perform during this latter period to meet the requirements of the jobs. If it happens that the man, during the remaining one-third of the time, spends twice as much time operating a calculator as does the woman who prefers and is allowed to do most of the copying work required in the office, this would not preclude a conclusion that the tinction in the performance requirements of such jobs so far as the skills utilized in these tasks are concerned. Even if the man were required to do all of the calculating work in order to perform his job, it is not at all apparent that the jobs would require substantially different degrees of skill unless it should appear that operation of that calculator requires more training and can command a higher wage than the typing and related work performed by both the man and the woman, and that the work required to be done by the woman in the remaining one-third of the time requires less training and is recognized as commanding a lower wage whether perfomed by a man or a woman.

EQUAL EFFORT

SECTION 800.127.—JOBS REQUIRING EQUAL EFFORT IN PERFORMANCE

The jobs to which the equal pay standard is applicable are jobs that require equal effort to perform. Where substantial differences exist in the amount or degree of effort required to be expended in the performance of jobs, the equal pay standard cannot apply even though the jobs may be equal in all other respects. Effort is concerned with the measurement of the physical or mental exertion needed for the performance of a job. Where jobs are otherwise equal under the Act, and there is no substantial difference in the amount or degree of effort which must be expended in performing the jobs under comparison, the jobs may require equal effort in their performance even though the effort may be exerted in different ways on the two jobs. Differences only in the kind of effort required to be expended in such a situation will not justify wage differentials.

SECTION 800.128—COMPARING EFFORT REQUIREMENTS OF JOBS

To illustrate the principle of equal effort exerted in different ways, suppose that a male checker employed by a supermarket is required to spend part of his time carrying out heavy packages or replacing stock involving the lifting of heavy items whereas a female checker is required to devote an equal degree of effort during a similar portion of her time to performing fill-in work requiring greater dexterity—such as rearranging displays of spices or other small items. The difference in kind of effort required of the employees does not appear to make their efforts unequal in any respect which would justify a wage differential, where such differences in kind of effort expended to perform the job are not ordinarily considered a factor in setting wage levels. Further, the occasional or sporadic performance of an activity which may require extra physical or mental exertion is not alone sufficient to justify a finding of unequal effort. Suppose, however, that men and women are working side by side on a line assembling parts. Suppose further that one of the men who performs the operations at the end of the line must also lift the assembly, as he completes his part of it, and places it on a waiting pallet. In such a situation, a wage rate differential might be justified for the person (but only for the person) who is required to expend the extra effort in the performance of his job, provided that the extra effort so expended is substantial and is performed over a considerable portion of the work cycle. However, a serious question would be raised about the bona fides of a wage differential if it is paid to a male employee who is otherwise performing equal work with female employees on the basis that the male is required to do some heavy lifting, unless a similar distinction in wage rates is made in the establishment as between male employees only where some do heavy lifting and other do not. In general, a wage rate differential based on differences in the degree or amount of effort required for performance of jobs must be applied uniformly to men and women. For example, if all women and some of the men performing a particular type of job do not perform heavy lifting, and some men do, payment of a higher wage rate to all of the men than to the women would constitute a prohibited wage rate differential if the equal pay provisions otherwise apply.

EQUAL RESPONSIBILITY

SECTION 800.129.—JOBS REQUIRING EQUAL RESPONSIBILITY IN PERFORMANCE

The jobs to which the equal pay standard applies are jobs in the performance of which equal responsibility is required. Responsibility is concerned with the degree of accountability required in the performance of the job, with emphasis on the importance of the job obligation. Differences in the degree of responsibility required in the performance of otherwise equal jobs cover a wide variety of situations. The following illustration in section 800.130, which are by no means exhaustive, may suggest the nature or degree of differences in responsibility which will constitute unequal work.

SECTION 800.130.—COMPARING RESPONSIBILITY REQUIREMENTS OF JOBS

(a) There are many situations where one employee of a group performing jobs which are equal in other respects is required from time to time to assume supervisory duties for reasons such as the absence of the regular superivsor. Suppose, for instance, that it is the employer's practice to pay a higher wage rate to such a "relief" supervisor with the understanding that during the intervals in which he performs supervisory duties he is in training for a supervisory position. In such a situation, payment of the higher rate to him might well be based solely on the additional responsibility required to perform his job and the equal pay provisions would not require the same rates to be paid to an employee of the opposite sex in the group who does not have an equal responsibility. There would clearly be no question concerning such a wage rate differential if the employer pays the higher rate to both men and women who are called upon from time to time to assume such supervisory responsibilities.

(b) Other differences in responsibilities of employees in generally similar jobs may require similar conclusions. Sales clerks, for example, who are engaged primarily in selling identical or similar merchandise may be given different responsibilities. Suppose that one employee of such a group (who may be either a man or a woman) is authorized and required to determine whether to accept payment for purchases by personal checks of customers. The person having this authority to accept personal checks may have a considerable additional degree of responsibility which may materially affect the business operations of the employer. In this situation, payment of a higher wage rate to this employee would be permissible.

(c) On the other hand, there are situations where one employee of the group may be given some minor responsibility which the others do not have (e.g., turning out the lights in his department at the end of the business day) but which is not of sufficient consequence or importance to justify a finding of unequal responsibility. As another example of a minor difference in responsibility, suppose that office employees of both sexes work in jobs essentially alike but at certain intervals a male and female employee performing otherwise equal work within the meaning of the statute are responsible for the office payroll. One of these employees may be assigned the jobs of checking time cards and compiling the payroll list. The other, of the opposite sex, may be required to make out paychecks, or divide up cash and put the proper amounts into pay envelopes after drawing a payroll check. In such circumstances, although some of the employees' duties are occasionally dissimilar, the difference in responsibility involved would not appear to be of a kind that is recognized in wage administration as a significant factor in determining wage rates. Under such circumstances, this difference would seem insufficient to justify a wage rate differential between the man's and the woman's job if the equal pay provisions otherwise apply.

Similar Working Conditions

SECTION 800.131.—JOBS PERFORMED UNDER SIMILAR WORKING CONDITIONS

In order for the equal pay standard to apply, the jobs must be performed under similar working conditions. It should be noted that the statute adopts the flexible standard of similarity as a basis for testing this requirement. In determining whether the requirement is met, a practical judgment is required in the light of whether the differences in working conditions are the kind customarily taken into consideration in setting wage levels. The mere fact that jobs are in different departments of an establishment will not necessarily mean that the jobs are performed under dissimilar working conditions. This may or may not be the case.

SECTION 800.132.—DETERMINING SIMILARITY OF WORKING CONDITIONS

Generally, employees performing jobs requiring equal skill, effort, and responsibility are likely to be performing them under similar working conditoins. However, in situations where some employees performing work meeting these standards have working conditions substantially different from those required for the performance of other jobs the equal pay principle would not apply. For example, if some sales persons are engaged in selling a product exclusively inside a store and others employed by the same establishment spend a large part of their time selling the same product away from the establishment, the working conditions would be dissimilar. Also, where some employees do repair work exclusively inside a shop while others employed by the shop spend most of their time doing similar repair work in customers' homes, there would not be similarity in working conditions. On the other hand, slight or inconsequential differences in working conditions that are essentially similar would not justify a differential in pay. Such differences are not usually taken into consideration by employers or in collective bargaining in setting wage rates.

SECTIONS 800.133–800.139.—[RESERVED]

Exceptions to Equal Pay Standard

SECTION 800.140.—THE SPECIFIED EXCEPTIONS

Section 6(d)(1) of the Act provides three specific exceptions and one broad general exception to its general standard requiring that employees doing equal work be paid equal wages, regardless of sex. Under these exceptions, where it can be established that a differential in pay is the result of a wage payment made pursuant to a seniority system, a merit system, a system measuring earnings by quantity or quality of production, or that the differential is based on any other factor other than sex, the differential is expressly excluded from the statutory prohibition of wage discrimination based on sex. The legislative intent was stated to be that any discrimination based upon any of these exceptions shall be exempted from the operation of the statute. These exceptions recognize, as do the reports of the legislative committees, that there are factors other than sex that can be used to justify a wage differential, even as between employees of opposite sexes performing equal work on jobs which meet the statutory tests of equal skill, effort, and responsibility, and similar working conditions. (See H. Rept. No. 309, S. Rept. No. 176, 88th Congress 1st sess.)

SECTION 800.141.—ESTABLISHING APPLICATION OF AN EXCEPTION

(a) The facts necessary to establish that a wage differential has a basis specified in any of the foregoing exceptions are peculiarly within the knowledge of the employer. If he relies on the excepting language to exempt a differential in pay from the operation of the equal pay provisions, he will be excepted to show the necessary facts. Thus, such a showing will be required to demonstrate that a payment of wages to employees at a rate less than the rate at which he pays employees of the opposite sex is based on a factor other than sex where it appears that such payments are for equal work on jobs the performance of which requires equal skill, effort, and responsibility, and which are performed under similar working conditions within the meaning of the statute. After careful examination of the legislative history and the judicial precedents, this is believed to be the most reasonable construction of the law and the one which will be approved by the courts. However, because there is some legislative history that could support a different view, the reasons for reaching the foregoing conclusions are explained in some detail in paragraph (b) of this section.

(b) The legislative history of the Equal Pay Act amendments to the Fair Labor Standards Act includes some statements in the House debate, by a member of the House committee who was an active sponsor of the legislation in the form approved by the committee, expressing a view differing from that stated in paragraph (a) of this section. The opinion expressed in these statements appears to be that the burden of establishing a prima facie case of violation of the equal pay provisions includes not only a showing of the facts necessary to establish a failure to comply with the Act's general standard, but also a showing that no facts exist that could bring the wage differential within an exception. In this view, the employer would not have to show facts necessary to provide the exception as an affirmative defense (Daily Congressional Record, House, May 23, 1963, p. 8698). But if the exceptions are intended to have an exempting effect, as was indicated by House committee spokesmen (H. Rept. No. 309, 88th Cong., 1st sess., p. 3; statement of Subcommittee Chairman Thompson, Daily Congressional Record, House, May 23, 1963, p. 8685), it seems plain that a view such as that expressed above is not consistent with the general rule established by the courts that the application of an exemption under this Act is a matter of affirmative defense and the employer urging such an exemption has the burden of showing that it applies. (See *Philips* v. *Walling*, 334 U.S. 490; *Arnold* v. *Kanowsky*, 361 U.S. 388; *Walling* v. *General Industries Co.*, 330 U.S. 545; *Mitchell* v. *Kentucky Finance Co.*, 359 U.S. 290.) On balance, it would be difficult to conclude from the legislative history that it was the intent of Congress to supersede this established rule by applying a different rule to these provisions that to other exemptions from section 6 or 7. The House committee report emphasized that the "now familiar system of * * * administration, and enforcement, * * * will be utilized fully to complement the new provision" and many statements in the legislative debates as well as the report of the Senate committee further indicate a well-understood legislative intent to apply and enforce the equal pay provisions in a manner consistent with the familiar procedures traditionally followed under the Act in the administration and enforcement of its labor standards. (H. Rept. No. 309, S. Rept. No. 176, 88th Cong. 1st sess.; Daily Congressional Record, House, May 23, 1963, pp. 8692, 8705; Daily Congressional Record, Senate, May 28, 1963, pp. 9219–9220). Also pertinent is the understanding expressed by the House sponsors that a "bona fide program" that "does not discriminate on the basis of sex will serve as a valid defense to a charge of discrimination" (H. Rept. No. 309, 88th Cong. 1st sess.; Daily Congressional Record, House, May 23, 1963, p. 8685) and the clarifying remarks of the subcommittee chairman managing the House-passed legislation in the Senate, who said: "The employer's defense, if it is based on an employer's plan, must be a bona fide one; and the burden of demonstrating the legitimacy of that defense will rest upon the employer." (Daily Congressional Record, Senate, May 28, 1963, p. 9219). On review of the legislative history as a whole, therefore, the most reasonable conclusion appears to be that the position expressed in paragraph (a) of this section is the better view, and that it is consistent with the legislative intent to consider the statutory exceptions, like other exemptions from section 6, as matters of affirmative defense and to require an employer who believes he comes within them to show facts establishing that this is so.

SECTION 800.142.—SEX MUST NOT BE A FACTOR IN EXCEPTED WAGE DIFFERENTIALS

While differentials in the payment of wages are permitted when it can be shown that they are based on a seniority system, a merit system, a system measuring earnings by quantity or quality of production, or on any other factor other than sex, the requirements for such an exception are not met unless the factor of sex provides no part of the basis for the wage differential. If these conditions are met, the fact that application of the system for measuring earnings results in higher average earnings for employees of one sex than for employees of the opposite sex performing equal work would not constitute a prohibited wage differential. However, to come within the exempting provisions, any system or factor of the type described pursuant to which a wage rate differential is paid must be applied equally to men and women whose jobs require equal skill, effort, and responsibility, and are performed under similar working conditions. Any evaluation, incentive, or other payment plan which establishes separate and different "male rates" and "female rates" without regard to job content will be carefully examined to determine if these rate differentials are based on sex in violation of the equal pay requirements.

SECTION 800.143.—ESTABLISHING ABSENCE OF SEX AS A FACTOR

A showing that a wage differential is based on a factor other than sex, so as to come within one of the exceptions in section 6(d)(1), may sometimes be incomplete without a showing that there is a reasonable relationship between the amount of the differential and the weight properly attributable to the factor other than sex. To illustrate, suppose that male clerks who work 40 hours each week and female clerks who work 35 hours each week are performing equal work on jobs the performance of which requires equal skill, effort, and responsibility, and which are performed under similar working conditions. If they are paid weekly salaries for this work, a differential in the amounts could be justified as based on a difference in hours of work, a difference based on a factor other than sex which the chairman of the House subcommittee stated would "be exempted under this act." (Daily Congressional Record, House, p. 8685, May 23, 1963.) But if the difference in salaries paid is too great to be accounted for by the difference in hours of work, as where the male clerks are paid $90 for their 40-hour week (equal to $2.25 an hour) and the female clerks receive only $70 for their 35-hour week (equal to $2.00 an hour), then it would seem necessary to show some other factor other than sex as the basis for the unexplained portion of the wage differential before a conclusion that there is no wage discrimination based on sex would be warranted. To illustrate further, a compensation plan which provides for a higher rate of commission, "draw", advance or guarantee for sales employees of one sex than for employees of the opposite sex performing "equal work" would be in violation of the equal pay provisions of the Act unless the employer can establish that the differential in pay is pursuant to a seniority system, a merit system, or a system measuring earnings by quantity or quality of production, or is based on any other factor other than sex. A compensation plan which provides for a "draw" based on a percentage of each employee's earnings during a specified prior period would not be in violation of the equal pay provisions of the Act if the plan is applied equally to men and women. However, for all men to receive a higher draw, because it is the employer's experience that men generally earn more in commissions than women, would not be sufficient indication that the differential is based on a factor other than sex.

SECTION 800.144.—EXCEPTED "SYSTEMS"

The exceptions for a seniority "system", a merit "system", and a "system" for measuring earnings by quantity or quality of work are not restricted to, although they include, formal systems or systems or plans that are reduced to writing. Such formal or written systems or plans may, of course, provide better evidence of the actual factors which provide a basis for a wage differential, but any informal or unwritten system or plan which can be shown to provide the basis for differentials in wage rates because of seniority, merit, or quantity or quality of production may qualify under the statutory language if it can be demonstrated that the standards or criteria applied under it are applied pursuant to an established plan the essential terms and conditions of which have been communicated to the affected employees.

SECTION 800.145.—APPLICATION OF EXCEPTIONS ILLUSTRATED, IN GENERAL

When applied without distinction to employees of both sexes, shift differentials, incentive payments, production bonuses, performance and longevity raises and the like will not result in equal pay violations. For example, in an establishment where men and women are employed on a job, but only men work on the night shift for which a night shift differential is paid, such a differential would not be prohibited. However, the payment of a higher hourly rate to all men on that job for all hours worked because some of the men may occasionally work nights would result in a prohibited wage differential. The examples (in the sections following) illustrate a few applications of the exception provisions.

SECTION 800.146.—EXAMPLES—"RED CIRCLE" RATES, IN GENERAL

The term "red circle" rates describes certain unusual, higher than normal, wage rates which are maintained for many reasons. An example of the use of a "red circle" rate might arise in a situation where a company wishes to transfer a long-service male employee, who can no longer perform his regular job because of ill health, to different work which is now being performed by women. Under the "red circle" principle the employer may continue to pay the male employee his present salary, which is greater than that paid to the women employees, for the work both will be doing. Under such circumstances, maintaining an employee's established wage rate, despite a reassignment to a less demanding job, is a valid reason for the differential even though other employees performing the less demanding work would be paid at a lower rate, since the differential is based on a factor other than sex. However, where wage rate differentials have been or are being paid on the basis of sex to employees performing equal work, rates of the higher paid employees may not be "red circled" in order to comply with the Act. To allow this would only continue the inequities which the Act was intended to cure.

SECTION 800.147.—EXAMPLES—TEMPORARY REASSIGNMENTS

For a variety of reasons an employer may require an employee, for a short period, to perform the work of a job classification other than the empoloyee's regular classification. If the employee's rate for his regular job is higher than the rate usually paid for the work to which he is temporarily reassigned, the employer may continue to pay him the higher rate, under the "red circle" principle. For instance, an employer who must reduce help in a skilled job may transfer employees to less demanding work without reducing their pay, in order to have them available when they are again needed for their former jobs. Although employees traditionally engaged in performing the less demanding work would would be paid at a lower rate than those employees transferred from the more skilled jobs, the resultant wage differential would not constitute a violation of the equal pay provisions since the differential is based on factors other than sex. This would be true during the period of time for which the "red circle" rate is bona fide. (See sec. 800.146.) Temporary reassignments may also involve the opposite relationship of wage rates. Thus, an employee may be required, during the period of temporary reassignment, to perform work for which employees of the opposite sex are paid a higher wage rate than that paid for the duties of the employee's regular job classification. In such a situation, the employer may continue to pay the reassigned employee at the lower rate, if the rate is not based on quality or quantity of production, and if the reassignment is in fact a temporary one. If a piece rate is paid employees of the opposite sex who perform the work to which the employee in question is reassigned, failure to pay that employee the same piece rate paid such other employees would raise questions of discrimination based on sex. Also, failure to pay the higher rate to the reassigned employee after it becomes known that the reassignment will not be of a temporary nature would raise a question whether sex rather than the temporary nature of the assignment is the real basis for the wage differential. Generally, failure to pay the higher rate for a period longer than one month will raise questions as to whether the reassignment was in fact intended to be a temporary one.

SECTION 800.148.—EXAMPLES—TRAINING PROGRAMS

Employees employed under a bona fide training program may, in the furtherance of their training, be assigned from time to time to various types of work in the establishment. At such times, the employee in training status may be performing equal work with nontrainees of the opposite sex whose wages or wage rates may be unequal to those of the trainee. Under these circumstances, provided the rate paid to the employee in training status is paid, regardless of sex, under the training program, the differential can be shown to be attributable to a factor other than sex and no violation of the equal pay standard will result. Training programs which appear to be available only to employees of one sex will, however, be carefully examined to determine whether such programs are, in fact, bona fide. In an establishment where a differential is paid to employees of one sex because, traditionally, only they have been considered eligible for promotion to executive positions, such a practice, in the absence of a bona fide training program, would be a discrimination based on sex and result in a violation of the equal pay provisions, if the equal pay standard otherwise applies.

SECTION 800.149.—EXAMPLES—"HEAD OF HOUSEHOLD"

Sometimes differentials in pay to employees performing equal work are said to be based on the fact that one employee is head of a household and the other, of the opposite sex, is not. In general, such allegations have not been substantiated. Experience indicates that where such factor is claimed the wage differentials tend to be paid to employees of one sex only, regadless of the fact that employees of the opposite sex may bear equal or greater financial responsibility as head of a household or for the support of parents or other family dependents. Accordingly, since the normal pay practice in the United States is to set a wage rate in accordance with the requirements of the job itself and since a "head of household" or "head of family" status bears no relationship to the requirements of the job or to the individuals performance on the job, the general position of the Secretary of Labor and the Administrator is that they are not prepared to conclude that any differential allegedly based on such status is based on a "factor other than sex" within the intent of the statute.

SECTION 800.150.—EXAMPLES—TEMPORARY AND PART-TIME EMPLOYEES

The payment of different wage rates to permanent employees than to temporary employees such as may be hired during the Christmas season would not necessarily be a violation of the equal pay provisions even though equal work is performed by both groups of workers. For example, no violation would result where payment of such a differential conforms with the nature and duration of the job and with the customary practice in the industry and the establishment, and the pay practice is applied uniformly to both men and women. Generally, employment for a period longer than one month will raise questions as to whether the employment is in fact temporary. Likewise, the payment of a different wage to employees who work only a few hours a day than to employees of the opposite sex who work a full day will not necessarily involve noncompliance with the equal pay provisions, even though both groups of workers are performing equal work in the same establishment. No violation of the equal pay standards would result if, for example, the difference in working time is the basis for the pay differential, and the pay practice is applied uniformly to both men and women. However, if employees of one sex work 30 to 35 hours a week and employees of the other sex work 40 to 45 hours, a question would be raised as to whether the differential is not in fact based on sex since different rates for part-time work are usually for workweeks of 20 hours or less.

SECTION 800.151.—EXAMPLES—EMPLOYMENT COST FACTORS

A wage differential based on claimed differences between the average cost of employing the employer's women workers as a group and the average cost of employing the men workers as a group does not qualify as a differential based on any "factor other than sex," and would result in a violation of the equal pay provisions, if the equal pay standard otherwise applies. To group employees solely on the basis of sex for purposes of comparison of costs necessarily rests on the assumption that the sex factor alone may justify the wage differential—an assumption plainly contrary to the terms and purpose of the Equal Pay Act. Wage differentials so based would serve only to perpetuate and promote the very discrimination at which the Act is directed, because in any grouping by sex of the employees to which the cost data relates, the group cost experience is necessarily assessed against an individual of one sex without regard to whether it costs an employer more or less to employ such individual than a particular individual of the opposite sex under similar working conditions in jobs requiring equal skill, effort, and responsibility.

[31 F.R. 2657, Feb. 11, 1966]

SECTION 800.152–800.159.—[RESERVED]

RELATION TO OTHER LAWS

SECTION 800.160.—RELATION TO OTHER EQUAL PAY LAWS

The provisions of various State or other equal pay laws may differ from the equal pay provisions set forth in the Fair Labor Standards Act. There is also other Federal legislation which deals broadly with discrimination by employers against individuals because of sex, including discrimination on such grounds with respect to compensation for employment (see Civil Rights Act of 1964, 78 Stat. 241, Title VII). Where any such legislation and the equal pay provisions of the Fair Labor Standards Act both apply, the principle established in section 18 of the latter Act will be controlling. No provisions of the Fair Labor Standards Act will excuse noncompliance with any State or other law establishing equal pay standards higher than the equal pay standards provided by section 6(d) of the Fair Labor Standards Act. On the other hand, compliance with other applicable legislation will not excuse noncompliance with the equal pay provisions of the Fair Labor Standards Act.

SECTION 800.161.—HIGHER STATE MINIMUM WAGE

State laws providing minimum wage requirements may affect the application of the equal pay provisions of the Fair Labor Standards Act. If a higher minimum wage than that required under the Act is applicable to a particular sex pursuant to State law, and the employer pays the higher State minimum wage to male or female employees, he must also pay the higher rate to employees of the opposite sex for equal work in order to comply with the equal pay provisions of the Act.

SECTION 800.162.—OVERTIME PAYMENTS REQUIRED BY STATE LAW

The application of the equal pay provisions of the Act may also be affected by State legal requirements with respect to overtime pay. If as a result of a State law, female employees in an employer's establishment are paid overtime premiums for hours worked in excess of a prescribed maximum in any workday or workweek, the employer must pay male employees performing equal work in such establishment the same overtime premiums when they work such excess hours, in order to comply with the equal pay provisions of the Fair Labor Standards Act. This would be true even though both the male and the female employees performing equal work are otherwise qualified for exemption from the overtime pay requirements of section 7 of the Fair Labor Standards Act. It would not be true, however, unless the overtime requiring the premium pay is actually being worked by the women.

SECTION 800.163.—OTHER LAWS NOT APPLYING EQUALLY TO EMPLOYMENT OF BOTH SEXES

In making a determination as to the application of the equal pay provisions of the Fair Labor Standards Act, legal restrictions in State or other laws upon the employment of individuals of a specified sex, with respect to such matters as hours of work, weight-lifting, rest periods, or other conditions of such employment, will not be deemed to make otherwise equal work unequal or be considered per se as justification for an otherwise prohibited differential in wage rates. For example, under the Act, the fact that a State law limits the weights which women are permitted to lift would not justify a wage differential in favor of all men regardless of job content. The Act would not prohibit a wage differential paid to male employees whose weight-lifting activities required by the job involve so significant a degree of extra effort as to warrant a finding that their jobs and those of female employees doing similar work do not involve equal work within the meaning of the Act. However, the fact that there is an upper liimt set by State law on the weights that may be lifted by women would not justify a wage differential to male employees who are not regularly required to lift substantially greater weights or expend the extra effort necessary to make the jobs unequal. The requirement of equal pay in such situations depends on whether the employees involved are actually performing "equal work" as defined in the Act, rather than on legal restrictions which may vary from State to State.

ENFORCEMENT

SECTION 800.164.—INVESTIGATIONS AND COMPLIANCE ASSISTANCE

The Wage and Hour Division is charged with the administration of the Fair Labor Standards Act, including the equal pay provisions. Investigations under the Act will therefore include such inquiry as may be necessary to obtain compliance with the equal pay provisions in cases where they are applicable. As provided in section 11(a) of the Act, authorized representatives of the Division may investigate and gather data regarding the wages, hours and other conditions and practices of employment. They may enter establishments and inspect the premises and records, transcribe records, and interview employees. They may investigate whatever facts, conditions, practices, or matters are considered necessary to find out whether any person has violated any provisions of the Act or which may aid in enforcement of the Act. Wage-Hour investigators will advise employers regarding any changes necessary or desirable regarding payroll, recordkeeping and other personnel practices which will aid in achieving and maintaining compliance with the law. Complaints, records, and other information obtained from employers and employees are treated confidentially.

SECTION 800.165.—RECORDKEEPING REQUIREMENTS

Records required to be kept by employers having employees subject to the equal pay provisions under section 6(d) of the Act are set forth in sections 516.2, 516.6, and 516.29 of this chapter.

SECTION 800.166.—RECOVERY OF WAGES DUE; INJUNCTIONS; PENALTIES FOR WILLFUL VIOLATIONS

(a) Pursuant to section 6(d)(3) of the Act, wages withheld in violation of the equal pay provisions have the status of unpaid minimum wages or unpaid overtime compensation under the Fair Labor Standards Act. This is true both of the additional wages required by the Act to be paid to an employee to meet the equal pay standard, and of any wages that the employer should have paid an employee whose wages he reduced in violation of the Act in an attempt to equalize his pay with that of an employee of the opposite sex performing equal work, on jobs subject to the equal pay standards.

(b) The following methods are provided under sections 16 and 17 of the Act for recovery of unpaid wages: The Administrator of the Wage and Hour Division may supervise payment of the back wages and, in certain circumstances, the Secretary of Labor may bring suit for back pay upon the written request of the employee. The employee may sue for back pay and an additional sum, up to the amount of back pay, as liquidated damages, plus attorney's fees and court costs. The employee may not bring suit if he had been paid back wages under supervision of the Administrator, or if the Secretary has filed suit to collect the wages. The Secretary may also obtain a court injunction to restrain any person from violating the law, including the unlawful withholding by an employer of proper compensation. A 2-year statute of limitations applies to the recovery of unpaid wages, except that an action on a cause of action arising out of a willful violation may be commenced within 3 years after the cause of action accrued.

[32 F.R. 2381, February 3, 1967]

(c) Willful violations of the Act may be prosecuted criminally and the violator fined up to $10,000. A second conviction for such a violation may result in imprisonment.

(d) The equal pay provisions are an integral part of section 6 of the Act, violation of any provision of which by any person, including any labor organization or agent thereof, is unlawful, as provided in section 15(a) of the Act. Accordingly, any labor organization, or agent thereof, who violates any provision of section 6(d) of the Act is subject to injunction proceedings in accordance with the applicable provisions of section 17 of the Act. Any such labor organization, or agent thereof, who willfully violates the provisions of section 15 is also liable to the penalties set forth in section 16(a) of the Act.

EXECUTIVE ORDER 11246

Under and by virtue of the authority vested in me as President of the United States by the Constitution and statutes of the Unied States, it is ordered as follows:

PART I—NONDISCRIMINATION IN GOVERNMENT EMPLOYMENT

[Secs. 101–105, barring discrimination in federal employment on account of race, color, religion, sex, or national origin, were superseded by Executive Order 11478. These provisions called for affirmative-action programs for equal opportunity at the agency level under general supervision of the Civil Service Commission; establishment of complaint procedures at each agency with appeal to the Commission; and promulgation of regulations by CSC.]

PART II—NONDISCRIMINATION IN EMPLOYMENT BY GOVERNMENT CONTRACTORS AND SUBCONTRACTORS

SUBPART A—DUTIES OF THE SECRETARY OF LABOR

SEC. 201. The Secretary of Labor shall be responsible for the administration of Parts II and III of this Order and shall adopt such rules and regulations and issue such orders as he deems necessary and appropriate to achieve the purposes thereof.

SUBPART B—CONTRACTORS' AGREEMENTS

SEC. 202. Except in contracts exempted in accordance with Section 204 of this Order, all Government contracting agencies shall include in every Government contract hereafter entered into the following provisions:

"During the performance of this contract, the contractor agrees as follows:

"(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

"(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

"(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the labor union or workers' representative of the contractor's commitments under Section 202 of Executive Order No. 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

"(4) The contractor will comply with all provisions of Executive Order No. 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

"(5) The contractor will furnish all information and reports required by Executive Order No. 11246 of September 24, 1965, and by the rules, regulations and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

"(6) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of such rules, regulations, or orders, this contract may be cancelled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order No. 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

"(7) The contractor will include the provisions of Paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive

Order No. 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions including sanctions for noncompliance: *Provided*, however, That in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States."

SEC. 203. (a) Each contractor having a contract containing the provisions prescribed in Section 202 shall file, and shall cause each of his subcontractors to file, Compliance Reports with the contracting agency or the Secretary of Labor as may be directed. Compliance Reports shall be filed within such times and shall contain such information as to the practices, policies, programs, and employment policies, programs, and employment statistics of the contractor and each subcontractor, and shall be in such form, as the Secretary of Labor may prescribe.

(b) Bidders or prospective contractors or subcontractors may be required to state whether they have participated in any previous contract subject to the provisions of this Order, or any preceding similar executive order, and in that event to submit, on behalf of themselves and their proposed subcontractors, Compliance Reports prior to or as an initial part of their bid or negotiation of a contract.

(c) Whenever the contractor or subcontractor has a collective bargaining agreement or other contract or understanding with a labor union or an agency referring workers or providing or supervising apprenticeship or training for such workers, the Compliance Report shall include such information as to such labor union's or agency's practices and policies affecting compliance as the Secretary of Labor may prescribe: *Provided*, That to the extent such information is within the exclusive possession of a labor union or an agency referring workers or providing or supervising apprenticeship or training and such labor union or agency shall refuse to furnish such information to the contractor, the contractor shall so certify to the contracting agency as part of its Compliance Report and shall set forth what efforts he has made to obtain such information.

(d) The contracting agency or the Secretary of Labor may direct that any bidder or prospective contractor or subcontractor shall submit, as part of his Compliance Report, a statement in writing, signed by an authorized officer or agent on behalf of any labor union or any agency referring workers or providing or supervising apprenticeship or other training, with which the bidder or prospective contractor deals, with supporting information, to the effect that the signer's practices and policies do not discriminate on the grounds of race, color, religion, sex, or national origin, and that the signer either will affirmatively cooperate in the implementation of the policy and provisions of this Order or that it consents and agrees that recruitment, employment, and the terms and conditions of employment under the proposed contract shall be in accordance with the purposes and provisions of the Order. In the event that the union, or the agency shall refuse to execute such a statement, the Compliance Report shall so certify and set forth what efforts have been made to secure such a statement and such additional factual material as the contracting agency or the Secretary of Labor may require.

SEC. 204. The Secretary of Labor may, when he deems that special circumstances in the national interest so require, exempt a contracting agency from the requirement of including any or all of the provisions of Section 202 of this Order in any specific contract, subcontract, or purchase order. The Secretary of Labor may, by rule or regulation, also exempt certain classes of contracts, subcontracts, or purchase orders (1) whenever work is to be or has been performed outside the United States and no recruitment of workers within the limits of the United States is involved; (2) for standard commercial supplies or raw materials; (3) involving less than specified amounts of money or specified numbers of workers; or (4) to the extent that they involve subcontracts below a specified tier. The Secretary of Labor may also provide, by rule, regulation, or order, for the exemption of facilities of a contractor which are in all respects separate and distinct from activities of the contractor related to the performance of the contract: *Provided*, That such an exemption will not interfere with or impede the effectuation of the purposes of this Order: *And provided further*, That in the absence of such an exemption all facilities shall be covered by the provisions of this Order.

SUBPART C—POWERS AND DUTIES OF THE SECRETARY OF LABOR AND THE CONTRACTING AGENCIES

SEC. 205. Each contracting agency shall be primarily responsible for obtaining compliance with the rules, regulations, and orders of the Secretary of Labor with respect to contracts entered into by such agency or its contractors. All contracting agencies shall comply with the rules of the Secretary of Labor in discharging their primary responsibility for securing compliance with the provisions of contracts and otherwise with the terms of this Order and of the rules, regulations and orders of the Secretary of Labor issued pursuant to this Order. They are directed to cooperate with the Secretary of Labor and to furnish the Secretary of Labor such information and assistance as he may require in the performance of his functions under this Order. They are further directed to appoint or designate, from among the agency's personnel compliance officers. It shall be the duty of such officers to seek compliance with the objectives of this Order by conference, conciliation, mediation, or persuasion.

SEC. 206. (a) The Secretary of Labor may investigate the employment practices of an Government contractor or subcontractor, or initiate such investigation by the appropriate contracting agency, to determine whether or not the contractual provisions specified in Section 202 of this Order have been violated. Such investigation shall be conducted in accordance with the procedures established by the Secretary of Labor and the investigating agency shall report to the Secretary of Labor any action taken or recommended.

(b) The Secretary of Labor may receive and investigate or cause to be investigated complaints by employees or prospective employees of a Government contractor or subcontractor which allege discrimination contrary to the contractual provisions specified in Section 202 of this Order. If this investigation is conducted for the Secretary of Labor by a contracting agency, that agency shall report to the Secretary what action has been taken or is recommended with regard to such complaints.

SEC. 207. The Secretary of Labor shall use his best efforts, directly and through contracting agencies, other interested Federal, State, and local agencies, contractors, and all other available instrumentalities to cause any labor union engaged in work under Government contracts or any agency referring workers or providing or supervising apprenticeship or training for or in the course of such work to cooperate in the implementation of the purposes of this Order. The Secretary of Labor shall, in appropriate cases, notify the Equal Employment Opportunity Commission, the Department of Justice, or other appropriate Federal agencies whenever it has reason to believe that the practices of any such labor organization or agency violate Title VI or Title VII of the Civil Rights Act of 1964 or other provision of Federal law.

SEC. 208. (a) The Secretary of Labor, or any agency, officer, or employee in the executive branch of the Government designated by rule, regulation, or order of the Secretary, may hold such hearings, public or private, as the Secretary may deem advisable for compliance, enforcement, or educational purposes.

(b) The Secretary of Labor may hold, or cause to be held, hearings in accordance with Subsection (a) of this Section prior to imposing, ordering, or recommending the imposition of penalties and sanctions under this Order. No order for debarment of any contractor from further Government contracts under Section 209(a)(6) shall be made without affording the contractor an opportunity for a hearing.

SUBPART D—SANCTIONS AND PENALTIES

SEC. 209. (a) In accordance with such rules, regulations, or orders as the Secretary of Labor may issue or adopt, the Secretary or the appropriate contracting agency may:

(1) Publish, or cause to be published, the names of contractors or unions which it has concluded have complied or have failed to comply with the provisions of this Order or the rules, regulations, and orders of the Secretary of Labor.

(2) Recommend to the Department of Justice that, in cases in which there is substantial or material violation or the threat of substantial or material violation of the contractual provisions set forth in Section 202 of this Order, appropriate proceedings be brought to enforce those provisions, including the enjoining, within the limitations of applicable law, of organizations, individuals, or groups who prevent directly or indirectly, or seek to prevent directly or indirectly, compliance with the provisions of this Order.

(3) Recommend to the Equal Employment Opportunity Commission or the Department of Justice that appropriate proceedings be instituted under Title VII of the Civil Rights Act of 1964.

(4) Recommend to the Department of Justice that criminal proceedings be brought for the furnishing of false information to any contracting agency or to the Secretary of Labor as the case may be.

(5) Cancel, terminate, suspend, or cause to be cancelled, terminated, or suspended, any contract, or any portion or portions thereof, for failure of the contractor or subcontractor to comply with the nondiscrimination provisions of the contract. Contracts may be cancelled, terminated, or suspended absolutely or continuance of contracts may be conditioned upon a program for future compliance approved by the contracting agency.

(6) Provide that any contracting agency shall refrain from entering into further contracts, or extensions or other modifications of existing contracts, with any noncomplying contractor, until such contractor has satisfied the Secretary of Labor that such contractor has established and will carry out personnel and employment policies in compliance with the provisions of this Order.

(b) Under rules and regulations prescribed by the Secretary of Labor, each contracting agency shall make reasonable efforts within a reasonable time limitation to secure compliance with the contract provisions of this Order by methods of conference, conciliation, mediation, and persuasion before proceedings shall be instituted under Subsection (a)(2) of this Section, or before a contract shall be cancelled or terminated in whole or in part under Subsection (a)(5) of this Section for failure of a contractor or subcontractor to comply with the contract provisions of this Order.

Sec. 210. Any contracting agency taking any action authorized by this Subpart, whether on its own motion, or as directed by the Secretary of Labor, or under the rules and regulations of the Secretary, shall promptly notify the Secretary of such action. Whenever the Secretary of Labor makes a determination under this Section, he shall promptly notify the appropriate contracting agency of the action recommended. The agency shall taken such action and shall report the results thereof to the Secretary of Labor within such time as the Secretary shall specify.

Sec. 211. If the Secretary shall so direct, contracting agencies shall not enter into contracts with any bidder or prospective contractor unless the bidder or prospective contractor has satisfactorily complied with the provisions of this Order or submits a program for compliance acceptable to the Secretary of Labor or, if the Secretary so authorizes, to the contracting agency.

Sec. 212. Whenever a contracting agency cancels or terminates a contract, or whenever a contractor has been debarred from further Government contracts, under Section 209(a)(6) because of noncompliance with the contract provisions with regard to nondiscrimination, the Secretary of Labor or the contracting agency involved, shall promptly notify the Comptroller General of the United States. Any such debarment may be rescinded by the Secretary of Labor or by the Contracting agency which imposed the sanction.

SUBPART E—CERTIFICATES OF MERIT

Sec. 213. The Secretary of Labor may provide for issuance of a United States Government Certificate of Merit to employers or labor unions, or other agencies which are or may hereafter be engaged in work under Government contracts, if the Secretary is satisfied that the personnel and employment practices of the employer, or that the personnel training, apprenticeship, membership, grievance and representation, upgrading, and other practices and policies of the labor union or other agency conform to the purposes and provisions of this Order.

Sec. 214. Any Certificate of Merit may at any time be suspended or revoked by the Secretary of Labor if the holder thereof in the judgment of the Secretary, has failed to comply with the provisions of this Order.

Sec. 215. The Secretary of Labor may provide for the exemption of any employer labor union, or other agency from any reporting requirements imposed under or pursuant to this Order if such employer, labor union, or other agency has been awarded a Certificate of Merit which has not been suspended or revoked.

PART III—NONDISCRIMINATION PROVISIONS IN FEDERALLY ASSISTED CONSTRUCTION CONTRACTS

SEC. 301. Each executive department and agency which administers a program involving Federal financial assistance shall require as a condition for the approval of any grant, contract, loan, insurance, or guarantee thereunder, which may involve a construction contract, that the applicant for Federal assistance undertake and agree to incorporate, or cause to be incorporated, into all construction contracts paid for in whole or in part with funds obtained from the Federal Government or borrowed on the credit of the Federal Government pursuant to such grant, contract, loan, insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan, insurance, or guarantee, the provisions prescribed for Government contracts by Section 203 of this Order or such modification thereof, preserving in substance the contractor's obligations thereunder, as may be approved by the Secretary of Labor, together with such additional provisions as the Secretary deems appropriate to establish and protect the interest of the United States in the enforcement of those obligations. Each such applicant shall also undertake and agree (1) to assist and cooperate actively with the administering department or agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with those contract provisions and with the rules, regulations and relevant orders of the Secretary, (2) to obtain and to furnish to the administering department or agency and to the Secretary of Labor such information as they may require for the supervision of such compliance, (3) to carry out sanctions and penalties for violation of such obligations imposed upon contractors and subcontractors by the Secretary of Labor or the administering department or agency pursuant to Part II, Subpart D, of this Order, or extension or other modification of such a contract with a contractor debarred from Government contracts under Part II, Subpart D, of this Order.

SEC. 302. (a) "Construction contract" as used in this Order means any contract for the construction, rehabilitation, alteration, conversion, extension, or repair of buildings, highways, or other improvements to real property.

(b) The provisions of Part II of this Order shall apply to such construction contracts, and for purposes of such application the administering department or agency shall be considered the contracting agency referred to therein.

(c) The term "applicant" as used in this Order means an applicant for Federal assistance or, as determined by agency regulation, other program participant, with respect to whom an application for any grant, contract, loan, insurance, or guarantee is not finally acted upon prior to the effective date of this Part, and it includes such an applicant after he becomes a recipient of such Federal assistance.

SEC. 303. (a) Each administering department and agency shall be responsible for obtaining the compliance of such applicants with their undertakings under this Order. Each administering department and agency is directed to cooperate with the Secretary of Labor, and to furnish the Secretary such information and assistance as he may require in the performance of his functions under this Order.

(b) In the event an applicant fails and refuses to comply with his undertakings: the administering department or agency may take any or all of the following actions; (1) cancel, terminate, or suspend in whole or in part the agreement, contract, or other arrangement with such applicant with respect to which the failure and refusal occurred; (2) refrain from extending any further assistance to the applicant under the program with respect to which the failure or refusal occurred until satisfactory assurance of future compliance has been received from such applicant; and (3) refer the case to the Department of Justice for appropriate legal proceedings.

(c) Any action with respect to an applicant pursuant to Subsection (b) shall be taken in conformity with Section 602 of the Civil Rights Act of 1964 (and the regulations of the administering department or agency issued thereunder), to the extent applicable. In no case shall action be taken with respect to an applicant pursuant to Clause (1) or (2) of Subsection (b) without notice and opportunity for hearing before the administering department or agency.

SEC. 304. Any executive department or agency which imposes by rule, regulation, or order requirements of non-discrimination in employment, other than requirements imposed pursuant to this Order, may delegate to the Secretary of Labor by agreement such responsibilities with respect to compliance standards, reports, and procedures as would tend to bring the administration of such requirements into conformity with the administration of requirements imposed under this Order: *Provided,* That actions to effect compliance by recipients of Federal financial assistance with requirements imposed pursuant to Title VI of the Civil Rights Act of 1964 shall be taken in conformity with the procedures and limitations prescribed in Section 602 thereof and the regulations of the administering department or agency issued thereunder.

PART IV—MISCELLANEOUS

SEC. 401. The Secretary of Labor may delegate to any officer, agency, or employee in the Executive branch of the Government, any function or duty of the Secretary under Parts II and III of this Order, except authority to promulgate rules and regulations of a general nature.

SEC. 402. The Secretary of Labor shall provide administrative support for the execution of the program known as the "Plans for Progress."

SEC. 403. (a) Executive Orders Nos. 10590 (January 18, 1955), 10722 (August 5, 1957), 10925 (March 6, 1961), 11114 (June 22, 1963), and 11162 (July 28, 1964) are hereby superseded and the President's Committee on Equal Employment Opportunity established by Executive Order No. 10925 is hereby abolished. All records and property in the custody of the Committee shall be transferred to the Civil Service Commission and the Secretary of Labor, as appropriate.

(b) Nothing in this Order shall be deemed to relieve any person of any obligation assumed or imposed under or pursuant to any executive order superseded by this Order. All rules, regulations, orders, instructions, designations, and other directives issued by the President's Committee on Equal Employment Opportunity and those issued by the heads of various departments or agencies under or pursuant to any of the executive orders superseded by this Order, shall, to the extent that they are not inconsistent with this Order, remain in full force and effect unless and until revoked or superseded by appropriate authority. References in such directives to provisions of the superseded orders shall be deemed to be references to the comparable provisions of this Order.

SEC. 404. The General Services Administration shall take appropriate action to revise the standard Government contract forms to accord with the provisions of this Order and of the rules and regulations of the Secretary of Labor.

SEC. 405. This Order shall become effective 30 days after the date of this Order.

The Department of Labor is responsible for enforcement of this Executive Order. Contract compliance responsibilities have been assigned to the Department of Health, Education, and Welfare for HEW-assisted construction contractors and for government contractors in the following industries:

Insurance.
Insurance Agents.
Medical, Legal, and Education Services.
Museums, Art Galleries.
Non-Profit Organizations.
Certain State and Local Governments.

Within the Department of Health, Education, and Welfare, the contract compliance program is administered by:

Contract Compliance Division.
Office for Civil Rights, Washington, D.C. 20201.

HIGHER EDUCATION GUIDELINES—EXECUTIVE ORDER 11246

I. LEGAL PROVISIONS

The Office for Civil Rights (OCR) in the Department of Health, Education, and Welfare (HEW) is responsible for the enforcement in institutions of higher education of Executive Order 11246, as amended by Executive Order 11375 (Tab A), which imposes equal employment opportunity requirements upon Federal contractors, and upon construction contractors on projects receiving Federal assistance from HEW.

Executive Order 11246, as amended

In signing a Government contract or subcontract in excess of $10,000 the contractor agrees that it "will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin," and that it "will take affirmative action to ensure that applicants are employed and that employees are treated during employment" without regard to these factors. In the event of the contractor's noncompliance with the nondiscrimination clauses of the contract, or with the rules and regulations of the Secretary of Labor, the contract may be cancelled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts.

Part II of the Executive Order sets forth other contractor obligations, enforcement procedures, and administrative responsibilities. Part III of the Executive Order describes the equal opportunity obligations of applicants for Federal assistance involving construction.

The equal employment opportunity obligations of Federal contractors apply to all employment by a contractor, and not solely to employment associated with the receipt or use of Federal funds. The specific obligations of nondiscrimination and affirmative action associated with the Executive Order apply and are enforceable by the Office for Civil Rights only in the case of contracts, not grants.[1]

Regulations of the Department of Labor

The requirements of the Executive Order are implemented by the regulations of the Department of Labor (41 Code of Federal Regulations Chapter 60). Part 60–1, "Obligations of Contractors and Subcontractors" (Tab B), sets forth matters of general applicability, including the scope of coverage of the Executive Order, the obligations of employers subject to that coverage, administrative requirements applicable to Federal agencies, steps in investigation and enforcement of compliance with the Order, and guidance for filing complaints of discrimination. Sanctions and OCR investigative procedures are discussed at Tab I.

Revised order No. 4 and non-public institutions

Revised Order No. 4 (Part 60–2) (Tab C), which implements and supplements Section 60–1.40 of Part 60–1, requires each private institution contractor with 50 or more employees and a contract in excess of $50,000 to develop and maintain a written affirmative action program within 120 days of receipt of such a contract. Section 60–1.40 and Revised Order No. 4 set forth the required contents of such a program, including directions for analyses of the contractor's work force and employment practices, steps to be taken to improve recruitment, hiring, and promotion of minority persons and women, and other specific procedures to assure equal employment opportunity.

Revised order No. 4 and public institutions

While all contractors, both public and private, are required to implement an affirmative action program, at present the basic requirement of Revised Order No. 4 that a contractor maintain a *written* affirmative action plan is not applicable to public institutions (those under state or local control) (see 41 CFR 60–1.5(a)(4)). Public institutions are nevertheless required to take action to ensure nondiscrimination and to comply with the Executive Order and regulations other than Order No. 4. In our judgment, a public institution can best carry out these obligations by conducting the kinds of analyses required of non-public institutions, and organizing in written form its plans to overcome problems of past discrimination.

In addition, the regulations which set forth the procedures for conducting compliance reviews of all contractors, including public institutions, require written commitments as to "the precise actions to be taken and dates for completion" to overcome any deficiencies which a compliance review identifies (41 CFR 60–1.20). These "precise actions" and "dates for completion," which must be provided in writing by a public institution following an HEW compliance review, will ordinarily be similar in content to the written affirmative action commitments required as a matter of regulation of non-public institutions (41 CFR 60–2.11).

---

[1] Where a grantee of funds for construction participates in construction under the grant, its employment is subject to the requirements of the equal opportunity clause during the term of participation. When such grantee or applicant for Federal funds is an agency or instrumentality of a state or local government, only such agency or instrumentality is subject to the clause.

On October 4, 1972, the Department of Labor will announce in the Federal Register its intention to amend the regulations to remove the present exemption of public educational institutions from the requirement of maintaining a written affirmative action plan. When effective, all educational institutions, both public and private, will have the same affirmative action obligations under the Executive Order.

Nondiscrimination and affirmative action in the executive order

Executive Order 11246 embodies two concepts: nondiscrimination and affirmative action.

Nondiscrimination requires the elimination of all existing discriminatory conditions, whether purposeful or inadvertent. A universty contractor must carefully and systematcally examine all of its employment policies to be sure that they do not, if implemented as stated, operate to the detriment of any persons on grounds of race, color, religion, sex or national origin. The contractor must also ensure that the practices of those responsible in matters of employment, including all supervisors, are nondiscriminatory.

Affirmative action requires the contractor to do more than ensure employment neutrality with regard to race, color, religion, sex, and national origin. As the phrase implies, affirmative action requires the employer to make additional efforts to recruit, employ and promote qualified members of groups formerly excluded, even if that exclusion cannot be traced to particular discriminatory actions on the part of the employer. The premise of the affirmative action concept of the Executive Order is that unless positive action is undertaken to overcome the effects of systemic institutional forms of exclusion and discrimination, a benign neutrality in employment practices will tend to perpetuate the *status quo ante* indefinitely.

Who is protected by the executive order

The *nondiscrimination* requirements of the Executive Order apply to *all* persons, whether or not the individual is a member of a conventionally defined "minority group." In other words, *no* person may be denied employment or related benefits on grounds of his or her race, color, religion, sex, or national origin.

The *affirmative action* requirements of determining underutilization, setting goals and timetables and taking related action as detailed in Revised Order No. 4 were designed to further employment opportunity for women and minorities. Minorities are defined by the Department of Labor as Negroes, Spanish-surnamed, American Indians, and Orientals.

Goals and timetables

As a part of the affirmative action obligation, Revised Order No. 4 requires a contractor to determine whether women and minorities are "underutilized" in its employee work force and, if that is the case, to develop as a part of its affirmative action program specific goals and timetables designed to overcome that underutilization. (See Tab J) Underutilization is defined in the regulations as "having fewer women or minorities in a particular job than would reasonably be expected by their availability."

Goals are projected levels of achievement resulting from an analysis by the contractor of its deficiencies, and of what it can reasonably do to remedy them, given the availability of qualified minorities and women and the expected turnover in its work force. Establishing goals should be coupled with the adoption of genuine and effective techniques and procedures to locate qualified members of groups which have previously been denied opportunities for employment or advancement and to eliminate obstacles within the structure and operation of the institution (e.g. discriminatory hiring or promotion standards) which have prevented members of certain groups from securing employment or advancement.

The achievement of goals is not the sole measurement of a contractor's compliance, but represents a primary threshold for determining a contractor's level of performance and whether an issue of compliance exists. If the contractor falls short of its goals at the end of the period it has set, that failure in itself does not require a conclusion of noncompliance. It does, however, require a determination by the contractor as to why the failure occurred. If the goals were not met because the number of employment openings was inaccurately estimated, or because of changed employment market conditions or the unavailability of women and minorities with the specific qualifications needed, but the record discloses that the contractor followed its affirmative action program, it has complied with the letter and spirit of the Executive Order. If, on the other hand, it appears that the cause for failure was an inattention to the nondiscrimination and affirmative action policies and procedures set by the contractor, then the contractor may be found out of compliance. It should be emphasized that while goals are required, quotas are neither required nor permitted by the Executive Order. When used correctly, goals are an indicator of probable compliance and achievement, not a rigid or exclusive measure of performance.

Nothing in the Executive Order requires that a university contractor eliminate or dilute standards which are necessary to the successful performance of the institution's educational and research functions. The affirmative action concept does not require that a university employ or promote any persons who are unqualified. The concept does require, however, that any standards or criteria which have had the effect of excluding women and minorities be eliminated, unless the contractor can demonstrate that such criteria are conditions of successful performance in the particular position involved.

II. PERSONNEL POLICIES AND PRACTICES

An employer must establish in reasonable detail and make available upon request the standards and procedures which govern all employment practices in the operation of each organizational unit, including any tests in use and the criteria by which qualifications for appointment, retention, or promotion are judged. It should be determined whether such standards and criteria are valid predictors of job performance, including whether they are relevant to the duties of the particular position in question. This requirement should not ignore or obviate the range of permissible discretion which has characterized employment judgments, particularly in the academic area. Where such discretion appears to have operated to deny equality of opportunity, however, it must be subjected to rigorous examination and its discriminatory effects eliminated. There are real and proper limits on the extent to which criteria for academic employment can be explicitly articulated; however, the absence of any articulation of such criteria provides opportunities for arbitrary and discriminatory employment decisions.

Recruitment

Recruitment is the process by which an institution or department within an institution develops an applicant pool from which hiring decisions are made. Recruitment may be an active process, in which the institution seeks to communicate its employment needs to candidates through advertisement, word-of-mouth notification to graduate schools or other training programs, disciplinary conventions or job registers. Recruitment may also be the passive function of including in the applicant pool those persons who on their own initiative or by unsolicited recommendation apply to the institution for a position.

In both academic and nonacademic areas, universities must recruit women and minority persons as actively as they have recruited white males. Some universities, for example, have tended to recruit heavily at institutions graduating exclusively or predominantly non-minority males, and have failed to advertise in media which would reach the minority and female communities, or have relied upon personal contacts and friendships which have had the effect of excluding from consideration women and minority group persons.

In the academic area, the informality of word-of-mouth recruiting and its reliance on factors outside the knowledge or control of the university makes this method particularly susceptible to abuse. In addition, since women and minorities are often not in word-of-mouth channels of recruitment, their candidacies may not be advanced with the same frequency or strength of endorsement as they merit, and as their white male colleagues receive.

The university contractor must examine the recruitment activities and policies of each unit responsible for recruiting. Where such an examination reveals a significantly lower representation of women or minorities in the university's applicant pool than would reasonably be expected from their availability in the work force, the contractor must modify or supplement its recruiting policies by vigorous and systematic efforts to locate and encourage the candidacy of qualified women and minorities. Where policies have the effect of excluding qualified women or minorities, and where their effects cannot be mitigated by the implementation of additional policies, such policies must be eliminated.

An expanded search network should include not only the traditional avenues through which promising candidates have been located (e.g., in the case of academic appointments, direct letters to graduate departments, or in the case of nonacademic appointments, advertising in community newspapers). In addition, to the extent that it is necessary to overcome underutilization, the university should search in areas and channels previously unexplored.

Certain organizations such as those mentioned in Revised Order No. 4 may be prepared to refer women and minority applicants. For faculty and administrative appointments, disciplinary and professional associations, including committees and caucus groups, should be contacted and their facilities for employee location and referral used.

Particularly in the case of academic personnel, potentially fruitful channels of recruitment include the following:

(*a*) Advertisements in appropriate professional journals and job registries;

(*b*) Unsolicited applications or inquiries;

(*c*) Women teaching at predominantly women's colleges, minorities teaching at predominantly minority colleges;

(*d*) Minorities or women professionally engaged in nonacademic positions, such as industry, government, law firms, hospitals;

(*e*) Professional women and minorities working at independent research institutions and libraries;

(*f*) Professional minorities and women who have received significant grants or professional recognition;

(*g*) Women and minorities already at the institution and elsewhere working in research or other capacities not on the academic ladder;

(*h*) Minority and women doctoral recipients, from the contractor's own institution and from other institutions, who are not presently using their professional training;

(*i*) Women and minorities presently candidates for graduate degrees at the institution and elsewhere who show promise of outstanding achievement (some institutions have developed programs of support for completion of doctoral programs with a related possibility of future appointment); and

(*j*) Minorities and women listed in relevant professional files, registries and data banks, including those which have made a particularly conscientious effort to locate women and minority persons.

It should be noted that a contractor is required to make explicit its commitment to equal employment opportunity in all recruiting announcements or advertisements. It may do this by indicating that it is an "equal opportunity employer." It is a violation of the Executive Order, however, for a prospective employer to state that only members of a particular minority group or sex will be considered.

Where search committees are used to locate candidates for appointment, they can best carry out the above measures when they are composed of persons willing and able to explore new avenues of recruitment. Effective search committees should, if possible, include among their members women and minority persons.

Policies which exclude recruitment at predominantly minority colleges and universities restrict the pool of qualified minority faculty from which prospective appointees may be chosen. Even if the intent of such policies may be to prevent the so-called "raiding" of minority faculty by predominantly white institutions, such policies violate the nondiscrimination provision of the Executive Order since their effect is to deny opportunity for employment on grounds relating to race. Such policies have operated to the serious disadvantage of students and teachers at minority institutions by denying them notice of research and teaching opportunities, assistantships, endowed professorships and many other programs which might enhance their potential for advancement, whether they choose to stay at a predominantly minority institution or move to a nonminority institution.

Minorities and women are frequently recruited only for positions thought to be for minorities and women, such as equal employment programs, ethnic studies, or women's studies. While these positions may have a particular suitability for minority persons and women, institutions must not restrict consideration of women and minorities to such areas, but should actively recruit them for any position for which they may be qualified.

Hiring

Once a nondiscriminatory applicant pool has been established through recruitment, the process of selection from that pool must also carefully follow procedures designed to ensure nondiscrimination. In all cases, standards and criteria for employment should be made reasonably explicit, and should be accessible to all employees and applicants. Such standards may not overtly draw a distinction based on race, sex, color, religion, or national origin, nor may they be applied inconsistently to deny equality of opportunity on these bases.

In hiring decisions, assignment to a particular title or rank may be discriminatory. For example, in many institutions women are more often assigned initially to lower academic ranks than are men. A study by one disciplinary association showed that women tend to be offered a first appointment at the rank of Instructor rather than the rank of Assistant Professor three time more often than men with identical qualifications. Where there is no valid basis for such differential treatment, such a practice is in violation of the Executive Order.

Recruiting and hiring decisions which are governed by unverified assumptions about a particular individual's willingness or ability to relocate because of his or her race or sex are in violation of the Executive Order. For example, university personnel responsible for employment decisions should not assume that a woman will be unwilling to accept an offer because of her marital status, or that a minority person will be unwilling to live in a predominantly white community.

Institutional policies regarding the employment of an institution's own graduates must not be applied in any manner which would deny opportunities to women and minorities. A university must give equal consideration to its graduate students regardless of their race or sex for future faculty positions, if the institution employs its own graduates.

In the area of academic appointments, a nondiscriminatory selection process does not mean that an institution should indulge in "reverse discrimination" or "preferential treatment" which leads to the selection of unqualified persons over qualified ones. Indeed, to take such action on grounds of race, ethnicity, sex or religion constitutes discrimination in violation of the Executive Order.

It should also be pointed out that nothing in the Executive Order requires or permits a contractor to fire, demote or displace persons on grounds of race, color, sex, religion, or national origin in order to fulfill the affirmative action concept of the Executive Order. Again, to do so would violate the Executive Order. Affirmative action goals are to be sought through recruitment and hiring for vacancies created by normal growth and attrition in existing positions.

Unfortunately, a number of university officials have chosen to explain dismissals, transfers, alterations of job descriptions, changes in promotional potential or fringe benefits, and refusals to hire *not* on the basis of merit or some objective sought by the university administration aside from the Executive Order, but on grounds that such actions and other "preferential treatment regardless of merit" are now required by Federal law. Such statements constitute either a misunderstanding of the law or a willful distortion of it. In either case, where they actually reflect decisions not to employ or promote on grounds of race, color, sex, religion or national origin, they constitute a violation of the Executive Order and other Federal laws.

Anti-nepotism policies

Policies or practices which prohibit or limit the simultaneous employment of two members of the same family and which have an adverse impact upon one sex or the other are in violation of the Executive Order. For example, because men have traditionally been favored in employment over women, anti-nepotism regulations in most cases operate to deny employment opportunity to a wife rather than to a husband.

If an institution's regulations against the simultaneous employment of husband and wife are discriminatory on their face (e.g., applicable to "faculty wives"), or if they have in practice served in most instances to deny a wife rather than a husband employment or promotion opportunity, salary increases, or other employment benefits, they should be altered or abolished in order to mitigate their discriminatory impact.

Stated or implied presumptions against the consideration of more than one member of the same family for employment by the same institution or within the same academic department also tends to limit the opportunities available to women more than to men.

If an individual has been denied *opportunity* for employment, advancement or benefits on the basis of an anti-nepotism rule or practice, that action is discriminatory and is prohibited under the Executive Order. Institutional regulations which set reasonable restrictions on an individual's capacity to function as judge or advocate in specific situations involving a member of his or her immediate family are permissible where they do not have the effect of denying equal employment opportunity to one sex over the other.[2]

---

[2] For an indication of what should constitute "reasonable restriction," see the policy statement of the American Association of University Professors on "Faculty Appointment and Family Relationship," which suggests that "faculty members should neither initiate or participate in institutional decisions involving a direct benefit (initial appointment, retention, promotion, salary, leave of absence, etc.) to members of their immediate families."

Placement, job classification, and assignment

A contractor must examine carefully its job category assignments and treatment of individuals within a single job classification. Experience shows that individuals of one sex or race frequently tend to be "clustered" in certain job classification, or in certain departments or diversions within an institution. Most often those classifications or departments in which women or minorities are found tend to be lower paid, and have less opportunity for advancement than those to which non-minority males are assigned.

Where there are no valid or substantial differences in duties or qualifications between different job classifications, and where persons in the classifications are segregated by race, color, religion, sex, or national origin, those separate classifications must be eliminated or merged. For example, where male administrative aides and female administrative assistants are performing the same duties and bear the same responsibilities, but are accorded different salaries and advancement opportunities, and where the separate classifications upon examination yield no valid distinctions, the separate classifications must be eliminated or merged.

In academic employment, minorities and women have sometimes been classified as "research associates," "lecturers" or similar categories of employment which do not carry with them the benefits and protections of regular academic appointment, and from which promotion is rare, while men with the same qualifications are appointed to regular faculty positions. Such sex- or minority-segregated classification is discriminatory and must be eliminated. In addition, appropriate remedies must be afforded those persons previously assigned to such classifications.

Training

To eliminate discrimination and assure equal opportunity in promotion, an employer should initiate necessary remedial, job training and work study programs aimed at upgrading specific skills. This is generally applicable in the case of nonacademic employees, but may also be relevant in the case of academic employees as, for example, in providing opportunities to participate in research projects, or to gain new professional skills through leave policies or special programs offered by the institution.

In institutions where in-service training programs are one of the ladders to administrative positions, minorities and women must be admitted into these programs on an equal basis with non-minority men. Furthermore, opportunities for training may not be limited to positions which are occupied by non-minorities and males.

The employment of students by an institution is subject to the same considerations of nondiscrimination and affirmative action as is all other employment in an institution.

Promotion

A contractor's policies and practices on promotion should be made reasonably explicit, and administered to ensure that women and minorities are not at a disadvantage. A contractor is also obligated to make special efforts to ensure that women and minorities in its work force are given equal opportunity for promotion. Specifically, 41 CFR 60–2.24 states that this result may be achieved through remedial, work study and job training programs; through career counseling programs; through the posting and announcement of promotion opportunities; and by the validation of all criteria for promotion.

Termination

Where action to terminate has a disproportionate effect upon women or minorities and the employer is unable to demonstrate reasons for the decision to terminate unrelated to race, religion, color, national origin or sex, such actions are discriminatory. Seniority is an acceptable standard for termination, with one exception: where an incumbent has been found to have been the victim of discrimination and as a result has less actual seniority than he or she would have had but for such discrimination, either seniority cannot be used as the primary basis for termination, or the incumbent must be presumed to have the seniority which he or she would have had in the absence of discrimination.

Conditions of work

A university employer must ensure nondiscrimination in all terms and conditions of employment, including work assignments, educational and training opportunities, research opportunities, use of facilities, and opportunities to serve on committees or decision-making bodies.

Intentional policy or practice which subjects persons of a particular sex or minority status to heavier teaching loads, less desirable class assignment, and fewer opportunities to serve on key decision-making bodies or to apply for research grants or leaves of absence for professional purposes, is in violation of the Executive Order.

Similarly, institutional facilities such as dining halls or faculty clubs have sometimes restricted their services to men only. Where such services are a part of the ordinary benefits of employment for certain classifications of employees, no members of such classifications can be denied them on the basis of race, color, national origin, sex, or religion.

Rights and benefits-salary

The Executive Order requires that universities adhere carefully to the concept of equal pay for equal work.

In many situations persons who hold the same or equivalent positions, with the same or equivalent qualifications, are not paid similar salaries, and disparities are identifiable along lines of race, color, national origin, sex, or religion.

An institution should set forth with reasonable particularity criteria for determining salary for each job classification and within each job classification. These criteria should be made available to all present and potential employees.

The question is often raised as to whether a person who applies for a position within a given job classification may be given a higher or lower rate of pay at entry based upon his or her pay in another position, or upon market factors defined outside the context of the institution's determination of rates of pay. Where reference to external market factors results in a disparate effect upon women or minority group persons, a reference to those rates of pay is prohibited. For example, if a minority or female applicant applies for a position as an Assistant Professor, and the salary range of those entering that position is from $10,000 to $12,000, the fact that the applicant's former position paid only $8,000 cannot be used to deny him or her the minimum pay for the new position, when nonminority men in a comparable situation are given an entry salary at or above the minimum stipulated area. In this example, the applicant's level of pay must be determined on the basis of capability and record of performance, not former salary.

Back pay

Back pay awards are authorized and widely used as a remedy under Title VII of the Civil Rights Act of 1964, the Equal Pay Act, and the National Labor Relations Act. Universities, like other employers, are subject to the provisions of these statutes.

This means that evidence of discrimination that would require back pay as a remedy will be referred to the appropriate Federal enforcement agency if the Office for Civil Rights is not able to negotiate a voluntary settlement with a university. At the direction of the Department of Labor, the Office for Civil Rights will continue to pursue back pay settlements only in cases involving employees who, while protected by the Executive Order, were not protected by the three statutes mentioned above at the time violation occurred.

Contractors continue to have the prospective obligation to include in an affirmative action program whatever payments are necessary to remove existing differentials in pay (based on race or sex) identified in the analyses required under the Executive Order.

Leave policies

A university contractor must not discriminate against employees in its leave policies, including paid and unpaid leave for educational or professional purposes, sick leave, annual leave, temporary disability, and leave for purposes of personal necessity.

Employment policies relating to pregnancy and childbirth

41 CFR 60-20 (Sex Discrimination Guidelines) (Tab D) provides that "women shall not be penalized in their conditions of employment because they require time away from work on account of childbearing." Pregnancy and childbearing must be considered as a justification of a leave of absence for a female employee regardless of marital status, for a reasonable length of time, and for reinstatement following childbirth without loss of seniority or accrued benefits.

A. *Eligibility.*—If an employer has a policy on eligibility for leave, a female employee may not be required to serve longer than the minimum length of service required for other types of leave in order to qualify for maternity leave. If the employer has no leave policy, childbearing must nevertheless be considered as a justification for a leave of absence for a female employee for a reasonable length of time.

B. *Mandatory period of leave.*—Any policy requiring a mandatory leave of absence violates the Executive Order unless it is based on individual medical or job characteristics. In such cases the employer must clearly demonstrate an overriding need based on medical safety or "business necessity," i.e., that the successful performance of the position or job in question requires the leave. For example, service in a radiation laboratory may constitute a demonstrable hazard to the expectant mother or her child. A mandatory period of leave should not, however, be stipulated by the university; the length of leave, whether mandatory or voluntary, should be based on a bona fide medical need related to pregnancy or childbirth.

C. *Eligibility for and conditions of return.*—Following the end of leave warranted by childbirth, a female employee must be offered reinstatement to her original position or one of like status and pay without loss of seniority or accrued benefits.

D. *Other conditions of leave.*—Department of Labor guidelines provide that the conditions related to pregnancy leave, i.e., salary, accrual of seniority and other benefits, reinstatement rights, etc., must be in accordance with the employer's general leave policy.

On April 5, 1972, the Equal Employment Opportunity Commission, under Title VII of the Civil Rights Act of 1964, issued revised guidelines on sex discrimination, 37 Fed. Reg. 6835, which differ substantially from the present Department of Labor guidelines under the Executive Order. The Labor Department has not adopted the rules of the EEOC as its own, although universities are subject to them. However, serious consideration is now being given to revising the Labor Department guidelines to equate disabilities caused by pregnancy and childbirth with all other temporary disabilities for which an employer might provide leave time, insurance pay, and other benefits.

E. *Child care leave.*—If employees are generally granted leave for personal reasons, such as for a year or more, leave for purposes relating to child care should be considered grounds for such leave, and should be available to men and women on an equal basis. A faculty member should not be required to have such leave time counted toward the completion of a term as a probationary faculty member, unless personal leave for other reasons is so considered. Nor should such leave time be subtracted from a stated term of appointment, or serve as a basis for nonrenewal of contract.

Fringe benefits

Fringe benefits are defined to include medical, hospital, accident, life insurance and retirement benefits; profit-sharing and bonus plans; leave, and other terms and conditions of employment.

The university should carefully examine its fringe benefit programs for possible discriminatory effects. For example, it is unlawful for an employer to establish a retirement or pension plan which establishes different optional or mandatory retirement ages for men and for women.

Where an employer conditions benefits available to employees and their spouses and families on whether the employee is the "head of the household" or "principal wage-earner" in the family unit, such benefits cannot be made available only to male employees and their families. The employer also must not presume that a married man is the "head of the household" or "principal wage earner"; this is a matter which must be determined by the employee and his or her family.

It is also unlawful for an employer to make benefits available to the wives and families of male employees where the same benefits are not available to the husbands and families of female employees.

With regard to retirement benefits and insurance, pensions, and other welfare programs, Department of Labor Sex Discrimination Guidelines provide that benefits must be equal for both sexes, *or* that the employer's contribution must be equal for both sexes. This means that a diffrent rate of retirement benefits for men and women does not violate the Executive Order *if* the employer's contributions for both sexes are equal. It is not a violation of the Executive Order if the employer, in seeking to equalize benefits for men and women employees, contributes more for one sex than the other.[3]

---

[3] Benefits which are different for men and women have been declared in violation of Title VII of the Civil Rights Act of 1964 in recent guidelines published by the Equal Employment Opportunity Commission. These guidelines also state that it is no defense against a charge of sex discrimination that the cost of such benefits is greater for one sex than for the other.

Child care

41 CFR 60–2.24 states that an employer should, as part of his affirmative action program, encourage child care programs appropriately designed to improve the employment opportunities of minorities and women. An increasing number of institutions have established child care programs for their male and female employees and students, and we commend such efforts to all institutions. As part of an affirmative action program, such programs may improve the employment opportunities of all employees, not only women and minorities, and contribute significantly to an institution's affirmative action profile.

Grievance procedures

As of March 1972 and pursuant to the provisions of the Equal Employment Opportunity Act of 1972, the Equal Employment Opportunity Commission has jurisdiction over individual complaints of discrimination by academic as well as non-academic employees of educational institutions.

Pursuant to formal agreement between OCR and EEOC, and to avoid duplication of effort, individual complaints of discrimination will be investigated and remedied by EEOC. Class complaints, groups of individual complaints or other information which indicates possible institutional *patterns* of discrimination (as opposed to isolated cases) will remain subject to investigation by OCR. In such cases, retrospective relief for individuals within such classes or groups will remain within the jurisdiction of EEOC.

Where an employer has established sound standards of due process for the hearing of employee grievances, and has undertaken a prompt and good faith effort to identify and provide relief for grievances, a duplicative assumption of jurisdiction by the Federal Government has not always proven necessary. We therefore urge the development of sound grievance procedures for all employees, academic and non-academic alike, in order to ensure the fair treatment of individual cases where discrimination is alleged, and to maintain the integrity of the employer's internal employment system.

Institutional grievance procedures which provide for prompt and equitable hearing of employee grievances relating to employment discrimination should be written and available to all present and prospective employees.

III. DEVELOPMENT OF AFFIRMATIVE ACTION PROGRAMS

Effective affirmative action programs shall cointain, but not necessarily be limited to, the following ingredients:

1. *Development or reaffirmation of the contractor's equal employment opportunity policy.*—Each institution should have a clear written statement over the signature of the chief administrative officer which sets forth the institution's legal obligation and policy for the guidance of all supervisory personnel, both academic and nonacademic, for all employees and for the community served by the institution. The policy statement should reflect the institution's affirmative commitment to esual employment opportunity, as well as its commitment to eliminate discrimination in employment on the basis of race, color, sex, religion and national origin.

2. *Dissemination of the policy.*—Internal communication of the institution's policy in writing to all supervisory personnel is essential to their understanding, cooperation and compliance. All persons responsible for personnel decisions must know what the law requires, what the institution's policy is, and how to interpret the policy and implement the program within the area of their responsibility. Formal and informal external dissemination of the policy is necessary to inform and secure the cooperation of organizations within the community, including civil rights groups, professional associations, women's groups, and various sources of referral within the recruitment area of the institution.

The employer should communicate to all present and prospective employees the existence of the affirmative action program, and make available such elements of the program as will enable them to know of and avail themselves of its benefits.

3. *Responsibility for implementation.*—An administrative procedure must be set up to organize and monitor the affirmative action program. 41 CFR 60–2.22 provides that an executive of the contractor should be appointed as director of EEO programs, and that he or she should be given "the necessary top management support and staffing to execute the assignment." (See the remainder of section 2.22 for details of the responsibilities of the Equal Employment Oppor-

tunity Officer.) This should be a person knowledgeable of and sensitive to the problems of women and minority groups. Depending upon the size of the institution, this may be his or her sole responsibility, and necessary authority and staff should be accorded the position to ensure the proper implementation of the program.

In several institutions the EEO officer has been assisted by one or more task forces composed in substantial part of women and minority persons. This has usually facilitated the task of the EEO officer and enhanced the prospects of success for the affirmative action program in the institution.

4. *Identification of problem areas by organizational units and job classifications.*—In this section the contractor should address itself to the issues discussed in sections I and II above. The questions involved in data gathering and analysis are treated in appendix J.

Once an inventory is completed, the data should be coded and controlled in strict confidence so that access is limited to those persons involved in administering and reviewing the Equal Employment Opportunity Program. Some state and local laws may prohibit the collection and retention of data relating to the race, sex, color, religion, or national origin of employees and applicants for employment. Under the principle of Federal supremacy, requirements for such inventories and recordkeeping under the Executive Order supersede any conflicting state or local law, and the existence of such laws is not an acceptable excuse for failure to collect or supply such information as required under the Executive Order.

5. *Internal audit and reporting systems.*—An institution must include in its administrative operation a system of audit and reporting to assist in the implementation and monitoring of the affirmative action program, and in periodic evaluations of its effectiveness. In some cases a reporting system has taken the form of a monitoring of all personnel actions, so that department heads and other supervisors must make periodic reports on affirmative action efforts to a central office. In most cases all new appointments must be accompanied by documentation of an energetic and systematic search for women and minorities.

Reporting and monitoring systems will differ from institution to institution according to the nature of the goals and programs established, but all should be sufficiently organized to provide a ready indication of whether or not the program is succeeding, and particularly whether or not good faith efforts have been made to ensure fair treatment of women and minority group persons before and during employment. Reporting systems should include a method of evaluating applicant flow; referral and hiring rate; and an application retention system to allow the development of an inventory of available skills.

At least once annually the institution must prepare a formal report to OCR on the results of its affirmative action compliance program. The evaluation necessary to prepare such a report will serve as a basis for updating the program, taking into consideration changes in the institution's work force (e.g., expansion, contraction, turnover), changes in the availability of minorities and women through improved educational opportunities, and changes in the comparative availability of women as opposed to men as a result of changing interest levels in different types of work.

6. *Publication of affirmative action programs.*—In accordance with 41 CFR 60-2.21(11), which states that the contractor should "communicate to his employees the existence of the contractor's affirmative action program and make available such elements of his program as will enable such employees to know of and avail themselves of its benefits," the Office for Civil Rights urges institutions to make public their affirmative action plans. University contractors should also be aware that affirmative action plans accepted by the Office for Civil Rights are subject to disclosure to the public under the Freedom of Information Act, 5 U.S.C. 552. Subject to certain exemptions, disclosure ordinarily will include broad utilization analyses, proposed remedial steps, goals and timetables, policies on recruitment, hiring, promotion, termination, grievance procedures and other affirmative measures to be taken. Other types of documents which must be released by the Government upon a request for disclosure include the contractor's validation studies of tests and other preemployment selection methods.

Exempt from disclosure are those portions of the plan which contain confidential information about employees, the disclosure of which may constitute an invasion of privacy, information in the nature of trade secrets, and confidential commercial or financial information within the meaning of 5 U.S.C. 552(b)(4). Compliance agencies also are not authorized to disclose the Standard Form 100 (EEO-1) or similar reporting forms or information about individuals.

7. *Developing a plan.*—The Office for Civil Rights recognizes that in an institution of higher education, and particularly in the academic staff, responsibility for matters concerning personnel decisions is diffused among many persons at a number of different levels. The success of a university's affirmative action program may be dependent in large part upon the willingness an dability of the faculty to assist in its development and implementation. Therefore, the Office for Civil Rights urges that university administrators involve members of their faculty, as well as other supervisory personnel in their work force, in the process of developing an information base, determining potential employee availability, the establishment of goals and time-tables, monitoring and evaluating the effectiveness of the plan, and in all other appropriate elements of a plan. A number of institutions have successfully established faculty or joint faculty-staff commissions or task forces to assist in the preparation and administration of its affirmative action obligations. We therefore recommend to university contractors that particular attention be given the need to bring into the deliberative and decision-making process those within the academic community who have a responsibility in personnel matters.

The Office for Civil Rights stands ready to the fullest extent possible to assist university contractors in meeting their equal employment opportunity obligations.

Office for civil rights compliance procedures

Section 206 of the Executive Order authorizes the Secretary of Labor to investigate the employment practices of any Government contractor to determine whether or not it is in compliance with the nondiscrimination and affirmative action provisions contained therein. The Secretary of Labor may also receive and investigate complaints from employees or prospective employees which allege discrimination in violation of the Executive Order. To implement these provisions, the Secretary of Labor has directed that Government agencies with compliance responsibility for specific types of Federal contractors institute programs for conducting regular compliances reviews, and institute a prompt investigation of each complaint filed with it or referred to it.

The Office of Civil Rights within the Department of Health, Education, and Welfare has been assigned responsibility by the Secretary of Labor for conducting reviews and investigations of institutions of higher education, *regardless of the agency which awards the contract* Reviews and investigations are undertaken by the ten Regional Offices for Civil Rights, which have the responsibility for determining in the first instance whether a contractor is in compliance, and of recommending possible enforcement action to the Director of the Office for Civil Rights in Washington.

Section 211 of the Executive Order provides that the Secretary of Labor may direct contracting agencies not to enter into contracts unless the prospective contractor has satisfactorily complied with the provisions of the Executive Order, or has submitted a program for compliance acceptable to the Secretary of Labor. To implement this directive, the Secretary of Labor has provided that no contract of $1 million or more shall be awarded unless a pre-award clearance has been conducted by the compliance agency at least 12 months prior to the award, and unless that review has found the prospective contractor to be in compliance or able to comply as the result of the submission of an acceptable affirmative action plan. Government contracting agencies may also be separately notified by the Secretary of Labor that a contractor or prospective contractor is unable to comply with the equal employment opportunity clause for the purpose of all future awards or extensions or renewals of existing contracts.

Types of reviews

There are a variety of circumstances which may prompt the Regional Office for Civil Rights to schedule a review or investigation of the employment practices of a college or university.

1. *Pre-award reviews.*—When any agency of the Federal Government identifies an institution of higher education as the prospective recipient of a contract of $1 million or more, the Office for Civil Rights is responsible for conducting a review of the institution's compliance status. The requirement applies in the case of a modification of an existing contract when the amount of additional funds is $1 million or more, as well as to the extension of an existing contract or award of a new contract in this amount.

2. *Reviews directed by Office of Federal Contract Compliance.*—The Director, Office of Federal Contract Compliance, Department of Labor, may direct the Office for Civil Rights to conduct a compliance review. For example, a specific

review may be requested as a part of a coordinated government-wide review of all contractors in a specific geographical area, or may be based on the receipt by the Director of information from public or private sources indicating that a specific problem of discrimination may exist within an institution's workforce.

3. *Complaint investigations.*—Until the summer of 1972, the Office for Civil Rights had been responsible for investigating complaints from professional employees against an institution received directly by the Office for Civil Rights, or referred to it by the Director, Office of Federal Contract Compliance. The U.S. Equal Employment Opportunity Commission, with its district offices throughout the nation, now has this responsibility. (See Guidelines, p. 14).

Institutions of higher education are subject to the provisions of Title VII of the Civil Rights Act of 1964, which prohibits discrimination in employment whether or not the employer receives Federal financial assistance. The Equal Employment Opportunity Commission is responsible for enforcing Title VII. The Office for Civil Rights continues to investigate complaints seeking relief for an affected class as well as general allegations of patterns of discrimination at an institution. Such class complaints or allegations may be factors in determining which institutions will be scheduled for review.

4. *Regular compliance reviews.*—Reviews are also undertaken as part of a systematic program of the Office for Civil Rights to examine the employment practices of contractors for which it is assigned responsibility. Most of these reviews are routinely scheduled, although it should be noted that they may be given a higher priority as a result of information received from either public or private sources that a specific problem of discrimination against a class or classes of persons exists within the institution.

Except for pre-award clearances, all reviews and investigations are scheduled by the Regional Offices on a quarterly basis. Since the number and location of pre-award reviews cannot be anticipated by the Office for Civil Rights sufficiently in advance to permit planned scheduling, they are scheduled as required.[4]

Access to information

In conducting a compliance review, the Office for Civil Rights must have adequate information about the contractor's employment practices. Such information includes data reflecting generally the employment status of existing employees and specific information on the contractor's recruitment and hiring patterns, and on its employment criteria, policies, and procedures.[5] It may also be necessary in particular instances to have access to specific information pertinent to employment decisions. It may also be necessary to compare the treatment of a number of individuals in order to determine factors which have affected relevant employment decisions.

Examination of individual records could conclusively demonstrate the existence of discrimination if, for example, there is overt mention in a personnel file that race, color, national origin, religion, or sex was improperly considered in an employment decision. In such a case, examination of more general statistical data might serve as a gauge of the extent of discrimination and the scope of the required remedy. A similar approach would be warranted where initial comparison of personnel files of similarly situated employees indicates significantly different treatment corresponding with the race, color, ethnicity, religion, or sex of the employees involved. Where the focal point of an investigation becomes an individual or class instance of discrimination, the examination of certain personnel records will in most cases be necessary.

It should be made clear that access by the Office of Civil Rights to personnel information is limited to its obligation to identify and eliminate discrimination prohibited by the Executive Order, and to secure required affirmative action. The Office has no intention or authority to seek information for any other purpose. With this in mind, we expect the full cooperation of institutions of higher education in providing the Office for Civil Rights information necessary to evaluate the contractor's compliance status. See 41 CFR Sections 60-1.7(a)(3) and 60-1.43, and paragraph (5) of the equal opportunity clause.

In addition, the Office for Civil Rights' investigative responsibilities require that it have access to employees of contractors, as sources of information. The Office is therefore authorized to interview any employee, without the presence of a contractor representative, in the course of investigation or compliance activities, subject, of course, to reasonable procedures on time, place, and manner. (See 41 CFR Sections 60–1.20, 60–1.24 and 60–1.32.)

---

[4] Allegations of discrimination filed by campus organizations, or by advocacy groups such as NOW, WEAL, NAACP, and The National Urban League, which do not contain the signature of any alleged victim of the discrimination or of an authorized representative of such an individual will be handled as part of a general compliance review.

[5] See Appendix J on data requirements.

The Office will request information in reasonable form, and will not demand access to information and copying of records except during normal business hours. Failure to provide information or permit access to and copying of pertinent records constitutes noncompliance with the contractor's obligations under the Executive Order, and subjects the contractor to enforcement action, including a hearing before an independent hearing examiner. During the course of an enforcement hearing the contractor has an opportunity to contest the Office for Civil Rights' determination as to the necessity and pertinence of information it seeks.

Consistent with its limited responsibilities, the Office for Civil Rights will not publicly disclose information gathered during the course of a compliance review except as indicated in the guidelines.

Conduct of compliance reviews[6]

1. *Notice to the institution*

Once an institution has been selected and scheduled for review, a letter is sent by the Regional Civil Rights Director to the head of the institution advising him of the anticipated date for commencement of the review. This notification will be sent to the institution as far in advance as possble, but ordinarily at least six weeks prior to the initiation of the compliance review.[7] The notice will request the institution to prepare and make available either prior to or at the beginning of the review certain information which is necessary to a determination of compliance. This informaton ordinarily will consist of:

1. For private institutions which are subject to Revised Order No. 4, a copy of the original affirmative action program including all of the base data, analyses, documents and supporting data which were used in preparing the program. If the program has been in effect for more than six months, the updated affirmative action program and the evaluation of the program's operation since it was originally developed should be included, as well as all actions taken to correct any problems of discrimination or underutilization.

If either the original or updated program has been in effect for less than six months, and if the institution believes that actions taken under it would affect a determination of its compliance, the university may, of course, include such information in its report.

2. For public institutions specifically exempted from Order No. 4 and for private institutions which have not previously held contracts covered by the Executive Order, the notice will request that the institution prepare the basic employment information described. If such institutions have drawn conclusions from the data as to discrimination or underutilization, the institutions are free to include the information, and we strongly encourage them to do so. Information on any programs and policies which have been developed pursuant to the contractor's affirmative action obligations should also be included.

3. If the institution, whether public or private, has been previously reviewed by the Office for Civil Rights, a full report, both narrative and statistical, indicating all actions taken to correct any problems which may have been reported to the institution as a result of the prior review should be provided.

The Regional Office may request that the above described information be submitted to it prior to commencement of the on-site review, or it may request that it be available when its review team arrives to begin the on-site review. Although it would be preferable to schedule the review sufficiently in advance to permit the institution to prepare the information and forward it to the Regional Office, this will not always be possible, particularly in the case of a mandatory pre-award review.

---

[6] This section describes procedures normally followed, in the absence of unforeseen circumstances.

[7] An exception to this minimum notice period will be in the case of a pre-award review where the anticipated date of award of the contract or modification will not permit such notice. In these circumstances, as much advance notice as possible will be given to the institution. We have found that the normal prior notice period can generally be no more than one week in these cases. However, in most circumstances, because an institution is directly involved in contract negotiations with the Government, it can anticipate the need for an Office for Civil Rights pre-award review sufficiently in advance of the receipt of notice to proceed with preparing the information necessary for the review.

2. *On-site review*

The purpose of a compliance review is to determine whether or not the institution is fulfilling its contractual obligations of nondiscrimination and affirmative action. In most instances, prior to any review, it is helpful for the Regional Office to have the benefit of the contractor's own analysis of its employment practices, its own evaluation of its utilization of minorities and females and its own plans and programs for overcoming problems which it has identified through these self-evaluation procedures. Indeed, if the contractor has fully complied with its obligations under 41 CFR 60-1, 60-2, 60-3 and 60-20, the review may consist of no more than an evaluation by the Regional Office of the adequacy of the contractor's analyses and conclusions and of the plans and programs which it has developed to overcome problems of discrimination and underutilization. The scope of the review will to a great extent depend on the quality of self-evaluation engaged in by the contractor prior to the on-site review.

On the basis of a review of the data prepared by the contractor, the Regional Office will select for review specific departments or other organizational units, specific job categories across departmental or organizational lines, and specific personnel practices or policies applicable within the institution as a whole. If the review team deems it necessary for the purpose of determining compliance, the review will involve the detailed examination of formal and informal personnel procedures and policies, as well as individual personnel records of employees, former employees and applicants for employment in the organizational units and job categories being analyzed. During the course of the review, the Regional Office team may wish to conduct interviews with employees, former employees and applicants for employment in those job categories or organizational units being examined and with personnel responsible for participating in the personnel decisions affecting the selected job categories or organizational units. Interviews may also be conducted with representatives of organizations active on the campus and community organizations which have an interest in equal employment opportunity. It should be emphasized that the organizational units, job categories and personnel procedures initially selected for examination may be expanded during the review if any information is developed which in the judgment of the Regional Office requires further evaluation and examination.

Based on the information gathered through these processes, preliminary findings will be developed by the review team and presented to the head of the institution or his designated representative at an exit conference. Suggestions will be offered as to how the institution can correct or remedy any problems of discrimination or underutilization discovered during the review. While it is expected that the review team will keep the contractor's representatives fully informed of problems as they are discovered during the review, the formal exit conference will assure that the contractor is fully apprised of the likely findings of the review.

The exit interview does not represent a formal presentation of the findings, but provides the contractor an opportunity to review and react to the probable findings, to submit any additional documentation, and to discuss any additional factors which may not have been brought to the reviewers' attention during the review.

3. *Compliance letter*

Within approximately 30 days of the on-site review and the exit conference, the head of the institution will receive a formal letter from the Regional Civil Rights Director. The letter will include an evaluation of the institution's compliance status in each organizational unit, job category or personnel policy or procedure examined during the review. The letter will include an identification and discussion of all facts considered. The letter may also indicate specifically what must be accomplished by the contractor, suggestions as to what additional actions the contractor might take, and a maximum period of time within which the remedy must be effected.

This letter may be presented either in person by a member of the Regional Office staff or mailed to the contractor. If major problems are found, the letter will be discussed in detail with the responsible administrative officers of the institution.

4. *Response by the contractor*

Within approximately 30 days of receipt of a compliance letter the contractor will be expected to respond in writing to the Regional Civil Rights Director.

This response must address itself to each citation contained in the compliance letter and indicate in detail what action has been taken or is planned by the contractor on each point, including the period within which he intends to take action. If the action differs from that set forth as acceptable in the compliance letter, a full justification for the alternative must be set forth, including evidence that the alternative will be effective. If the time limit for effective action differs from that indicated in the compliance letter, the contractor must also provide evidence to support his conclusion that the action cannot be effected within the time specified by the Regional Office.

If the contractor disagrees with a finding made by the Regional Civil Rights Director, its response must state in detail the basis for disagreement and provide evidence to refute the validity of the facts upon which the finding was based, or demonstrate that the finding itself was based on an erroneous interpretation of the facts. In any such case it is expected that the contractor will provide any additional documentation which it considers appropriate to support its position.

Exceptions to the exit conference, compliance letters and response procedures will in most cases be required in pre-award reviews which carry a requirement that notice be given to the Government contracting agency regarding the prospective contractor's compliance status within 30 days of the request for clearance. In such instances every effort will be made by the Regional Office to issue the formal letter within 3 weeks of the request, which would allow the contractor one week for response. If the contractor is unable for reasons beyond his control to respond within the one week period, an extension of the 30-day clearance period will be requested by the Office for Civil Rights from the contracting agency. However, if the contractor elects not to respond within the one week or an extension cannot be secured from the contracting agency, the Office for Civil Rights will be unable to make the positive certification required for the award.

5. *Evaluation of the response*

Within aproximately 30 days of receipt of the institution's response, the Regional Civil Rights Director will notify the head of the institution of the results of his evaluation of the response. If the response appears to the Regional Office to be satisfactory, or if the response is sufficient to alter a previous finding, the notification will indicate the Regional Office's tentative acceptance of the response and will advise the institution that it has been forwarded to the Washington Office with a recommendation for final acceptance.

If the response is not acceptable to the Regional Office, the notification will indicate the areas of unacceptability and usually will request a conference with the contractor to attempt to resolve the differences. If a resolution cannot be achieved within approximately 30 days following this notification, the matter will be forwarded to the Washington Office with appropriate recommendations for additional conciliation efforts or enforcement action. If such recommendations are made by a Regional Office, the head of the institution will be so advised in writing by the Regional Civil Rights Director. When a case is not resolved at the level of the Regional Office, the Washington Office may determine that additional conciliation efforts are necessary before taking enforcement action. In such cases, the Director of the Office for Civil Rights will inform the institution of its opportunity to meet with the Director or his representatives for further discussion of the unresolved issues.

Conduct of class complaint investigations

1. *Notice to the institution*

Within approximately 10 days of the filing of a class complaint, a notice will be sent by the Regional Civil Rights Director to the head of the institution advising him of the receipt of a complaint. This notice will include the date, place and circumstances of the alleged unlawful employment practice. Notification of a schedule review will be sent to the institution as far in advance as possible but at least two weeks prior to the initiation of the investigation.

2. *On-site investigation*

At the opening of an investigation a copy of the complaint will be provided to the institution, and the institution will be advised of the procedures to be followed by the reviewer conducting the investigation. The institution will also be advised at this time of the particular personnel processes and the organizational units or job categories which will be reviewed as a part of the investigation. The investigation may involve, according to the discretion of the compliance review team, an examination of relevant data and information concerning present employees, former employees or applicants for employment in the organization units and job categories associated with the complaint. It may also include an analysis of formal and informal personnel procedures and policies associated with the particular practice being examined; interviews with employees, former employees or applicants for employment.

Based on the information gathered during the investigation, preliminary findings will be developed by the investigative team and presented to the head of the institution or his designated representative at an exit conference. As in the case of regular reviews, the exit interview does not represent a formal presentation of the findings but provides the contractor an opportunity to submit any additional documentation and discuss any additional factors which may not have been brought to the reviewers' attention during the review and which it wishes the reviewers to consider in preparing their formal findings. If the preliminary finding is that the allegations are valid, the investigative team will advise the institution as to the specific corrective action which may be required by the contractor to remedy the discriminatory treatment, and of the date by which such actions should be taken. It should be noted that while a formal finding is not made at the exit conference, this should not preclude the contractor's acting to remedy a matter brought to his attention during the exit conference, prior to receipt of formal findings.

It should be emphasized that the law protects individuals who have complained of discrimination from harassment by the employer because of that complaint. Instances of harassment or reprisals brought to the attention of the Office for Civil Rights may be considered a basis for enforcement action. The same criteria apply to relatives of complainants and to those who aid in a Government inquiry.

Steps following non-compliance determinations

Show cause notices

When the Director of the Office for Civil Rights has reasonable cause to believe that a contractor has violated the equal opportunity clause, he may issue a notice requiring the contractor to show cause, within 30 days, why monitoring, enforcement procedures or other appropriate action to ensure compliance should not be instituted. (See 41 CFR 60–1.28) A show cause notice will in all cases be issued to the contractor when it is found that a contractor does not have an affirmative action program or that the program is not acceptable under the standards contained in 41 CFR 60–2.10 through 60–2.32. The Department of action program (37 FR 17766). In other enforcement circumstances, a show cause notice be issued when there is a substantial deviation from an affirmative action program (37 FR 17766). In other enforcement circumstances, a show cause notice is not required and its use is at the sole discretion of the Director, Office of Federal Contract Compliance, Department of Labor.

Show cause notices may also be issued by the Regional Civil Rights Director as a part of letters of findings following either a compliance review or a complaint investigation if it is found that an institution which is required to have developed an affirmative action program has not done so, or that the affirmative action program which has been developed by the institution does not conform to the guidelines contained in 41 CFR 60–2.10 through 60–2.32.

Sanctions and penalties

The Executive Order authorizes the imposition of the following sanctions and penalties against contractors who have failed to comply with the provisions of the Executive Order and the implementing regulations:

1. Publication of the name of the non-complying contractor.
2. Cancellation, termination, and suspension of contracts or portions of contracts.
3. Debarment from future contracts or extensions or modifications of existing contracts.

In addition, the Director, Office of Federal Contract Compliance, may in some cases recommend to the Department of Justice or the Equal Employment Opportunity Commission the initiation of appropriate judicial proceedings, including criminal proceedings by the Department of Justice for providing false nformaton.

Prior to the imposition of any sanctions and penalties, reasonable efforts within a reasonable time must be made to secure compliance through conference, conciliation, mediation and persuasion, and the contractor must be afforded an opportunity for a hearing.—We have briefly described the processes of conference, conciliation, mediation and persuasion above in outlining the compliance review and complaint investigation procedures. When these efforts fail to produce corrective action adequate to overcome any instance of noncompliance, appropriate administrative proceedings leading to the imposition of sanctions and penalties will be initiated. The first step in this process will be a letter giving contractors 10 days in which to comply or request a hearing before an impartial hearing officer. The procedures for imposition of the sanctions and penalties are detailed in 41 CFR 60-1.26, 60-1.27, 60-1.30 and 60-1.31.

A hearing adjudicates whether the contractor is out of compliance with the requirements of the Executive Order and its regulations. Except to the extent that applicable law provides otherwise, the burden of proving noncompliance is on the Government. Hearings are conducted in accordance with the Department's rules for such proceedings, published at 45 CFR Part 82 and 37 Fed. Reg. 7323. These rules also prescribe the procedures for intervention of interested parties in these proceedings (section 82.6), and for review within the Department of the decision of the hearing officer (section 82.37).

The Office for Civil Rights is responsible for advising HEW contracting agencies as to whether contractors for which they are responsible can comply with the requirements of the equal employment opportunity clause contained in each Federal contract over $10,000. Such advice is binding upon the contracting officers in their determinations of the responsibility of prospective contractors. OFCC is responsible for advising other agencies on the contractor's compliance status. Such advice is ordinarily based upon the information and findings of the OCR review.

If the Office for Civil Rights has determined, pursuant to the review and enforcement procedures outlined in this and the preceding section, that a contractor is unable to comply with its equal employment opportunity obligations, the Director may so advise all contracting agencies.[8] This notification may or may not occur in the context of a response to a request for clearance of a new award or of the modification or extension of an existing contract.[9]

Notification of "inability to comply" to contracting agencies by the Director of the Office for Civil Rights has the effect of denying or deferring the extension of an existing contract or the award of a new contract which may arise. In such cases, the contractor is entitled to have an immediate hearing on its compliance status concurrent with the second denial or deferral of a contract award.

Procedures for a formal hearing, including those for cancellation or termination of existing contracts and debarment from further contracts, are set forth in detail in 41 CFR 60-1.26(b) (Tab B), and in Chapter 27-10 of the Department of Health, Education, and Welfare General Administration Manual (34 FR 1276).

Data gathering and analysis—Suggested procedures

A necessary prerequisite to the development of a meaningful affirmative action program is the identification and analysis of problem areas inherent in minority and female employment, and an evaluation of the opportunities for utilization of minorities and women in the contractor's workforce. (See Guidelines p. 2 for an explanation of the obligations of public contractors.)

The first step in the contractor's analysis of its workforce is to determine where policies and practices have had the effect of denying equal employment opportunity and benefits to certain groups of persons on a discriminatory basis. This will necessitate the development of a comprehensive inventory of all employees.

An employer must then organize this inventory so as to determine:

1. Any patterns of job classification and assignment identifiable by sex or minority group;

2. Any job classification or organizational unit where women and minorities are not employed or are underutilized (see Guidelines p. 3 for a definition of underutilization); and

---

[8] 41 CFR 60-2.2 provides in part that "[Any contractor required . . . to develop an affirmative action program . . . who has not complied fully . . . is not in compliance with Executive Order 11246 . . ." and "is unable to comply with the equal employment opportunity clause" unless the government can "otherwise affirmatively determine that the contractor is able to comply with his equal employment obligations or, unless, upon review, it is determined by the Director [Office of Federal Contract Compliance] that substantial issues of law or fact exist as to the contractor's responsibility to the extent that a hearing is, in his sole judgment, required prior to a determination. . . ."

[9] 41 CFR 60-1.20(d) provides that contracts of $1 million or more, including modifications or extensions of existing contracts which involve the allocation of additional funds in the amount of $1 million or more, can not be awarded without a finding that the prospective contractor is complying with the provisions of the Executive Order and the implementing regulations.

3. Any patterns of difference in rate of pay, status, type of appointment, termination, or rates of advancement within job classifications or organizational units which are identifiable by sex or minority group.

The results of a contractor's analysis should be shared and discussed with personnel relations staff, with department and divisional heads and with other supervisors responsible for academic and nonacademic personnel to determine whether patterns suggesting deficiencies in equal employment exist and, if so, why. At this stage of evaluation, some institutions have set up task forces to assist in identifying discriminatory patterns and practices. This has proven particularly useful in the area of academic employment, where the faculty has traditionally had a principal responsibility for matter relating to faculty status.

A. *Basic data file*

The contractor must first establish a basic data file on its employees. This is the primary source material of the institution and need not be submitted to the Office for Civil Rights, although the contractor may be required at some time to supply OCR with this information in order to determine the accuracy in the compilation of the data.

The basic file should contain the following for each employee:

(1) Name and/or identification number (See discussion below);
(2) Sex;
(3) Ethnic identification (Negro, Spanish-surnamed, American Indian, Oriental. All others, including Caucasians, should be identified as "other");
(4) Year or date of birth, or age;
(5) Current salary (full-time annual equivalent);
(6) Current job family or generic job family;
(7) Current job title;
(8) Personnel action resulting in current job title (new hire, promotion, transfer, demotion);
(9) Date of personnel action resulting in current title (years in current job);
(10) Previous job title;
(11) Employment status (full-time, part-time, tenured, non-tenured, etc.);
(12) Educational level;
(13) Organizational unit where employed; and
(14) Date of hire.

The contractor may wish to compile this basic data in the form of a master list, or computer printout, arranged by department, within department by job classification, and within job classification by length of service and salary. The Office for Civil Rights will not normally require that these printouts be submitted, if the summaries described below are compiled in such a way as to be sufficient to determine compliance.

In collecting data on employees, it is not necessary to identify the employees by name. Where there is an objection raised by an individual to providing data on his or her race or sex, it should be made clear that individuals are not themselves legally bound to report such information. Where an inventory by voluntary submission of such data on the part of employees is not obtained, however, employers must rely on their superivsors to make identification on the basis of their "best knowledge" of employees. It is clear that no inventory method, and particularly the latter one, will provide perfect accuracy. Nevertheless, the institution must devise some method which will produce reasonably accurate data upon which to base its identification of problems or deficiencies and to develop a responsive affirmative action program.

B. *Organization*

The basic data on all employees must be summarized for ready analysis in the following manner:

1. by department, a list of each job classification in descending order (e.g. professor, associate professor; secretary 1, secretary 2, etc.) showing the numbers by sex for each racial and ethnic group, as well as cumulative figures for minorities and for females generally.

2. by job classification, within the entire institution, showing the numbers by sex for each ethnic group, as well as cumulative figures for minorities and for females generally. In order to satisfy this requirement an institution must establish an organization chart, broken down by career ladders; it must also classify all job titles and organize them into career ladders. The duties, educational requirements, experiential requirements and pay ranges for each position must be made reasonably explicit.

3. by department, the mean salary in each job classification, by sex for each racial and ethnic group.

4. by job classification, across department lines, the mean salary in each classification, by sex for each racial and ethnic group.

C. *Required Analysis*

1. *Availability of women and minorities.*—A unique aspect of equal employment opportunity under the Executive Order is the required compilation of availability data on women and minorities for use as a measure of the contractor's equal employment opportunity. By comparing availability data with current employees, the contractor has an indication of how representative its workforce is of the persons qualified for employment in its institution.

The Department of Labor's Revised Order No. 4 (41 CRF 60–2.11(a) (1 and 2)) contains explicit guidelines for constructing an availability index for minorities and an availability index for women. These indices are particularly applicable in the case of nonacademic personnel.

The demographic data needed to develop these estimates can generally by secured through the Census Bureau, the Department of Labor's Bureau of Labor Statistics and its Women's Bureau, and from city, county and state governments, including planning commissions and public employment agencies. Estimates concerning minority population, workforce and requisite skills may often be obtained from local Chambers of Commerce, union organizations, employer associations, local educational institutions, community organizations, and minority and women's advocacy groups such as the Urban League and NOW. The community organizations serving minorities and women will often be the closest to the situation and thus should be contacted by the contractor in preparing estimates of availability.

For academic personnel the development of availability figures is slightly different, because the recruiting area will vary from institution to institution. It may be a national or even international one. Because the skills required for a particular position are often quite specialized, accurate information on availability may be more difficult to obtain.

OCR recommends the following procedure for determining availability figures for women and minorities for academic positions:

Many disciplinary associations and professional groups have data that show percentages of racial and national origin minorities available in certain fields, and a 1968 study by the Ford Foundation (Office of Reports) provides percentages of Negroes holding doctorates. To determine the number of women available for senior level positions, the Office recommends that the contractor use data available from the National Register of Scientific and Technical Personnel prepared by the National Science Foundation, and the U.S. Office of Education's annual reports on earned degrees. Another source is the National Research Council of the National Academy of Science. This data has been compiled by sex, but is now being compiled by race, as well. The NSF data is broken down by sex, specialty and subspecialty, highest degree, years of professional experience, and primary work activity. The OE data is broken down by sex, degree earned, school granting degree, and specialty. For women in junior positions, the Office recommends that the contractor consider the OE annual report of earned degrees for the last 5 years and current graduate school enrollments.

To the extent that an institution makes a practice of employing its own graduates, the number and percentage of graduate degrees which it has itself awarded to women and minorities in the past ten years or so should be reflected in the goals which it sets for its future faculty appointments.

For academic employees the basic national data on earned doctoral degrees will provide the basis for a utilization analysis of a contractor's workforce, unless the contractor can otherwise demonstrate that the labor market upon which it draws is significantly different from this base. For example, some institutions appoint a large number of new faculty from a particular group of graduate schools: such institutions may use data obtained from these schools to determine the availability of women and minorities. If the annual output of women and minorities from the primary feeder schools exceeds the national average, the contractor will be expected to use the higher figures to determine availability. If the output from the feeder schools is less than the national average, the institution will be expected to justify its use of such recruitment sources, or use the higher figures to determine eligibility.

2. *Com arison of current workforce with availability data.*—The next step for the contractor is to compare the number of women and minorities in its current

workforce with their availability in the market from which it can reasonably recruit. This comparison must be by comparable job categories. Wherever the comparison reveals that a hiring unit of the university (a department or other section) is not employing minorities and women to the extent that they are available and qualified for work, it is then required to set goals to overcome this situation.

Goals should be set so as to overcome deficiencies in the utilization of minorities and women within a reasonable time. In many cases this can be accomplished within 5 years; in others more time or less time will be required.

Goals may be set in numbers or percentages, and should reflect not only the number of new hires but also the projected overall composition of the work force in the given unit.

It is necessary to set goals that will overcome underutilization in the institution's work force within a reasonable period of time, not merely to set goals for new hires based on current availability.

In many institutions the appropriate unit for goals is the school or division, rather than the department. While estimates of availability in academic employment can best be determined on a disciplinary basis, anticipated turnover and vacancies can usually be calculated on a wider basis. While a school, division or college may be the organizational unit which assumes responsibility for setting and achieving goals, departments which have traditionally excluded women or minorities from their ranks are expected to make particular efforts to recruit, hire and promote women and minorities. In other words, the Office for Civil Rights will be concerned not only with whether a school meets its overall goals, but also whether apparent general success has been achieved only by strenuous efforts on the part of a few departments.

3. *Salary analysis.*—A salary analysis is required for all employees. The basic question to be answered by such an analysis is whether there is a difference in the salary of employees with the same job title that can be attributed to their sex or minority status. However, before this analysis is done, job titles must be compared and overlapping ones merged so that persons doing the same work with different job titles benefit from the salary analysis.

The most effective means of undertaking a meaningful salary analysis may vary from institution to institution. Factors which are taken into consideration in determining salary may vary among and even within institutions. The purpose and function of every salary analysis should be to determine whether women or minority group persons are being paid lower wages for performing the same or essentially the same duties.

D. *Additional types of analyses which are useful in determining compliance*

1. *Locations analysis.*—In an attempt to prevent the development of segregated job titles in any physical location, a locations report is suggested. This report should examine the race-sex-national origin composition of each job title in each major organizational unit of the institution, e.g., athletic department, health services, hospitals, central administration, deans' offices, building and grounds, etc.

This analysis may not be revealing where the units involved are small or where the numbers of minorities or women in the job title are few. But where a university discovers that it has one minority or sex group clustered in any one unit, even though there are members of the opposite sex or of other minorities in the same job title clustered elsewhere, corrective action must be taken. If a university discovers the reason for this concentration, it can prevent it from recurring or continuing by altering its policies.

This type of analysis may also be useful in determining at what point in the organizational structure women or minorities cease to move upward, and what obstacles to upward mobility may exist within the contractor's organizational structure.

2. *Promotion analysis.*—A university may also compile data to determine the success or failure of women and minorities in attaining promotion or tenure. One possible method is to compare the time spent prior to gaining promotion or tenure by males and by females of similar experience or by minorities and by others of similar experience. Another comparison could show the percentage in each group eligible for and those granted promotion or tenure. Wide variance among sex-ethnic-racial groups would necessitate further analysis.

E. *Testing and test validation*

41 CFR 60-3 ("Employee Testing and Other Selection Procedures") requires all contractors to validate tests used as a basis for employment decisions, in

order to make certain they are not discriminatory, and provides that contractors may be required to validate other employee selection techniques.

The term "test" is defined as any paper-and-pencil or performance measure used as a basis for any employment decision and all other formal, scored, quantified or standardized techniques of assessing job suitability.

The latter techniques include personal history and background requirements which are specifically used as a basis for qualifying or disqualifying applicants or employees, specific educational or work history requirements, scored interviews, biographical information blanks, interviewer's rating scales, and scored application forms.

If a test or selection technique is determined to have a disproportionate impact on minority persons or women, such test or selection technique must be validated pursuant to the regulations cited above.

A testing report should contain the following data: name of test, publisher, and publication date of the test, the groups on whom it was validated and when and where, the groups to whom it is administered by the contractor and in what employment decisions it is used, the average score, the standard deviation for each race-sex group taking the test and the number of people in each race-sex group taking the test. Data should be kept indicating the scores, standard deviation, and number of people in each race-sex group who took the test and subsequently received a favorable personnel action (hired, promoted, placed in new job) in part because of their test scores. Based on the analysis of this data, the contractor must determine where tests must be eliminated or modified.

CODE OF FEDERAL REGULATIONS—TITLE 41

CHAPTER 60—OFFICE OF FEDERAL CONTRACT COMPLIANCE, EQUAL EMPLOYMENT OPPORTUNITY, DEPARTMENT OF LABOR

(NOTE. The President, by Executive Order 11246 (30 F.R. 2319), abolished the President's Committee on Equal Employment Opportunity and delegated the functions of the abolished Committee to the Secretary of Labor. By Order of the Secretary of Labor, 30 F.R. 13441, Oct. 22, 1965, all rules, regulations, orders, instructions, and other directives, issued by the abolished Committee, not inconsistent with E.O. 11246 remain in effect for the present as those of the Secretary of Labor. All references in this chapter to "Committee", "Chairman", "Vice-Chairman", and "Executive Vice-Chairman" shall mean the Director of the Office of Federal Contract Compliance of the United States Department of Labor, and all references to "a panel of the Committee" shall mean an appropriate panel of three appointed by the Director.)

Part

60-1 Obligations of contractors and subcontractors.
60-2 Affirmative action programs.
60-3 Employee testing and other selection procedures.

(AUTHORITY. The provisions of this Part 60-1 issued pursuant to sec. 201, E.O. 11246 (30 F.R. 12319)).

(SOURCE. The provisions of this Part 60-1 appear at 33 F.R. 7804, May 28, 1968, unless otherwise noted.)

SUBPART A—PRELIMINARY MATTERS; EQUAL OPPORTUNITY CLAUSE; COMPLIANCE REPORTS

§ 60-1.1 Purpose and application.

The purpose of the regulations in this part is to achieve the aims of Parts II, III, and IV of Executive Order 11246 for the promotion and insuring of equal opportunity for all persons, without regard to race, color, religion, sex, or national origin, employed or seeking employment with Government contractors or with contractors performing under federally assisted construction contracts. The regulations in this part apply to all contracting agencies of the Government and to contractors and subcontractors who perform under Government contracts, to the extent set forth in this part. The regulations in this part also apply to all agencies of the Government administering programs involving Federal financial assistance which may include a construction contract, and to all contractors and subcontractors performing under construction contracts which are related to any such programs. The procedures set forth in the regulations in this part govern all disputes relative to a contractor's compliance with his obligations under the equal opportunity clause regardless of whether or not his contract contains a "Disputes" clause. Failure of a contractor or applicant to comply with any provision of the regulations in this part shall be grounds for the imposition of any or all of the sanctions authorized by the order. The regulations in this part do not apply to any action taken to effect compliance with respect to employment practices subject to Title VI of the Civil Rights Act of 1964. The rights and remedies of the Government hereunder are not exclusive and do not affect rights and remedies provided elsewhere by law, regulation, or contract; neither do the regulations limit the exercise by the Secretary or Government agencies of powers not herein specifically set forth, but granted to them by the order.

[33 F.R. 7804, May 28, 1968, as amended at 34 F.R. 744, Jan. 17, 1969]

§ 60–1.2 Administrative responsibility.

Under the general direction of the Secretary, the Director has been delegated authority and assigned responsibility for carrying out the responsibilities assigned to the Secretary under the order, except the power to issue rules and regulations of a general nature. All correspondence regarding the order should be directed to the Director, Office of Federal Contract Compliance, U.S. Department of Labor, 14th and Constitution Avenue NW., Washington, D.C. 20210.

§ 60–1.3 Definitions.

(a) The term "administering agency" means any department, agency and establishment in the Executive Branch of the Government, including any wholly owned Government corporation, which administers a program involving federally assisted construction contracts.

(b) The term "agency" means any contracting or any administering agency of the Government.

(c) The term "applicant" means an applicant for Federal assistance involving a construction contract, or other participant in a program involving a construction contract as determined by regulation of an administering agency. The term also includes such persons after they become recipients of such Federal assistance.

(d) The term "Compliance Agency" means the agency designated by the Director on a geographical industry or other basis to conduct compliance reviews and to undertake such other responsibilities in connection with the administration of the order as the Director may determine to be appropriate. In the absence of such a designation, the Compliance Agency will be determined as follows:

(1) In the case of a prime contractor not involved in construction work, the Compliance Agency will be the agency whose contracts with the prime contractor have the largest aggregate dollar value;

(2) In the case of a subcontractor not involved in construction work, the Compliance Agency will be the Compliance Agency of the prime contractor with which the subcontractor has the largest aggregate value of subcontracts or purchase orders for the performance of work under contracts;

(3) In the case of a prime contractor or subcontractor involved in construction work, the Compliance Agency for each construction project will be the agency providing the largest dollar value for the construction project; and

(4) In the case of a contractor who is both a prime contractor and subcontractor, the Compliance Agency will be determined as if such contractor is a prime contractor only.

(e) The term "construction work" means the construction, rehabilitation, alteration, conversion, extension, demolition or repair of buildings, highways, or other changes or improvements to real property, including facilities providing utility services. The term also includes the supervision, inspection, and other onsite functions incidental to the actual construction.

(f) The term "contract" means any Government contract or any federally assisted construction contract.

(g) The term "contractinng agency" means any depart. agency, establishment, or instrumentality of the Executive Branch of the Government, including any wholly owned Government corporation, which enters into contracts.

(h) The term "contractor" means, unless otherwise indicated, a prime contractor or subcontractor.

(i) The term "Director" means the Director, Office of Federal Contract Compliance, U.S. Department of Labor or any person to whom he delegates authority under the regulations in this part.

(j) The term "equal opportunity clause" means the contract provisions set forth in § 60–1.4 (a) or (b), as appropriate.

(k) The term "federally assisted construction contract" means any agreement or modification thereof between any applicant and a person for construction work which is paid for in whole or in part with funds obtained from the Government or borrowed on the credit of the Government pursuant to any Federal program involving a grant, contract, loan, insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan, insurance, or guarantee, or any application or modification thereof approved by the Government for a grant, contract, loan, insurance, or guarantee under which the applicant itself participates in the construction work.

(l) The term "Government" means the Government of the United States of America.

(m) The term "Government contract" means any agreement or modification thereof between any contracting agency and any person for the furnishing of supplies or services or for the use of real or personal property, including lease arrangements. The term "services", as used in this section includes, but is not limited to the following services: Utility, construction, transportation, research, insurance, and fund depositary. The term "Government contract" does not include (1) agreements in which the parties stand in the relationship of employer and employee, and (2) federally assisted construction contracts.

(n) The term "hearing officer" means the individual or board of individuals designated to conduct hearings.

(o) The term "modification" means any alteration in the terms and conditions of a contract, including supplemental agreements, amendments, and extensions.

(p) The term "Order" means Parts II, III, and IV of the Executive Order 1246 dated September 24, 1965 (30 F.R. 12319), any executive order amending such order, and any other Executive order superseding such order.

(q) The term "person" means any natural person, corporation, partnership, unincorporated association, State or local government, and any agency, instrumentality, or subdivision of such a government.

(r) The term "prime contractor" means any person holding a contract and, for the purposes of Subpart B of this part, any person who has held a contract subject to the order.

(s) The term "recruiting and training agency" means any person who refers workers to any contractor or subcontractor, or who provides or supervises apprenticeship or training for employment by any contractor or subcontractor.

(t) The term "rules, regulations, and relevant orders of the Secretary of Labor" used in paragraph (4) of the equal opportunity clause means rules, regulations, and relevant orders of the Secretary of Labor or his designee issued pursuant to the order.

(u) The term "Secretary" means the Secretary of Labor, U.S. Department of Labor.

(v) The term "site of construction" means the general physical location of any building, highway, or other change or improvement to real property which is undergoing construction, rehabilitation, alteration, conversion, extension, demolition, or repair and any temporary location or facility at which a contractor, subcontractor, or other participating party meets a demand or performs a function relating to the contract or subcontract.

(w) The term "subcontract" means any agreement or arrangement between a contractor and any person (in which the parties do not stand in the relationship of an employer and an employee):

(1) For the furnishing of supplies or services or for the use of real or personal property, including lease arrangements, which, in whole or in part, is necessary to the performance of any one or more contractors; or

(2) Under which any portion of the contractor's obligation under any one or more contractors is performed, undertaken, or assumed.

(x) The term "subcontractor" means any person holding a subcontract and, for the purposes ofS ubpart B of this part, any person who has held a subcontract subject to the order. The term "First-tier subcontractor" refers to a subcontractor holding a subcontract with a prime contractor.

(y) The term "United States" as used herein shall include the several States, thte District of Columbia, the Commonwealth of Puerto Rico, the Panama Canal Zone, and the possessions of the United States.

(z) The term "minority group" as used herein shall include, where appropriate, female employees and prospective female employees.

[33 F.R. 7804, May 28, 1968, as amended at 34 F.R. 745, Jan. 17, 1969]

§ 60–1.4 Equal opportunity clause.

(a) *Government contracts.*—Except as otherwise provided, each contracting agency shall include the following equal opportunity clause contained in section 202 of the order in each of its Government contracts (and modifications thereof if not included in the original contract):

During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be

limited to the following: Employment, upgrading, demotion, or transfer, recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided by the agency contracting officer, advising the labor union or workers' representative of the contractor's commitments under section 202 of Executive Order 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of such rules, regulations, or orders, this contract may be canceled, terminated or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The contractor will include the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions including sanctions for noncompliance: *Provided, however,* That in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

(b) *Federally assisted construction contracts.*—(1) Except as otherwise provided, each administering agency shall require the inclusion of the following language as a condition of any grant, contract, loan, insurance, or guarantee involving federally assisted construction which is not exempt from the requirements of the equal opportunity clause:

The applicant hereby agrees that it will incorporate or cause to be incorporated into any contract for construction work, or modification thereof, as defined in the regulations of the Secretary of Labor at 41 CFR Chapter 60, which is paid for in whole or in part with funds obtained from the Federal Government or borrowed on the credit of the Federal Government pursuant to a grant, contract, loan, insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan, insurance, or guarantee, the following equal opportunity clause:

During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of

compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The contractor will include the portion of the sentence immediately preceeding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: *Provided, however*, That in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the contractor may request the United States to enter into such litigation to protect the interests of the United States.

The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted construction work: *Provided*, That if the applicant so participating is a State or local government, the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance.

The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to the Executive order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings.

(2) State and local governments intending to impose affirmative action hiring and/or training requirements on federally assisted construction already subject to federal minority hiring and/or training plans established pursuant to the Order shall submit such requirements to the Director prior to their inclusion in any federally assisted construction contracts. Such State or local government requirements will be deemed applicable to federally assisted construction contracts unless the Director, or in the case of an appeal of the Director's determination, the Assistant Secretary for Employment Standards, determines that such requirements are inconsistent with the Order or incompatible with the effective implementation of the federal minority hiring and/or training plan (either voluntary or imposed) in the area. The State or local government affirmative action hiring and/or training requirements shall not be included in federally assisted construction contracts until the Director, or, in the case of an appeal, the Assistant Secretary, has had an opportunity to make a determination in accordance with this paragraph. The Director shall make his determination within 60 days of his receipt of the State or local government's submission, which should include the pertinent affirmative action hiring and/or training requirements and supporting data. The Director may also request the State or local government to supply information and data necessary for his determination. The Director's determination shall be communicated directly to the State or local governmental body by registered mail, return receipt requested, together, in the case of an adverse determination, with a notification of its right to appeal to the Assistant Secretary. The Director's determination shall also be announced in a Federal Register notice, which shall also indicate that the State or local government, and any other persons or groups affected by the Director's determination, including construction trades contractors, labor organizations, associations or other organizations of construction trades contractors and/or labor organizations, and minority community groups, may appeal such determination to the Assistant Secretary by requesting a hearing within 21 days of the publication of the Federal Register notice.

Following this appeal period, if any requests for a hearing have been filed with the Assistant Secretary, the Department of Labor shall then designate an administrative law judge who shall conduct a hearing to make proposed findings and a recommended decision to the Assistant Secretary upon the basis of the record before him. The administrative law judge shall give reasonable notice of the opportunity to participate in such hearing by registered mail, return receipt requested, to those requesting the hearing and shall also give reasonable notice of such hearing in the FEDERAL REGISTER to inform all other persons, organizations and other entities affected by the Director's determination of their opportunity to participate in the hearing. Each participant shall have the right to counsel and a fair opportunity to present his case, including such cross-examination as the administrative law judge may deem appropriate in the circumstances. Within 80 days of the close of the appeal period for requesting a hearing, the Assistant Secreteary shall make a final decision on the basis of the record before him, which shall consist of the record for recommended decision, the rulings and recommended decision of the administrative law judge, and the exceptions and briefs filed subsequent to the administrative law judge's decision.

In determining whether State or local government affirmative action hiring and/or training requirements are inconsistent with the Order or incompatible with the effective implementation of the applicable federal minority hiring and/or training plan in the area, at least the following factors shall be considered under this subparagraph: (i) The impact of the State or local government requirements on the successful implementation of the federal plan in the area; (ii) the minority population in the area to be covered by the State or local government plan; (iii) the minority manpower utilization in the area construction industry, on a trade-by-trade basis; (iv) the availability of minorities for employment in the area construction industry; (v) the need and availability of training programs in the area construction industry; (vi) the projected growth and attrition factors of the area construction industry in the near future; (vii) available procedures to ensure that contractors, subcontractors and others are provided with notice and a full opportunity to contest allegations of noncompliance; and (viii) assurances that the State or local government minority hiring and/or training requirements are not intended and shall not be used to discriminate against any qualified person on the basis of race, color, religion, sex or national origin. State and local governments are encouraged: to participate in the formulation and implementation of federal minority hiring and/or training plans consonant with the aforementioned criteria in areas currently without such plans; to enforce their fair employment practices laws with respect to acts of discrimination affecting federally assisted construction; and to assist the administering federal agency in monitoring the compliance of contractors and subcontractors performing on federally assisted projects. For purposes of this subparagraph, "Assistant Secretary" means the Assistant Secretary for Employment Standards or his designee.

(c) *Subcontracts.*—Each nonexempt prime contractor or subcontractor shall include the equal opportunity clause in each of its nonexempt subcontracts.

(d) *Incorporation by reference.*—The equal opportunity clause may be incorporated by reference in Government bills of lading, transportation requests, contracts for deposit of Government funds, contracts for issuing and paying U.S. savings bonds and notes, contracts and subcontracts less than $50,000 and such other contracts as the Director may designate.

(e) *Incorporation by operation of the order and agency regulations.*—By operation of the order, the equal opportunity clause shall be considered to be a part of every contract and subcontract required by the order and the regulations in this part to include such a clause whether or not it is physically incorporated in such contracts. The clause may also be applied by agency regulations to every nonexempt contract where there is no written contract between the agency and the contractor.

(f) *Adaptation of language.*—Such necessary changes in language may be made in the equal opportunity clause as shall be appropriate to identify properly the parties and their undertakings.

[33 F.R. 7804, May 28, 1968, as amended at 34 FR 744, Jan. 17, 1969; 39 FR 2365, Jan. 21, 1974]

§ 60-1.5 Exemptions.

(a) *General*—(1) *Transactions of $10,000 or under.*—Contracts and subcontracts not exceeding $10,000, other than Government bills of lading, are exempt from the requirements of the equal opportunity clause. In determining the applicability of this exemption to any federally assisted construction contract, or subcontract thereunder, the amount of such contract or subcontract rather than the amount of the Federal financial assistance shall govern. No agency, contractor, or subcontractor shall procure supplies or services in less than usual quantities to avoid applicability of the equal opportunity clause.

(2) *Contracts and subcontracts for indefinite quantities.*—With respect to contracts and subcontracts for indefinite quantities (including, but not limited to, open end contracts, requirement-type contracts, Federal Supply Schedule contracts, "call-type" contracts, and purchase notice agreements), the equal opportunity clause shall be included unless the purchaser has reason to believe that the amount to be ordered in any year under such contract will not exceed $10,000. The applicability of the equal opportunity clause shall be determined by the purchaser at the time of award for the first year, and annually thereafter for succeeding years, if any. Notwithstanding the above, the equal opportunity clause shall be applied to such contract whenever the amount of a single order exceeds $10,000. Once the equal opportunity clause is determined to be applicable, the contract shall continue to be subject to such clause for its duration, regardless of the amounts ordered, or reasonably expected to be ordered in any year.

(3) *Work outside the United States.*—Contracts and subcontracts are exempt from the requirements of the equal opportunity clause with regard to work performed outside the United States by employees who were not recruited within the United States.

(4) *Contracts with State or local governments.*—The requirements of the equal opportunity clause in any contract or subcontract with a State or local government (or any agency, instrumentality or subdivision thereof) shall not be applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract or subcontract. In addition, any agency, instrumentality or subdivision of such government, except

for educational institutions and medical facilities, are exempt from the requirements of filing the annual compliance report provided for by § 60–1.7(a)(1) and maintaining a written affirmative action compliance program prescribed by § 60–1.40 and Part 60–2 of this chapter.

(b) *Specific contracts and facilities*.—(1) *Specific contracts.*—The Director may exempt an agency or any person from requiring the inclusion of any or all of the equal opportunity clause in any specific contract or subcontract when he deems that special circumstances in the national interest so require. The Director may also exempt groups or categories of contracts or subcontracts of the same type where he finds it impracticable to act upon each request individually or where group exemptions will contribute to convenience in the administration of the order.

(2) *Facilities not connected with contracts.*—The Director may exempt from the requirements of the equal opportunity clause any of a prime contractor's or subcontractor's facilities which he finds to be in all respects separate and distinct from activities of the prime contractor or subcontractor related to the performance of the contract or subcontract, provided that he also finds that such an exemption will not interfere with or impede the effectuation of the order.

(c) *National security.*—Any requirement set forth in these regulations in this part shall not apply to any contract or subcontract whenever the head of an agency determines that such contract or subcontract is essential to the national security and that its award without complying with such requirement is necessary to the national security. Upon making such a determination, the head of the agency will notify the Director in writing within 30 days.

(d) *Withdrawal of exemption.*—When any contract or subcontract is of a class exempted under this section, the Director may withdraw the exemption for a specific contract or subcontract or group of contracts or subcontracts when in his judgment such action is necessary or appropriate to achieve the purposes of the order. Such withdrawal shall not apply to contracts or subcontracts awarded prior to the withdrawal, except that in procurements entered into by formal advertising, or the various forms of restricted formal advertising, such withdrawal shall not apply unless the withdrawal is made more than 10 calendar days before the date set for the opening of the bids.

[33 F.R. 7804, May 28, 1968, as amended at 38 F.R. 1932, Jan. 29, 1973]

§ 60–1.6 Duties of agencies.

(a) *General responsibility.*—Each agency shall be primarily responsible for obtaining compliance with the equal opportunity clause, the order, the regulations in this part, and orders issued pursuant thereto. Each agency shall cooperate with the Director and shall furnish him such information and assistance as he may require in the performance of his functions under the order. Such information shall include compliance review reports, schedules of compliance reviews and any other information relevant to the administration of the order.

(b) *Agency program.*—The head of each agency shall, subject to the prior approval of the Director, establish a program and promulgate procedures to carry out the agency's responsibilities for obtaining compliance with the order and regultaions and orders issued pursuant thereto. Each agency head shall also designate a Contract Compliance Officer, who (unless otherwise approved by the Director) shall be appointed by the head of the agency from among the agency's executive personnel to whom the Executive Schedule applies, and such officer shall be subject to the immediate supervision of the head of the agency. All compliance reviews required pursuant to the regulations in this part and such other compliance reviews as the Contract Compliance Officer determines to be appropriate shall be conducted by him or his designee. The head of the agency or the Contract Compliance Officer may also designate a Deputy Contract Compliance Officer to assist the Contract Compliance Officer in the performance of his duties. The names of the Contract Compliance Officers and the Deputy Contract Compliance Officers, their addresses and telephone numbers, and any changes made in their designation shall be furnished to the Director.

(c) *Agency regulation.*—The head of each agency shall prescribe regulations for the administration of the order and the regulations in this part. Agency regulations, directives and orders for such purpose must be submitted to the Director prior to issuance and may be enforced upon approval of the Director or 60 days after submission if not disapproved by the Director.

(d) [Reserved]

(e) *Evaluations.*—The Director may from time to time evaluate the programs, procedures, and policies of agencies in order to assure their compliance with the order and the regulations in this part and the compliance of prime contractors and subcontractor with the equal opportunity clause.

[33 F.R. 7804, May 28, 1968, as amended at 35 F.R. 10660, July 1, 1970]

§ 60–1.7 Reports and other required information.

(a) *Requirements for prime contractors and subcontractors.*—(1) Each agency shall require each prime contractor and each prime contractor and subcontractor shall cause its subcontractors to file annually, on or before the 31st day of March, complete and accurate reports on Standard Form 100 (EEO–1) promulgated jointly by the Office of Federal Contract Compliance, the Equal Employment Opportunity Commission and Plans for Progress or such form as may hereafter be promulgated in its place if such prime contractor or subcontractor (i) is not exempt from the provisions of these regulations in accordance with § 60–1.5; (ii) has 50 or more employees; (iii) is a prime contractor or first tier subcontractor; and (iv) has a contract, subcontract or purchase order amounting to $50,000 or more or serves as a depository of Government funds in any amount, or is a financial institution which is an issuing and paying agent for U.S. savings bonds and savings notes: *Provided*, That any subcontractor below the first tier which performs construction work at the site of construction shall be required to file such a report if it meets requirements of subdivisions (i), (ii), and (iv) of this subparagraph.

(2) Each person required by § 60–1.7(a)(1) to submit reports shall file such a report with the contracting or administering agency within 30 days after the award to him of a contract or subcontract, unless such person has submitted such a report within 12 months preceding the date of the award. Subsequent reports shall be submitted annually in accordance with § 60–1.7(a)(1), or at such other intervals as the agency or the Director may require. The agency with the approval of the Director may extend the time for filing any report.

(3) The Director, the agency or the applicant, on their own motions, may require a contract to keep employment or other records and to furnish, in the form requested, within reasonable limits, such information as the Director, agency or the applicant deems necessary for the administration of the order.

(4) Failure to file timely, complete and accurate reports as required constitutes noncompliance with the prime contractor's or subcontractor's obligations under the equal opportunity clause and is ground for the imposition by the agency, the Director, an applicant, prime contractor or subcontractor, of any sanctions as authorized by the order and the regulations in this part. Any such failure shall be reported in writing to the Director by the agency as soon as practicable after it occurs.

(b) *Requirements for bidders or prospective contractors*—(1) *Certification of compliance with Part 60–2: Affirmative Action Programs.*—Each agency shall require each bidder or prospective prime contractor and proposed subcontractor, where appropriate, to state in the bid or in writing at the outset of negotiations for the contract: (i) Whether it has developed and has on file at each establishment affirmative action programs pursuant to Part 60–2 of this chapter; (ii) whether it has participated in any previous contract or subcontract subject to the equal opportunity clause; (ii) whether it has filed with the Joint Reporting Committee, the Director, an agency, or the Equal Employment Opportunity Commission all reports due under the applicable filing requirements.

(2) *Additional information.*—A bidder or prospective prime contractor or proposed subcontractor shall be required to submit such information as the agency or the Director requests prior to the award of the contract or subcontract. When a determination has been made to award the contract or subcontract to a specific contractor, such contractor shall be required, prior to award, or after the award, or both, to furnish such other information as the agency, the applicant, or the Director requests.

(c) *Use of reports.*—Reports filed pursuant to this section shall be used only in connection with the administration of the order, the Civil Rights Act of 1964, or in furtherance of the purposes of the order and said Act.

[33 F.R. 7804, May 28, 1968, as amended at 34 F.R. 745, Jan. 17, 1969; 35 F.R. 10660, July 1, 1970]

§ 60–1.8 Segregated facilities.

(a) *General.*—In order to comply with his obligations under the equal opportunity clause, a prime contractor or subcontractor must ensure that facilities provided for employees are provided in such a manner that segregation on the basis of race, color, religion, sex, or national origin cannot result. He may neither require such segregated use by written or oral policies nor tolerate such use by employee custom. His obligation extends further to ensuring that his employees are not assigned to perform their services at any location, under his control, where the facilities are segregated. This obligation extends to all contracts containing the equal opportunity clause regardless of the amount of the contract. The term "facilities" as used in this section means waiting rooms, work areas, restaurants and other eating areas, time clocks, restrooms, wash rooms, locker rooms, and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees.

(b) *Certification by prime contractors and subcontractors.*—Prior to the award of any nonexempt Government contract of subcontract or federally assisted construction contract or subcontract, each agency or applicant shall require the prospective prime contractor and each prime contractor and subcontractor shall require each subcontractor to submit a certification, in the form approved by the Director, that the prospective prime contractor or subcontractor does not and will not maintain any facilities he provides for his employees in a segregated manner, or permit his employees to perform their services at any location, under his control, where segregated facilities are maintained; and that he will obtain a similar certification in the form approved by the Director, prior to the award of any nonexempt subcontract.

[33 F.R. 7804, May 28, 1968, as amended at 34 F.R. 744, Jan. 17, 1969]

§ 60–1.9 Compliance by labor unions and by recruiting and training agencies.

(a) Whenever compliance with the equal opportunity clause may necessitate a revision of a collective bargaining agreement, the labor union or unions which are parties to such an agreement shall be given an adequate opportunity to present their views to the Director.

(b) The Director shall use his best efforts, directly and through agencies, contractors, subcontractors, applicants, State and local officials, public and private agencies, and all other available instrumentalities, to cause any labor union, recruiting and training agency or other representative of workers who are or may be engaged in work under contracts and subcontracts to cooperate with, and to comply in the implementation of, the purposes of the order.

(c) In order to effectuate the purposes of paragraph (a) of this section, the Director may hold hearings, public or private, with respect to the practices and policies of any such labor union or recruiting and training agency.

(d) The Director may notify any Federal, State, or local agency of his conclusions and recommendations with respect to any such labor organization or recruiting and training agency which in his judgment has failed to cooperate with himself, agencies, prime contractors, subcontractors, or applicants in carrying out the purposes of the order. The Director also may notify the Equal Employment Opportunity Commission, the Department of Justice, or other appropriate Federal agencies whenever he has reason to believe that the practices of any such labor organization or agency violates Title VII of the Civil Rights Act of 1964 or other provisions of Federal law.

SUBPART B—GENERAL ENFORCEMENT; COMPLIANCE REVIEW AND COMPLAINT PROCEDURE

§ 60–1.20 Compliance reviews.

(a) The purpose of a compliance review is to determine if the prime contractor or subcontractor maintains nondiscriminatory hiring and employment practices and is taking affirmative action to ensure that applicants are employed and that employees are placed, trained, upgraded, promoted, and otherwise treated during employment without regard to race, color, religion, sex, or national origin. It shall consist of a comprehensive analysis and evaluation of each aspect of the aforementioned practices, policies, and conditions resulting therefrom. Where necessary, recommendations for appropriate sanctions shall be made.

(b) Where deficiencies are found to exist, reasonable efforts shall be made to secure compliance through conciliation and persuasion. Before the contractor can be found to be in compliance with the order, it must make a specific commitment, in writing, to correct any such deficiencies. The commitment must include the precise action to be taken and dates for completion. The time period allotted shall be no longer than the minimum period necessary to effect such changes.

Upon approval of the Contract Compliance Office, appropriate Deputy or the agency head of such commitment, the contractor may be considered in compliance, on condition that the commitments are faithfully kept. The contractor shall be notified that making such commitments does not preclude future determinations of noncompliance based on a finding that the commitments are not sufficient to achieve compliance.

(c) The Compliance Agency shall have the primary responsibility for the conduct of compliance reviews. Agencies shall institute programs for the regular conduct of compliance reviews in accordance with the Director's guidelines, and shall also conduct compilance reviews in accordance with any special requests or instructions of the Director. Compliance reviews may also be conducted by the Director. Compliance reviews should be conducted by qualified specialists regularly involved in equal opportunity programs.

(d) Each agency shall include in the invitation for bids for each formally advertised nonconstruction contract or state at the outset of negotiations for each negotiated contract, that if the award, when let, should exceed the amount of $1 million or more, the prospective contractor and his known first-tier subcontractors with subcontracts of $1 million or more will be subject to a compliance review before the award of the contract. No such contract shall be awarded unless a preaward compliance review of the prospective contractor and his known first-tier $1 million subcontractors has been conducted by the compliance agency within 12 months prior to the award. If an agency other than the awarding agency is the compliance agency, the awarding agency will notify the compliance agency and request appropriate action and findings in accordance with this subsection. Compliance agencies will provide awarding agencies with written reports of compliance within 30 days following the request. In order to qualify for the award of a contract, a contractor and such first-tier subcontractors must be found to be in compliance pursuant to paragraph (b) of this section, and with Part 60–2 of these regulations.

[33 F.R. 7804, May 28, 1968, as amended at 34 F.R. 744, Jan. 17, 1969; 35 F.R. 19660, July 1, 976]

§ 60–1.21 Who may file complaints.

Any employee of any contractor or applicant for employment with such contractor may, by himself or by an authorized representative, file in writing a complaint of alleged discrimination in violation of the equal opportunity clause. Such complaint is to be filed not later than 180 days from the date of the alleged discrimination, unless the time for filing is extended by the agency or the Director upon good cause shown.

§ 60–1.22 Where to file.

Complaints may be filed with the agency or with the Director. Those filed with the Director may be referred to the agency for processing, or they may be processed in accordance with § 60–1.25.

§ 60–1.23 Contents of complaint.

(a) The complaint should include the name, address, and telephone number of the complainant, the name and address of the prime contractor or subcontractor committing the alleged discrimination, a description of the acts considered to be discriminatory, and any other pertinent information which will assist in the investigation and resolution of the complaint. The complaint shall be signed by the complainant or his authorized representative.

(b) Where a complaint contains incomplete information, the agency or the Director shall seek promptly the needed information from the complainant. In the event such information is not furnished to the agency or the Director within 60 days of the date of such request, the case may be closed.

§ 60–1.24 Processing of matters by agencies.

(a) *Complaints.*—Where complaints are filed with the agency, the Contracts Compliance Officer shall transmit a copy of the complaint to the Director within 10 days after the receipt thereof.

(b) *Investigations.*—The agency or Compliance Agency shall institute a prompt investigation of each complaint filed with it or referred to it, and shall be responsible for developing a complete case record. A complete case record consists of the name and address of each person interviewed, and a summary of his statement, copies or summaries of pertinent documents, and a narrative summary of the evidence disclosed in the investigation as it relates to each violation revealed.

When a complaint is filed against a prime contractor or subcontractor who has contracts involving more than one agency, unless otherwise provided, the Compliance Agency shall conduct the investigation and make such findings and determinations as shall be appropriate for the administration of the order.

(c) *Resolution of matters.*—(1) If the complaint investigation by the agency pursuant to paragraph (b) of this section shows no violation of the equal opportunity clause, the agency shall so inform the Director. The Director may review the findings of the agency, and he may request further investigation by the agency or may undertake such investigation as he may deem appropriate.

(2) If any complaint investigation or compliance review indicates a violation of the equal opportunity clause, the matter should be resolved by informal means whenever possible. Such informal means may include the holding of a compliance conference by the agency. Each prime contractor and subcontractor shall be advised that the resolution is subject to review by the Director and may be disapproved if he determines that such resolution is not sufficient to achieve compliance.

(3) Where any complaint investigation or compliance review indicates a violation of the equal opportunity clause and the matter has not been resolved by informal means, the Director or the agency, with the approval of the Director, shall afford the contractor an opportunity for a hearing. If the final decision reached in accordance with the provisions of § 60–1.26 is that a violation of the equal opportunity clause has taken place, the Director, or the agency with the approval of the Director, may cause the cancellation, termination, or suspension of any contract or subcontract, cause a contractor to be debarred from further contracts or subcontracts, or may impose such other sanctions as are authorized by the order.

(4) When a prime contractor or subcontractor, without a hearing, shall have complied with the recommendations or orders of an agency or the Director and believes such recommendations or orders to be erroneous, he shall, upon filing a request therefor within ten days of such compliance, be afforded an opportunity for a hearing and review of the alleged erroneous action by the agency or the Director.

(5) For reasonable cause shown, the Director or an agency head may reconsider or cause to be reconsidered any matter on his motion or pursuant to a requset.

(d) *Reports to the Director.*—(1) Within 60 days from receipt of a complaint by the agency, or within such additional time as may be allowed by the Director for good cause shown, the agency or the Compliance Agency shall process the complaint and submit to the Director the case record and a summary report containing the following information:

(i) Name and address of the complainant;

(ii) Brief summary of findings, including a statement as to the agency's conclusions regarding the contractor's compliance or noncompliance with the requirements of the equal opportunity clause;

(iii) A statement of the disposition of the case, including any corrective action taken and any sanctions or penalties imposed or, whenever appropriate, the recommended corrective action and sanctions or penalties.

(2) A written report of every preaward compliance review required by this regulation or otherwise required by the Director, including findings, will be forwarded to the Director within 10 days after the award for a postaward review.

(3) A written report of every other compliance review or any other matter processed by the agency involving an apparent violation of the equal opportunity clause shall be submitted to the Director. Such report shall contain a brief summary of the findings, including a statement of conclusions regarding the contractor's compliance or noncompliance with the requirements of the order, and a statement of the disposition of the case, including any corrective action taken or recommended and any sanctions or penalties imposed or recommended.

§ 60–1.25 Assumption of jurisdiction by or referrals to the Director.

The Director may inquire into the status of any matter pending before an agency or a Compliance Agency, including complaints and matters arising out of reports, reviews, and other investigations. Where he considers it necessary or appropriate to the achievement of the purposes of the order, he may assume jurisdiction over the matter and proceed as provided herein. Whenever the Director assumes jurisdiction over any matter, or an agency refers any matter, he may conduct, or have conducted, such investigations, hold such hearings, make such findings, issue such recommendations and directives, order such sanctions and penalties, and take such other action as may be necessary or appropriate to achieve the purposes of the order. The Director shall promptly notify the agency of any corrective action to be taken or any sanctions to be taken or any sanction to be imposed by the agency. The agency shall take such action, and report the results thereof to the Director within the time specified.

§ 60–1.26 Hearings.

(a) *Informal hearings*—(1) *Purpose.*—The Director or any agency head with the approval of the Director may convene such informal hearings as may be deemed appropriate for the purpose of inquiring into the status of compliance by any prime contractor or subcontractor with the terms of the equal opportunity clause.

(2) *Notice.*—Contractors and subcontractors shall be advised in writing as to the time and place of the informal hearing and may be directed to bring specific documents and records, or furnish other relevant information concerning their compliance status. When so requested, the prime contractor or subcontractor shall attend and bring requested documents and records, or other requested information.

(3) *Conduct of hearing.*—The hearing shall be conducted by hearing officers appointed by the Director or an agency head. Parties to informal hearings may be represented by counsel and shall have a fair opportunity to present any relevant material. Formal rules of evidence will not apply to such proceedings.

(b) *Formal hearings*—(1) *General procedure.*—In accordance with procedures prescribed by the Secretary or other agency head, the Director or an appropriate official of any agency, with the approval of the Director, may convene formal hearings pursuant to Subpart B of this part for the purpose of determining whether the sanctions set forth in section 209(a) (5) and (6) of the order shall be invoked against any prime contractor or subcontractor. Reasonable notice of a hearing shall be sent by registered mail, return receipt requested, to the last known address of the prime contractor or subcontractor complained against. Such notice shall contain the time, place, and nature of the hearing and a statement of the legal authority pursuant to which the hearing is to be held. Copies of such notice shall be sent to all agencies. Hearings shall be held before a hearing officer designated by or under the direction of the Secretary or other agency head. Each party shall have the right to counsel; a fair opportunity to present evidence and argument and to cross-examine. Whenever a formal hearing is based in whole or in part on matters subject to the collective bargaining agreement and compliance may necessitate a revision of such agreement, any labor organization which is a signatory to the agreement shall have the right to participate as a party. Any other person or organization shall be permitted to participate upon a showing that such person or organization has an interest in the proceedings and may contribute materially to the proper disposition thereof. The hearing officer shall make his proposed findings and conclusions upon the basis of the record before him.

(2) *Cancellation, termination, and debarment.*—No order for cancellation or termination of existing contracts or subcontracts or for debarment from further contracts or subcontracts pursuant to section 209 of the order shall be made without affording the prime contractor or subcontractor an opportunity for a hearing. When cancellation, termination, or debarment is proposed, the following procedure shall be observed:

> (i) *Notice of proposed cancellation or termination.*—Whenever the Director or his designee, or an appropriate official of any agency, upon prior notification to the Director, proposes to request the Secretary or other agency head to cancel or terminate, or cause to be canceled or terminated, in whole or in part, a contract or contracts, or to require cancellation or termination of a subcontract or subcontracts, a notice of the proposed action, in writing and signed by the Director or his designee, or an appropriate agency official, shall be sent to the last known address of the prime contractor or subcontractor. A copy of such notice shall be published in the Federal Register. The notice shall contain a concise jurisdictional statement, a short and plain statement of the matters furnishing a basis for the imposition of sanctions, an enumeration of the sanctions being requested, and a citation of the provisions of the order and regulations pursuant to which the requested action may be taken.
>
> (ii) *Notice of proposed ineligibility.*—Whenever the Director or his designee, or an appropriate official of any agency upon prior notification to the Director, proposes to request the Secretary or other agency head to

declare a prime contractor or subcontractor ineligible for further contracts or subcontracts under section 209 of the order, a notice of the proposed action, in writing and signed by the Director or his designee, or appropriate agency official, shall be sent to the last known address of the prime contractor or subcontractor. A copy of such notice shall be published in the Federal Register. The notice shall contain a concise jurisdictional statement, a short and plain statement of the matters furnishing a basis for the imposition of sanctions, a citation of the provisions of the order and regulations pursuant to which the requested action may be taken, and a statement that the debarment sanction is being sought.

(iii) *Answer and hearing request.*—The prime contractor or subcontractor shall be afforded at least 14 days from receipt of the notice of proposed cancellation, termination, or ineligibility in which to file an answer to the notice and a request for a hearing with the Director or his designee, or the agency. The answer shall admit or deny specifically, and in detail, matters set forth in each allegation of the notice unless the prime contractor or subcontractor is without knowledge, in which case the answer shall so state, and the statement shall be deemed a denial. Matters not specifically denied shall be deemed admitted. Matters alleged as affirmative defenses shall be separately stated and numbered. The hearing request shall be included as a separate paragraph of the answer.

(iv) *Suspension during pendency of hearing.*—Whenever the prime contractor or subcontractor requests a hearing in accordance with these provisions, his contracts or subcontracts may be suspended, in the discretion of the Director, during the pendency of the hearing. However, no Government contract, or portion thereof, with any employer shall be suspended where such employer has an affirmative action plan which has previously been accepted by the Government for the facility at issue within the past 12 months without first according such employer full hearing and adjudication unless such employer has deviated substantially from such previously agreed to affirmative action plan: *Provided*, That for the purposes of this sentence an affimative action plan shall be deemed to have been accepted by the Government at the time the appropriate compliance agency has accepted such plan unless within 45 days thereafter the Office of Federal Contract Compliance has disapproved such plan.

(v) *Imposition of sanctions without a hearing.*—If at the end of the 14-day period referred to in subdivision (iii) of this subparagraph, no answer including a hearing request has been filed, or the answer does not raise issues of fact or law, the Secretary or other agency head may cancel, suspend or terminate or cause to be canceled, suspended or terminated any one or more contracts or subcontracts, or parts thereof, held by the prime contractor or subcontractor complained against, or enter an order declaring such contractor or subcontractor ineligible for further contracts, subcontracts, or extensions or other modifications of existing contracts, until the contractor or subcontractor has satisfied the Secretary that he has established and will carry out personnel and employment policies and practices in compliance with the provisions of the equal opportunity clause and the order.

(vi) *Decision following hearing.*—When the hearing is conducted by an agency, the hearing officer shall make recommendations to the head of the agency who shall make a decision whether sanctions will be invoked against the contractor or subcontractor. No decision by the head of the agency, or his representative, shall be final without the prior approval of the Director. When the hearing is conducted by a hearing officer appointed by or under the direction of the Secretary the hearing officer shall make recommendations to the Secretary, who shall make the final decision whether sanctions will be invoked against the contractor or subcontractor. Parties shall be furnished with copies of the hearing officer's recommendations, and shall be given an opportunity to submit their views.

[33 FR 7804, May 28, 1968, as amended at 37 FR 20536, Sept. 30, 1972]

§ 60–1.27 Sanctions and penalties.

The sanctions described in subsections (1), (5), and (6) of section 209(a) of the order may be exercised only by or with the approval of the Director. Referral of any matter arising under the order to the Department of Justice or to the Equal Employment Opportunity Commission shall be made by the Director.

§ 60–1.28 Show cause notices.

When the Director has reasonable cause to believe that a contractor has violated the equal opportunity clause he may issue a notice requiring the contractor to show cause, within 30 days, why monitoring, enforcement proceedings or other appropriate action to ensure compliance should not be instituted.

§ 60–1.29 Preaward notices.

(a) *Preaward compliance reviews.*—Upon the request of the Director, agencies shall not enter into contracts or approve the entry into contracts or subcontracts with any bidder, prospective prime contractor, or proposed subcontractor named by the Director until a preaward compliance review has been conducted and the Director or designated agency head or his designee has approved a determination that the bidder, prospective prime contractor or proposed subcontractor will be able to comply with the provisions of the equal opportunity clause.

(b) *Other special preaward procedures.*—Upon the request of the Director, agencies shall not enter into contracts or approve the entry into subcontracts with any bidder; prospective prime contractor or proposed subcontractor specified by the Director until the agency has complied with the directions contained in the request.

§ 60–1.30 Contract ineligibility list.

The Director shall distribute periodically a list to all executive departments and agencies giving the names of prime contractors and subcontractors who have been declared ineligible under the regulations in this part and the order.

§ 60–1.31 Reinstatement of ineligible prime contractors and subcontractors.

Any prime contractor or subcontractor declared ineligible for further contracts or subcontracts under the order may request reinstatement in a letter directed to the Director. In connection with the reinstatement proceedings, the prime contractor or subcontractor shall be required to show that it has established and will carry out employment policies and practices in compliance with the equal opportunity clause.

§ 60–1.32 Intimidation and interference.

The sanctions and penalties contained in Subpart D of the order may be exercised by the agency or the Director against any prime contractor, subcontractor or applicant who fails to take all necessary steps to ensure that no person intimidates, threatens, coerces, or discriminates against any individual for the purpose of interfering with the filing of a complaint, furnishing information, or assisting or participating in any manner in an investigation, compliance review, hearing, or any other activity related to the administration of the order or any other Federal, State, or local laws requiring equal employment opportunity.

SUBPART C—ANCILLARY MATTERS.

§ 60–1.40 Affirmative action compliance programs.

(a) *Requirements of programs.*—Each agency or applicant shall require each prime contractor who has 50 or more employees and a contract of $50,000 or more and each prime contractor and subcontractor shall require each subcontactor who has 50 or more employees and a subcontact of $50,000 or more to develop a written affirmative action compliance program for each of its establishments. A necessary prerequisite to the development of a satisfactory affirmative action program is the identification and analysis of problem areas inherent in minority employment and an evaluation of opportunities for utilization of minority group personnel. The contractor's program shall provide in detail for specific steps to guarantee equal employment opportunity keyed to the problems and needs of members of minority groups, including, when there are deficiencies, the development of specific goals and time tables for the prompt achievement of full and equal employment opportunity. Each contractor shall include in his affirmative action compliance program a table of job classifications. This table should include but need not be limited to job titles, principal duties (and auxiliary duties, if any), rates of pay, and where more than one rate of pay applies (because of length of time in the job or other factors) the applicable rates. The affirmative action compliance program shall be signed by an executive official of the contractor.

(b) *Utilization evaluation.*—The evaluation of utilization of minority group personnel shall include the following:

(1) An analysis of minority group representation in all job categories.

(2) An analysis of hiring practices for the past year, including recruitment sources and testing, to determine whether equal employment opportunity is being afforded in all job categories.

(3) An analysis of upgrading, transfer and promotion for the past year to determine whether equal employment opportunity is being afforded.

(c) *Maintenance of program.*—Within 120 days from the commencement of the contract, each contractor shall maintain a copy of separate affirmative action compliance programs for each establishment, including evaluations of utilization of minority group personnel and the job classification tables, at each local office responsible for the personnel matters of such establishment. An affirmative action compliance program shall be part of the manpower and training plans for each new establishment and shall be developed and made available prior to the staffing of such establishment. A report of the results of such program shall be compiled annually and the program shall be updated at that time. This information shall be made available to representatives of the agency or Director upon request and the contractor's affirmative action program and the result it produces shall be evaluated as part of compliance review activities.

§ 60–1.41 Solicitations or advertisements for employees.

In solicitations or advertisements for employees placed by or on behalf of a prime contractor or subcontractor, the requirements of paragraph (2) of the equal opportunity clause shall be satisfied whenever the prime contractor or subcontractor complies with any of the following:

(a) States expressly in the solicitations or advertising that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin;

(b) Uses display or other advertising, and the advertising includes an appropriate insignia prescribed by the Director. The use of the insignia is considered subject to the provisions of 18 U.S.C. 701;

(c) Uses a single advertisement, and the advertisement is grouped with other advertisements, under a caption which clearly states that all employers in the group assure all qualified applicants equal consideration for employment without regard to race, color, religion, sex, or national origin;

(d) Uses a single advertisement in which appears in clearly distinguishable type the phrase "an equal opportunity employer."

[33 F.R. 7804, May 28, 1968, as amended at 34 F.R. 744, Jan. 17, 1969]

§ 60–1.42 Notices to be posted.

(a) Unless alternative notices are prescribed by the Director or by the agency with the approval of the Director, the notices which prime contractors and subcontractors are required to post by paragraphs (1) and (3) of the equal opportunity clause will contain the following language and will be provided by the contracting or administering agencies:

EQUAL EMPLOYMENT OPPORTUNITY IS THE LAW—DISCRIMINATION IS PROHIBITED BY THE CIVIL RIGHTS ACT OF 1964 AND BY EXECUTIVE ORDER NO. 11246

Title VII of the Civil Rights Act of 1964—Administered by The Equal Employment Opportunity Commission.

Prohibits discrimination because of Race, Color, Religion, Sex, or National Origin by Employers with 75 or more employees, by Labor Organizations with a hiring hall of 75 or more members, by Employment Agencies, and by Joint Labor-Management Committees for Apprenticeship or Training. After July 1, 1967, employers and labor organizations with 50 or more employees or members will be covered; after July 1, 1968, those with 25 or more will be covered.

ANY PERSON WHO BELIEVES HE OR SHE HAS BEEN DISCRIMINATED AGAINST SHOULD CONTACT THE EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

1800 G. Street NW., Washington, D.C. 20506

Executive Order No. 11246—Administered by The Office of Federal Contract Compliance.

Prohibits discrimination because of Race, Color, Religion, Sex, or National Origin, and requires affirmative action to ensure equality of opportunity in all aspects of employment.

By all Federal Government Contractors and Subcontractors, and by Contractors Performing Work Under a Federal Assisted Construction Contract, regardless of the number of employees in either case.

ANY PERSON WHO BELIEVES HE OR SHE HAS BEEN DISCRIMINATED AGAINST SHOULD CONTACT THE OFFICE OF FEDERAL CONTRACT COMPLIANCE

U.S. Department of Labor, Washington, D.C. 20210

(b) The requirements of paragraph (3) of the equal opportunity clause will be satisfied whenever the prime contractor or subcontractor posts copies of the notification prescribed by or pursuant to paragraph (a) of this section in conspicuous places available to employees, applicants for employment and representatives of each labor union or other organization representing his employees with which he has a collective bargaining agreement or other contract or understanding.

[33 F.R. 7804, May 28, 1968, as amended at 34 F.R. 745, Jan. 17, 1969]

§ 60–1.43 Access to records and site of employment.

Each prime contractor and subcontractor shall permit access during normal business hours to its premises for the purpose of conducting on-site compilance reviews and inspecting and copying such books, records, accounts, and other material as may be relevant to the matter under investigation and pertinent to compliance with the Order, and the rules and regulations promulgated pursuant thereto by the agency, or the Director. Information obtained in this manner shall be used only in connection with the administration of the Order, the administration of the Civil Rights Act of 1964 (as amended) and in furtherance of the purposes of the Order and that Act. (See 41 CFR Part 60–60, Contractor Evaluation Procedures for Nonconstruction Contractors; 41 CFR Part 60–40, Examination and Copying of OFCC Documents.)

(Sec. 201, E.O. 11246, 30 FR 12319, and E.O. 1375, 32 FR 14303) [38 FR 34464, Dec. 14, 1973]

§ 60–1.44 Rulings and interpretations.

Rulings under or interpretations of the order or the regulations contained in this part shall be made by the Secretary or his designee.

§ 60–1.45 Existing contracts and subcontracts.

All contracts and subcontracts in effect prior to October 24, 1965, which are not subsequently modified shall be administered in accordance with the nondiscrimination provisions of any prior applicable Executive orders. Any contract or subcontract modified on or after October 24, 1965, shall be subject to Executive Order 11246. Complaints received by and violations coming to the attention of agencies regarding contracts and subcontracts which were subject to Executive Order 10925 and 11114 shall be processed as if they were complaints regarding violations of this order.

§ 60–1.46 Delegation of authority by the Director.

The Director is authorized to redelegate the authority given to him by the regulations in this part. The authority redelegated by the Director pursuant to the regulations in this part shall be exercised under his general direction and control.

§ 60–1.47 Effective date.

The regulations contained in this part shall become effective July 1, 1968, for all contracts, the solicitations, invitations for bids, or requests for proposals which were sent by the Government or an applicant on or after said effective date, and for all negotiated contracts which have not been executed as of said effective date. Notwithstanding the foregoing, the regulations in this part shall become effective as to all contracts executed on and after the 120th day following said effective date. Subject to any prior approval of the Secretary, any agency may defer the effective date of the regulations in this part, for such period of time as the Secretary finds to be reasonably necessary. Contracts executed prior to the effective date of the regulations in this part shall be governed by the regulations promulgated by the former President's Committee on Equal Employment Opportunity which appear at 28 F.R. 9812, September 2, 1963, and at 28 F.R. 11305, October 23, 1963, the temporary regulations which appear at 30 F.R. 13441, October 22, 1965, and the orders at 31 F.R. 6881, May 10, 1966, and 32 F.R. 7439, May 19, 1967.

PART 60-2—AFFIRMATIVE ACTION PROGRAMS

SUBPART A—GENERAL

Sec.

60-2.1 Title, purpose and scope.
60-2.2 Agency Action.

SUBPART B—REQUIRED CONTENTS OF AFFIRMATIVE ACTION PROGRAMS

60-2.10 Purpose of affirmative action program.
60-2.11 Required utilization analysis.
60-2.12 Establishment of goals and timetables.
60-2.13 Additional required ingredients of affirmative action programs.
60-2.14 Compliance status.

SUBPART C—METHODS OF IMPLEMENTING THE REQUIREMENTS OF SUBPART B

60-2.20 Development or reaffirmation of the equal employment opportunity policy.
60-2.21 Dissemination of the policy.
60-2.22 Responsibility for implementation.
60-2.23 Identification of problem areas by organizational units and job classifications.
60-2.24 Development and execution of programs.
60-2.25 Internal audit and reporting systems.
60-2.26 Support of action programs.

SOURCE. 36 F.R. 23152, Dec. 4, 1971.

SUBPART A—GENERAL

§ 60-2.1 Title, purpose and scope.

This part shall also be known as "Revised Order No. 4," and shall cover nonconstruction contractors. Section 60-1.40 of this Chapter, Affirmative Action Compliance Programs, requires that within 120 days from the commencement of a contract each prime contractor or subcontractor with 50 or more employees and a contract of $50,000 or more develop a written affirmative action compliance program for each of its establishments, and such contractors are now further required to revise existing written affirmative action programs to include the changes embodied in this order within 120 days of its publication in the Federal Register. A review of agency compliance surveys indicates that many contractors do not have affirmative action programs on file at the time an establishment is visited by a compliance investigator. This part details the agency review procedure and the results of a contractor's failure to develop and maintain an affirmative action program and then set forth detailed guidelines to be used by contractors and Government agencies in developing and judging these programs as well as the good faith effort required to transform the programs from paper commitments to equal employment opportunity. Subparts B and C are concerned with affirmative action plans only.

Relief for members of an affected class who, by virtue of past discrimination, continue to suffer the present effects of that discrimination shall be provided in the conciliation agreement entered into pursuant to § 60-60.6 of this title. An "affected class" problem must be remedied in order for a contractor to be considered in compliance. Section 60-2.2 herein pertaining to an acceptable affirmative action program is also applicable to the failure to remedy discrimination against members of an "affected class."

[36 FR 23152, Dec. 4, 197[illegible] amended at 39 FR 5630, Feb. 14, 1974]

§ 60–2.2 Agency action.

(a)(1) Any contractor required by § 60–1.40 of this chapter to develop an affirmative action program at each of his establishments who has not complied fully with that section is not in compliance with Executive Order 11246, as amended (30 FR 12319). Until such programs are developed and found to be acceptable in accordance with the standards and guidelines set forth in §§ 60–2.10 through 60–2.32, the contractor is unable to comply with the employment opportunity clause. An affirmative action plan shall be deemed to have been accepted by the Government at the time appropriate compliance agency has accepted such plan unless within 45 days thereafter the Office of Federal Contract Compliance has disappoved such plan.

(2) The appropriate compliance agency shall notify the contractor and the Office of Federal Contract Compliance when it has accepted an affirmative action plan.

(b) If, in determining such contractor's responsibility for an award of a contract it comes to the contracting officer's attention, through sources within his agency or through the Office of Federal Contract Compliance or other Government agencies, that the contractor has not developed an acceptable affirmative action program at each of his establishments or has substantially deviated from such an approved affirmative action program, the contracting officer shall notify the Director and declare the contractor-bidder nonresponsible unless he can otherwise affirmatively determine that the contractor is able to comply with his equal employment obligations or, unless upon review, it is determined by the Director that substantial issues of law or fact exist as to the contractor's responsibility to the extent that a hearing is, in his sole judgment, required prior to a determination that the contractor is nonresponsible: *Provided*, That during any preaward conferences every effort shall be made through the processes of conciliation, mediation and persuasion to develop an acceptable affirmative action program meeting the standards and guidelines set forth in §§ 60–2.10 through 60–2.32 so that, in the performance of his contract, the contractor is able to meet his equal employment obligations in accordance with the equal opportunity clause and applicable rules, regulations, and orders: *Provided further*, That when the contractor-bidder is declared nonresponsible more than once for inability to comply with the equal employment opportunity clause a notice setting a timely hearing date shall be issued concurrently with the second nonresponsibility determination in accordance with the provisions of § 60–1.26 proposing to declare such contractor-bidder ineligible for future contracts and subcontracts.

(c) Immediately upon finding that a contractor has no affirmative action program or has deviated substantially from an approved affirmative action program or that his program is not acceptable, the contracting officer, the compliance agency representative or the representative of the Office of Federal Contract Compliance, whichever has made such a finding, shall notify officials of the appropriate compliance agency and the Office of Federal Contract Compliance of such fact. The compliance agency shall issue a notice to the contractor giving him 30 days to show cause why enforcement proceedings under section 209(b) of Executive Order 11246, as amended, should not be instituted.

(1) If the contractor fails to show good cause for his failure or fails to remedy that failure by developing and implementing an acceptable affirmative action program within 30 days, the compliance agency, upon the approval of the Director, shall immediately issue a notice of proposed cancellation or termination of existing contracts or subcontracts and debarment from future contracts and subcontracts pursuant to § 60–1.26(b) of this chapter, giving the contractor 14 days to request a hearing. If a request for hearing has not been received within 14 days from such notice, such contractor will be declared ineligible for future contracts and current contracts will be terminated for default.

(2) During the "show cause" period of 30 days every effort shall be made by the compliance agency through conciliation, mediation, and persuasion to resolve the deficiencies which led to the determination of nonresponsibility. If satisfactory adjustments designed to bring the contractor into compliance are not concluded, the compliance agency, with the prior approval of the Director, shall promptly commence formal proceedings leading to the cancellation or termination of existing contracts or subcontracts and debarment from future contracts and subcontracts under § 60–1.26(b) of this chapter.

(d) During the "show cause" period and formal proceedings, each contracting agency must continue to determine the contractor's responsibility in considering whether or not to award a new or additional contract.

[38 FR 2970, Jan. 31, 1973]

§ 60-2.10 Purpose of affirmative action program.

An affirmative action program is a set of specific and result-oriented procedures to which a contractor commits himself to apply every good faith effort. The objective of those procedures plus such efforts is equal employment opportunity. Procedures without effort to make them work are meaningless; and effort, undirected by specific and meaningful procedures, is inadequate. An acceptable affirmative action program must include an analysis of areas within which the contractor is deficient in the utilization of minority groups and women, and further, goals and timetables to which the contractors good faith efforts must be directed to correct the deficiencies and, thus to achieve prompt and full utilization of minorities and women, at all levels and in all segments of his work force where deficiencies exist.

[36 FR 23152, Dec. 4, 1971, as amended at 39 FR 5630, Feb. 14, 1974]

§ 60-2.11 Required utilization analysis.

Based upon the Government's experience with compliance reviews under the Executive order programs and the contractor reporting system, minority groups are most likely to be underutilized in departments and jobs within departments that fall within the following Employer's Information Report (EEO-1) designations: officials and managers, professionals, technicians, sales workers, office and clerical and craftsmen (skilled). As categorized by the EEO-1 designations, women are likely to be underutilized in departments and jobs within departments as follows: officials and managers, professionals, technicians, sales workers (except over-the-counter sales in certain retail establishments), craftsmen (skilled and semi-skilled). Therefore, the contractor shall direct special attention to such jobs in his analysis and goal setting for minorities and women. Affirmative action progrgams must contain the following information:

(a) Workforce analysis which is defined as a listing of each job title as appears in applicable collective bargaining agreements or payroll records (not job group) ranked from the lowest paid to the highest paid within each department or other similar organizational unit including departmental or unit supervision. If there are separate work units or lines of progression within a department a separate list must be provided for each such work unit, or line, including unit supervisors. For lines of progression there must be indicated the order of jobs in the line through which an employee could move to the top of the line. Where there are no formal progression lines or usual promotional sequences, job titles should be listed by department, job families, or disciplines, in order of wage rates or salary ranges. For each job title, the total number of incumbents, the total number of male and female incumbents, and the total number of male and female incumbents in each of the following groups must be given: Blacks, Spanish-surnamed Americans, American Indians, and Orientals. The wage rate or salary range for each job title must be given. All job titles, including all managerial job titles, must be listed.

(b) An analysis of all major job groups at the facility, with explanation if minorities or women are currently being underutilized in any one or more job groups ("job groups" herein meaning one or a group of jobs having similar content, wage rates and oportunities). "Underutilization" is defined as having fewer minorities or women in a particular job group than would reasonably be expected by their availability. In making the utilizaton analysis, the contractor shall conduct such analysis separately for minorities and women.

(1) In determining whether minorities are being underutilized in any job group the contractor will consider at least all of the following factors:

(i) The minority population of the labor area surrounding the facility;

(ii) The size of the minority unemployment force in the labor area surrounding the facility;

(iii) The percentage of the minority work force as compared with the total work force in the immediate labor area;

(iv) The general availability of minorities having requisite skills in the immediate labor area;

(v) The availability of minorities having requisite skills in an area in which the contractor can reasonably recruit;

(vi) The availability of promotable and transferable minorities within the contractor's organization;

(vii) The existence of training institutions capable of training persons in the requisite skills; and

(viii) The degree of training which the contractor is reasonably able to undertake as a means of making all job classes available to minorities.

(b) In determining whether women are being underutilized in any job group, the contractor will consider at least all of the following factors:

(i) The size of the female unemployment force in the labor area surrounding the facility;

(ii) The percentage of the female work force as compared with the total workforce in the immediate labor area;

(iii) The general availability of women having requisite skills in the immediate labor area;

(iv) The availability of women having requisite skills in an area in which the contractor can reasonably recruit;

(v) The availability of women seeking employment in the labor or recruitment area of the contractor;

(vi) The availability of promotable and transferable female employees within the contractor's organization;

(vii) The existence of training institutions capable of training persons in the requisite skills; and

(viii) The degree of training which the contractor is reasonably able to undertake as a means of making all job classes available to women.

[36 FR 23152, Dec. 4, 1971, as amended at 39 FR 5630, Feb. 14, 1974]

§ 60–2.12 Establishment of goals and timetables.

(a) The goals and timetables developed by the contractor should be attainable in terms of the contractor's analysis of his deficiencies and his entire affirmative action program. Thus, in establishing the size of his goals and the length of his timetables, the contractor should consider the results which could reasonably be expected from his putting fort every good faith effort to make his overall affirmative action program work. In determining levels of goals, the contractor should consider at least the factors listed in § 60–2.11.

(b) Involve personnel relations staff, department and division heads, and local and unit managers in the goal setting process.

(c) Goals should be significant, measurable and attainable.

(d) Goals should be specific for planned results, with timetables for completion.

(e) Goals may not be rigid and inflexible quotas which must be met, but must be targets reasonably attainable by means of applying every good faith effort to make all aspects of the entire affirmative action program work.

(f) In establishing timetables to meet goals and commitments, the contractor will consider the anticipated expansion, contraction and turnover of and in the work force.

(g) Goals, timetables and affirmative action commitments must be designed to correct any identifiable deficiencies.

(h) Where deficiencies exist and where numbers or percentages are relevant in developing corrective action, the contractor shall establish and set forth specific goals and timetables separately for minorities and women.

(i) Such goals and timetables, with supporting data and the analysis thereof shall be a part of the contractor's written affirmative action program and shall be maintained at each establishment of the contractor.

(j) Where the contractor has not established a goal, his written affirmative action program must specifically analyze each of the factors listed in § 60–2.11 and must detail his reason for a lack of a goal.

(k) In the event it comes to the attention of the compliance agency or the Office of Federal Contract Compliance that there is a substantial disparity in the utilization of a particular minority group or men or women of a particular minority group, the compliance agency or OFCC may require separate goals and timetables for such minority group and may further require, where appropriate, such goals and timetables by sex for such group for such job classifications and organizational units specified by the compliance agency or OFCC.

(l) Support data for the required analysis and program shall be compiled and maintained as part of the contractor's affirmative action program. This data will include but not be limited to progression line charts, seniority rosters, applicant flow data, and applicant rejection ratios indicating minority and sex status.

(m) Copies of affirmative action programs and/or copies of support data shall be made available to the compliance agency or the Office of Federal Contract Compliance, at the request of either, for such purposes as may be appropriate to the fulfillment of their responsibilities under Executive Order 11246, as amended.

§ 60–2.13 Additional required ingredients of affirmative action programs.

Effective affirmative action programs shall contain, but not necessarily be limited to, the following ingredients:

(a) Development or reaffirmation of the contractor's equal employment opportunity policy in all personnel actions.

(b) Formal internal and external dissemination of the contractor's policy.

(c) Establishment of responsibilities for implementation of the contractor's affirmative action program.

(d) Identification of problem areas (deficiencies) by organizational units and job group.

(e) Establishment of goals and objectives by organizational units and job groups including timetables for completion.

(f) Development and execution of action oriented programs designed to eliminate problems and further designed to attain established goals and objectives.

(g) Design and implementation of internal audit and reporting systems to measure effectiveness of the total program.

(h) Compliance or personal policies and practices with the Sex Discrimination Guidelines (41 CFR Part 60–20).

(i) Active support of local and national community action programs and community service programs, designed to improve the employment opportunities of minorities and women.

(j) Consideration of minorities and women not currently in the work force having requisite skills who can be recruited through affirmative action measures.

§ 60–2.14 Compliance status.

No contractor's compliance status shall be judged alone by whether or not he reaches his goals and meets his timetables. Rather, each contractor's compliance posture shall be reviewed and determined by reviewing the contents of his program, the extent of his adherence to this program, and his good faith efforts to make his program work toward the realization of the program's goals within the timetables set for completion. There follows an outline of examples of procedures that contractors and Federal agencies should use as a guideline for establishing, implementing, and judging an acceptable affirmative action program.

SUBPART C—METHODS OF IMPLEMENTATING THE REQUIREMENTS OF SUBPART B

§ 60–2.20 Development or reaffirmation of the equal employment opportunity policy.

(a) The contractor's policy statement should indicate the chief executive officers' attitude on the subject matter, assign overall responsibility and provide for a reporting and monitoring procedure. Specific items to be mentioned should include, but not be limited to:

(1) Recruit, hire, train, and promote persons in all job titles, without regard to race, color, religion, sex, or national origin, except where sex is a bona fide occupational qualification. (The term "bona fide occupational qualification" has been construed very narrowly under the Civil Rights Act of 1964. Under Executive Order 11246 as amended and this part, this term will be construed in the same manner.)

(2) Base decisions on employment so as to further the principle of equal employment opportunity.

(3) Insure that promotion decisions are in accord with principles of equal employment opportunity by imposing only valid requirements for promotional opportunities.

(4) Insure that all personnel actions such as compensation, benefits, transfers, layoffs, return from layoff, company sponsored training, education, tuition assistance, social and recreation programs, will be administered without regard to race, color, religion, sex, or national origin.

§ 60–2.21 Dissemination of the policy.

(a) The contractor should disseminate this policy internally as follows:

(1) Include it in contractor's policy manual.

(2) Publicize it in company newspaper, magazine, annual report and other media.

(3) Conduct special meetings with executive, management, and supervisory personnel to explain intent of policy and individual responsibility for effective implementation, making clear the chief executive officer's attitude.

(4) Schedule special meetings with all other employees to discuss policy and explain individual employee responsibilities.

(5) Discuss the policy thoroughly in both employee orientation and management training programs.

(6) Meet with union officials to inform them of policy, and request their cooperation.

(7) Include nondiscrimination clauses in all union agreements, and review all contractual provisions to ensure they are nondiscriminatory.

(8) Publish articles covering EEO programs, progress reports, promotions, etc., of minority and female employees, in company publications.

(9) Post the policy on company bulletin boards.

(10) When employees are featured in product or consumer advertising, employee handbooks or similar publications both minority and nonminority, men and women should be pictured.

(11) Communicate to employees the existence of the contractors affirmative action program and make available such elements of his program as will enable such employees to know of and avail themselves of its benefits.

(b) The contractor should disseminate his policy externally as follows:

(1) Inform all recruiting sources verbally and in writing of company policy, stipulating that these sources actively recruit and refer minorities and women for all positions listed.

(2) Incorporate the Equal Opportunity clause in all purchase orders, leases, contracts, etc., covered by Executive Order 11246, as amended, and its implementing regulations.

(3) Notify minority and women's organizations, community agencies, community leaders, secondary schools and colleges, of company policy, preferably in writing.

(4) Communicate to prospective employees the existence of the contractor's affirmative action program and make available such elements of his program as will enable such prospective employees to know of and avail themselves of its benefits.

(5) When employees are pictured in consumer or help wanted advertising, both minorities and nonminority men and women should be shown.

(6) Send written notification of company policy to all subcontractors, vendors and suppliers requesting appropriate action on their party.

§ 60-2.22 Responsibility for implementation.

(a) An executive of the contractor should be appointed as director or manager of company Equal Opportunity Programs. Depending upon the size and geographical alignment of the company, this may be his or her sole responsibility. He or she should be given the necessary top management support and staffing to execute the assignment. His or her identity should appear on all internal and external communications on the company's Equal Opportunity Programs. His or her responsibilities should include, but not necessarily be limited to:

(1) Developing policy statements, affirmative action programs, internal and external communication techniques.

(2) Assisting in the identification of problem areas.

(3) Assisting line management in arriving at solutions to problems.

(4) Designing and implementing audit and reporting systems that will:

(i) Measure effectiveness of the contractor's programs.

(ii) Indicate need for remedial action.

(iii) Determine the degree to which the contractor's goals and objectives have been attained.

(5) Serve as liaison between the contractor and enforcement agencies.

(6) Serve as liaison between the contractor and minority organizations, women's organizations and community action groups concerned with employment opportunities of minorities and women.

(7) Keep management informed of latest developments in the entire equal opportunity area.

(b) Line responsibilities should include, but not be limited to, the following:

(1) Assistance in the identification of problem areas and establishment of local and unit goals and objectives.

(2) Active involvement with local minority organizations, women's organizations, community action groups and community service programs.

(3) Periodic audit of training programs, hiring and promotion patterns to remove impediments to the attainment of goals and objectives.

(4) Regular discussions with local managers, supervisors and employees to be certain the contractor's policies are being followed.

(5) Review of the qualifications of all employees to insure that minorities and women are given full opportunities for transfers and promotions.

(6) Career counseling for all employees.

(7) Periodic audit to insure that each location is in compliance in area such as:

(i) Posters are properly displayed.

(ii) All facilities, including company housing, which the contractor maintains for the use and benefit of his employees, are in fact desegregated, both in policy and use. If the contractor provides facilities such as dormitories, locker rooms and rest rooms, they must be comparable for both sexes.

(iii) Minority and female employees are afforded a full opportunity and are encouraged to participate in all company sponsored educational, training, recreational and social activities.

(8) Supervisors should be made to understand that their work performance is being evaluated on the basis of their equal employment opportunity efforts and results, as well as other criteria.

(9) It shall be a responsibility of supervisors to take actions to prevent harassment of employee placed through affirmative action efforts.

§ 60-2.23 Identification of problem areas by organizational units and job classifications.

(a) An in-depth analysis of the following should be made, paying particular attention to trainees and those categories listed in § 60-2.11(d).

(1) Composition of the work force by minority group status and sex.

(2) Composition of applicant flow by minority group status and sex.

(3) The total selection process including position descriptions, position titles, worker specifications, application forms, interview procedures, test administration, test validity, referral procedures, final selection process, and similar factors.

(4) Transfer and promotion practices.

(5) Facilities, company sponsored recreation and social events, and special programs such as educational assistance.

(6) Seniority practices and seniority provisions of union contracts.

(7) Apprenticeship programs.

(8) All company training programs, formal and informal.

(9) Work force attitude.

(10) Technical phases of compliance, such as poster and notification to labor unions, retention of applications, notification to subcontractors, etc.

(b) If any of the following items are found in the analysis, special corrective action should be appropriate.

(1) An "underutilization" of minorities or women in specific job groups.

(2) Lateral and/or vertical movement of minority or female employees occurring at a lesser rate (compared to work force mix) than that of nonminority or male employees.

(3) The selection process eliminates a significantly higher percentage of minorities or women than nonminorities or men.

(4) Application and related preemployment forms not in compliance with Federal legislation.

(5) Position descriptions inaccurate in relation to actual functions and duties.

(6) Tests and other selection techniques not validated as required by the OFCC Order on Employee Testing and other Selection Procedures.

(7) Test forms not validated by location, work performance and inclusion of minorities and women in sample.

(8) Referral ratio of minorities or women to the hiring supervisor or manager indicates a significantly higher percentage are being rejected as compared to nonminority and male applicants.

(9) Minorities or women are excluded from or are not participating in company sponsored activities or programs.

(10) De facto segregation still exists at some facilities.

(11) Seniority provisions contribute to overt or inadvertent discrimination, i.e., a disparity by minority group status or sex exists between length of service and types of job held.

(12) Nonsupport of company policy by managers, supervisors or employees.

(13) Minorities or women underutilized or significantly underrepresented in training or career improvement programs.

(14) No formal techniques established for evaluating effectiveness of EEO programs.

(15) Lack of access to suitable housing inhibits recruitment efforts and employment of qualified minorities.

(16) Lack of suitable transportation (public or private) to the work place inhibits minority employment.

(17) Labor unions and subcontractors not notified of their responsibilities.

(18) Purchase orders do not contain EEO clause.

(19) Posters not on display.

§ 60–2.24 Development and execution of programs.

(a) The contractor should conduct detailed analyses of position descriptions to insure that they accurately reflect position functions, and are consistent for the same position from one location to another.

(b) The contractor should validate worker specifications by division, department, location or other organizational unit and by job title using job performance criteria. Special attention should be given to academic, experience and skill requirements to insure that the requirements in themselves do not constitute inadvertent discrimination. Specifications should be consistent for the same job title in all locations and should be free from bias as regards to race, color, religion, sex or national origin, except where sex is a bona fide occupational qualification. Where requirements screen out a disproportionate number of minorities or women, such requirements should be professionally validated to job performance.

* * * * * * *

((5 U.S.C. 553(a)(3)(B)) 29 CFR 2.7 section 201, Executive Order 11246, 30 FR 12319, and Executive Order 11375, 32 FR 14303.)

(c) Approved position descriptions and worker specifications, when used by the contractor, should be made available to all members of management involved in the recruiting, screening, selection, and promotion process. Copies should also be distributed to all recruiting sources.

(d) The contractor should evaluate the total selection process to insure freedom from bias and, thus, aid the attainment of goals and objectives.

(1) All personnel involved in the recruiting, screening, selection, promotion, disciplinary, and related processes should be carefully selected and trained to insure elimination of bias in all personnel actions.

(2) The contractor shall observe the requirements of the OFCC Order pertaining to the validation of employee tests and other selection procedures.

(3) Selection techniques other than tests may also be improperly used so as to have the effect of discriminating against minority groups and women. Such techniques include but are not restricted to, unscored interviews, unscored or casual application forms, arrest records, credit checks, considerations of marital status or dependency or minor children. Where there exist data suggesting that such unfair discrimination or exclusion of minorities or women exists, the contractor should analyze his unscored procedures and eliminate them if they are not objectively valid.

(e) Suggested techniques to improve requirement and increase the flow of minority or female applicants follow:

(1) Certain organizations such as the Urban League, Job Corps, Equal Opportunity Programs, Inc., Concentrated Employment Programs, Neighborhood Youth Corps, Secondary Schools, Colleges, and City Colleges with high minority enrollment, the State Employment Service, specialized employment agencies, Aspira, LULAC, SER, the G.I. Forum, the Commonwealth of Puerto Rico are normally prepared to refer minority applicants. Organizations prepared to refer women with specific skills are: National Organization for Women, Welfare Rights Organizations, Women's Equity Action League, Talent Bank from Business and Professional Women (including 26 women's organizations), Professional Women's Caucus, Intercollegiate Association of University Women, Negro Women's sororities and service groups such as Delta Sigma Theta, Alpha Kappa Alpha, and Zeta Phi Beta, National Council of Negro Women, American Association of University Women, YWCA, and sectarian groups such as Jewish Women's Groups, Catholic Women's Groups and Protestant Women's Groups, and women's colleges. In addition community leaders as individuals shall be added to recruiting sources.

(2) Formal briefing sessions should be held, preferably on company premises, with representatives from these recruiting sources. Plant tours, pres-

sentations by minority and female employees, clear and concise explanations of current and future job openings, position descriptions, worker specifications, explanations of the company's selection process, and recruiting literature should be an integral part of the briefings. Formal arrangements should be made for referral of applicants, followup with sources, and feedback on disposition of applicants.

(3) Minority and female employees, using procedures similar to subparagraph (2) of this paragraph should be actively encouraged to refer applicants.

(4) A special effort should be made to include minorities and women on the Personnel Relations staff.

(5) Minority and female employees should be made available for participation in Career Days, Youth Motivation Programs, and related activities in their communities.

(6) Active participation in "Job Fairs" is desirable. Company representatives so participating should be given authority to make on-the-spot commitments.

(7) Active recruiting programs should be carried out at secondary schools, junior colleges, and colleges with predominant minority or female enrollments.

(8) Recruiting efforts at all schools should incorporate special efforts to reach minorities and women.

(9) Special employment programs should be undertaken whenever possible. Some possible programs are:

(i) Technical and nontechnical co-op programs with predominately Negro and women's colleges.

(ii) "After school" and/or work-study jobs for minority youths, male and females.

(iii) Summer jobs for underprivileged youth, male and female.

(iv) Summer work-study programs for male and female faculty members of the predominantly minority schools and colleges.

(v) Motivation, training and employment programs for the hard-core unemployed, male and female.

(10) When recruiting brochures pictorially present work situations, the minority and female members of the work force should be included, especially when such brochures are used in school and career programs.

(11) Help wanted advertising should be expanded to include the minority news media and women's interest media on a regular basis.

(f) The contractor should insure that minority and female employees are given equal opportunity for promotion. Suggestions for achieving this result include:

(1) Post or otherwise announce promotional opportunities.

(2) Make an inventory of current minority and female employees to determine academic, skill and experience level of individual employees.

(3) Initiate necessary remedial, job training and workstudy programs.

(4) Develop and implement formal employee evaluation programs.

(5) Make certain "worker specifications" have been validated on job performance related criteria. (Neither minority nor female employees should be required to possess higher qualifications than those of the lowest qualified incumbent.)

(6) When apparenty qualified minority or female employees are passed over for upgrading, require supervisory personnel to submit written justification.

(7) Establish formal career counseling programs to include attitude development, education aid, job rotation, buddy system and similar programs.

(8) Review seniority practices and seniority clauses in union contracts to insure such practices or clauses are nondiscriminatory and do not have a discriminatory effect.

(g) Make certain facilities and company-sponsored social and recreation activities are desegregated. Actively encourage all employees to participate.

(h) Encourage child care, housing and transportation programs appropriately designed to improve the employment opportunities for minorities and women.

§ 60-2.25 Internal audit and reporting systems.

(a) The contractor should monitor records of referrals, placements, transfers, promotions and terminations at all levels to insure nondiscriminatory policy is carried out.

(b) The contractor should require formal reports from unit managers on a schedule basis as to degree to which corporate or unit goals are attained and timetables met.

(c) The contractor should review report results with all levels of management.

(d) The contractor should advise top management of program effectiveness and submit recommendations to improve unsatisfactory performance.

§ 60-2.26 Support of action programs.

(a) The contractor should appoint key members of management to serve on Merit Employment Councils, Community Relations Boards and similar organizations.

(b) The contractor should encourage minority and female employees to participate actively in National Alliance of Businessmen programs for youth motivation.

(c) The contractor should support Vocational Guidance Institutes, Vestibule Training Programs and similar activities.

(d) The contractor should assist secondary schools and colleges in programs designed to enable minority and female graduates of these institutions to compete in the open employment market on a more equitable basis.

(e) The contractor should publicize achievements of minority and female employees in local and minority news media.

(f) The contractor should support programs developed by such organizations as National Alliance of Businessmen, the Urban Coalition and other organizations concerned with employment opportunities for minorities or women.

SUBPART D—MISCELLANEOUS

§ 60-2.30 Use of goals.

The purpose of a contractor's establishment and use of goals is to insure that he meet his affirmative action obligation. It is not intended and should not be used to discriminate against any applicant or employee because of race, color, religion, sex, or national origin.

§ 60-2.31 Preemption.

To the extent that any State or local laws, regulations or ordinances, including those which grant special benefits to persons on account of sex, are in conflict with Executive Order 11246, as amended, or with the requirements of this part, we will regard them as preempted under the Executive order.

§ 60-2.32 Supersedure.

All orders, instructions, regulations, and memoranda of the Secretary of Labor, other officials of the Department of Labor and contracting agencies are hereby superseded to the extent that they are inconsistent herewith including a previous "Order No. 4" from this Office dated January 30, 1970. Nothing in this part is intended to amend 41 CFR 60-3 published in the Federal Register on October 2, 1971 or Employee Testing and Other Selection Procedures or 41 CFR 60-20 on Sex Discrimination Guidelines.

Effective date. This part shall become effective on the date of its publication in the Federal Register (12-4-71).

Part 60-3—Employee Testing and Other Selection Procedures

Sec.
60-3.1 Purpose and scope.
60-3.2 Test defined.
60-3.3 Violations of the Executive order.
60-3.4 Evidence of validity; meaning of technically feasible.
60-3.5 Minimum standards for validation.
60-3.6 Presentation of evidence of validity.
60-3.7 Use of other validity studies.
60-3.8 Assumption of validity.
60-3.9 Continued use of tests.
60-3.10 Employment agencies and state employment services.
60-3.11 Disparate treatment.
60-3.12 Retesting.
60-3.13 Other selection techniques.
60-3.14 Affirmative action.
60-3.15 Recordkeeping.
60-3.16 Sanctions.

Sec.
60–3.17 Exemptions.
60–3.18 Effect on other rules and regulations.

Authority: The provisions of this Part 60–3 are issued under secs. 201, 205, 206(a), 301, 303(a), 303(b), and 403(b) of Executive Order 11246, as amended, 30 F.R. 12319; 32 F.R. 14303; 34 F.R. 12986; § 60–1.2 of Part 60–1 of this chapter.

§ 60–3.1 Purpose and scope.

(a) This order is based on the belief that properly validated and standardized employee selection procedures can significantly contribute to the implementation of nondiscriminatory personal policies, as required by Executive Order 11246, as amended. It is also recognized that professionally developed tests, when used in conjunction with other tools of personnel assessment and complemented by sound programs of job design, may significantly aid in the development and maintenance of an efficient work force and, indeed, aid in the utilization and conservation of human resource generally.

(b)(1) An examination of charges of discrimination filed with the Office of Federal Contract Compliance and an evaluation of the results of its compliance activities has revealed a decided increase in total test usage and a marked increase in testing practices which have discriminatory effects. In many cases, contractors have come to rely almost exclusively on tests as the basis for making the decision to hire, to promote, to transfer, to train, or to retain with the result that candidates are selected or rejected on the basis of test scores. Where tests are so used, minority candidates frequently experience disproportionately high rates of rejection by failing to attain score levels that have been established as minimum standards for qualification.

(2) It has also become clear that in many instances contractors are using tests as the basis for employment decisions without evidence that they are valid predictors of employee job performance. Where evidence in support of presumed relationships between test performance and job behavior is lacking, the possibility of discrimination in the application of test results must be recognized. A test lacking demonstrated validity, i.e., having no known significant relationship to job behavior, and yielding lower scores for classes protected by Executive Order 11246, as amended, may result in the rejection of many who have necessary qualifications for successful work performance.

(c) Section 202 of Executive Order 11246, as amended, requires each Government contractor and subcontractor to take affirmative action to insure that he will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. This order is designed to serve as a set of standards for contractors and subcontractors subject to Executive Order 11246, as amended, in determining whether their use of tests conforms with the requirements of the Executive Order.[1]

§ 60–3.2 Test defined.

For the purpose of this order, the term "test" is defined as any paper-and-pencil or performance measure used as a basis for any employment decision. This order applies, for example, to ability tests which are designed to measure eligibility for hire, transfer, promotion, training, or retention. This definition includes, but is not restricted to, measures of general intelligence, mental ability and learning ability; specific intellectual abilities; mechanical, clerical and other aptitudes; dexterity and coordination; knowledge and proficiency; occupational and other interests; and attitudes, personality or temperament. The term "test" also covers all other formal, scored, quantified or standardized techniques of assessing job stability including, for example, personal history and background requirements which are specifically used as a basis for qualifying or disqualifying applicants or employees, specific educational or work history requirements, scored interviews, biographical information blanks, interviewers' rating scales and scored application forms. The term "test" shall not including other selection techniques discussed in § 60–3.13.

---

[1] Except for the necessary differences in language arising from the different legal authority of the two agencies and for reasons of clarity, this order and the Guidelines on Employee Selection Procedures, issued earlier by the Equal Employment Opportunity Commission (35 F.R. 12333, Aug. 1, 1970) are intended to impose the same basic requirements on persons and contractors covered by each of them.

§ 60-3.3 Violation of Executive order.

A contractor regularly using a test which has adversely affected the opportunities of minority persons or women for hire, transfer, promotion, training, or retention violates Executive Order 11246, as amended, unless he can demonstrate that he has validated the test pursuant to the requirements of this part.

§ 60-3.4 Evidence of validity; meaning of technically feasible.

(a) Each contractor using tests to select from among candidates for hire, transfer, promotion, training, or retention shall have available for inspection evidence that the test is being used in a manner which does not violate § 60-3.3.

(b) Where technically feasible, a test should be validated for each minority group with which it is used; that is, any differential rejection rates that may exist, based on a test, must be relevant to performance on the jobs in question.

(c) The term "technically feasible" as used in paragraph (b) of this section and elsewhere in this part means having or obtaining a sufficient number of minority individuals to achieve findings of statistical and practical significance, the opportunity to obtain unbiased job performance criteria, etc. It is the responsibility of the persons claiming absence of technical feasibility to demonstrate evidence of this absence.

(1) Evidence of a test's validity should consist of empirical data demonstrating that the test is predictive of or significantly correlated with important elements of work behavior which comprise or are relevant to the job or jobs for which candidates are being evaluated.

(2) If job progression structures and seniority provisions are so established that new employees will probably, within a reasonable period of time and in a great majority of cases, progress to a higher level, it may be considered that candidates are being evaluated for jobs at that higher level. However, where job progression is not so nearly automatic, or the time span is such that higher level jobs or employees' potential may be expected to change in significant ways, it shall be considered that candidates are being evaluated for a job at or near the entry level. This point is made to underscore the principle that attainment of or performance at a higher level job is a relevant criterion in validating employment tests only when there is a higher probability that persons employed will in fact attain that higher level job within a reasonable period of time.

(3) Where a test is to be used in different units of a multiunit organization and no significant differences exist between units, jobs, and applicant populations, evidence obtained in one unit may suffice for the others. Similarly, where the validation process requires the collection of data throughout a multiunit organization, evidence of validity specific to each unit may not be required. There may also be instances where evidence of validity is appropriately obtained from other companies in the same industry. Both in this instance and in the use of data collected throughout a multiunit organization, evidence of validity specific to each unit or company may not be required provided that no significant differences exist between companies, units, jobs, and applicant populations.

§ 60-3.5 Minimum standards for validation.

(a) For the purpose of satisfying the requirements of this part, empirical evidence in support of a test's validity must be based on studies employing generally accepted procedures for determining criterion-related validity, such as those described in "Standards for Educational and Psychological Tests and Manuals," published by the American Psychological Association, 1200 17th Street NW., Washington, DC 20036. Evidence of content or construct validity, as defined in that publication, may also be appropriate where criterion-related validity is not feasible. However, evidence for content or construct validity should be accompanied by sufficient information from job analyses to demonstrate the relevance of the content, in the case of job knowledge or proficiency tests, or the construct, in the case of trait measures. Evidence of content validity alone will be acceptable for well-developed tests that consist of suitable samples of the essential knowledge, skills or behaviors composing the job in question. The types of knowledge, skills or behaviors contemplated here do not include those which can be acquired in a brief orientation to the job. In the case of personal history, background, educational, and work history requirements which are specifically used as a basis for qualifying or disqualifying applicants (see § 60-3.2), evidence of content or construct validity may be sufficient.

(b) Although any appropriate validation strategy may be used to develop such empirical evidence, the following minimum standards, as applicable, must be met in the research approach and in the presentation of results which constitute evidence of validity:[1]

(1) Where a validity study is conducted in which tests are administered to applicants, with criterion data collected later, the sample of subjects must be representative of the normal or typical candidates group for the job or jobs in question. This further assumes that the applicant sample is representative of the minority population available for the job or jobs in question in the local labor market. Where a validity study is conducted in which tests are administered to present employees, the sample must be representative of the minority groups currently included in the applicant population. If it is not technically feasible to include minority employees in validation studies conducted on the present work force, the conduct of a validation study without minority candidates does not relieve any contractor of his subsequent obligation for validation when inclusion of minority candidates becomes technically feasible.

(2) Tests must be administered and scored under controlled and standardized conditions, with proper safeguards to protect the security of test scores and to insure that scores do not enter into any judgments of employee adequacy that are to be used as criterion measures.

(3) The work behaviors or other criteria of employee adequacy which the test is intended to predict or identify must be fully described; and, additionally, in the case of rating techniques, the appraisal form(s) and instructions to the rater(s) must be included as a part of the validation evidence. Such criteria may include measures other than actual work proficiency, such as training time, supervisory ratings, regularity of attendance and tenure. Whatever criteria are used they must represent major or critical work behaviors as revealed by careful job analyses.

(4) In view of the possibility of bias inherent in subjective evaluations, supervisory rating techniques should be carefully developed, and the ratings should be closely examined for evidence of bias. In addition, minorities or women might obtain unfairly low performance criterion scores for reasons other than supervisors' prejudice, as when, as new employees, they have had less opportunity to learn job skills. In general, all criteria must be examined to ensure freedom from factors which would unfairly depress the scores of minority groups or women.

(5) Data must be generated and results separately reported for minority and nonminority groups wherever technically feasible. Where a minority group is sufficiently large to constitute an identifiable factor in the local labor market, but validation data have not been developed and presented separately for that group, evidence of satisfactory validity based on other groups will be regarded as only provisional compliance with this order pending separate validation of the test for the minority group in question (see § 60–3.9). A test which is differentially valid may be used in groups for which it is valid but not for those in which it is not valid. In this regard, where a test is valid for two groups but one group characteristically obtains higher test scores than the other without a corresponding difference in job performance, test results must be applied so as to predict the same probability of job success in both groups.

(c) In assessing the utility of a test the following considerations will be applicable:

(1) The relationship between the test and at least one relevant criterion must be statistically significant. This ordinarily means that the relationship should be sufficiently high as to have a probability of no more than 1 to 20 to have occurred by change. However, the use of a single test as the sole selection device, when that test is valid against only one component of job performance, will be scrutinized closely.

(2) In addition to statistical significance, the practical significance of the relationship between the test and criterion should also be considered. The magnitude of the relationship needed for practical significance or usefulness is affected by several factors, including:

(i) The larger the proportion of applicants who are hired for or placed on the job, the higher the relationship needs to be in order to be practically useful. Conversely, a relatively low relationship may prove useful when proportionately few job vacancies are available;

(ii) The larger the proportion of applicants who become satisfactory employees when not selected on the basis of the test, the higher the relationship needs to be between the test and a criterion of job success for the test to be practically useful. Conversely, a relatively low relationship may prove useful when proportionately few applicants turn out to be satisfactory;

(iii) The smaller the economic and human risks involved in hiring an unqualified applicant relative to the risks entailed in rejecting a qualified applicant, the greater the relationship needs to be in order to be practically useful. Conversely, a relatively low relationship may prove useful when the former risks are relatively high.

§ 60–3.6 Presentation of evidence of validity.

(a) *Criterion-related validity.*—Reports of criterion-related validity of tests and other selection methods, where required by this chapter, are to contain the following information:

(1) *Firm or organization and location(s) and date(s) of study.*—If study is longitudinal, both testing dates and criterion collection dates or the time range within which these dates occurred must be shown (Essential). If study was conducted at several locations, names of cities and states should be shown in addition to plant identification.

(2) *Problem and setting.*—Explicit definition of purposes and brief discussion of the situation in which the study was conducted should be provided. Include description of existing selection procedures and cutting scores, if any, which were used.

(3) *Job analysis.*—A full description of all important duties and tasks involved in each of the jobs on which research has been conducted and for which the test will be used must be provided (Essential). Unless a general measure of job behavior (such as turnover or tenure) is used as a criterion, it is expected that the description of the duties performed by the incumbents on the job will also detail the level of difficulty at which the duties are performed, and those duties which are critical (i.e., must be performed competently if the job is to be performed in a satisfactory manner). This job analysis also should describe on what bases duties were determined to be critical, such as the proportion of time spent on the respective duties, their levels of difficulty, their importance, their frequency of performance, and other relevant factors. If a duty which occupies a high proportion of time is not deemed critical, the reasons therefore must be set forth. Published descriptions from industry sources or Volume I of the *Dictionary of Occupational Titles* are satisfactory if they adequately and completely described the job. If necessary a brief supplement to the published descriptions may be provided. (The requirements in this section are not intended to specify a particular method of job analysis. Any professionally recognized product and/or process oriented method of job analysis is acceptable if it is comprehensive and otherwise appropriate for the specific validation strategy used.) If two or more jobs are grouped for a validation study, a justification for this grouping as well as a description of each of the jobs should be provided.

(4) *Job titles and codes.*—It is desirable that the job title used in company terminology plus the corresponding job title and code from United States Employment Service *Dictionary of Occupational Titles* (Third Edition) Volumes I and II, United States Government Printing Office, 1965, be provided. Where appropriate DOT codes and titles do not exist, a notation to that effect should be made.

(5) *Criteria.*—Provide a description of all criteria of job related behaviors collected (including a rationale for what were selected as final criteria) and means by which they were observed, recorded, evaluated and quantified (Essential). (To the extent possible this description should parallel the content validity justification described under "content validity" below.) An indication of the reliability coefficients and how they were established is desirable.

(6) *Sample.*—A description of the ethnic and sex composition of the sample must be provided. (Minority group categories shown on EEO–1 should be used.) Also required is a description of how the research sample was selected and how it compares with employees in the job and with current applicants. Description of educational levels, length of service, and age is also desirable.

(7) *Number of cases.*—Indicate the number of people in the sample, and the number of people in each of the subsamples (Essential).

(8) *Predictors.*—Commercially available tests should be described by title, form and publisher (Essential). Other predictors, including privately constructed tests, interviewer's ratings, educational and experience levels and composites of test batteries should be explicitly described (Essential). The inclusion of a rationale for each predictor studied is desirable.

(9) *Techniques and results.*—Methods used in evaluating data must be described (essential). Any statistical adjustments such as for less than perfect

reliability or for restriction of score range in the test or criterion or both must be described and uncorrected coefficients must also be shown (Essential). Statistical results must be summarized in graphical or tubular form (by ethnic and/or subgroup, if feasible) and statements regarding statistical significance of results must be made (Essential). Where the statistical technique used categorizes continuous data (such as biserial correlation and phi coefficient) the cut-offs used and their bases must be described (Essential). Where more than one predictor and/or more than one criterion is used, all predictor-criterion correlations must be reported regardless of magnitude or direction. Average scores (e.g. means) and measures of dispersion (e.g. standard deviations and ranges) for all test and criteria must be reported for all relevant subgroups, including minoritiy and nonminority groups and males and females, where feasible (Essential).

(10) *Uses and applications.*—A description of the way in which the test is to be used (e.g., as a screening device with a cut-off score, combined with other tests in a battery) and application of the test (e.g., selection, transfer, upgrading) must be provided so as to permit judgments of the test's utility in making predictions of future work behavior (Essential). Where cut-off scores are to be used, both the cut-off scores and the way in which they were determined must be described (Essential). It is expected that each operational cut-off score will be reasonable and consistent with normal expectations of proficiency within the work force or group on which the study was conducted.) The specific way the test or test battery is used operationally must be described and validity data must support this particular use (Essential). If predictor weights are used, the weights and the validity of the weighted composite must be reported (Essential).

(11) *Source data.*—Each contractor must maintain, and make available upon request, records showing all pertinent information about individual sample members in studies involving the validation of tests. These data must include test scores, criterion scores, age, sex, minority group status, and experience on the specific job on which the validation study is being conducted and may also include such things as education, training and prior job experience. If the contractor chooses to submit along with a report on validation a worksheet showing the pertinent information about the individual sample members, specific identifying information such as name and social security number should NOT be shown. Submittal with the validation report is encouraged as it may prevent delays in approval in the event that errors are noted.

(12) *Contact person.*—It would be desirable for the contractor to provide the name, address and telephone number of person currently working for the company or consulting firm who may be contacted for further information about the validation study.

(b) *Content validity.*—Content validity is an appropriate type of validity to demonstrate for skills tests (that is, tests to determine whether an individual already possesses needed skills or knowledge and certain other selection procedures, but it is not ordinarily an appropriate type of validity to fully support aptitude or intelligence tests (that is, tests to determine whether an individual can learn needed skills or knowledge). Also, content validity sometimes may be accepted as provisional compliance where criterion related is preferred but is not technically reasible. Frequently ,the contnt validity of a selection procedure can be demonstrated to the satisfaction of the compliance officer by the contractor, either orally or in writing, without the need to prepare a formal report in accordance with these guidelines.

NOTE.—It is important to distinguish between face validity which involves an apparent but superficial correspondence between test content and the job (not an acceptable type of validity) and content validity, which involves a demonstration that the test content samples important elements of job tasks. Formal reports of the content validity of tests and other selection methods, where required by this chapter (i.e., disproportionate rejection rate and request of compliance officer), are to contain the following information:

(1) *Job analysis.*—The essential foundation of a content validity study is a reliable and comprehensive job analysis. The analysis must define the duties performed by incumbents on the job, the level of difficulty at which the duties are performed, and those duties which are critical (i.e., those which must be performed competently if the job is to be performed in a satisfactory manner (Essential). The job analysis shsould describe on what bases duties were determined to be critical, such as the proportion of time spent on the respective duties, their levels of difficulty, their importance, their frequency of performance, and other relevant factors. If a duty which occupies a high proportion of time is not

deemed critical, the reasons therefore must be set forth. (The level, breadth, degree and/or type of skills or knowledge to be learned on the job or in the job related training must be identified because selection standards must not require this level, breadth, degree and/or type of skills or knowledge.) Citation of actual occurrences of ineffective behavior resulting from the absence of a particular knowledge, skill or personal characteristic would be desirable.

(2) *Job title and code.*—It is desirable that the job title used in company terminology plus the corresponding job title and code from United States Employment Service *Dictionary of Occupational Titles* (Third Edition) Volumes I and II, United States Government Printing Office, 1965 be provided. Where appropriate DOT codes and titles do not exist, a notation to that effect should be made.

(3) *Predictors.*—Privately constructed tests, specific training requirements, composites of test batteries and other predictors should be explicitly described (Essential). Commercially available tests, if used, should be described by title, form and publisher (Essential). (The predictor content must be restricted to measurement of the knowledge and skills identified in the job analysis.)

(4) *Techniques and results.*—Describe the way in which the correspondence between the predictor content and the job content was established (Essential). (This includes both content area and relative emphasis given to each area.) The validity demonstration must include a clear description of the depth and scope of primary characteristics required of the worker in performing these specific tasks. Specify the way in which these tasks, knowledge, skills and personal characteristics were determined and their relative importance. Describe qualifications of subject matter experts and/or job experts who review predictor content and job requirements. If any steps were taken to reduce racial, cultural or sex bias in the predictor content, describe these steps. Explain how time limits were established and how these are related to speed with which tasks must be accomplished on the job. Describe studies, if any, to estimate the reliability of the predictors or, if relevant reliability studies have been described in the literature, these should be referenced.

(5) *Normative data.*—As appropriate, it is desirable that average scores (e.g. means) and measures of dispersion (e.g. standard deviations and ranges) on the predictors be reported for one or more samples of applicants or other relevant samples. If feasible, these data should be reported separately for minority subgroups and separately for males and females.

(6) *Cut-off scores.*—The rationale for minimum requirements, if any, must be provided (Essential). (It is expected that each operational cut-off score or level of skill sought will be reasonable and consistent with normal expectations of proficiency within the work force.)

If the test is used to rank individuals who are above minimum levels, or if preference is given to individuals who score significantly above the minimum levels, a rational for this procedure must be provided (Essential).

(7) *Uses and applications.*—A description of the way in which the test is to be used (e.g. as a screening device with a cut-off score, combined with other tests in a battery) and application of the test (e.g. selection, transfer, upgrading) must be provided (Essential).

(8) *Contact person.*—It would be desirable for the contractor to provide the name, mailing address and telephone number of person currently working for the company or consulting firm who may be contacted for further information about the validation study.

NOTE. Previously written company or consultant reports on criterion-related validity or content validity are acceptable if they are reasonably complete in regard to the above information. If the previously written reports are not complete, the additional information may be appended. If necessary information (all items except those identified as desirable) is not available, the report may still be submitted but approval will be limited to provisional compliance. Reports should not be submitted if any Essential items are missing.

[39 FR 2095, Jan. 17, 1974]

§ 60-3.7 Use of other validity studies.

In cases where the validity of a test cannot be determined pursuant to §§ 60-3.4 and 60-3.5 (e.g., the number of subjects is less than that required for a technically adequate validation study, or an appropriate criterion measure cannot be developed), evidence from validity studies conducted in other organizations, such as that reported in test manuals and professional literature, may be considered acceptable when: (a) The studies pertain to jobs which are comparable (i.e., have basically the same task elements), and (b) there are no major differences in contextual variables or sample composition which are likely to affect significantly validity. Any contractor citing evidence from other validity studies as evidence of test validity for his own jobs must demonstrate that he meets requirements in paragraphs (a) and (b) of this section.

§ 60–3.8 Assumption of validity.

(a) Under no circumstances will the general reputation of a test, its author or its publisher, or casual reports of test utility be accepted in lieu of evidence of validity. Specifically ruled out are: Assumptions of validity based on test names or descriptive labels; all forms of promotional literature; data bearing on the frequency of a test's usage; testimonial statements of sellers, users, or consultants; and other nonempirical or anecdotal accounts of testing practices or testing outcomes.

(b) Although professional supervision of testing activities may help greatly to insure technically sound and nondiscriminatory test usage, such involvement alone shall not be regarded as constituting satisfactory evidence of test validity.

§ 60–3.9 Continued use of tests.

Under certain conditions where validation is required by this order, a contractor may be permitted to continue the use of a test which is not at the moment fully supported by the required evidence of validity. If, for example, evidence of criterion-related validity in a specific setting is technically feasible and required but not yet obtained, the use of the test may continue: *Provided:* (a) The contractor can cite substantial evidence of validity as described in § 60–3.7 (a) and (b); and (b) he has in progress validation procedures which are designed to produce, within a reasonable time, the additional data required. It is expected also that the contractor may have to alter or suspend test cutoff scores so that score ranges broad enough to permit the identification of criterion-related validity will be obtained.

§ 60–3.10 Employment agencies and state employment services.

A contractor utilizing the services of any private employment agency, state employment agency or any other person, agency or organization engaged in the selection or evaluation of personnel which makes its selections or evaluations of personnel wholly or partially on the basis of the results of any test shall have available evidence that any test used by such person, agency or organization is in conformance with the requirements of this order.

§ 60–3.11 Disparate treatment.

The principle of disparate or unequal treatment must be distinguished from the concept of test validation. Disparate treatment, for example, occurs where members of a group protected by Executive Order 11246, as amended, have been denied the same opportunities for hire, transfer or promotion as have been made available to other employees or applicants. Those employees or applicants who can be shown to have been denied equal treatment because of prior discriminatory practices or policies must at least be afforded the same opportunities as had existed for other employees or applicants during the period of discrimination. Thus, no new test or other employee selection standard can be imposed upon an individual or class of individuals protected by Executive Order 11246, as amended, who, but for this prior discrimination, would have been granted the opportunity to qualify under less stringent selection standards previously in force.

§ 60–3.12 Retesting.

Contractors should provide an opportunity for retesting and reconsideration to earlier "failure" candidates who have availed themselves of more training or experience. In particular, if any applicant or employee during the course of an interview or other employment procedure claims more education or experience, that individual should be retested.

§ 60–3.13 Other selection techniques.

Selection techniques other than tests, as defined in § 60–3.2, may be improperly used so as to have the effect of discriminating against minority groups or women. Such techniques include, but are not restricted to, unscored or casual interviews, unscored application forms and unscored personal history and background requirements not used uniformly as a basis for qualifying or disqualifying applicants. Where there are data suggesting employment discrimination, the contractor may be called upon to present evidence concerning the validity of his unscored procedures regardless of whether tests are also used, the evidence of validity being of the same types referred to in §§ 60–3.4 and 60–3.5. Data suggesting the possibility of discrimination exists, for example, when there are higher rates of rejection of minority candidates than of nonminority candidates for the same job or group of jobs or when there is an underutilization of minority group personnel among present employees in certain types of jobs. If the contractor is unable or unwilling to perform such validation studies, he has the option of adjusting employment procedures so as to eliminate the conditions suggestive of employment discrimination.

§ 60–3.14 Affirmative action.

Nothing in this order shall be interpreted as diminishing a contractor's obligation under both title VII of the Civil Rights Act of 1964 and Executive Order 11246, as amended, to take affirmative action to ensure that applicants or employees are treated without regard to race, color, religion, sex, or national origin. Specifically, where substantially equally valid tests can be used for a given purpose, the contractor will be expected to use the test or battery of tests which will have the least adverse effect on the employment opportunities of minorities or women. Further, the use of tests which have been validated pursuant to this order does not relieve contractors of their obligation to take affirmative action to afford employment and training opportunities to members of classes protected by Executive Order 11246, as amended.

§ 60–3.15 Recordkeeping.

Each contractor shall maintain, and submit upon request, such records and documents relating to the nature and use of tests, the validation of tests, and test results, as may be required under the provisions of this chapter and under the orders and directives issued by the Office of Federal Contract Compliance.

§ 60–3.16 Sanctions.

(a) The use of tests and other selection techniques by contractors as qualification standards for hire, transfer, promotion, training or retention shall be examined carefully for possible indications of noncompliance with the requirements of Executive Order 11246, as amended.

(b) A determination of noncompliance pursuant to the provisions of this part shall be grounds for the imposition of sanctions under Executive Order 11246, as amended.

§ 60–3.17 Exemptions.

(a) Requests for exemptions from this order or any part thereof must be made in writing to the Director, Office of Federal Contract Compliance, Washington, D.C., and must contain a statement of reasons supporting the request. Such request shall be forwarded through and shall contain the endorsement of the head of the contracting agency. Exemption may be granted for good cause.

(b) The requirements of this part shall not apply to any contract when the head of the contracting agency determines that such contract is essential to the national security and that its award without complying with such requirements is necessary to the national security. Upon making such a determination, the agency head will notify the Director, in writing, within 30 days.

§ 60–3.18 Effect of this part on other rules and regulations.

(a) All orders, instructions, regulations, and memoranda of the Secretary of Labor, other officials of the Department of Labor and contracting agencies are hereby superseded to the extent that they are inconsistent herewith.

(b) Nothing in this part shall be interpreted to diminish the present contract compliance review and complaint investigation programs.

PART 60–5—WASHINGTON PLAN

NOTE. An amendment at 39 FR 19943, June 5, 1974, extended the expiration date of the Washington Plan until June 30, 1974. As noted at 39 FR 24648, July 5, 1974, the expiration date was further extended until July 31, 1974.

PART 60-20—SEX DISCRIMINATION GUIDELINES

Sec.
60-20.1 Title and purpose.
60-20.2 Recruitment and advertisement.
60-20.3 Job policies and practices.
60-20.4 Seniority system.
60-20.5 Discriminatory wages.
60-20.6 Affirmative action.

AUTHORITY: The provisions of this Part 60-20 issued under sec. 201, E.O. 11246, 30 F.R. 12319, and E.O. 11375, 32 F.R. 14303.

SOURCE: The provisions of this Part 60-20 appear at 35 F.R. 8888, June 9, 1970, unless otherwise noted.

§ 60-20.1 Title and purpose.

The purpose of the provisions in this part is to set forth the interpretations and guidelines of the Office of Federal Contract Compliance regarding the implementation of Executive Order 11375 for the promotion and insuring of equal opportunities for all persons employed or seeking employment with Government contractors and subcontractors or with contractors and subcontractors performing under federally assisted construction contracts, without regard to sex. Experience has indicated that special problems related to the implementation of Executive Order 11375 require a definitive treatment beyond the terms of the order itself. These interpretations are to be read in connection with existing regulations, set forth in Part 60-1 of this chapter.

§ 60-20.2 Recruitment and advertisement.

(a) Employers engaged in recruiting activity must recruit employees of both sexes for all jobs unless sex is a bona fide occupational qualification.

(b) Advertisement in newspapers and other media for employment must not express a sex preference unless sex is a bona fide occupational qualification for the job. The placement of an advertisement in columns headed "Male" or "Female" will be considered an expression of a preference, limitation, specification, or discrimination based on sex.

§ 60-20.3 Job policies and practices.

(a) Written personnel policies relating to this subject area must expressly indicate that there shall be no discrimination against employees on account of sex. If the employer deals with a bargaining representative for his employees and there is a written agreement on conditions of employment, such agreement shall not be inconsistent with these guidelines.

(b) Employees of both sexes shall have an equal opportunity to any available job that he or she is qualified to perform, unless sex is a bona fide occupational qualification.

NOTE: In most Government contract work there are only limited instances where valid reasons can be expected to exist which would justify the exclusion of all men or all women from any given job.

(c) The employer must not make any distinction based upon sex in employment opportunities, wages, hours, or other conditions of employment. In the area of employer contributions for insurance, pensions, welfare programs and other similar "fringe benefits" the employer will not be considered to have violated these guidelines if his contributions are the same for men and women or if the resulting benefits are equal.

(d) Any distinction between married and unmarried persons of one sex that is not made between married and unmarried persons of the opposite sex will be considered to be a distinction made on the basis of sex. Similarly, an employer must not deny employment to women with young children unless it has the same exclusionary policies for men; or terminate an employee of one sex in a particular job classification upon reaching a certain age unless the same rule is applicable to members of the opposite sex.

(e) The employer's policies and practices must assure appropriate physical facilities to both sexes. The employer may not refuse to hire men or women, or deny men or women a particular job because there are no restroom or associated facilities, unless the employer is able to show that the construction of the facilities would be unreasonable for such reasons as excessive expense or lack of space.

(f)(1) An employer must not deny a female employee the right to any job that she is qualified to perform in reliance upon a State "protective" law. For example, such laws include those which prohibit women from performing in certain types of occupations (e.g., a bartender or a core-maker); from working at jobs requiring more than a certain number of hours; and from working at jobs that require lifting or carrying more than designated weights.

(2) Such legislation was intended to be beneficial, but, instead, has been found to result in restricting employment opportunities for men and/or women. Accordingly, it cannot be used as a basis for denying employment or for establishing sex as a bona fide occupational qualification for the job.

(g)(1) Women shall not be penalized in their conditions of employment because they require time away from work on account of childbearing. When, under the employer's leave policy the female employee would qualify for leave, then childbearing must be considered by the employer to be a justification for leave of absence for female employees for a reasonable period of time. For example, if the female employee meets the equally applied minimum length of service requirements for leave time, she must be granted a reasonable leave on account of childbearing. The conditions applicable to her leave (other than the length thereof) and to her return to employment, shall be in accordance with the employer's leave policy.

(2) If the employer has no leave policy, childbearing must be considered by the employer to be a justification for a leave of absence for a female employee for a reasonable period of time. Following childbirth, and upon signifying her intent to return within a reasonable time, such female employee shall be reinstated to her original job or to a position of like status and pay, without loss of service credits.

(h) The employer must not specify any differences for male and female employees on the basis of sex in either mandatory or optional retirement age.

(i) Nothing in these guidelines shall be interpreted to mean that differences in capabilities for job assignments do not exist among individuals and that such distinctions may not be recognized by the employer in making specific assignments. The purpose of these guidelines is to insure that such distinctions are not based upon sex.

§ 60-20.4 Seniority system.

Where they exist, seniority lines and lists must not be based solely upon sex. Where such a separation has existed, the employer must eliminate this distinction.

§ 60-20.5 Discriminatory wages.

(a) The employer's wages schedules must not be related to or based on the sex of the employees.

Note. The more obvious cases of discrimination exist where employees of different sexes are paid different wages on jobs which require substantially equal skill, effort and responsibility and are performed under similar working conditions.

(b) The employer may not discriminatorily restrict one sex to certain job classifications. In such a situation, the employer must take steps to make jobs available to all qualified employees in all classifications without regard to sex. (Example: An electrical manufacturing company may have a production division with three functional units: One (assembly) all female; another (wiring), all male; and a third (circuit boards), also all male. The highest wage attainable in the assembly unit is considerably less than that in the circuit board and wiring units. In such a case the employer must take steps to provide qualified female employees opportunity for placement in job openings in the other two units.)

(c) To avoid overlapping and conflicting administration the Director will consult with the Administrator of the Wage and Hour Administration before issuing an opinion on any matter covered by both the Equal Pay Act and Executive Order 11246, as amended by Executive Order 11375.

§ 60-20.6 Affirmative action.

(a) The employer shall take affirmative action to recruit women to apply for those jobs where they have been previously excluded.

Note. This can be done by various methods. Examples include: (1) including in itineraries of recruiting trips women's colleges where graduates with skills desired by the employer can be found, and female students of coeducational institutions and (2) designing advertisements to indicate that women will be considered equally with men for jobs.

(b) Women have not been typically found in significant numbers in management. In many companies management trainee programs are one of the ladders to management positions. Traditionally, few, if any, women have been admitted into these programs. An important element of affirmative action shall be a commitment to include women candidates in such programs.

(c) Distinctions based on sex may not be made in other training programs. Both sexes should have equal access to all training programs and affirmative action programs should require a demonstration by the employer that such access has been provided.

PART 60–30—HEARING RULES FOR SANCTION PROCEEDINGS

SUBPART A—GENERAL INFORMATION

Sec.
60–30.1 Applicability of rules, waiver, modification.
60–30.2 Definitions.
60–30.3 Computation of time.

SUBPART B—FORM AND FILING OF DOCUMENTS AND PLEADINGS

60–30.4 Form.
60–30.5 Filing; service.

SUBPART C—PREHEARING PROCEDURES

60–30.6 Notice of proposed cancellation, termination, or ineligibility.
60–30.7 Answer.
60–30.8 Amendments.
60–30.9 Notice of hearing.
60–30.10 Motions; disposition of motions.
60–30.11 Participation by interested persons.
60–30.12 Admissions as to facts and documents.
60–30.13 Production of documents and things and entry upon land for inspection and other purposes.
60–30.14 Depositions upon oral examination.
60–30.15 Prehearing conferences.

SUBPART D—DESIGNATION AND RESPONSIBILITIES OF HEARING EXAMINER

60–30.16 Designation.
60–30.17 Authority and responsibilities.

SUBPART E—HEARING AND RELATED MATTERS

60–30.18 Appearances.
60–30.19 Appearance of witnesses.
60–30.20 Evidence; testimony.
60–30.21 Objections; exceptions.
60–30.22 Offer of proof.
60–30.23 Public documents.
60–30.24 Ex parte communications.
60–30.25 Oral argument.
60–30.26 Official transcript.
60–30.27 Summary judgment.

SUBPART F—POST HEARING PROCEDURES

60–30.28 Proposed findings of fact and conclusions.
60–30.29 Record for recommended decision.
60–30.30 Recommended decision.
60–30.31 Exceptions to recommended decision.
60–30.32 Record.
60–30.33 Final decision.

SUBPART G—MISCELLANEOUS

60–30.34 Cooperation by agencies.
60–30.35 Effect of this part on other rules and regulations.

AUTHORITY: Secs. 201, 205, 208, 209, 301, 302(b), and 303(a) of Executive Order 11240, as amended, 30 F.R. 12319; 32 F.R. 14303; § 60–1.26 of Part 60–1 of this chapter (41 CFR Part 60–1).

SOURCE: 37 FR 20537, Sept. 30, 1972, unless otherwise noted.

SUBPART A—GENERAL INFORMATION

§ 60–30.1 Applicability of rules, waiver, modification.

(a) *Applicability of rules.* These rules of procedure supplement the provisions of § 60–1.26(b) of this chapter. The rules govern the practice and procedure for hearings conducted by the Office of Federal Contract Compliance with respect to the imposition of sanctions under sections 208(b), 209(a) (5) and (6) of Executive Order No. 11246, as amended.

(b) *Waiver, modification.* Upon notice to all parties, the hearing examiner or the Secretary may, with respect to matters pending before him modify or waiver any rule herein upon a determination that no party will be prejudiced and that the ends of justice will be served thereby.

§ 60–30.2 Definitions.

As used in these rules:

(a) "Associate Solicitor" means the Associate Solicitor for Labor Relations and Civil Rights, U.S. Department of Labor, Washington, D.C. 20210, who has been designated to prosecute all actions under this part and § 60–1.26(b) of this chapter in the name of the Director.

(b) "Chief Hearing Examiner" means the Chief Hearing Examiner, U.S. Department of Labor, Washington, D.C. 20210.

(c) "Department" means the Department of Labor.

(d) "Director" means the Director of the Office of Federal Contract Compliance of the Department of Labor.

(e) "Hearing Examiner" means the hearing officer designated by the Chief Hearing Examiner, pursuant to section 208(b) of Executive Order 11246, as amended, and § 60–1.26(b) of this chapter to conduct hearings under section 209 of the order.

(f) "Notice" means, unless the context clearly indicates otherwise, the Notice of Proposed Cancellation, Termination, or Ineligibility.

(g) "The order" means Executive Order 11246 of September 24, 1965 (30 F.R. 12319), as amended (32 F.R. 14303).

(h) "Party" means a respondent: the Director of the Office of Federal Contract Compliance of the Department of Labor: and any person or organization participating in a proceeding pursuant to § 60–30.11(a).

(i) "Respondent" means a person or organization against whom sanctions are proposed because of alleged violations of Executive Order 11246, and the rules, regulations, and orders thereunder.

(j) "Secretary" means Secretary of the Department of Labor.

§ 60–30.3 Computation of time.

In computing any period of time under these rules or in an order issued hereunder, the time begins with the day following the act, event, or default, and includes the last day of the period, unless it is a Saturday, Sunday, or legal holiday observed in the District of Columbia, in which event it includes the next following business day.

SUBPART B—FORM AND FILING OF DOCUMENTS AND PLEADINGS

§ 60–30.4 Form.

Documents and pleadings filed pursuant to a proceeding herein shall be dated, the original signed in ink, shall show the docket description and title of the proceeding, and shall show the title, if any, and address of the signatory. Copies need not be signed, but the name of the person signing the original shall be reproduced.

§ 60–30.5 Filing; service.

(a) *Manner of service.* Service upon any party shall be made by the party filing the document or pleading by delivering a copy or mailing a copy to the last known address: *Provided, however,* That the notice of hearing shall be sent by registered mail, return receipt requested, pursuant to § 60–1.26(b)(1) of this chapter.

(b) *Upon whom served.* All papers shall be served upon counsel of record and upon parties not represented by counsel, and upon the Associate Solicitor or his designee.

(c) *Proof of service.* A certificate of the person serving the pleading or other document by personal delivery or by mailing, setting forth the manner of said service shall be prima facie proof of service.

(d) *Number of copies.* An original and 3 copies of all documents and pleadings shall be filed.

SUBPART C—PREHEARING PROCEDURES

§ 60–30.6. Notice of proposed cancellation, termination or ineligibility.

Actions shall be commenced under this part and § 60–1.26(b) (2) of this chapter by service of a written notice signed by the Director, or by the Associate Solicitor in the name of the Director, on the contractor or subcontractor against whom the Director seeks the imposition of sanctions. The notice shall indicate whether the Director proposes to request the Secretary to cancel or terminate, or cause to be canceled or terminated, in whole or in part, any one or more contracts or subcontracts, or to declare the prime contractor or subcontractor ineligible for further contracts or subcontracts under section 209 of the order. The notice shall contain a concise jurisdictional statement, a short and plain statement of the matter furnishing a basis for the imposition of sanctions, an enumeration of the sanctions being proposed, and a citation of the provisions of the order regulations pursuant to which the requested action may be taken.

§ 60–30.7 Answer.

(a) *Filing and service.* Within 14 days after receipt of the notice of proposed cancellation, termination, or ineligibility, Respondent shall file an answer and a hearing request with the hearing examiner or, if no hearing examiner has been designated, with the Chief Hearing Examiner.

(b) *Contents; failure to file.* The answer shall admit or deny specifically, and in detail, matters set forth in each allegation of the notice. Unless Respondent is without knowledge, in which case the answer shall so state, and the statement shall be deemed a denial. Matters not specifically denied shall be deemed admitted. Matters alleged as affirmative defenses shall be separately stated and numbered. Failure to file an answer shall constitute an admission of all facts recited in the notice.

(c) *Hearing request.* The request for a hearing shall be included as a separate paragraph of the answer.

§ 60–30.8 Amendments.

The Director may amend the notice once as a matter of course before an answer is filed, and Respondent may amend its answer once as a matter of course not later than 10 days after the filing of the original answer. Other amendments of the notice or of the answer to the notice shall be made only by leave of the hearing examiner. An amended notice shall be answered within 7 days of its service, or within the time for filing an answer to the original notice, whichever period is longer.

§ 60–30.9 Notice of hearing.

In response to Respondent's request for a hearing, a notice of hearing shall be served on the Respondent pursuant to § 60–1.26(b)(1) of this chapter. Such notice shall contain the time, place, and nature of the hearing and the legal authority under which the proceedings are to be held.

§ 60–30.10 Motions; disposition of motions.

(a) *Motions.* Motions shall state the relief sought, the authority relied upon and the facts alleged, and shall be filed with the hearing examiner, or with the Chief Hearing Examiner, if no hearing examiner has been designated. If made before or after the hearing itself, these matters shall be in writing. If made at the hearing, they may be stated orally; but the hearing examiner may require that they be reduced to writing and filed and served on all parties in the same manner as a formal motion. Within 7 days after a written motion is served, or such other time period as may be fixed, any party may file a response to a motion.

(b) *Disposition of motions.* The hearing examiner, or Secretary, may not grant a written motion prior to expiration of the time for filing responses thereto, except upon consent of the parties or following a hearing thereon, but may overrule or deny such motion without awaiting response: *Provided, however,* That prehearing conferences, hearings, and decisions need not be delayed pending disposition of motions. Rulings by the hearing examiner shall not be appealed prior to the transfer of the case to the Secretary, but shall be considered by the Secretary when the case is transferred to him for decision.

§ 60–30.11 Participation by interested persons.

(a) (1) To the extent that proceedings hereunder involve employment of persons covered by a collective bargaining agreement, and compliance may necessitate a revision of such agreement, any labor organization which is a signatory to the agreement shall have the right to participate as a party.

(2) Other persons or organizations shall have the right to participate as parties if the final decision of the Secretary could adversely affect them or the class they represent and such participation may contribute materially to the proper disposition of the proceedings.

(3) Any person or organization wishing to participate as a party under this paragraph shall file and serve upon the hearing examiner, or upon the Chief Hearing Examiner, if no hearing examiner has been designated, and all parties a petition within 7 days after the commencement of the action. Such petition shall concisely state (i) petitioner's interest in the proceedings, (ii) who will appear for petitioner, (iii) the issues on which petitoner wishes to participate, and (iv) whether petitioner intends to present witnesses.

(4) The hearing examiner shall determine whether each petitioner has the requisite interest in the proceedings and shall permit or deny participation accordingly. Where petitions to participate as parties are made by individuals or groups with common interest, the hearing examiner may request all such petitioners to designate a single representative to represent all such petitioners: *Provided*, That the representative of a labor organization qualifying to participate under subparagraph (1) of this paragraph must be permitted to participate in the proceeding. The hearing examiner shall give each petitioner written notice of the decision on his petition; and if the petition is denied, he shall briefly state the grounds for denial and shall then treat the petition as a request for participation as amicus curiae. The hearing examiner shall give written notice to each party of each petition granted.

(b) (1) Any othe interested person or organization wishing to participate as amicus curiae shall file a petition before the commencement of the final hearing with the hearing examined. Such petition shall concisely state (i) the petitioner's interest in the hearing, (ii) who will represent the petitioner, and (iii) the issues on which petitioner intends to present argument. The hearing examiner may grant the petition if he finds that the petitioner has a legitimate interest in the proceedings, and that such participation may contribute materially to the proper disposition of the issues. An amicus curiae is not a party but may participate as provided in this paragraph.

(2) An amicus curiae may present a brief oral statement at the hearing, at the point in the proceedings specified by the hearing examiner. He may submit a written statement of position to the hearing examiner prior to the beginning of a hearing, and shall serve a copy on each party. He may also submit a brief or written statement at such time as the parties submit briefs and exceptions, and shall serve a copy on each party.

§ 60–30.12 Admissions as to facts and documents.

Not later than 14 days prior to the date of the hearing, except for good cause shown, or not later than 14 days prior to such earlier date as the hearing examiner may order, any party may serve upon an opposing party a written request for the admission of the genuineness and authenticity of any relevant documents described in, and exhibited with, the request, or for the admission of the truth of any relevant matters of fact stated in the request. Each of the matters, as to which an admission is requested shall be deemed admitted, unless within a period designated in the request (not less than 7 days, and not more than 10 days, after service thereof) the party to whom the request is directed serves upon the requesting party a sworn statement either (a) denying specically the matter as to which an admission is requested, or (b) setting forth in detail the reasons why he cannot truthfully either admit or deny such matters.

§ 60–30.13 Production of documents and things and entry upon land for inspection and other purposes.

(a) After commencement of the action, any party may serve on any other party a request to produce and/or permit the party, or someone acting on his behalf, to inspect and copy any unprivileged documents, phonorecords, and other compilations which contain or may lead to relevant information and which are in the possession, custody, or control of the party upon whom the request is served. If necessary, translation of data compilations shall be done by the party furnishing the information.

(b) After commencement of the action, any party may serve on any other party a request to permit entry upon designated property which may be relevant to the issues in the proceeding and which is in the possession or control of the party upon whom the request is served for the purpose of inspection, measuring, surveying or photographing, testing, or sampling the property or any designated object or area.

(c) Each request shall set forth with reasonable particularity the items to be inspected and shall specify a reasonable time and place for making the inspection and performing the related acts.

(d) The party upon whom the request is served shall respond within 7 days after the service of the request. The response shall state, with respect to each item, that inspection and related activities will be permitted as requested, unless there are objections, in which case the reasons for each objecton shall be stated. The party submitting the request may move for an order with respect to any objection or to other failure to respond.

§ 60–30.14 Depositions upon oral examination.

(a) *Depositions; notice of examination.* After commencement of the action, any party may take the testimony of any person, including a party, having personal or expert knowledge of the matters in issue, by deposition upon oral examination for the purposes of discovery and/or the perpetuation of testimony. A party desiring to take a deposition shall give reasonable notice in writing to every other party to the proceeding. The notice shall state the time and place for taking the deposition and the name and address of each person to be examined, if known, and, if the name is not known, a general description sufficient to identify him or the particular class or group to which he belongs. The notice shall also set forth the categories of documents the witness is to bring with him to the depostion, if any. A copy of the notice shall be furnished to the person to be examined unless his name is unknown.

(b) *Production of witnesses; obligation of parties; objections.* It shall be the obligation of each party to produce for examination any person, along with such documents as may be requested, at the time and place, and on the date, set forth in the notice, if that party has control over such person. Each party shall be deemed to have control over its officers, agents, employees, and members. Depositions shall be held within the county in which the witness resides or works. The party or prospective witness may file with the hearing examiner, or with the Chief Hearing Examiner, if no hearing examiner has been assigned, an objection within 3 days after the identity of such witness first becomes known, stating with particularity the reasons why the party cannot or ought not to produce a requested witness. The party serving the notice may move for an order with respect to such objection or failure to produce a witness. All errors or irregularities in compliance with the provisions of this section shall be deemed waived unless a motion to suppress the deposition or some part thereof is made with reasonable promptness after such defect is or, with due diligence, might have been ascertained.

(c) *Before whom taken; scope of examination; failure to answer.* Depositions may be taken before any officer authorized to administer oaths by the laws of the United States or of the place where the deposition is held. At the time and place specified in the notice, the officer designated to take the deposition shall permit each party to examine and cross-examine the witness under oath upon any unprivileged matter which is relevant to the subject matter of the proceeding, or which is reasonably calculated to lead to the production of relevant and otherwise admissible evidence. All objectioins to questions, except as to the form thereof, and all objections to evidence are reserved until the hearing. A refusal or failure on the part of any person under the control of a party to answer a question shall operate to create a presumption that the answer, if given, would be unfavorable to the controlling party, unless the question is subsequently ruled improper by the hearing examiner or the hearing examiner rules that there was valid justification for the witness' failure or refusal to answer the question: *Provided*, That the examining party shall note on the record during the deposition the question which the deponent has failed, or refused to answer, and state his intention to invoke the presumption if no answer is forthcoming.

(d) *Subscription; certification; filing.* The testimony shall be reduced to typewriting by the officer taking the deposition or under his direction, and shall be subscribed by the witness in the presence of the officer who shall attach his certificate stating that the witness was duly sworn by him and that the deposition is a true record of the testimony and exhibts given by the witness, and that said officer is not of counsel or attorney to any of the parties nor interested in the proceeding. If the deposition is not signed by the witness because he is ill, dead, cannot be found, or refuses to sign it, such fact shall be noted in the certificate of the officer and the deposition may then be used as fully as though signed. The officer shall immediately deliver any original copy of the transcript, together with his certificate, in person or by mail to the hearing examiner, or to the Chief Hearing Examiner, if no hearing examiner has been assigned. Copies of the transcript and certificate shall be furnished to all persons desiring them, upon payment of reasonable charges therefor, unless distribution is restricted by order of the hearing examiner for good cause shown.

(e) *Rulings on admissibility; use of deposition.* Subject to the provisions of this section, objection may be made at the hearing to receiving in evidence any deposition or part thereof for any reason which would require the exclusion of the evidence if the witness were then present and testifying. Any part or all of a deposition, so far as admissible in the discretion of the hearing examiner, may be used against any party who was present or represented at the taking of the deposition or who had reasonable notice thereof, in accordance with the following provisions:

(1) Any deposition may be used by any party for the purpose of contradicting or impeaching the testimony of the deponent as a witness.

(2) The deposition of a party or of anyone who at the time of taking the deposition was an officer, director, or managing agent, or was designated to testify on behalf of a public or private corporation, partnership, association, or governmental agency which is a party may be used by the adverse party for any purpose.

(3) The deposition of a witness, whether or not a party, may be used by any party for any purpose if the hearing examiner finds: (i) That the witness is dead; or (ii) that the witness is unable to attend or testify because of age, illness, infirmity, or imprisonment; or (iii) that the party offering the deposition has been unable to procure the attendance of the witness by notice; or (iv) upon application and notice, that such exceptional circumstances exist as to make it desirable to allow the deposition to be used.

(4) If only part of a deposition is introduced in evidence by a party, any party may introduce any other parts by way of rebuttal and otherwise.

(f) *Stipulations.* If the parties so stipulate in writing, depositions may be taken before any person at any time or place, upon any notice and in any manner, and when so taken may be used like other depositions.

§ 60-30.15 Prehearing conferences.

(a) Within 14 days after the answer has been filed, the hearing examiner shall establish a date for the prehearing conference to include all parties and petitioners for status as a party whose petition has not yet been ruled on. Written notice of the prehearing conference shall be sent to all participants in the conference. At the prehearing conference the following matters shall be considered:

(1) Simplification and delineation of the issues to be heard;

(2) Stipulations, admissions of fact and of contents and authenticity of documents;

(3) Limitation of number of witnesses particularly the avoidance of duplicate expert witnesses, and exchange of expert witness lists;

(4) Scheduling dates for the exchange of witness lists (except as provided in subparagraph (3) of this paragraph) and exhibits;

(5) Offers of settlement;

(6) Scheduling of such additional prehearing conferences as may be considered necessary; and

(7) Such other matters as may tend to expedite the disposition of the proceedings.

(b) The record shall show the matters disposed of by order and/or the matters disposed of by agreement in the prehearing conference. The subsequent course of the proceeding shall be controlled by such action.

SUBPART D—DESIGNATION AND RESPONSIBILITIES OF HEARING EXAMINER

§ 60-30.16 Designation.

Hearings shall be held before a hearing examiner designated by the Chief Hearing Examiner under the direction of the Secretary. After service of an order designating a hearing examiner to preside, and until such examiner makes his decision, motions and petitions shall be submitted to him. In the case of the death, illness, disqualification, or unavailability of the designated hearing examimner, another hearing examiner may be designated to take his place.

§ 60–30.17 Authority and responsibilities.

The hearing exmanier shall proposed findings and conclusions to the Secretary on the basis of the record before him. In order to do so, he shall have the duty to conduct a fair hearing, to take all necessary action to avoid delay, and to maintain order. He shall have all powers necessary to those ends, including, but not limited to, the power to:

(a) Hold conferences to settle, simplify, or fix the issues in a proceeding, or to consider other matters that may aid in the expeditious disposition of the proceeding by consent of the parties or upon his own motion;

(b) Require parties to state their position with respect to the various issues in the proceeding;

(c) Require parties to produce for examination those relevant witnesses and documents under their control;

(d) Administer oaths;

(e) Rule on motions, and other procedural items on matters pending before him;

(f) Regulate the course of the hearing and conduct of participants therein;

(g) Examine and cross-examine witnesses, and introduce into the record documentary or other evidence;

(h) Receive, rule on, exclude, or limit evidence, and limited lines of questioning or testimony which are irrelevant, immaterial or unduly repetitious;

(i) Fix time limits for submission of written documents in matters before him and extend any time limits established by this part upon a determination that no party will be prejudiced and that the ends of justice will be served thereby;

(j) Impose appropriate sanctions against any party or person failing to obey an order under these rules which may include:

(1) Refusing to allow the disobedient party to support or oppose designated claims or defenses, or prohibiting him from introducing designated matters in evidence;

(2) Excluding all testimony of an unresponsive or evasive witness, or determining that the answer of such witness, if given, would be unfavorable to the party having control over him; and

(3) Expelling any party or person from further participation in the hearing;

(k) Take official notice of any material fact not appearing in evidence in the record, which is among the traditional matters of judicial notice;

(l) Recommend whether the Respondent is in current violation of Executive Order 11246, as amended, and applicable rules, regulations, and orders, as well as the nature of whatever corrective action may be necessary to bring the Respondent into compliance with the equal employment opportunity clause;

(m) Recommend to the Secretary the adoption of a consent order agreed to by the parties in settlement of the issues in a proceeding; and

(n) Take any action authorized by these rules.

SUBPART E—HEARINGS AND RELATED MATTERS

§ 60–30.18 Appearances.

(a) *Representation.* The parties or other persons or organizations participating pursuant to § 60–30.11 have the right to be represented by counsel.

(b) *Failure to appear.* In the event that a party appears at the hearing and no party appears for the opposing side, the party who is present shall have an election to present his evidence in whole or such portion thereof sufficient to make a prima facie case before the hearing examiner. Failure to appear at the hearing shall not be deemed to be a waiver of the right to be served with a copy of the hearing examiner's recommended decision and to file exceptions to it.

§ 60–30.19 Appearance of witnesses.

(a) A party wishing to procure the appearance at the hearing of any person having personal or expert knowledge of the matters in issue shall serve on the prospective witness a notice setting forth the time, date and place at which he is to appear for the purpose of giving testimony. The notice shall also set forth the categories of documents the witness is to bring with him to the hearing, if any.

A copy of the notice shall be filed with the hearing examiner and additional copies shall be served upon the opposing parties.

(b) It shall be the obligation of each party to produce for examination any person, along with such documents as may be requested, at the time and place, and on the date, set forth in the notice, if that party has control over such person. Each party shall be deemed to have control over its officers, agents, employees, and members. Due regard shall given to the convenience of witnesses in scheduling their testimony so that they will be detained no longer than reasonably necessary.

(c) The party or prospective witness may file an objection within 3 days after the identity of such witness first becomes known, stating with particularity the reasons why the party cannot produce a requested witness. The party serving the notice may move for an order with respect to such objection or failure to produce a witness.

§ 60-30.20 Evidence; testimony.

Formal rules of evidence shall not apply, but rules or principles designed to assure production of the most probative evidence available shall be applied, as the hearing examiner directs. Testimony shall be given orally by witnesses at the hearing, but may, in the discretion of the hearing examiner, be prepared in writing and served on all parties within 10 days prior to the hearing. A witness shall be available for cross-examination, and, at the discretion of the hearing examiner, may be cross-examined without regard to the scope of direct examination as to any matter which is relevant and material to the proceeding. The hearing examiner may exclude evidence which is immaterial, irrelevant, or unduly repetitious.

§ 60-30.21 Objections; exceptions.

(a) *Objections.* If a party objects to the admission or rejection of any evidence or to the limitation of the scope of any examination or cross-examination or the failure to limit such scope, he shall state briefly the grounds for such objection. Rulings on all objections shall appear in the record. Only objections made before the hearing examiner may be relied upon subsequently in the proceedings.

(b) *Exceptions.* Formal exception to an adverse ruling is not required. Rulings by the hearing examiner shall not be appealed prior to the transfer of the case to the Secretary, but shall be considered by the Secretary upon filing exceptions to the hearing examiner's recommendations and conclusions.

§ 60-30.22 Offer of proof.

An offer of proof made in connection with an objection taken to any ruling of the hearing examiner excluding proffered oral testimony shall consist of a statement of the substance of the evidence which counsel contends would be adduced by such testimony; and, if the excluded evidence consists of evidence in written form or consists of reference to documents, a copy of such evidence shall be marked for identification and shall accompany the record as the offer of proof.

§ 60-30.23 Public documents.

Whenever a party offers a public document, or part thereof, in evidence, and such document, or part thereof, has been shown by the offeror to be reasonably available to the public, such documents need not be produced or marked for identification, but may be offered for official notice as a public document item by specifying the document or relevant part thereof.

§ 60-30.24 Ex parte communications.

The hearing examiner shall not consult any person, or party, on any fact in issue unless upon notice and opportunity for all parties to participate. No employee or agent of the Federal Government engaged in the investigation and prosecution of this case shall participate or advise in the rendering of the recommended or final decision, except as witness or counsel in the proceeding.

§ 60-[illegible]0.25 Oral argument.

Any party shall be entitled upon request to a reasonable period between the close of evidence and termination of the hearing for oral argument. Oral arguments shall be included in the official transcript of the hearing.

§ 60–30.26 Official transcript.

The Department will designate the official reporter for all hearings. The official transcripts of testimony taken, together with any exhibits, briefs, or memoranda of law filed therewith, shall be filed with the Department. Transcripts of testimony may be obtained from the official reporter by the parties and the public at rates not to exceed the applicable rates fixed by the contract between the Department and the reporter unless distribution is limited by order of the hearing examiner for good cause shown. Upon notice to all parties, the hearing examiner may authorize such corrections to the transcript as are necessary to reflect accurately the testimony.

§ 60–30.27 Summary judgment.

(a) *For Director.* At any time after the expiration of 14 days from the commencement of the action or after service of a motion for summary judgment by the Respondent, the Director may move the hearing examiner with or without supporting affidavits for a summary judgment in his favor upon all claims or any part thereof.

(b) *For Respondent.* The Respondent may, at any time after commencement of the action, move the hearing examiner with or without supporting affidavits for a summary judgment in his favor as to all claims or any part thereof.

(c) *Other parties.* Any other party to a formal proceeding under this part may support or oppose motions for summary judgment made by the Director or Respondent, in accordance with this section, but may not move for a summary judgment in his own behalf.

(d) *Motion and proceedings thereon.* The motion shall be served upon all parties and the hearing examiner or, if no hearing examiner has been designated, upon the Chief Hearing Examiner, at least 15 days before the time fixed for the hearing on the motion. The adverse party or parties may serve opposing affidavits prior to the day of hearing. The judgment sought shall be rendered forthwith if the notice and answer, depositions, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. A summary judgment rendered for or against the Director or the Respondent shall constitute the hearing examiner's findings and recommendations to the Secretary on the issues involved. Hearings on motions made under this section shall be scheduled by the hearing examiner, or the Chief Hearing Examiner, and may be postponed until the date established in the notice for the final hearing on the merits.

(e) *Case not fully adjudicated on motion.* If on motion under this section judgment is not rendered upon the whole case or for all the relief asked and a final hearing is necessary, the hearing examiner at the hearing of the motion, by examining the notice and answer and the evidence before him and by interrogating counsel, shall if practicable ascertain what material facts exist without substantial controversy and what material facts are actually and in good faith controverted. He shall thereupon make an order specifying the facts that appear without substantial controversy, including the extent to which relief is not in controversy, and directing such further proceedings as are just. At the hearing on the merits, the facts so specified shall be deemed established, and the final hearing shall be conducted accordingly.

(f) *Form of affidavits; further testimony; defense required.* Supporting and opposing affidavits shall be made on personal knowledge, shall set forth such facts as would be admissible in evidence, and shall show affirmatively that the affiant is competent to testify to the matters stated therein. Sworn or certified copies of all papers or parts thereof referred to in an affidavit shall be attached thereto or served therewith. The hearing examiner may permit affidavits to be supplemented or opposed by depositions or further affidavits. When a motion for summary judgment is made and supported as provided in this section, an adverse party may not rest upon the mere allegations or denials in his notice or answer, but his response, by affidavit or as otherwise provided in this section, must set forth specific facts showing there is a genuine issue for final hearing. If he does not so respond, summary judgment, if appropriate, shall be rendered against him.

(g) *When affidavits are unavailable.* Should it appear from the affidavits of a party opposing the motion that he cannot for the reasons stated present by affidavit facts essential to justify his opposition, the hearing examiner may refuse the application for summary judgment or may order a continuance to permit affidavits to be obtained or depositions to be taken or discovery to be had or make such other orders as are just.

(h) *Affidavits made in bad faith.* Should it appear to the satisfaction of the hearing examiner at any time that any of the affidavits presented pursuant to this section are presented in bad faith or solely for the purpose of delay, the hearing examiner may make such orders and impose such sanctions as may be appropriate against the offending party.

SUBPART F—POST HEARING PROCEDURES

§ 60–30.28 Proposed findings of fact and conclusions.

Within 20 days after receipt of the transcript of the testimony, each party and amicus may file a brief with the hearing examiner. Such briefs shall be served simultaneously on all parties and amici, and a certificate of service shall be furnished to the hearing examiner. Requests for additional time in which to file a brief shall be made to the hearing examiner, in writing, and copies shall be served simultaneously on the other parties. Requests for extensions shall be received not later than 3 days before the date such briefs are due. No reply brief may be filed except by special permission of the hearing examiner.

§ 60–30.29 Record for recommended decision.

The transcript of testimony, exhibits, and all papers, documents, and requests filed in the proceedings, including briefs, but excepting the correspondence section of the docket, shall constitute the record for decision.

§ 60–30.30 Recommended decision.

Within 20 days after the filing of briefs, or, if the parties elect not to file such documents, not more than 20 days after the close of the hearing, the hearing examiner shall recommend findings, conclusions, and a decision. These recommendations shall be certified, together with the record for recommended decision, to the Secretary for his decision. The recommended findings, conclusions, and decisions shall be served on all parties and amici to the proceeding.

§ 60–30.31 Exceptions to recommended decisions.

Within 14 days after receipt of the hearing examiner's recommended findings, conclusions, and decision, any party may submit exceptions to said recommendation. These exceptions may be responded to by other parties within 10 days of their receipt by said parties. All exceptions and responses shall be filed with the Secretary. Service of such briefs or exceptions and responses thereto shall be made simultaneously on all parties to the proceeding, and a certificate of service shall be furnished to the Secretary. Requests to the Secretary for additional time in which to file exceptions and responses thereto shall be in writing and copies thereof shall be served simultaneously on other parties. Requests for extensions must be received no later than 3 days before the exceptions are due.

§ 60–30.32 Record.

After expiration of the time for filing briefs and exceptions, the Secretary shall make a final decision on the basis of the record before him. The record shall consist of the record for recommended decision, the rulings and recommended decision of the hearing examiner, and the exceptions and briefs filed subsequent to the hearing examiner's decision.

§ 60–30.33 Final decision.

After expiration of the time for filing, the Secretary shall make a final decision on the basis of the record for decision, and upon consideration of any exceptions and briefs filed subsequent to the hearing. A copy of the decision of the Secretary shall be served on all parties and amici to the proceeding.

SUBPART G—MISCELLANEOUS

§ 60–30.34 Cooperation by agencies.

All agencies are directed to cooperate with the Director and his representatives in the prosecution of any matter under this part. Such cooperation shall include, but not be limited to, the furnishing of information and other assistance in hearing preparation, and the production of witnesses and documents upon request for participation or use in the conduct of hearings.

§ 60–30.35 Effect of this part on other rules and regulations.

All orders, instructions, regulations, and memoranda of the Secretary of Labor and other officials of the Department of Labor and the agencies are hereby superseded to the extent they are inconsistent herewith.

PART 60-40—EXAMINATION AND COPYING OF OFCC DOCUMENTS

SUBPART A—GENERAL

Sec.
60-40.1 Purpose and scope.
60-40.2 Information available on request.
60-40.3 Information exempt from compulsory disclosure and which may be withheld.
60-40.4 Information disclosure of which is prohibited by law.

SUBPART B—PROCEDURE FOR DISCLOSURE

60-40.5 Applicability of procedures.
60-40.6 To whom to direct requests.
60-40.7 Particular disclosure.
60-40.8 Facilities and procedures for disclosure.

AUTHORITY: Executive Order 11246, as amended by Executive Order 11375; 5 U.S.C. 552.

SOURCE: 38 FR 3193, Feb. 2, 1973, unless otherwise noted.

SUBPART A—GENERAL

§ 60-40.1 Purpose and scope.

This part contains the general rules of the OFCC providing for public access to information from records of the OFCC or its various compliance agencies. These regulations implement 5 U.S.C. 552, the Freedom of Information Act and supplement the policy and regulations of the Department of Labor, 29 CFR Part 70. It is the policy of the OFCC to disclose information to the public and to cooperate with other public agencies as well as private parties seeking to eliminate discrimination in employment. This part sets forth generally the categories of records accessible to the public, the types of records subject to prohibitions or restrictions on disclosure, and the places at which and the procedures whereby members of the public may obtain access to and inspect and copy information from records in the custody of the OFCC and the compliance agencies.

§ 60-40-2. Information available on request.

(a) Upon the request of any person for identifiable records obtained or generated pursuant to Executive Order 11246 (as amended) such records shall be made available for inspection and copying, notwithstanding the applicability of the exemption from mandatory disclosure set forth in 5 U.S.C. 552 subsection (b), if it is determined that the requested inspection or copying furthers the public interest and does not impede any of the functions of the OFCC or the Compliance Agencies except in the case of records disclosure of which is prohibited by law.

(b) Consistent with the above, all contract compliance documents within the custody of the OFCC and the Compliance Agencies shall be disclosed upon request unless specifically prohibited by law or as limited elsewhere herein. The types of documents which if in the custody of the OFCC or Compliance Agencies must be disclosed include, but are not limited to, the following:

(1) Affirmative action plans, whether or not reviewed and finally accepted by the OFCC or the Compliance Agencies except as limited in 41 CFR 60-40.3 (a)(1).

(2) Imposed plans and hometown plans, pending or approved.

(3) Text of final conciliation agreements.

(4) Validation studies of tests or other preemployment selection methods.

(5) Dates and times of scheduled compliance reviews.

§ 60-40.3 Information exempt from compulsory disclosures and which may be withheld.

(a) The following documents or parts thereof are exempt from mandatory disclosure by the OFCC and the compliance agencies, and should be withheld if it is determined that the requested inspection or copying does not further the public interest and might impede the discharge of any of the functions of the OFCC or the Compliance Agencies.

(1) Those portions of affirmative action plans such as goals and timetables which would be confidential commercial or financial information because they indicate, and only to the extent that they indicate, that a contractor plans major

shifts or changes in his personnel requirements and he has not made this information available to the public. A determination by an agency to withhold this type of information should be made only after receiving verification and a satisfactory explanation from the contractor that the information should be withheld.

(2) Those portions of affirmative action plans which constitute information on staffing patterns and pay scales but only to the extent that their release would injure the business or financial position of the contractor, would constitute a release of confidential financial information of an employee or would constitute an unwarranted invasion of the privacy of an employee.

(3) The names of individual complainants.

(4) The assignments to particular contractors of named compliance officers if such disclosure would subject the named compliance officers to undue harassment or would affect the efficient enforcement of the Executive order.

(5) Compliance investigation files including the standard compliance review report and related documents, during the course of the review to which they pertain or while enforcement action against the contractor is in progress or contemplated within a reasonable time. Therefore, these reports and related files shall not be disclosed only to the extent that information contained therein constitutes trade secrets and confidential commercial or financial information, inter-agency or intra-agency memoranda or letters which would not be available by law to a private party in litigation with the agency, personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, data which would be exempt from mandatory disclosure pursuant to the "informants privilege" or such information the disclosure of which is prohibited by statute.

(6) Copies of preemployment selection tests used by contractors.

(b) Other records may be withheld consistent with the Freedom of Information Act on a case-by-case basis, with the prior approval of the Director, OFCC.

§ 60–40.4 Information disclosure of which is prohibited by law.

The Standard Form 100 (EEO–1) which is submitted by contractors to the OFCC, a compliance agency or a Joint Reporting Committee servicing both the OFCC and the EEOC shall be disclosed pending further instructions from the Director, OFCC. The statutory prohibition on disclosure set forth in Section 709 (e) of the Civil Rights Act of 1964 is limited by the terms of that section to information obtained pursuant to the authority of title VII of that Act and its disclosure by employees of the EEOC.

SUBPART B—PROCEDURES FOR DISCLOSURE

§ 60–40.5 Applicability of procedures.

Requests for the inspection and copy of information from records in the custody of the OFCC or the Compliance Agencies which are identifiable and available under the provisions of Subpart A of this part shall be made and acted upon as provided in the following sections of this subpart. Officers and employees of the OFCC and the Compliance Agencies are authorized by the Director, OFCC to continue to furnish to the public, informally and without compliance with these procedures, information and copies from its records which prior to the enactment of the Freedom of Information Act (5 U.S.C. 552) were customarily furnished in the regular performance of their duties.

§ 60–40.6 To whom to direct requests.

A request for contract compliance records or information shall be directed to the Director of Contract Compliance of the agency designated as the appropriate Compliance Agency for the industry to which the records pertain, pursuant to 41 CFR 60–1.3(d). If the person making the request does not know in which Compliance Agency the record is located, he may direct his request to the Director, Office of Federal Contract Compliance, Department of Labor, 14th and Constitution Avenue NW., Washington, DC 20210, for appropriate handling.

§ 60–40.7 Partial disclosure.

If a requested record contains some materials which are protected from disclosure and other materials which are not so protected, identifying details or protected matters shall be deleted wherever analysis indicates that such deletions are feasible. Whenever such deletions are made, the remainder of the records may be disclosed.

§ 60–40.8 Facilities and procedures for disclosure.

(a) Procedural matters such as where the information may be inspected, forms of requests, time for reply to requests, forms of denials, appeals from denials, and fees for special services and copying services, shall be controlled by the general regulations of the custodial agency except to the extent modified herein.

(b) Procedures relating to the availability of records in the custody of the OFCC shall be governed by the Department of Labor regulations, 29 CFR 70.35 to 29 CFR 70.64.

(c) Copies of all requests for disclosure of information made directly to the Compliance Agencies shall be submitted to the OFCC within 5 calendar days of receipt. The compliance agencies shall thereafter allow 5 working days from the time the request is submitted to the OFCC for comment by the OFCC. Delay by the OFCC may be waived at the request of the compliance agency.

(d) The compliance agencies shall furnish the OFCC with copies of all initial actions by the agencies granting or denying a request for information. The OFCC shall be given an opportunity by the Compliance Agencies to consult on all appeals from initial decisions denying requests for information.

PART 60–50—GUIDELINES ON DISCRIMINATION BECAUSE OF RELIGION OR NATIONAL ORIGIN

Sec.
60–50.1 Purpose and [illegible].
60–50.2 Equal employ[illegible] policy.
60–50.3 Accommodations to religious observance and practice.
60–50.4 Enforcement.
60–50.5 Nondiscrimination.

AUTHORITY: Sec. 201, E.O. 11246, 30 FR 12319, and E.O. 11375, 32 FR 14303.

SOURCE: 38 FR 1933, Jan. 19, 1973, unless otherwise noted.

§ 60–50.1 Purpose and scope.

(a) The purpose of the provisions in this part is to set forth the interpretations and guidelines of the Office of Federal Contract Compliance regarding the implementation of Executive Order 11246, as amended, for promoting and insuring equal employment opportunities for all persons employed or seeking employment with Government contractors and subcontractors or with contractors and subcontractors performing under federally assisted construction contracts, without regard to religion or national origin.

(b) Members of various religious and ethnic groups, primarily but not exclusively of Eastern, Middle, and Southern European ancestry, such as Jews, Catholics, Italians, Greeks, and Slavic groups, continue to be excluded from executive, middle-management, and other job levels because of discrimination based upon their religion and/or national origin. These guidelines are intended to remedy such unfair treatment.

(c) These guidelines are also intended to clarify the obligations of employers with respect to accommodating to the religious observances and practices of employees and prospective employees.

(d) The employment problems of blacks, Spanish-surnamed Americans, orientals, and American Indians are treated under Part 60–2 of this chapter and under other regulations and procedures implementing the requirements of Executive Order 11246, as amended. Accordingly, the remedial provisions of § 60–50.2(b) shall not be applicable to the employment problems of these groups.

[38 FR 1933, Jan. 19, 1973; 38 FR 3511, Feb. 7, 1973]

§ 60–50.2 Equal employment policy.

(a) *General requirements.* Under the equal opportunity clause contained in section 202 of Executive Order 11246, as amended, employers are prohibited from discriminating against employees or applicants for employment because of religion or national origin, and must take affirmative action to insure that applicants are employed, and that employees are treated during employment, without regard to their religion or national origin. Such action includes, but is not limited to the following: Employment, upgrading, demotion, or transfer: recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

(b) *Outreach and positive recruitment.* Employers shall review their employment practices to determine whether members of the various religious and/or ethnic groups are receiving fair consideration for job opportunities. Special attention shall be directed toward executive and middle-management levels, where employment problems relating to religion and national origin are most likely to occur. Based upon the findings of such reviews, employers shall undertake appropriate outreach and positive recruitment activities, such as those listed below, in order to remedy existing deficiencies. It is not contemplated that employers necessarily will undertake all of the listed activities. The scope of the employer's efforts shall depend upon all the circumstances, including the nature and extent of the employer's deficiencies and the employer's size and resources.

(1) Internal communication of the employer's obligation to provide equal employment opportunity without regard to religion or national origin in such a manner as to foster understanding, acceptance, and support among the employer's executive, management, supervisory, and all other employees and to encourage such persons to take the necessary action to aid the employer in meeting this obligation.

(2) Development of reasonable internal procedures to insure that the employer's obligation to provide equal employment opportunity without regard to religion or national origin is being fully implemented.

(3) Periodically informing all employees of the employer's commitment to equal employment opportunity for all persons, without regard to religion or national origin.

(4) Enlisting the assistance and support of all recruitment sources (including employment agencies, college placement directors, and business associates) for the employer's commitment to provide equal employment opportunity without regard to religion or national origin.

(5) Reviewing employment records to determine the availability of promotable and transferable members of various religious and ethnic groups.

(6) Establishment of meaningful contacts with religious and ethnic organizations and leaders for such purposes as advice, education, technical assistance, and referral of potential employees.

(7) Engaging in significant recruitment activities at educational institutions with substantial enrollments of students from various religious and ethnic groups.

(8) Use of the religious and ethnic media for institutional and employment advertising.

§ 60–50.3 Accommodations to religious observance and practice.

An employer must accommodate to the religious observances and practices of an employee or prospective employee unless the employer demonstrates that it is unable to reasonably accommodate to an employee's or prospective employee's religious observance or practice without undue hardship on the conduct of the employer's business. As part of this obligation, an employer must make reasonable accommodations to the religious observances and practices of an employee or prospective employee who regularly observes Friday evening and Saturday, or some other day of the week, as his Sabbath and/or who observes certain religious holidays during the year and who is conscientiously opposed to performing work or engaging in similar activity on such days, when such accommodations can be made without undue hardship on the conduct of the employer's business. In determining the extent of an employer's obligations under this section, at least the following factors shall be considered: (a) Business necessity, (b) financial costs and expenses, and (c) resulting personnel problems.

§ 60–50.4 Enforcement.

The provisions of this part are subject to the general enforcement, compliance review and complaint procedures set forth in Subpart B of Part 60–1 of this chapter.

§ 60–50.5 Nondiscrimination.

The provisions of this part are not intended and shall not be used to discriminate against any qualified employee or applicant for employment because of race, color, religion, sex, or national origin.

PART 60–60—CONTRACTOR EVALUATION PROCEDURES FOR CONTRACTORS FOR SUPPLIES AND SERVICES

SUBPART A—GENERAL

Sections

60–60.1 Purpose and scope.
60–60.2 Background.

SUBPART B—PROCEDURES FOR CONTRACTOR EVALUATION

60-60.3 Agency actions.

SUBPART C—DISCLOSURE AND REVIEW OF CONTRACTOR DATA

60-60.4 Confidentiality and relevancy of information.

60-60.6 Exit conference.
60-60.7 Time schedule for completion.

AUTHORITY: 5 U.S.C. 553(a)(3)(B), 29 CFR 2.7; sec. 201, E.O. 11246, 30 FR 12319, and E.O. 11375, 32 FR 14303.

SOURCE: 39 FR 5630, Feb. 14, 1974, unless otherwise noted.

SUBPART A—GENERAL

§ 60-60.1 Purpose and scope.

This part shall be known as "Revised Order No. 14" and is intended to establish standardized contractor evaluation procedures for compliance agencies in their conduct of compliance reviews of contractors for supplies and services subject to the Equal Employment Opportunity Requirements of 41 CFR 60-1.40 and 41 CFR Part 60-2 (Revised Order No. 4) for the development of written affirmative action programs.

§ 60-60.2 Background.

(a) Each prime contractor or subcontractor with 50 or more employees and a contract of $50,000 or more is required to develop a written affirmative action program for each of its establishments (§ 60-1.40 of this chapter). If a contractor fails to submit an affirmative action program and supporting documents, including the workforce analysis within 30 days of a request therefor, the enforcement procedures specified in OFCC Order No. 4 (§ 60-2.2(c) of this chapter) shall be applicable.

(b) Required affirmative action programs must contain a utilization analysis and goals and timetables as required in § 60-2.11 and § 60-2.12 of this chapter.

SUBPART B—PROCEDURES FOR CONTRACTOR EVALUATION

§ 60-60.3 Agency actions.

Basic steps. A contractor evaluation should proceed as follows: (1) A desk audit of the contractor's affirmative action program with special attention directed to the included workforce analysis, using the format set forth in the Standard Compliance Review Report, (2) an on-site review of those matters which still are not fully or satisfactorily addressed in the affirmative action program and workforce analysis, using the format set forth in the Standard Compliance Review Report and (3) where necessary, an off-site analysis of information supplied by the contractor during or pursuant to the on-site review. (The standard compliance review report will be published on or before the effective date of this part.) Contractors may reach agreement with their respective compliance agencies on nationwide AAP formats or on frequency of updating statistics with the approval of the Director of OFCC.

(a) *Desk Audit.* Using OFCC approved methods of priority selection, compliance agencies shall routinely request from among the Federal contractors within their jurisdiction affirmative action programs and supporting documentation, including the workforce analysis and support data for audit. As used throughout this part, the term "Affirmative Action Program (AAP) and supporting documentation" means the Required Contents of Affirmative Action Programs, as set forth in Subpart B of 41 CFR Part 60-2 and Methods of Implementing the Requirements of Subpart B, set forth in Subpart C of 41 CFR Part 60-2. "Workforce analysis" is defined as a listing of each job title as appears in applicable collective bargaining agreements or payroll records (not job groups) ranked from the lowest paid to the highest paid within each department or other similar organizational unit including departmental or unit supervision. If there are separate work units or lines of progression within a department a separate list must be provided for each such work unit, or line, including unit supervisors. For lines of progression there must be indicated the order of jobs in the line through which an employee could move to the top of the line. Where there are no formal progression lines or usual promotional sequences, job titles should be listed by department, job families, or disciplines, in order of wage rates or salary ranges. For each job title, the total number of incumbents, the total number of male and female incumbents, and the total number of male and female incumbents in each of the following groups must be given: Blacks, Spanish-surnamed Americans, American Indians, and Orientals. The wage rate or salary range for each job title must be given. All job titles, including all managerial job titles, must be listed.

(1) *Exceptions to the desk audit requirements.* For pre-award reviews and for complaint investigations with the approval of the agency Contract Compliance Officer (as defined at § 60–1.6(b)), the desk audit need not be carried out or an abbreviated desk audit may be performed and an immediate on-site review performed. Special reports that meet the criteria in (b) (1) below may be requested from contractors, as required, for submission to the agency for complaint investigations and follow-up reviews performed within 1 year of a full compliance review. The Director may approve other special compliance reviews when the circumstances require an immediate on-site review.

(b) *On-site review.* If upon selection of an AAP and included workforce analysis for desk audit, the compliance agency finds that the material submitted does not demonstrate a reasonable effort by the contractor to meet all the requirements of subparts B and C of Order No. 4 (Part 60–2 of this chapter) the on-site review need not be carried out and the enforcement procedures specified in Order 4 shall be applicable. Otherwise following a desk audit of the affirmative action program and supporting documentation the agency will schedule an on-site review of the establishment, provided, that an on-site review need not be carried out when the agency can determine that the contractor's affirmative action program is acceptable. This determination must be based on the current desk audit and an on-site review conducted within the preceding 24 months and also must include an affirmative determination that the circumstances of the previous on-site review have not substantially changed.

(1) Each agency is to request from those contractors scheduled for on-site reviews that information necessary to perform the review be made available on-site. Specifically, this includes (i) information necessary to conduct an in-depth analysis of apparent deficiencies in the contractors utilization of women or minorities, (ii) information required for a complete and thorough understanding of data contained in or offered as support for the affirmative action program and (iii) information concerning matters relevant to a determination of compliance with the requirements of Executive Order 11246 (as amended), but not adequately addressed in the affirmative action program. However, the contractor should be requested to furnish only the specific items of information which the compliance officer determines are:

(a) Necessary for conducting the review and completing the standard compliance review report, and

(b) Not contained in or able to be derived from the material submitted by the contractor.

(2) In order to pursue certain issues uncovered in the compliance review, it may be necessary for the compliance officer to request certain additional information on-site even though such data have not been previously identified. Such additional information must also meet the above criteria.

(c) *Off-site analysis.* Where necessary, the compliance officer may take information made available during the on-site review off-site for further analysis. An off-site analysis should be conducted where issues have arisen concerning deficiencies or an apparent violation which, in the judgment of the compliance officer, should be more thoroughly analyzed off-site before a determination of compliance is made.

SUBPART C—DISCLOSURE AND REVIEW OF CONTRACTOR DATA

§ 60–60.4 Confidentiality and relevancy of information.

(a) *Desk audit data.* If the contractor is concerned with the confidentiality of such information as lists of employees, employee names, reasons for termination and pay data, then alphabetic or numeric coding or the use of an index of pay and pay ranges are acceptable for desk audit purposes.

(b) *On-site data.* The contractor must provide full access to all relevant data on-site as required by § 60–1.43 of this chapter.

(c) *Data required for off-site analysis.* The contractor must provide all data determined by the Compliance officer to be necessary for off-site analysis pursuant to § 60–60.3(c) above. Such data may only be coded if the contractor makes the code available to the compliance agency. If the contractor believes that particular informatoin which is to be taken off-site is not relevant to compliance with the Executive Order, the contractor may request a ruling by the agency Contract Compliance Officer. The contract compliance officer shall issue a ruling within 10 days. The contractor may appeal that ruling to the Director of OFCC within 10 days. The Director of OFCC shall issue a final ruling within 10 days. Pending a final ruling, the information in question must be made available to the compliance officer off-site, but shall be considered a part of the investigatory file and subject to the provisions of paragraph (d) below. The agency shall take all necessary precautions to safeguard the confidentiality of such information until a final determination is made. Such information may not be copied by the agency and access to the information shall be limited to the compliance officer and agency personnel involved in the determination of relevancy. Data determined to be not relevant to the investigation will be returned to the contractor immediately.

(d) *Public access to information.* Information obtained from a contractor under Subpart B will be subject to the public inspection and copying provisions of the Freedom of Information Act, 5 U.S.C. 552. Contractors should identify any information which they believe is not subject to disclosure under 5 U.S.C. 552, and should specify the reasons why such information is not disclosable. The Contract Compliance Officer will consider the contractors claim and make a determination, within 10 days, as to whether the material in question is exempt from disclosure. The contract compliance officer will inform the contractor of such a determination. The contratcor may appeal that ruling to the Director of OFCC within 10 days. The Director of OFCC shall make a final determination within 10 days of the filing of the appeal. However, during the conduct of a compliance review or while enforcement action against the contractor is in progress or contemplated within a reasonable time, all information obtained from a contractor under Subpart B except information disclosable under §§ 60–40.2 and 60–40.3 of this chapter is to be considered part of an investigatory file compiled for law enforcement purposes within the meaning of 5 U.S.C. 552(b)(7), and such information obtained from a contractor under Subpart B shall be treated as exempt from mandatory disclosure under the Freedom of Information Act during the compliance review.

(e) *Examination and copying of documents.* Nothing contained herein is intended to supersede or otherwise limit the provisions contained in part 60–40 of this chapter for public access to information from records of the OFCC or its various compliance agencies.

§ 60–60.5 Employee interviews.

The compliance officer should contact, where appropriate, a reasonable number of employees for interviews as part of the on-site review of the contractors' employment practices. The number, scope and manner of conducting such interviews should be discussed in advance with the contractor.

§ 60–60.6 Exit conference.

(a) Upon completion of the on-site review (and off-site analysis, if one is undertaken) the compliance officer should schedule an exit conference with contractor officials to review the findings of the review. This exit conference should itemize the apparent violations that lend themselves to immediate correction, and solicit the contractor's agreement to take adequate corrective action by specified dates. The contractor's commitments should be contained in a written conciliation agreement signed at the exit conference. However, in cases where the apparent deficiencies require further analysis subsequent to the on-site review, the compliance officer will advise the contractor of the areas of concern, secure the data necessary to his ultimate compliance determination, complete the review later by notifying the contractor in writing of all apparent violations found, and obtain the contractor's commitments in a written conciliation agreement to correct such deficiencies.

(b) The contractor may at any time avail himself of the provisions of § 60–1.24 (c)(4) of this chapter which provides as follows:

When a prime contractor or subcontractor, without a hearing, shall have complied with the recommendations or orders of an agency or the Director and believes such recommendations or orders to be erroneous, he shall, upon filing a request therefor within 10 days of such compliance, be afforded an opportunity for a hearing and review of the alleged erroneous action by the agency or the Director.

§ 60–60.7 Time schedule for completion.

(a) With the exception of extensions of time granted by the Director of OFCC for good cause shown, within 60 days from the date the affirmative action program including the workforce analysis is received by the agency, the compliance agency must either have found the contractor in compliance and notified the contractor of that fact, or must have issued a 30-day show cause notice as required under the rules and regulations pursuant to the Executive Order.

(b) During this period the compliance agency shall:

(1) Complete the desk audit.

(2) Schedule the on-site review.

(3) Complete the on-site review.

(4) Complete the off-site analysis, if conducted.

(5) Give notice of compliance or issue show cause notice.

(6) Complete and forward the coding sheet to OFCC.

(c) A contractor's affirmative action plan may be accepted only after the coding sheet has been forwarded to OFCC. The coding sheet is the notification required by § 60–2.2.(a)(2) of this chapter. Failure of the compliance agency to give the contractor a notice of compliance or issue a show cause notice within the time period set forth in paragraph (a) shall not be deemed a finding of compliance or acceptance of the contractor's affirmative action program by the compliance agency.

§ 60–60.8 Supersedure.

The requirements of this Part 60–60 supersede the prior version of Revised Order No. 14 published at 38 FR 13376, May 21, 1973.

(5 U.S.C. 553(a)(3)(b) 29 CFR 2.7 section 201, Executive Order 11246, 30 FR 12319, and Executive Order 11375, 32 FR 14303.)

§ 60–60.9 Attachments.

The following formats are set out in full as they give detailed information as to procedures and requirements of value to contractors:

STANDARD COMPLIANCE REVIEW REPORT

CONTRACT COMPLIANCE REVIEW PROCEDURE AND REPORT FORMAT

Purpose: The purpose of these guidelines is to provide compliance officers with a systematic standardized approach to the conducting of a compliance review and the preparation of a comprehensive report under Revised Order No. 14. It is not meant to be an all inclusive or an inflexible document to be used in sequence in the actual conducting of a compliance review, but it is an effort to point out the essential elements that should at least be addressed in all such efforts. An analysis of the affirmative action program and support data is required of each contractor facility targeted for review. The purpose of your analysis is to determine if the contractor is in compliance with the requirements of Executive Order 11246, as amended, and the implementing regulations. If your analysis identifies deficiencies, the reasons or possible reasons (including past or present personnel policies or practices) why certain deficiencies exist should be identified and evaluated as well as the appropriateness of the actions the contractor has taken or plans he intends to take. This will enable you to make a determination of whether or not the contractor is in compliance with the Executive Order.

In preparing the actual written report for official submission (which is subject to review by the Office of Federal Contract Compliance), the information must be presented in the prescribed format irrespective of the agency originating the review. The prescribed format is the various items listed below in the order in which they are listed. Instructions for the analysis for each heading are found in the Desk Audit Section, or in the On-Site Review Section of these guidelines.

Part A. Desk Audit Section

I. Identifying Information
II. Workforce Analysis
III. Recruitment, Hiring, Selection and Placement
IV. Promotion and Transfer
V. Terminations
VI. Analysis of Jobs with Substantial Concentrations of Minorities or Women

Part B. On-Site Review

I. **Identifying Information**
II. **Community Survey**
III. **Initial Contact with Contractor**
IV. **EEO Policies and Procedures**
V. **Recruitment, Hiring, Selection and Placement**
VI. **Promotion and Transfer**
VII. **Terminations**
VIII. **Supervisory Positions**
IX. **Pay Practices**
X. **Analysis of Jobs with Substantial Concentrations of Minorities or Women**
XI. **Training and Educational Opportunities**
XII. **Goals and Timetables**
XIII. **Religious and National Origin Discrimination**

In addition, no review is competed until the Coding Sheet is forwarded to OFCC. The Coding Sheet provides the necessary instructions for its completion.

Part A. Desk Audit Section

I. Identifying Information.

A. Indicate: the name and address of the contractor; the date the letter was sent requesting the affirmative action program and supporting documentation including the workforce analysis, the date the AAP was received; the type of review (i.e., pre-award, post-award, follow-up or other).

B. In beginning the desk audit, determine and so indicate whether or not there is a utilization analysis for minorities and women that considers the points itemized in 41 CFR 60–2.11. Discuss fully any deficiencies with the analysis. Has the contractor established goals and timetables for minorities and women to the extent required by 41 CFR 60–2.12? If the contractor has not established a goal, does his AAP analyze the factors in 41 CFR 60–2.11? Does the contractor's AAP include all the ingredients listed in 41 CFR 60–2.13? This discussion should be a brief introductory statement to the further analysis which will constitute the desk audit.

II. Workforce Analysis.

A. *Composition.* (1) An adequate compliance review must always be founded on a clear understanding of where minorities and women are *not* employed in the contractor's workforce. An overall view of the composition of the workforce should be obtained by reviewing the most recent copy of SF–100 (EEO–1) as well as copies of the official submission for the past year or more. This analysis should indicate such potential problem areas as whether or not minorities and women are employed in higher level job categories, under-utilization of women in nonclerical jobs, and concentrations of minorities and/or women in service worker or unskilled categories. The comparison made with past EEO–1 reports will give some insight into the kind of progress being made by the company in their overall employment pattern. Also review the rank and pertinent data on the establishment in Table C of the OFCC Target Selection and Evaluation System for the past year or more.

(2) Prepare your analysis of this summary information, recognizing that these comparisons are most fundamental in nature and only form the foundation from which to explore minority group and female utilization. Further exploration in the utilization of minorities and women must now be made.

(3) The composition of the workforce by minority group and sex must be understood well beyond EEO–1 job categories and must consider where such employees are working and not working in individual departments or other units. This is necessary in order to determine whether of not the company is underutilizing minorities or women in certain jobs, and whether or not minority groups or females are employed in specific jobs, and as a result might be identified as members of an "affected class".

B. *Examination of Work Force Analysis.* (1) Review the "workforce analysis" required from the contractor. For the purpose of this report alphabetic or numeric coding or the use of an index of pay and pay ranges is acceptable and should be used when contractors are concerned about confidentiality of salary information.

(2) List the job titles by department in which the minority or female proportions either do not generally reflect the minority or female composition of the establishment's labor force or the labor force of the area within which it is

reasonable to expect persons to commute. These titles are to be considered "focus job titles". Also list as "focus job titles" areas with substantial concentration of minorities or women and also job titles where minorities or women may be continuing to suffer the effects of past discrimination. These problem areas will now be the principle focus of the review. Present your analysis for each such "focus job title" listed, including at least all of the following areas:

(a) Is the job group to which this job title belongs addressed as an area of deficiency or source of promotable persons in the affirmative action program? Where certain job titles within a given job group show an inordinate and consistent absence of minorities or women in relation to their availability, the contractor may be required to establish and set worth specific goals and timetables for these job titles separately from the goals for the job group of which they are a part.

(b) Are any problems in the utilization of minority men or minority women or members of a particular minority group (Blacks, Spanish-surnamed Americans, Orientals or American Indians) addressed where necessary through the establishment of separate goals and timetables? See 41 CFR 60–2.12(k).

(c) In the job group to which this job title belongs, are goals and timetables significant and attainable such that underutilization will be eliminated in a reasonable period of time and that turnover and growth are considered in the establishment of numerical goals, including the use of percentages as backup goal estimates? See 41 CFR 60–2.12.

(d) Are other appropriate actions included in the affirmative action program to remedy current concentrations of minorities or women in certain jobs?

(3) *Evaluation of Contractors AAP and Focus Job Titles.* (a) If in your analysis, you conclude that the contractor's affirmative action program has satisfactorily addressed each of these areas, then add your analysis of the contractor's past achievements for the relevant focus job title and the current status of attainment in his affirmative action program. Has the contractor met his past goals and is he proceeding at a current rate of progress that implies he will meet current goals? I not, you must determine if the contractor has made a good faith effort to achieve these goals. Cite the specific efforts that you conclude demonstrate good faith. Include your analysis as called for in item XII of the on-site section of these guidelines as part of this desk audit.

(b) If in your analysis, you conclude that the contractor's affirmative action program has not satisfactorily addressed any of these areas, then you must identify the additional information needed. Include the following in your analysis of the contractor's AAP.

(1) Such material as organizational charts.

(2) Promotional sequences and line of progression charts (if established).

(c) In subsequent sections of the desk audit, specific analysis is required. If the information necessary for an adequate analysis is not available in the contractor's affirmative action program or if the focus job titles are not adequately included, a letter to the contractor should be sent prior to the on-site visit informing him of the information that must be available on site. Items for possible inclusion in the letter are: applications and information on applicants (see III B); rejections, (see III E); promotions and transfers (see IV); terminations (see V); and job groups (see VI). These items are not intended to be used to impose additional standard reporting requirements on contractors. The regulations require an analysis of each of these areas and the contractor may prepare an analysis that meets the regulations and the contractor's own needs through the affirmative action program and support data. An adequate analysis by the contractor will enable you to prepare an analysis similar to that called for in each section of this report or to determine that the area is not causing an equal opportunity problem. If the contractor's analysis is inadequate under the regulations, or if the focus job titles cited by you in your review of the workforce analysis are not included, or if information is needed for the three categories cited in 41 CFR 60–60.3(b)(1) then the contractor should be informed of the additional information that must be made available on site. In addition, you must determine that such requests meet the requirements of 41 CFR 60–60.3(b)(1) (a) and (b).

III. Recruitment, Hiring, Selection and Placement.

A. OFCC regulations require contractors to conduct an analysis of applicant flow as part of their hiring practices. (41 CFR 60–1.40(b)(2), 60–2.12(1), 60–2.23(a)(2), (3), (4), and 60–2.24 (d) and (e)). Review the sections of the affirmative action program that contain this analysis.

B. Prepare as a part of this report, your analysis of the contractor's data on recruitment, hiring, selection and placement. Determine if the data supplied by the contractor is adequate under the regulations and analyze these data. Your analysis should reflect applicant activity for the last year. If the number of applicants in the last year was less than 100, your analysis should include all such applicants. If the number of applicants in the last year was more than 100, your analysis should include an appropriate sample of 10 percent of such applicants or 100, whichever is greater. Summarize total applicants by total, male, female, and male and female minority classifications. While in many cases applicants are not classified by particular job, it should be possible to provide some separation of the applicant flow count into at least broad occupation groups. Report the number of offers of employment for each category and by total, male, female, and male and female minority classifications. The acceptance should be related to the job groups outlined by you in your review of the workforce analysis.

C. If the data supplied by the contractor are inadequate under the regulations or if the data relevant to the focus job titles cited by you in your review of the workforce analysis are not indicated, further information will be necessary. In the letter prior to the on-site visit, advise the contractor to maintain such data in the future and that the following collection of data will be made during the on-site review to determine any problems that may exist in applicant flow and hiring rates. Because information is more readily accessible on site and to insure that the recruitment, hiring, selection and placement procedures are adequately analyzed, more information will be necessary.

During the on-site review, obtain applications of applicants for blue-collar employment and applicants for white-collar employment. You may use a random sample or an immediate past chronological period. You should be sure to include the job titles cited by you in your review of the workforce analysis. Now construct the report described in the paragraph above showing applicants, offers and acceptances by total, male, female, and male and female minority classifications by as much organization job grouping detail as possible.

D. Based on the data collected under paragraph B or C above, indicate whether or not the proportion of offers or hires to minorities or women is less than the porportion of applicants who are minorities or women for the particular job groups. If so, the basis for this rejection rate must be investigated and discussed. Discuss the selection procedures used for these jobs. Explore whether or not the distribution of those minorities or women actually employed reflects a current or past lower rate of hire.

E. For any job group identified in paragraph D above as having a lower rate of offers or hires for minorities or women than indicated by the applicant flow, ask the contractor in the letter prior to the on-site visit (or during the on-site review if the information in paragraph B is collected on site), to have available for the on-site review, an analysis showing the reasons for the rejection of applicants for total and by appropriate race and sex groups for these job groups. Reasons include but are not necessarily limited to:

(1) Qualified for some jobs, but no vacancies at time of application.
(2) Failed to fill out application completely.
(3) Failed paper-and-pencil or performance tests.
(4) Failed educational requirements.
(5) Unsatisfactory work history.
(6) Unfavorable credit report.
(7) Unfavorable interview.
(8) Unfavorable reference check.
(9) Failed physical requirements.
(10) Transportation inadequate.
(11) Criminal convictions.
(12) Applicant rejected contractor's offer of employment.

IV. Promotion and Transfer.

Review the contractor's analysis of promotions and transfers in his affirmative action program. If such analysis is not available, or if the contractor's analysis is inadequate under the regulations, the investigator should ask the contractor in the letter prior to the on-site review to prepare for the on-site review a list of promotions. If the number of promotions in the last year was less than 100, your analysis should include all such promotions. If the number of promotions in the last year was more than 100 your analysis should include an appropriate sample of 10 percent of such promotions or 100, whichever is greater. A promotion is defined as any personnel action resulting in movement to a position of greater skill, effort or responsibility. Wage increases alone do not determine a promotion. The review should relate name or other identification to minority/majority group status, sex, previous job, department and pay, and new job and department and pay.

V. Termination.

Review the contractor's analysis of terminations in his affirmative action program. If such analysis is not available or if the contractor's analysis presented in the affirmative action program is inadequate under the regulations or if the focus job titles cited by you in your review of the workforce analysis are not included, advise the contractor in the letter prior to the on-site review, to prepare for the on-site review a list of terminations, by name or other identification, showing hire and termination date, job assignment, minority/majority group membership and sex. To determine if there is an unfair disparity of company policies, terminations should be reviewed. If the number of terminations in the last year was less than 100, your analysis should include all such terminations. If the number of terminations in the last year was more than 100 your analysis should include an appropriate sample of 10 percent of such terminations or 100, whichever is greater.

VI. Analysis of Jobs with Substantial Concentrations of Minorities or Women.

A. Now look again at each of the focus job titles with substantial concentrations of minorities or women as cited by you in your review of the workforce analysis. Based upon your analysis of the workforce composition and your analysis in previous sections, prepare an analysis which includes an identification of those specific jobs wherein the minority or female incumbents could have been denied placement, promotion or transfer due to discrimination.

B. In order to identify an affected class, it will be necessary to review detailed listings of employees in the jobs identified in A above. Inform the contractor in the letter prior to the on-site review that these listings will be required for the on-site review. For all the job groups cited, the contractor should be asked to prepare a list by department, line of progression or unit within which promotion normally occurs of all employees ranked by job in order of progression and indicating for each: name, job title, rate of pay, sex, minority group or nonminority identification, original hire date, and other appropriate seniority dates considered in promotion, transfer or layoffs. If department, job, company or plant seniority dates are utilized by the contractor such dates must be included. Usually, even if seniority is not a guiding factor in promotions, in all but managerial positions, total length of service will be correlated to job entitlement.

Part B. The On-Site Review

I. Identifying Information.

Give the dates of the on-site review indicating the date the review was initiated and completed. List the names and titles of contractor personnel contacted in the review.

II. Community Survey.

A. Community contacts should be made as appropriate and practical prior to the direct meeting with the contractor. Some later confirmations may be required. The number of these contacts depends on the nature of the information available prior to visiting the locale. If there is a regional OFCC office, they may be able to advise you on the effectiveness of some community resources as possible referral sources for minority and women job seekers. A contact with the local office of the State Employment Service is vital to ascertain the substance of the contractor's relationship with that agency. If there is a minority specialist in the office, he or she can be most helpful in orienting you towards other community resources.

B. The following is relevant information which must be reported in this section as determined through community contacts or otherwise:

(1) Report of population and workforce data as specified in Order No. 4.

(2) Indicate other key industries and companies with whom the contractor will be competing for minority and women workers.

(3) List the significant employment oriented organizations which could be referral sources for minorities and women.

(4) Identify the community leaders generally recognized as representing minorities and women.

(5) Comment on the community image of the contractor as an EEO employer and otherwise including the reputation of the contractor's facility as a desirable place to work.

III. Initial Contact with Contractor.

A. *Initial Contact.* (1) If this is the initial compliance review experience for the contractor, a brief discussion of the history of the compliance program is appropriate. Otherwise, the contractor need only be brought up-to-date regarding any new policies or changes in the rules and regulations occurring since the previous review. If not adequately determined in the previous review or, if significant changes have occurred, discuss the contractor's overall corporate organization in terms of corporate headquarters, subsidiaries, number of facilities and nature of the inter-facility relationships as it might affect this review.

(2) Discuss the nature and extent of the contractor's Government contract work. How does this relate to the contractor's business? Discuss the major nonexempt subcontractors and determine if the contractor has satisfied his EEO responsibilities in their regard. Have they been notified of their EEO obligations relative to filing the Standard Form 100 and preparing an affirmative action program? Review a sample contract and purchase order form for inclusion of an EEO clause. Does the contractor require a certification of nonsegregated facilities from each nonexempt subcontractor? Does the contractor assure appropriate physical facilities to both sexes?

(3) Any additional information needed for the conduct of this review should be requested during the initial contact to assure its availability while still on-site. A tour of the facility might be appropriate at this time or at least it can be tentatively scheduled for a later point in the review. To avoid unwarranted or unintended interferences with employer-employee relations, the number, content and scope of employee interviews should be discussed with the contractor at this time.

B. *Report of General Information.* Based on the information obtained from the contractor, or researched by you, report on the contractor's corporate organization as it might affect this review. If this material is adequately covered in a previous review, attach a copy of the relevant portion of that review. Attach copies of a sample contract or purchase agreement and a sample certification of non-segregated facilities as exhibits to this report. Describe the compliance history of the contractor leading up to the previous compliance review, indicating the compliance agencies involved and any changes in the compliance posture. What actions has the contractor taken relative to commitments made subsequent to the last compliance review?

IV. EEO Policies and Procedures.

A. *External.* Describe how the contractor indicates he has attempted to establish an image of an EEO employer in his community and in his recruitment area. How does the contractor utilize and support organizations which would assist his efforts and implement his affirmative action program?

B. *Internal.* (1) Are EEO posters prominently displayed? Indicate the type of EEO policy statements that have been issued. By whom and addressed to whom? Are these statements posted? Are they included in employee handbooks or policy manuals? Is the policy statement up-dated periodically? Has management expressed any intention in writing or otherwise to take disciplinary action for failure to adhere to EEO policies and procedures? Does the contractor publicize an EEO achievement? Have out-dated posters mentioning restrictions on employment of females been removed?

(2) Describe the role of the EEO coordinator. What role does the coordinator play in dissemination of policy? How much time does he or she spend in EEO work?

(3) Describe if supervisors are involved in goal setting. How have the lower level supervisors received and disseminated company EEO policy? Are supervisors held accountable for failure to meet EEO goals? Is EEO part of the orientation for new employees and are there periodic meetings with employees and/or supervisors on the subject?

V. Recruitment, Hiring, Selection and Placement.

A. *General Procedures.* (1) Review the material in the desk audit section of these guidelines to see that you have completed the required analysis to identify the job titles where fewer offers or acceptances are made to minorities and women and have indicated information needed for on-site analysis.

(2) Provides an analysis based on the following issues with full explanation when necessary, from data gathered at the on-site review. Are different inter-

viewers assigned to interview applicants because of their job interest, race or sex? Is job counseling offered? If not hired, is the applicant given a specific reason? Is it generally the real reason and is it so noted on the application form? If not hired, what happens to the application form? What are the possibilities of the application being retrieved at a latter date? Based on the EEO specialist's analysis of records as well as the contractor's statements, has this happened very often? If the employment office does not make final decisions for hire, who does and on what basis? If additional interviews are conducted, is there feedback to the employment office and the EEO Coordinator? Does anyone monitor for disparate rejection ratios of minorities and women? Can and does anyone challenge decisions made by the selecting officials? Are those who make selections conscious of the contractor's goals and timetables? Describe what role if any the Coordinator has in the selection process.

(3) Does the contractor maintain applicant flow data which gives all the necessary information such as name, race, sex, job applied for, source of referral, date of application and disposition? Obtain copies of application forms. Do the forms request information which could be used in a discriminatory manner? Specify the questionable information and who might have access to it. If such information is allegedly asked for affirmative action purposes, could it be maintained on a separate record? Are any questions asked of applicants of one sex but not of applicants of the other sex (e.g., anticipated temporary disability, child care problems, and marital status)? From discussions with interviewers and supervisors as well as from comments appearing on the application forms, what appear to be some of the more subjective criteria considered? (i.e., socio-economic background, illegitimacy, appearance, dress, hair style, geographical, or non-job related school preferences.) Describe the filing system and check to see how long applications are retained. Is there an affirmative action file or other retrieval system to enable minorities and women to be reconsidered if no job can be offered at the time of their original application? Are there written job descriptions or job specifications? If not, what procedures are used instead? Are job requisitions submitted to the employment office in writing and how detailed are they? Are these forms or others used for external recruitment? Sample a representative number of job requisitions on a given date and determine if minorities and women were applying at the same time. The contractor's applicant flow data and application retrieval system should permit this kind of comparison with minimum effort. Obtain samples of any other relevant forms utilized by the personnel operation such as interview reports.

Rules and Regulations

(4) Describe in detail, the job application process from the point where the applicant first makes contact with the contractor. Observe the physical layout of the contractor's employment office for any segregation by race of sex of applicants and whether it would be apparent to a job seeker that the contractor has an integrated workforce. What are the responsibilities of any receptionist on duty? Does the receptionist screen applicants or application forms in any way? Is everyone requested to complete an application form at all times?

(5) Does the contractor have a policy on nepotism? If so, is the policy written or applied to effect job opportunities adversely for women more than men? Does there appear to be any selection or placement pattern based on race or sex? Does the contractor claim any bona fide occupational qualifications to justify sex discrimination?

B. *Determination and Analysis of Adverse Effect.* (1) Adverse effect is a differential rate of selection which works to the disadvantage of a covered group. In order to determine whether adverse effect results from the use of "objective" selection requirements, review the data provided by the contractor on the reasons for rejection for the job titles cited by you in the desk audit analysis. Present the number and proportion of nonminority applicants or employees and the number and proportion of minority applicants or employees rejected for each of the cited reasons. Present the same statistics for women and men. Then determine the selection rate for each of these groups by subtracting the rejection rate from 100 percent. If the selection rate for minorities (or women) is less than 80 percent of the selection rate for the remaining applicants for any of the cited reasons, then there is an adverse effect and the selection method must be validated as required by the OFCC Testing and Selection Order. To make this computation, divide the selection rate for the covered group by the selection rate for the remaining applicants and compare the resulting figure with 80 percent. For example, if 30 percent of nonminorities are rejected (100 percent—30 percent=70 percent selected) on the basis of educational requirements and 53 percent of minorities are rejected (100 percent—53 percent=47 percent selected) on this basis, then there is an adverse effect (i.e., 47 percent divided by 70 percent equals 56 percent, which is less than 80 percent). If no individual reason is causing an adverse effect but the minorities (or women) selected for employment is less than 80 percent of the remaining applicants selected, then the entire selection process must be reviewed and validated as required by the OFCC Testing and Selection Order. Continue in this section with those job titles where you have determined that there is an adverse effect resulting from one or more "objective" selection) requirements. Continue with part (3) below for other job titles cited by you in the desk audit analysis, where there are not "objective" selection requirements causing an adverse effect.

(2) Refer to the Testing and Selection Order (41 CFR 60–3). To meet the requirements of that Order, all contractors must submit certain information. (41 CFR 60–3.4(a), 60–3.6, 60–3.15, 41 CFR 60–2.23(a)(3), 60–2.23(b)(7), (8), (13), 60–2.24(b), (d)).

(a) To be meaningful, information submitted concerning use of tests should include:

1. Applicable job title or job group.

2. Identifying information on procedures used for selection or promotion of individuals, including the following for paper and pencil or performance tests: name of test, form, and publisher or author.

3. Criteria for acceptance or cut-off score, if applicable.

4. For total candidates tested in the past year, the number of men and women not acceptable. The same information for men and women should be provided for Negroes, Spanish-surnamed Americans, American Indians and Orientals when the group constitutes 2 percent or more of the labor force in the labor market or recruiting area and for nonminority men and women. If no definite criteria of acceptance are used (such as cut-off scores, the average (mean) test score for each group and the scores of the three lowest scoring candidates accepted should be presented.

(b) If the selection procedure for which there is an adverse effect is a paper and pencil or performance measure (see 41 CFR 60–3.2), inquire if this has been validated. If the test has not been validated then the contractor must take appropriate action (e.g., take necessary steps to validate the procedure—during which time cut-off scores may have to be changed or eliminated, or eliminate the adverse effect). The compliance office must determine whether the action taken by the contractor is in accord with 41–CFR 60–3 and testing and selection guidance memoranda issued by OFCC. If the selection procedure has been validated, the contractor must provide evidence to show that the procedure has been validated in accordance with the Order and the compliance officer must review this evience. For guidelines on reporting validity, refer to 41 CFR 60–3.6 of the Revised Testing and Selection Order as amended in January 1974. You should inform contractors of noncompliance with the Order when validity or evidence supporting validity is absent or substantially deficient. However, since the issues involved in test validity are often quite technical and complex, the compliance officer should not try to identify or resolve these issues during the review. In cases where there are technical or complex issues or any case where the compliance officer cannot make a clear determination of compliance or noncompliance, the contractor's evidence of test validity is to be submitted for higher level review along with the compliance officer's analysis of the adverse effect.

(3) *Underutilization, Higher Rejection Rates and Other Selection Procedures.* For any job groups cited by you in the desk audit where there is underutilization or a higher rejection rate for minorities or women, are selection techniques other than tests used for employment decisions? Such techniques include but are not restricted to unscored or casual interviews, unscored application forms and unscored personal history and background requirements not used uniformly as a basis for qualifying or disqualifying applicants (see 41 CFR 60–3.13). If so, the contractor must either provide the same validation evidence as called for in B above or must adjust employment procedures so as to eliminate the higher rejection rate and underutilization.

(4) *Adequacy of Applicant Flow.* Are the contractor's applicant flow data adequate for the focus job titles cited by you as having underutilization in your review of the workforce analysis? If not, the following further investigation into recruitment methods and resources is necessary during the on-site review.

(a) What procedures are used for external recruitment? Summarize the contractor's explanation of the specific recruitment methods and resources utilized for each focus job title involved. Are minority and women-oriented press or broadcast media utilized? Do recruitment ads, either in words or location in the publication, suggest preference for one sex? Explain the impact of word-of-mouth or other employee referral systems. Explain if recruitment sources are contacted in writing at the time of actual job openings and how much information is provided to them as to the qualifications necessary.

(b) Is the contractor actually aware of the results of the company's recruitment efforts? Has the contractor specifically requested to have minority and women candidates among these referrals? Has the contractor discontinued using any of these sources which have failed to make such referrals? Has the contractor instituted any transportation or housing programs to aid in minority recruitment? What is the contractor's explanation for any failure to attract a significant number of women and minority applicants? Are employment opportunities denied to women with young children but not to men with young children? Does the contractor deny employment opportunities to women or men based on a State "protective" law?

(c) Describe the college recruitment program only if college recruitment is involved for the focus job titles cited in your review of the workforce analysis. Are schools visited with predominantly minority or women enrollment? Is the contractor familiar with some of the lesser known schools? How is this program related to the company's national recruiting program? Describe the blue-collar recruitment program, if applicable.

(d) Identify the appropriate entry level positions and the promotional ladders as indicated by the contractor and by the EEO Specialist's confirmation through sample record analysis. Are these lines in any way oriented by race or sex? Differentiate between those promotions that are automatic and those that are competitive. What is the significance of interest, ability and seniority in promotion and transfer considerations? Are there any periodic written performance ratings which influence promotion or transfer? Explain whether or not minorities or women are concentrated in certain jobs outside any line of progression or which deadend before the employee can reach the pay grade to which their experience, training or seniority might entitle them. Is there a well stuctured transfer program? Discuss any lack of representation of minorities and women in this program. Review the file on transfer requests, if any. Have many minorities or women been overlooked or rejected disproportionately? What is the frequency of inter- or intra-departmental transfer for better working conditions or to gain promotional opportunities? Is counseling offered to employees considering this move? How common is transfer from blue-collar to white-collar positions or from "traditionally female" to "traditionally male" jobs or vice versa? Who monitors promotion and transfer activity and through what means? How is job security affected by transfer or promotion and does this disproportionately affect minorities or women?

VI. Promotion and Transfer.

A. Based on the information outlined in the desk audit section on promotion and transfers, a determination should now be made if there is a disparity between promotion rate of minorities and women as related to the rate for nonminorities and/or males.

B. Any selection criteria for promotion that is causing a higher rejection rate of minorities or women must be reviewed using the procedure in VB (1) and (2), above.

VII. Terminations.

As a result of your analysis of data supplied during the desk audit or on-site, if there is a disproportionate number of terminations because of assignment of minority group members or women to specific kinds of jobs, the causal factor should be explored and discussed on-site. Present the results of that explanation here or state that no such disproportionate effect exists. Are employees of one sex in a certain job title terminated upon reaching a certain age without the same rule applying to the other sex? Are procedures affecting termination validated if there is a disproportionate effect? Refer practices or procedures that may indicate age discrimination to the Wage-Hour Administrator of the U.S. Department of Labor.

VIII. Supervisory Positions.

Review the workforce analysis and focus jobs cited by you in the desk audit with specific reference to supervisory positions. Comment on the representation of minorities and women among supervisors and where promotions during the previous year suggest any improvement. If appropriate, review selected personnel records to conduct the following analysis. Explain how supervisors are selected. Who monitors these actions? Explain how supervisory ability is measured. Are minorities and women supervising integrated groups? Are women supervisors generally at a lower plateau in the organization? Where there is low utilization of minorities or women in supervisory positions, can this be traced to specific past actions in recruitment or placement? Are there selection criteria for supervisory positions that are causing an adverse effect? If so, follow the procedures in VB(1) and VB(2)(b)(1) above. Where minorities and women have been newly installed as supervisors, has there been any negative reaction from the workforce and how has management dealt with it? Is there a supervisory development program? Does this start prior to entry into supervision or is it part of an on-the-job program? Does it include training on EEO matters and problems?

IX. Pay Practices.

Review and compare wages and salaries of a sampling of minorities and women within selected job titles. The following list of questions are necessary in making this investigation. Be sure and give a full explanation with each answer.

A. Are there positions with similar duties but with different rates of pay?

(1) Does the incumbent's sex or race have anything to do with these differences in rates of pay?

(2) What is the contractor's explanation for these discrepancies?

B. Are there general salary ranges for jobs or specific rates at which everyone begins?

C. Do minority and women workers appear to to be paid lower beginning rates?

(1) What is the contractor's explanation?

(2) Who makes these determinations?

D. Are the rates negotiable?

E. Are minorities or women assigned to jobs where incentive earnings are more difficult?

F. Does review of any employee's records confirm or dispute the relationship of education, training, and experience to the wages being earned?

X. Analysis of Jobs with Substantial Concentrations of Minorities or Women.

A. Review the information prepared by the contractor and make a determination as to which, if any, departments or lines of progression within departments appear to have been utilized in the past for discriminatory placement of minorities or women.

B. Now compare the wage or job class range of each such unit with that of departments or lines of progression where whites (or males, if comparing female) are concentrated. Also compare working conditions, degree of skill acquisition, and rapidity of advancement in each unit. Then make a determination as to whether each of the units in which minorities or females are concentrated is less desirable. Take into consideration in this analysis whether progression to the top of one line may lead to advancement to management while the other may not. Additional detail data will probably be required for this analysis.

C. If discriminatory placement has occurred you must attempt to determine if and when the company has ceased discriminatory placement. Begin with a review of your analysis of new hire data, determining whether placement into departments and lines of progression has been oriented according to race or sex. If so, then all present minority and female incumbents of the units identified should be considered members of an affected class. If race or sex no longer appear to be factors in placement of new hires, further inquiry of the contractor must be made to determine when these factors cease to be considerations in placement. Try to establish a definite date; all incumbents of the units identified hired prior to that date will be identifiable as members of the affected class.

D. Formulate a definition of the affected class as identified in this review, and identify each member of it. This may me done, for example, by reference to their locations in the seniority list. A typical definition would read as follows:

The affected class shall be considered to be all black employees presently assigned to Progression Lines 1, 2, 3, and 4 who were hired prior to December 31, 1970.

E. Now you must conduct an analysis to determine which business practices are resulting in the denial of equal empolyment opportunity to these discriminatorily placed in the past. Examine provisions of the collective bargaining agreement, or if no union, the company policy manual, and summarize in the compliance review those provisions having to do with transfer, promotion and layoff, as well as those dealing with the effect of seniority upon such personnel changes. The following must determined:

(1) May any qualified employees transfer from one employment unit to another?

(2) What kind of seniority—plant, department, seniority unit, job—is the basis for transfer competition?

(3) If lines of progression or promotional sequences are utilized within departments, is seniority the principal determinant of promotion from one job level to the next highest job level. In other words, is progression through the line principally a function of seniority?

(4) What kind of seniority—plant, department, seniority unit, line of progression, or job—is the basis for competition for promotion within lines of progression or seniority units?

(5) What kind of seniority competition is there for reduction in force and layoff?

(6) Assuming that the affected class may transfer, if qualified, to other employment units, the heart of the matter is what losses, in terms of seniority, job retention rights,and wages, they will sustain if they seek to avail themselves of transfer opportunity?

F. Now make a determination as to whether members of the affected class are presently qualified, or can become qualified in the same manner as white or male employees in the past, for jobs in the employment units from which they have been excluded. The most productive technique here is probably comparing present qualifications of the affected class with qualifications of whites (or males) at the time the whites (or males) were hired. Make a determination of the qualifications of the least qualified white (or male) currently in the more desirable employment unit.

G. If you have identified an affected class, remedies must be developed for the contractor to be in compliance. Refer to OFCC guidance memos on affected class in developing each step of the remedy. However, in arriving at the nature and extent of the remedy, some insight is needed into the extent that any remedy would be welcomed and utilized by such individuals even with job security assured. It is therefore advisable that selected members of the affected class be interviewed. Your written discussion of the remedy should include the following aspects. Referring to the lines of progression or promotional sequences, which jobs must dead-ended minorities and women move into in order to progress? Would the affected class employee require additional training to progress? Are the jobs in the promotional sequences functionally related? What changes in the bargaining agreements would be necessary in order to stimulate transfer of affected class members or perhaps make transfer unnecessary? Has the contractor already initiated some action in this regard? When? Could long-time affected class members possibly move up more than one job title immediately or with little extra training in order to obtain their rightful place in relationship to their company seniority? Note: since this is still a preliminary stage to final agreements, you should avoid unnecessary interference in employer-employee relationships by giving the contractor the opportunity to discuss remedies with affected class members. If the contractor fails to do this adequately, you should interview selected members of the affected class. Through interviews you should determine whether minorities or women feel the union, if any, is servicing them properly.

(1) *Bargaining Units*. (a) Identify the various unions in the contractor's establishment. Determine if there are any memoranda of understanding of addendums not included in the labor agreement. Obtain copies of all collective bargaining agreements. Do the labor agreements contain an EEO clause? Review these agreements (and attach them along with progression charts to this report) considering, as appropriate, the following:

(b) Are EEO grievances subject to the applicable grievance machinery, if any. If so, with what frequency have such EEO grievances been filed and what have been the results. Does the labor agreement spell out the rights of employees in terms of tenure, layoff, recall, transfer, promotions and the various fringe benefits? Is there a formal posting and bidding procedure for transfer or promotions? What are the criteria for determining the successful bidder? Are minorities and women encouraged to bid into jobs where they have been previously underutilized? How important is seniority? Can an employee hold more than one seniority date? If so, explain what each means and how it was acquired. Do the layoff and recall provisions have a disparate effect on minorities and women? How and why? Have there been any mergers of seniority units or lines of progression, and how has this affected minorities and women? Are there any "understood" or traditional practices which differ from those described in the contract itself? Are disciplinary actions spelled out clearly? (Explain this under Section 3 below.)

(2) *Non-Bargaining Unit Positions.* Determine if there are company policies or precedures in writing which deal with the situations as discussed in the previous paragraph for those positions not covered by any bargaining unit? Does longevity play any role in job security?

(3) *Benefits and Disciplinary Actions.* Review the contractor's personnel manual or its equivalent. Are there any disciplinary policies which would tend to discriminate against minorities or women? What is the policy on maternity leave and is it in accord with OFCC regulations? Does the policy result in rejection or suspension from employment or require involuntary leave solely on account of the condition of pregnancy? Are there any distinctions based upon sex in the granting of fringe benefits, including medical, hospital, accident, life insurance, pension and retirement benefits, profit sharing and bonus plans, credit union benefits, or leave which violate current OFCC regulations? Are the same benefits made available for the wives and families of male employees also made available for the husbands and families of female employees? Does the contractor specify any differences on the basis of sex in either mandatory or optional retirement age?

XI. Training and Educational Opportunities.

A. *Internal.* (1) Review the contractor's data on training that has occurred over the past year. Indicate the participation by total, male, female and male and female minority classification and show the training participating rate for each group. If the number of applicants in the last year was less than 100, your analysis should include all such applicants. If the number of applicants in the last year was more than 100, your analysis should include a sample of 10 percent of such applicants or 100 whichever is greater. Include employees hired directly into such programs. Is participation strictly voluntary or are there selection procedures? Such procedures must be validated if there is an adverse effect.

(2) Inquire about what types of training new employees receive. Is there evidence of any disparate failure or dropout rate? If such disparities exist, what efforts has the contractor made to correct the situation? How is failure determined? Is it in accord with 41 CFR Part 60-3? Is formal training being required now for jobs not previously involved? If so, have you included this in the section on affected class? If there is a registered apprenticeship program, has the contractor developed an affirmative action program under 29 CFR Part 30 or a State plan for EEO in Apprenticeship? Has the contractor's Apprenticeship AAP been approved by the contractor's apprenticeship registration agency?

B. *External Programs.* Describe any programs offering tuition assistance and the extent of minority and women participation? What is the contractor's explanation for any disproportionate representation of women or minorities? Describe any school work or other cooperative type programs, the minority and female enrollment at these institutions, and the minority and female participation in such programs. Are there any summer school work programs or other Government or privately-funded training on a part time basis? Are there any selection or qualifying procedures that would tend to preclude the involvement of a representative number of minorities and women (e.g., expense, length of training, travel involved, no clear evidence of career advancement, etc.)? After completion of the program, is job replacement assured or assistance available?

XII. Goals and Timetables.

A. *Achievement of past and present goals and timetables.* Is the contractor meeting the current goals and timetables? Did he meet previous goals and timetables? If not, determine from the contractor his assessment of why the goals were not achieved. Pursue what you deem to be necessary changes for future success in meeting goals. If the contractor is not meeting the current goals and timetables or if the contractor did not meet the previous goals and timetables, a determintaion of good faith must be made and the determination will be based upon his efforts to broaden his recruitment and promotion base. See B(2) below.

B. *Establishment of present and future goals and timetables.* (1) Specific goals and timetables are to be established separately for minorities and women considering the factors cited in Order 4 and based on the contractor's analysis. In establishing timetables the contractor must consider the anticipated expansion, contraction and turnover of and in the workforce. This would include a review of anticipated vacancies in the major job groupings for the next year and any other pertinent period related to the affirmative action program.

(a) A goal must be established for each job group in which underutilization exists and must be designed to completely correct the underutilization. The goal must be stated as a percentage of the total employees in the job group and must be equal to the percentage of minorities or women available for work in the job group in accordance with the criteria set forth in 41 CFR 60–2.11.

A single goal for minorities is acceptable, unless through the company's evaluation it is determined that one minority is underutilized in a substantially disparate manner, in which case separate goals and timetables for such minority groups may be required individually, and it may further be required, where appropriate, that separate goals be established within the minority groups by sex. (See Order 4, § 60–2.12(k).)

(b) For each job group in which underutilization exists, a specific timetable must be established for reaching the ultimate goal in the minimum feasible time period.

(c) For each job group in which underutilization exists, the contractor must establish annual rates of hiring and/or promoting minorities and women until the ultimate goal is reached. These rates should be the maximum rates that can be achieved through putting forth every good faith effort, including the use of available recruitment and training facilities, and must not be lower than the percentage rate set in the ultimate goal. Numerical goals based on projected openings are required but cannot be used in place of percentage goals. Goals should be stated both as actual numbers and as percentages for backup goals. That is, a contractor may establish a goal of 10 women based on an expected 20 vacancies for hires or promotions. But his expected vacancies may vary. So he should also give a percentage goal (e.g., 50 percent of hires) which would apply if opportunities exceed his current estimates.

(d) Each program must contain specific and detailed action oriented programs, including recruitment and training programs, which comply with Revised Order 4. These programs must, among other required ingredients, commit the contractor to undertake every good faith effort to contact and make use of relevant recruitment and training resources available in the community and to use its own resources for recruiting and training minorities and women to fill positions in job groups where underutilization exists. Data regarding promotable employees, community training facilities and company training facilities must be prepared by the company itself, and related to the locality.

(2) How many of these jobs will be filled through upgrading? In considering the current work force, turnover, and deficiencies identified, are the contractor's goals reasonable and will they achieve prompt and full utilization of minorities and women? Is there evidence that the contractor is considering minorities and women not in the work force? Make specific suggestions for affirmative action based on problem areas and on areas previously lacking in positive affirmative action, as pointed out by the review. The affirmative action program must appear as an exhibit to this report. Determination of good faith effort should be made which shall include but not be limited to the following:

(a) Notification to the community organizations that the contractor has employment opportunities available and maintenance of records regarding the organizations' response.

(b) Maintenance of a file of the names and addresses of each minority or female worker referred to the contractor and what action was taken with respect to each such referred worker.

(c) Participation in training programs in the area. Full consideration of the training which the contractor can reasonably undertake.

(d) Dissemination of the contractor's EEO policy, by including it in any policy manual; by publicizing it in company or union newspapers, annual report, etc. by conducting meetings to explain and discuss the policy; by posting of the policy; and by specific review of the policy with minority and female employees.

(e) Dissemination of the EEO policy externally by informing and discussing it with all recruitment sources; by advertising in news media, specifically including minority news media; and by notifying and discussing it with all contractors and subcontractors.

(f) Specific and constant personal (both written and oral) recruitment efforts directed at all minority and female organizations, schools with minority and female students, minority and female recruitment organizations, and training organizations, within the contractor's recruitment area.

(g) Specific efforts to encourage present minority and female employees to make referrals in the recruitment effort.

(h) Validation of all worker specifications, selection requirements, tests, etc., as required by the Testing and Selection Order 41 CFR § 60-3.

(i) Making every effort to provide after-school, summer and vacation employment to minority youths.

(j) Where reasonable, the development of on-the-job training opportunities and participation and assistance in any association or group training programs relevant to the contractor's needs.

(k) Continuing inventory and evaluation of all minority and female personnel for promotion opportunities and encouragement of minority and female employees to seek such opportunities.

(l) Assuring that seniority practices, job classifications, etc., do not have a discriminatory effect.

(m) Assuring that all facilities and activities are nonsegregated.

(n) Continual monitoring of all personnel activities to insure that its EEO policy is being carried out.

(o) All other sections of Subpart C of Order 4 (41 CFR 60-2-20, 21, 22, 23, 24, and 25) and the OFCC Sex Discrimination Guidelilnes at 41 CFR Part 60-20.

XII. Religious and National Origin Discrimination.

Refer to the regulations (41 CFR 60-50). Has the contractor reviewed his practices to determine whether members of religious and/or ethnic groups are receiving fair consideration for job opportunities? Describe the outreach and positive recruitment activities undertaken by the contractor to remedy problems identified. (See 41 CFR 60-50.2(b)). Describe any accommodation made by the contractor to the religious observances and practices of an employee or prospective employee. When such situations exist, if the contractor has not made such accommodation, describe the contractor's rationale including, at least: (a) business necessity, (b) financial costs and expenses and (c) resulting personnel policies.

((5 U.S.C. 553(a)(3)(B)) 29 CFR 2.7 section 201, Executive Order 11246, 30 FR 12319, and Executive Order 11375, 32 FR 14303.)

Signed at Washington, D.C., this 8th day of July, 1974.

PETER J. BRENNAN,
Secretary of Labor.
BERNARD E. DELURY,
Assistant Secretary for Employment Standards.
PHILLIP J. DAVIS,
Director, Office of Federal Contract Compliance.

Antibias Regulation of Universities

FACULTY PROBLEMS AND THEIR SOLUTIONS

by Richard A. Lester

Professor of Economics
Princeton University

A Report Prepared for
The Carnegie Commission on Higher Education

MCGRAW-HILL BOOK COMPANY
New York St Louis San Francisco Düsseldorf
London Sydney Toronto Mexico Panama
Johannesburg Kuala Lumpur Montreal
New Delhi São Paulo Singapore

Foreword

The Carnegie Commission on Higher Education has consistently expressed support for efforts to increase the relative participation of women and members of minority groups in college and university faculties. It has recognized, however, that such efforts will be accomplished with considerable difficulty and probably more slowly than we might wish.

In our report entitled *Opportunities for Women in Higher Education,* and in a technical note to our final report *Priorities for Action,* we reviewed some actions that must be taken if the difficulties are to be overcome. Among them are increasing the numbers of women and members of minorities who pursue graduate studies and become part of the "pool" of qualified academic talent available for faculty appointment; finding jobs for new faculty members during a period in which little or no enrollment growth is anticipated and existing faculties are well staffed by relatively young men and women; and matching new faculty members who seek jobs with the often highly specialized openings that may occur.

Some of these same problems have been of concern to Richard A. Lester, who has conducted an extended independent study of the issues involved and has had practical experience with employment practices and compensation differentials in both industry and academe. He has served as chairman of the Southern Textile Commission under the National War Labor Board (1945), as vice-chairman of the President's Commission on the Status of Women (1961–1963), Dean of the Faculty of Princeton University (1968–1973), and chairman of Princeton's Equal Employment Opportunity Committee (1968–1972).

In this book, Lester reports on his studies and discusses many of the specific problems associated with increasing the membership of women and members of minority groups on the faculties of major colleges and universities. He stresses the fact that current faculty members favor such an increase, but warns that many of the action programs prescribed to achieve it fail to take into consideration either the inadequate supply of qualified people among those groups currently underrepresented on our faculties or the characteristics of academic employment that distinguish it from employment in industry. At stake is not only an equitable system of academic employment, but also loss of financial support as governments apply economic sanctions to achieve numerical hiring goals that often have little relevance to the character and mission of universities. Lester has given us a sensible and well-documented study that should be vitally important as our colleges, universities, and state and federal governments consider or reconsider the policies that guide them in this difficult and sensitive area. He speaks with the authority of a person with extensive and most successful experience in the field of industrial relations and academic administration and with the credentials of a long-time supporter of equal opportunity. His wisdom and his advice merit the most careful consideration.

Clark Kerr
Chairman
Carnegie Commission
on Higher Education

May 1974

Preface

Since 1968, universities and colleges having federal research contracts have been under antibias regulation by the federal government. The regulation, enforced by the Department of Health, Education, and Welfare, has been unsatisfactory in certain respects to various parties—university faculty and administrators, interested women and men in academic communities, and persons in concerned organizations and in government.

Difficulties were to be expected in the first five years of a program that involves such a sensitive and complex subject as discrimination in faculty employment in universities and colleges. The question to ask is: How much have we learned from five years of experience, and is the program generating difficulties and ill-effects unnecessary for the achievement of its legitimate purposes? This book attempts to answer that question and, in doing so, proposes some different solutions to the problems involved.

In presenting criticisms of government programs, and proposing alternative ways to achieve and enforce nondiscrimination for university faculties, I do so out of a strong conviction that prejudice in employment, on account of race, sex, religion, or other nonperformance factors, is destructive of democratic values and violates the principle of appointment and promotion on merit, which is so vital for achievement of the educational objectives of our institutions of higher learning. It should also be said that some of the criticisms and proposals in the book were presented to HEW officials by me in January 1972, in September 1972, and in October and December 1973.

Some of the ideas offered here have much wider application than just to the faculties of universities. I leave it to those versed in other areas of activity to develop such broader applications.

The writing of this book was my own idea, and the product is mine. I have purposely avoided seeking financial support for the project. The Carnegie Commission on Higher Education has no responsibility for any opinion and bias in these pages.

Many persons have helped to sharpen the reasoning and improve the ideas and analysis in this book. They have done so through discussion of views and experience and by reading parts of the first draft of the manuscript and giving me the benefit of their criticisms and suggestions. I particularly wish to express my appreciation to the following for their contribution, but hasten to add that none of them is responsible for the particular views or proposals presented in the book: Robert L. Aronson, Orley Ashenfelter, William G. Bowen, J. Douglas Brown, John H. Bunzel, Robert R. France, Marjorie Galenson, Eli Ginzberg, Frederick H. Harbison, Clark Kerr, William F. Miller, Charles A. Myers, Robert B. McKersie, Albert Rees, Adele Simmons, Sheldon Steinbach, Phyllis Wallace, Edwin H. Young, and Verne A. Stadtman, whose skillful editing has greatly improved the book's readability.

The staff of the Industrial Relations Section of Princeton University—Helen E. Fairbanks, Dorothy Silvester, Karen Stout, and Irene Rowe—have been of valuable assistance in a variety of ways, including preparation of the manuscript for the press.

Antibias Regulation of Universities

1. *Introduction*

Equal opportunity for each person to rise to the top—as a student and as a faculty member—on the basis of individual merit, is essential for the healthy functioning of institutions of advanced learning. Painful experience in this country and abroad has demonstrated the corrosive effects on the creation and cultivation of truth when outside groups—government, business, religious, or other special interests—exert too much pressure or gain significant control over the operation of universities. The professional integrity of the search for, and distribution of, truth must be maintained if the intellectual leadership in a country is to be free from the bonds of prejudice.

THE NATURE OF OUR INQUIRY

The problem of eliminating bias in the appointment, advancement, and compensation of faculty of major universities—without hampering their professional purposes or their potential for benefiting mankind—is presented in this book. That is a complex problem with many ramifications. Analysis of the problem's various facets involves critical examination of government programs that enforce "affirmative action" against job discrimination as applied to the faculties of the most advanced universities. We shall examine the implications that "compliance" with federal and state antibias programs may have on the future of our distinguished institutions of higher education over, say, the next 30 years, which is about the average length of faculty tenure appointments by promotion.

Our analysis will draw on experience, especially since 1968, in particular institutions. Our analysis should not, however, be considered a report of individual case studies. During 1973 and early 1974, discussions of problems and experiences were held with administrators and faculty members at some 20 universities across the country, with compliance officials in Washington and in several regional offices of the Department of Health, Education, and Welfare (HEW), and with staff personnel in associations of colleges and universities. No direct quotations are, however, presented from such conversations. Frankness was encouraged by assurance that the specifics of those discussions would be used primarily for understanding problems and developing possible solutions for them. Therefore, only published material is used in reference to individual institutions or persons.

University faculty and administrators generally are sympathetic with the elimination of prejudice from faculty employment, whether based on race, sex, religion, ethnic origin, or any other grounds. Indeed, many of them could be considered oversympathetic. For instance, a broad national survey shows that about 32 percent of the male and 42 percent of the female faculty of universities questioned in the 1972–73 academic year favored preferential hiring for women in faculty positions at their institutions. Preferential hiring for members of minority groups was favored by 35 percent of the male faculty and 36 percent of the female faculty.[1] Faculty members want to avoid being labeled as "prejudiced" against blacks, women, or persons with particular religious views, or being charged with violating particular antidiscrimination legislation or federal executive orders banning bias in employment.

Although university faculty are quite individualistic and mixed in their positions on particular issues, numerous surveys have shown that a high proportion of university professors are liberal or left of center in their social and political views (see Ladd & Lipset, 1973, pp. 16, 18–19, 22–26, 28). However, they tend to be relatively conservative or cautious concerning change in internal university operations. Also, in each age group, the distinguished, highly achieving professors in the prestigious institutions generally are disproportionately more liberal—"display the greatest inclination to support politics of social criticism from perspectives of egalitarian and popular values"—than are professors in the middle-tier and lower-tier institutions (ibid., pp. 19, 22–27).

On the issue of race and sex bias, and affirmative action to achieve government-specified, numerical hiring goals for women and blacks in universities and elsewhere in the economy, university professors often find themselves somewhat torn by conflicting philosophic viewpoints. Some, especially in the social sciences and the humanities (ibid., p. 28), may favor action beyond equal opportunity extending into equality of results. But they and their colleagues may also be quite concerned about assaults on the principle of selection and reward according to individual merit, in the economy in general and in university faculties in particular.[2]

---

[1] The percentages are significantly smaller for two-year colleges. In those institutions, male faculty figures were 20 percent favoring preferential hiring for women and 28 percent for members of minorities. See Bayer (1973, p. 30). In a 1968–69 survey with approximately the same coverage, 23 percent of the men and 20 percent of the women on university faculties favored "relaxing" the normal academic requirements in appointing "members of minority groups" to positions on their faculty. See Bayer (1970, p. 17).

Generally speaking, university faculty and top university administrators can be expected to support appointment, advancement, and compensation of individual faculty members on the basis of merit, judged by past performance and by future promise as indicated by previous experience. On educational as well as legal and moral grounds, they can be expected to want to conform to the principle of equal opportunity for faculty employment for all qualified persons. It may, however, be difficult to convince all concerned, including some students, advocacy groups, and compliance officers, that the best-qualified candidate for a particular position was appointed or promoted to tenure from among the candidates who emerge in open competition. Differences of opinion may arise on the qualities that a particular university most needs in its faculty, in general and especially for a particular opening. Differences may also involve which candidate's abilities and potential as a teacher-scholar best fit an ideal conception of the position.

LEGAL BASIS FOR GOVERNMENT CONTROL

Executive Order No. 11246, approved by President Lyndon B. Johnson in September 1965, provides that as a condition of obtaining federal contracts, all contractors, including universities with research contracts, sign an agreement not to "discriminate against any employee or applicant for employment because of race, color, religion, or national origin." Sex was added to that list by Executive Order No. 11375, effective October 1968. The Department of Labor was given responsibility by President Johnson for issuing rules, regulations, and orders to carry out the nondiscrimination purposes of the Executive order and to determine compliance by contractors. Provision was made for the department to delegate its compliance enforcement powers to other federal administrative agencies for coverage of contractors in particular industries or sectors. Under such delegation, the Office for Civil Rights in the Department of

---

[2] Ibid. (p. 31). For good illustrations of such conflicting viewpoints, see Galbraith, Kuh, and Thurow (1971) and Bunzel (1973).

Health, Education, and Welfare administers the compliance reviews and applies the rules and regulations to colleges and universities, regardless of which federal agency awards the contract.[3] HEW's 10 regional offices have the responsibility, in the first instance, for determining whether a university is in compliance and for recommending possible enforcement action to the Department of Labor. In case of a finding of noncompliance with Executive Order No. 11246 as amended or with the rules, regulations, or orders issued by the Department of Labor, a university may have its federal research or other contracts canceled, terminated, or suspended in whole or in part, and the university may be declared ineligible for further federal contracts.

From December 1969 to January 1974, a total of 20 universities are recorded as having had a temporary block imposed on new contracts or renewals for failure either to supply the required data or to meet other compliance requirements, including the submission of an acceptable affirmative action plan.[4] The delayed contracts of those 20 institutions amounted to about $28.5 million. At least four other universities have been reported as experiencing some brief delay.

Complaints of discrimination may be of three kinds. *Pattern* complaints allege that a general pattern of discrimination exists at a college or university. A *class* complaint alleges that discrimination prevails against a particular class (or classes) of employees in an institution. An *individual* complaint involves a charge that the complainant has personally been subjected to discrimination in employment or in applying for employment; it can include a claim of discrimination against members of the complainant's class and, thus, include a class complaint.

Through its regional offices, the Office for Civil Rights has responsibility for investigating pattern and class complaints against universities, and had such responsibility for the individual complaints of professional employees of universities until March 1972. Educational institutions were excluded from Title VII of the Civil Rights Act of 1964 until that exclusion was removed by enactment of the Equal Employment Opportunity Act in March 1972. Thereafter all individual complaints were to be handled by the Equal Employment Opportunity (EEO) Commission and not by HEW, which did, however, continue to handle some filed before March 1972.

---

[3] Except for colleges and universities, federal contract compliance is handled as part of the contracting process, with compliance reviews conducted by compliance officers on the staffs of the agencies that actually make the contracts with the contractors. Only in the case of institutions of higher education is all compliance supervision concentrated in a single agency (the Department of Health, Education, and Welfare), whatever the agencies with which universities conclude their research and other contracts.

[4] They were: Harvard, University of Michigan, Columbia, Cornell, Duke, Vanderbilt, Northwestern, Notre Dame, University of Illinois, Loyola University (New Orleans), Yeshiva, University of California at Berkeley and at San Diego, New Mexico State University, University of Arkansas, University of Texas, Rice University, Mt. Sinai School of Medicine, Virginia Polytechnic Institute, and University of Washington.

Most of the complaints brought against colleges and universities have been on grounds of sex discrimination. In the spring of 1970, Harvard University was the first private institution and the University of Michigan the first public institution to be investigated by HEW as a result of complaints lodged against them. By mid-1973, pattern complaints on grounds of sex discrimination were reported to have been made against some 500 of the 2,500 institutions of higher education. Included in the 500 were practically all the major universities. Many of those complaints were brought by such women's advocacy organizations as the National Organization for Women and the Women's Equity Action League. A figure for the number of class complaints was not available at the time. By mid-1973, about 350 women had filed individual complaints against their institutions. Such actions have tended to put university administrators under considerable internal as well as external pressure.

In addition to enforcement of antibias requirements under federal contracts, HEW has enforcement powers under the Higher Education Amendments of 1972, which prohibit discrimination on the basis of sex in all federally assisted programs or activities.

The Higher Education Amendments of 1972 also extended to executive, administrative, and professional employees in colleges and universities the provisions of the Equal Pay Act of 1963. The Wage-Hour Division of the Department of Labor is the compliance agency for enforcing equal pay for women and men on jobs requiring equal skill, effort, and responsibility.

The Equal Employment Opportunity Act of 1972 amended Title VII (which deals with employment) of the Civil Rights Act of 1964 to include thereunder all educational institutions, whether they have federal assistance or not, and gave new enforcement powers to the Equal Employment Opportunity Commission. The commission (or the Attorney General in the case of public institutions) may bring a civil action in the federal courts against an institution, charging an unlawful employment practice, which may include a pattern of discrimination as well as an individual complaint.

Furthermore, about four-fifths of the states have fair employment practices laws, which usually ban discrimination in employment on grounds of race, sex, religion, or age. The laws in many states apply to the faculties of institutions of higher education and are generally administered by a state agency specifically created for that purpose. As provided in the Civil Rights Act of 1964, the federal commission defers action on charges until a state agency granted deferred status has acted on the same complaint.

Thus a university can be subject to as many as four separate compliance investigations over a period of time and can have separate charges of discrimination brought against it by three federal agencies and a state agency. The agencies have different data requirements and may apply somewhat different definitions, criteria, and standards for determining the existence and extent of discrimination. Indeed, as indicated in Chapter 7, enforcement may vary significantly among the 10 regional offices of HEW. Although coordination among the different federal and state enforcement agencies has improved somewhat, universities have been troubled by inconsistency and confusion in the enforcement of antidiscrimination laws and regulations. Also, universities that submitted affirmative action plans have often waited a year, two years, and even longer without definite and official word from HEW on whether their plans were acceptable as submitted. From November 1971 until July 23, 1973, some 33 affirmative action plans submitted by colleges and universities were given interim or final approval, 51 plans were rejected as not approvable under the Executive order and HEW's rules and regulations, and 175 were pending.[5] Those figures accounted for only about two-sevenths of the universities and colleges estimated to be under HEW regulation.

In addition to actions by government agencies, educational institutions can be sued directly in the federal and state courts by persons alleging that they have suffered discrimination. Universities have been confronted with an increasing number of such court suits under Title VII of the Civil Rights Act and state legislation. At the same time, a considerable number of charges of "reverse discrimination" (favoring women and members of minorities) have been filed with HEW against academic institutions, and some have been taken directly to the courts.

---

CHARACTERISTICS OF MAJOR UNIVERSITIES

Universities are known for the quality of their faculties as educators and as creators of new knowledge through research, and for the relative effectiveness of their programs of undergraduate instruction and graduate training in the arts and sciences. It is mainly on their contributions in the humanities, social sciences, and physical sciences that the national and world reputation of American universities rests.

In addition to the education of students and the creation of new knowledge, universities serve as independent centers for the advanced study of human affairs and the critical evaluation of society. To perform those functions properly, academic freedom—freedom to search out and report the truth—is essential.

Compared with universities in other countries, American institutions of higher education have enjoyed an unusually large measure of autonomy and independence from government control.[6] That has been true not only of our private universities but also of the great state universities. Indeed, the state universities that have achieved the most distinction have generally enjoyed the greatest degree of autonomy.

In this book, special attention is given to the possible effects of government antidiscrimination regulation upon the faculties and the instruction-research programs of what are termed *major universities*. They are the three to four dozen most outstanding universities in the country in terms of advanced education and research in the arts and sciences.[7] Among the major universities in this country are such distinguished centers of learning as the University of California at Berkeley, Massachusetts Institute of Technology, and the universities of Chicago, Columbia, Harvard,

---

[6] For a comparative analysis of American universities and those in other countries, see Ben-David (1972).

[7] As used in this book, the term means those universities that rank in the top level according to such criteria as (1) assessments of the quality of programs of graduate education published by the American Council on Education and number of Ph.D. degrees granted per year and (2) measures of research contribution such as volume of scholarly publications, dollar volume of research, and honors received by faculty (e.g., Nobel Prize winners, members of the National Academy of Sciences, and awards by professional associations in academic disciplines).

Michigan at Ann Arbor, Princeton, Stanford, Wisconsin at Madison, and Yale.

Such institutions have not only been leaders in advanced instruction and scholarship but also tend to be selected by HEW as leaders in the development of detailed affirmative action plans that conform to federal regulations. In other words, they have been used to establish patterns, to provide early examples of approvable affirmative action plans.

Furthermore, the problems and issues of government regulation via affirmative action plans with numerical hiring goals tend to arise most acutely in cases involving the major universities. Many years of on-the-job training are required before one becomes a mature teacher-scholar who enjoys the combined advantages of academic tenure and academic freedom at such institutions.

A high degree of faculty self-governance generally characterizes major universities. The faculty determine the curriculum and largely control academic personnel decisions on such matters as recruitment, appointment, reappointment, promotion, and individual faculty salaries.

Our major universities generate a large proportion of the new knowledge and basic-research contributions in this country. Probably in no other country is national scientific endeavor so concentrated in universities as it is in the United States (see Kerr, 1972). A good part of our well-being rests on the effectiveness of their faculties.

While they share the goal of improving knowledge and training minds, the major universities differ in their traditions, in their administrative structures and practices, in the areas of their strength within different disciplines, and in their student-faculty relationships. And they are in strong competition with one another for financial and other community support, for the best undergraduate students, for the best graduate students in particular disciplines, and for the best faculty in different subject areas.

In American universities, the academic department is an important unit in the organization and governance of a university faculty, especially for purposes of the teaching and research programs and personnel decisions. Departments are generally organized according to academic disciplines. Within a department, tenured professors in their teaching and research tend to operate much like individual entrepreneurs; but they do, of course, have a strong self-interest in the successful operation and long-term future of that department. The aim is a kind of collegial form of self-government, motivated by a common desire for excellence. Excellence can be defined in terms of the institution's reputation for undergraduate instruction, for graduate training, and for research output, both inside the university and among teacher-scholars in the discipline around the country and in the world at large.

In a very real sense, the faculty are the university. The reputation and success of a university depends largely on the teaching and research ability, the dedication, and the collegial cooperation of the professoriate. Therefore, the trustees and the administration generally allow a considerable measure of autonomy to the faculty in teaching and research activities, and successful university administration involves working in cooperation with faculty in the definition and achievement of the educational objectives of the institution.

Although our analysis will focus on major institutions, much of it applies to other universities and distinguished colleges as well. A number of the less-prominent universities have at least one distinguished academic department and to that extent are part of the interuniversity competition for top-quality faculty. Also, major universities not infrequently compete for individual faculty with departments in such distinguished colleges as Amherst, Oberlin, Swarthmore, and Williams. In considering the problems of applying affirmative action guidelines, one needs to recognize that a fairly mixed situation exists in terms of the academic reputations of individual faculty in the 2,500 institutions of higher education in this country, of which some 900 come under federal contract compliance.

PLAN OF THE BOOK

This study of antibias regulation of major universities begins in Chapter 2 with an examination of faculty appointments at such institutions. An understanding of the universities' demand for faculty is basic for the analysis in the chapters that follow. A reader knowledgeable of university aims in hiring, promotion, and compensation of faculty may wish to skim or omit this chapter.

Chapter 3 considers the various aspects of discrimination, especially in university faculties, and explains the need to take supply factors into account in dealing with allegations of discrimination in employment. The federal government, in its method of analysis and its enforcement programs, has tended to neglect these factors. The supply analysis in this chapter provides a basis for much of the discussion in the next two chapters.

Chapters 4 and 5 critically examine the federal program of compliance for contractors, based on Executive orders and administrative decisions. This HEW program of compliance uses estimated proportional representation by sex and race to establish the extent of discrimination, and requires that the contractor adopt numerical hiring goals by sex and race in order to achieve that proportional representation. Chapter 4 is concerned especially with the development of the enforcement program of HEW and the prescribed scheme for estimating the statistical base for hiring goals to enforce proportional representation. Chapter 5 contains a critical analysis of numerical hiring goals calculated in the required manner and considers other goals for affirmative action plans.

The enforcement programs of other federal agencies and of state agencies, based on legislation, are considered in Chapter 6. They involve the investigation and prosecution of complaints filed with an agency or the courts by individuals alleging that they have been discriminated against on grounds of sex, race, or religion. Use of adversary proceedings to determine the comparative professional qualifications of individual faculty for appointment and promotion is examined, and a voluntary system for outside mediation and arbitration of individual complaints of discrimination in faculty employment is proposed.

Chapter 7 discusses the staff of the Higher Education Division of HEW and the requirements it enforces with respect to the affirmative action plans of universities and colleges. On the basis of experience, a single HEW regulatory unit for the major universities is recommended.

The faculty system of collegial decision making by a community of scholars and its long-term educational benefits are discussed in Chapter 8. The faculty system is contrasted with industry's hierarchical system of authority from the top down. The chapter explains the unsuitability of the industrial model for faculty decision making under government antibias regulation.

Chapter 9 presents an alternative program of antibias regulation for faculty of institutions of higher education. The program provides for systematic collection of faculty data from covered institutions and central analysis of the material for purposes of comparing the progress of the institutions and estimating the effects of the government's antibias programs as well as for enforcement purposes. The six substantive components of the program are based on the material and conclusions presented in preceding chapters.

The final chapter summarizes the principal faults in federal antibias regulation of universities, indicating that the seven main defects of federal regulatory programs can have as adverse consequences for most of the country's universities and colleges subject to regulation as they have for major universities. The chapter discusses the need for leadership by faculty and administrators to achieve appropriate and constructive antibias programs on the part of both the universities and the government.

2. The Operation of Faculty Appointment Systems

Antibias programs and government regulation for antibias purposes need to take proper account of the systems for faculty appointment and promotion in leading universities. Those systems have evolved over a long span of time and are peculiar to higher education in countries of the Western world. They involve special procedures for faculty evaluation and selection of candidates, and they play a crucial role in determining faculty quality and the achievement by universities of their educational goals.

Unfortunately, university administrators and faculty are finding that things they assume are well known about the functioning of their systems for faculty appointment and advancement are often not understood and appreciated, and are passed off lightly by federal officials and others who press distinguished universities to make commitments to increase sharply the number of women and blacks and members of other minorities in their faculties. Consciously or unconsciously, efforts are being made, in the name of antidiscrimination, to transform those faculty systems—to make them conform more closely to industrial patterns of personnel management.

Such developments present a challenge to the faculties and top administrations of major universities, to whom the country looks for leadership in higher education. The public needs to be informed of the significance of those faculty systems for the successful accomplishment of the educational programs of universities, and the universities need to reexamine their systems of faculty appointment and advancement to make sure that they are as free of bias—race, sex, and other forms—as is humanly possible. That message runs throughout this book and is given special emphasis in the last chapter.

This chapter discusses the planning, the appointment procedures, the demand competition, and the drive for faculty excellence that characterize major universities. It explains the costliness of tenure appointments that prove unsatisfactory—"mistakes"—and the need to take account of faculty development in formulating and enforcing government programs for preventing bias in faculty recruitment, appointment, and advancement.

PLANNING FOR EXCELLENCE

Major universities generally strive, especially in the selection of tenured faculty, to achieve teaching and scholarship of the highest order. The tenured faculty play the central role in determining the intellectual quality of the institution and in shaping its long-term character and reputation.

To develop and retain a distinguished and effective faculty in the face of severe competition among the three or four dozen major universities requires a great deal of thoughtful planning, skillful recruitment, and careful development of an environment that fosters productive academic careers. Great academic departments and outstanding faculties do not come about by the mechanistic application of procedures or by a willingness to settle for the very good instead of the very best. They are usually the result of intelligent efforts and leadership on the part of many faculty and members of the administration.

In planning for the most effective use of the resources available for faculty staffing of a department or all departments in the arts and sciences in a university, the faculty and the administration need to think in terms of the educational objectives of the institution. In what kind of a program of teaching and research should the university excel? How much stress should there be on undergraduate teaching, on graduate teaching, on sponsored research projects? How wide a coverage of disciplines should a particular university try to achieve? In what subfields of the different disciplines should it seek to have great strength? What methods of instruction, and in what proportions, seem best suited for its educational program? What research best fits its faculty and physical facilities?

Especially in major universities, research and teaching reinforce each other. The search for new knowledge helps teaching to continue to be fresh and stimulating throughout a professor's tenure, and the critical interchange between advanced student and creative scholar sharpens and improves the research product. Students are thus able to gain insights into the exacting and imaginative work involved in creating new knowledge by scholarly and scientific methods and disciplined diligence.

Planning for a department, a group of departments, and the whole faculty involves not only drawing proper balances among undergraduate teaching, graduate teaching, and particular kinds of research, but also thinking about the needs for the next academic year within a long-range framework. Assistant professors are usually hired for a three- to five-year term; promotions to tenure, which normally extends to retirement, usually involve an employment commitment averaging between 30 and 35 years.

In addition to the foregoing, planning for excellence of a departmental faculty has to take account of such other factors as the following:

The specific amounts of teaching time by subfield required to staff needed courses, semester by semester, taking account of scheduled leaves of absence

Awareness of the dynamics of the discipline in order to anticipate student requirements and to take advantage of developing prospects for particular research enterprises

Arrangement for sufficient versatility in the teaching staff to furnish the flexibility needed to meet short-term changes and long-range trends in the discipline

Provision of sufficient diversity among the faculty to meet student and research needs—such as differences in approach and methods of analysis, differences in background and views in subjects where values and policy issues are important factors in instruction, and differences in sex, race, and cultural experience to provide breadth of understanding and role models, which may be especially important for undergraduate instruction

Retention of sufficient nontenure positions and turnover among junior faculty to supply the stimulus and invigorating influence of able, fresh recruits to the discipline, who are trained under other masters of their subject, and to provide opportunity for the department to select for promotion to tenure on the basis of a period of experience as a junior faculty member at the institution

Continuation and enhancement of an institution's reputation in certain subfields and disciplines gained as a result of the research contributions and training in the profession provided by previous faculty—in other words, the retention of traditional strengths and historical advantages of the department and the university

Faculty diversity is a complex subject that involves a variety of aspects and considerations. Faculty members differ with regard to: (1) their abilities for particular types of teaching, (2) their approaches and methods of scholarship, (3) their sheer intellectual ability and dedication to scholarship, (4) their gifts for intellectual leadership and administration, (5) their philosophies of life and education, (6) their cultural background and range of experience, (7) their political-social viewpoints and activism for reform, (8) their race, sex, and national origin, and (9) many other aspects. Individual faculty members have different combinations of these characteristics and generally are quite individualistic.

Particular kinds of diversity serve particular educational and intellectually creative purposes. Natives of an area can enrich area studies. Diversity of intellectual approach and philosophy may be more creative and educationally significant in the humanities and social sciences than in the physical sciences and engineering. Diversity of race, religion, and sex may be more important for student-faculty relationships and student role-models at the undergraduate level than at the graduate level, and it may be of greater significance in some settings and times than in other circumstances and periods.

In considering the question of appropriate diversity for a faculty, one should think in terms of balance among objectives and the area of focus for such balance. Proper diversity can improve breadth of understanding and provide challenge to conventional wisdom and unthinking conformity. But challenge just for challenge's sake can promote dilettantism and be nonconstructive. There is a question on the need for, and kind of, diversity in particular academic departments and on whether diversity should be considered and judged in terms of its distribution by department, by divisions of the arts and sciences departments, or over the arts and sciences faculty as a whole. A single pattern of diversity applied to each and every discipline in a uniform fashion would be a kind of uniformity—a contradiction of diversity. It would tend to injure the very values that diversity should promote.[1]

Faculty diversity, to be constructive, must involve tolerance and respect for appropriate differences among colleagues. Effective functioning of academic departments requires a readiness on the part of independent operators enjoying academic freedom to cooperate in the achievement of common departmental and university objectives, to pursue the truth in a collegial atmosphere of friendly rivalry. Above all, one should bear in mind the importance, especially for major universities, of the intellectual quality of the faculty and its combined ability to achieve the educational objectives of the institution.

---

[1] Advocacy groups are prone to overlook the many dimensions and the differentiation inherent in the concept of academic diversity in their single-minded pursuit of one goal. The Office for Civil Rights in the Department of Health, Education, and Welfare in compliance enforcement at institutions of higher learning has also been subject to the same criticism. This matter is discussed further in Chapter 5.

ATTRACTING OUTSTANDING TEACHER-SCHOLARS

Major universities in this country compete for leading scientists, social scientists, and humanities scholars throughout the universe of advanced learning. In considering the recruitment and development of outstanding faculty, one needs to distinguish between mature teacher-scholars who are considered for a tenure position and "fresh" Ph.D.'s who are considered for term appointments. The latter are regarded as probationary employees gaining further training and experience in order to qualify for a tenure appointment at some institution.

Leading scholars usually have to be attracted away from tenure professorships that are satisfactory to them. These scholars generally have experienced numerous attempts to woo them to other universities. Their decisions to stay or to move are likely to hinge on the comparative advantages of positions at the competing universities—on which place they think would best facilitate their research contributions and would afford them the best opportunity to teach and develop outstanding young scholars.

Some of the leading teacher-scholars are so generally able and contribute so much to the work of their colleagues and the university enterprise that any major university would consider it a great achievement to attract one of them to its faculty. Other prominent scholars and scientists may not be effective in certain types of teaching and may be oriented almost exclusively toward their own research and research staff. Their scholarly reputations may make them academic ornaments, but some universities may decide that scholars of such limited usefulness are too costly in terms of meeting institutional needs and the disturbing repercussions that their appointment at a very high salary and with very special advantages would have on the tenured faculty in the department and in the university in general. Departments at universities that do not have "research professorships," and have a single faculty teaching in both the undergraduate and graduate programs, would not seek to attract such a "limited" contributor to their university's educational goals unless (1) the department was anxious for added prominence in research or (2) it was well staffed with faculty who had the attributes that the "star" lacked, and his or her subfield was one in which the university wished to be eminent in scholarly terms.

The most distinguished teacher-scholars are normally not in the market looking for jobs as is the case with students who are just completing their Ph.D. training or is the case with many junior faculty who, in their early probation years, are searching for career identity and often move between institutions as a part of that process. And a major university with a senior position does not normally need to canvass the market to discover or observe the supply being offered. The tenured members of a department as a group are likely to know who the top teacher-scholars are in the subfield where there is an opening. If one is thinking in such terms as reputation in the discipline and drawing power for the most able graduate students, the best-qualified teacher-scholars for a tenure opening should be well recognized by scholars in the discipline. That is especially true in the physical sciences, where a strong relationship appears to exist between the significance or quality of a scientist's contributions (as measured by citations of his or her published work) and both awards received and appointment in high-ranking departments.[2]

To avoid a charge of sex or racial bias, universities nowadays generally follow a procedure that involves some public announcement of both tenure and nontenure openings. Whether or not past experience has proved such announcement of value in recruitment for senior faculty positions, because of HEW pressure in affirmative action plans and in compliance reviews, money and time are spent for that purpose.[3]

---

[2] See Cole and Cole (1967). Also, analysis shows that the system of using scientists as "referees" with respect to selection or rejection of papers submitted for publication to a leading scientific journal can serve to avoid any special bias of selection in terms of the authors' ages, scientific reputations, academic positions, etc. See Merton and Zuckerman (1973).

[3] Universities in Great Britain and the Scandinavian countries have for decades advertised open professorships as a standard practice. However, the ratio of female faculty to male faculty in Britain and the three Scandinavian countries seems, on the whole, to be lower than in this country. See Galenson (1973, pp. 27, 29).

When a decision has been made on the best-suited teacher-scholar for a tenure position, every effort is made to attract him or her to the university. If it cannot attract its first choice, a major university may leave a tenure post open, filling the vacancy temporarily with visitors or junior faculty until the university can obtain the very best mature scholar. It may give a standing offer to the professor considered the best person for an open professorship, or may wait two or three years and make a second offer to the top-ranked scholar who declined to move on the first offer. In a surprising number of cases, the second offer is accepted. Standing offers may also be made to a leading teacher-scholar without regard to an institution's need in a particular subfield. That might be done because of that professor's breadth of scholarly interests and the contributions that a powerful mind can make to the intellectual life of a university community.

A university trying to attract a distinguished professor will seek to make its offer as close to his or her desires as possible, without violating its teaching norms and appropriate salary relationships. Discussions concerning various aspects of the university and the offer—benefit comparisons, collegial relationships, housing, the relative advantages of living in the community, etc.—will be held with the professor and his or her family. A mature professor is likely to weigh all aspects because a move may be costly in terms of interruption of work and of adjustments to new conditions and because any move could be the last one. And, of course, the professor's present university will undoubtedly make a counteroffer.

The process of recruitment and appointment is typically much more market-like in hiring persons who have recently earned a Ph.D. degree or are close to it (normally the Ph.D. is a prerequisite for entering on the promotional ladder at a university). The new Ph.D. supply available each year is about one-seventh the size of the nation's faculty members who hold Ph.D. degrees. Of course, many Ph.D.'s in engineering and science go into nonacademic employment. Universities usually hire junior faculty (assistant professors and instructors) in much larger numbers than senior faculty (associate and full professors). For instance, junior hires recently have been running at a rate 5 to 10 times the figure for senior hires at some major universities.

Enforcement of equal employment opportunity for women and minority persons is vital when they are ready for their first regular teaching position. That is true because: (1) there is a possibility that some new Ph.D.'s of great promise will not be known by leading scholars in a subfield;[4] (2) with considerable uncertainty of the ultimate performance of individuals and the limited commitment of a nontenure appointment, universities may be justified in making some high-talent but high-risk appointments where the probability that the appointee will achieve great distinction may be as low as one out of four; (3) experience in the early years is very important in determining the career level that one aspires to reach; and (4) it is most desirable that those who have the capability to reach the top in the academic profession have the proper environment and opportunities (including free time for research) to permit the full development of their talents and contributions.

It is at the stage of first full-time appointment to a position on the ladder of promotion that any "pattern of discrimination" in faculty employment can best be established by objective analysis. Major universities seek to appoint persons to assistant professorships from among the most promising as teachers and scholars in the current crop of Ph.D.'s[5]

Even during the current period of oversupply of Ph.D.'s relative to demand, especially for positions at the major universities, there is strong competition among leading departments for Ph.D.'s they believe have the greatest promise. Ph.D.'s assumed to be the most promising candidates are likely to receive offers from several major universities at about the same time of the year – December, January, and February.

Factors that can influence the decision of a strong candidate include the following: the salary and rank offered; the prospects for a tenure opening later on in the candidate's specialty; teaching loads; free time for research, including paid leave for that purpose; research support and facilities; other benefits, including pensions; the quality and congeniality of the faculty in the department; the quality of the students; the university's financial condition; and the kind of leadership the university's administration provides.

Excellence attracts excellence. To draw new faculty of the highest quality to junior positions, a university should have a first-class academic reputation. Able and ambitious new Ph.D.'s may wish to spend their early years in the profession at a leading university for the "career development" benefits that professional experience there can provide. And, even though it offers little prospect for a tenure opening in a certain subfield, a leading university may be a very favorable place from which to obtain an attractive post elsewhere.

---

[4] Ph.D. candidates of high quality often earn reputations as graduate students while working on their theses by such means as the submission and publication of articles at that stage and the presentation of papers or participation in discussions at annual meetings of the professional association in the discipline.

[5] The sex ratio for the top group of new Ph.D.'s in a discipline might differ from the sex ratio for all new Ph.D.'s in that discipline. However, one can probably assume that the average quality of all female new Ph.D.'s and all male new Ph.D.'s in any one year is approximately equal.

THE FACULTY'S ROLE IN ACHIEVING EXCELLENCE

As already explained, the faculty in leading universities usually enjoys a large measure of self-governance. Indeed, there seems to be a fairly close correlation between an institution's standing in the scholarly world and the control that the faculty enjoys over its own affairs. At the highest levels of academe, the faculty, through the department structure and a facultywide appointments committee, practically exercises the power to select new faculty, to judge which faculty members should not be reappointed and which should be promoted to tenure, and, in many institutions, to decide faculty salaries and salary increases for individual faculty. Essentially, the tenured faculty are the employers of faculty in leading institutions, and any charges of discrimination in faculty employment are, for the most part, really made against faculty members in the performance of their faculty responsibilities.

Leaders among the faculties of major universities place great store on significant contributions to knowledge through the disciplined methods of scholarship and science. For outstanding contributions, teacher-scholars are singled out for rewards of various kinds—rapid promotion, professional awards and honors, ample research support, and other forms of academic distinction and privilege. At the top reaches of academia, there is a considerable amount of "discrimination by distinction."

In a leading university, the tenured faculty of a department should have the primary responsibility for recommending new appointments, reappointments, and promotions and also for judging the salaries that assistant and associate professors merit. Most of the tenured members of a high-ranking department should know by reputation the leading teacher-scholars in the discipline, should be in a good position to judge the qualifications most needed in a candidate for an open position in the department,[6] and generally should have a strong professional interest in hiring an outstanding performer and an effective colleague. Tenured faculty tend to have a fairly long perspective on the department and have an extensive experience with the development of graduate students, junior faculty, and senior faculty on which to base their judgment of a candidate's promise as a teacher-scholar in that setting.

---

[6] For joint appointments in two departments or where interdepartmental programs are involved in appointments, a proposed appointment would be critically examined by the two or more departments or organizational units.

From the viewpoint of long-run benefit to the institution, perhaps the most important function that the tenured professors of a department perform is to select and attract the best persons for tenure appointments. Usually a great deal of time, effort, and care are devoted to that process.

Rather typically, the department selects from its members a search committee to study the scholarly work, the teaching qualities, and the potential contributions to the department and the university of mature teacher-scholars in the subfield who appear to be among the best suited for the post. The search committee obtains all the significant information it can on the leading candidates and makes a report to the tenured members of the department, possibly ranking the leading candidates and recommending one as the best. The department goes over the material, with other members reading the writings and possibly collecting additional confidential material from personal sources. When the department's tenured faculty are satisfied that the canvass of the subfield, the available material on candidates, and the analysis of their strengths and weaknesses are complete and according to requirements, they vote on a recommendation that an offer be made to the candidate considered best qualified for the post.[7]

The department's recommendation is then sent to the administration, where it is checked for conformance to procedures and completeness of documentation. The procedure in many major institutions provides for solicitation by (say) the dean of the faculty of letters from distinguished outside scholars in the field and subfield, asking, on a strictly confidential basis, for an evaluation of the recommended candidate as a teacher-scholar and for a comparison of his or her qualifications with other professors of recognized excellence in that subfield in this country and abroad. When the confidential outside letters and any other additional material are available, the procedure may require that the department's recommendation be presented to a higher-level committee, perhaps a standing faculty committee on appointments (technically advisory to the president and elected by the faculty) for its review.[8]

---

[7] The department's tenured faculty could decide at this point that no possible candidate is sufficiently distinguished and promising as a teacher-scholar in the future for appointment to a professorship and instead have the opening converted to a nontenure or a visiting appointment for the time being.

Review by an overall faculty or faculty-administration committee on appointments has certain advantages. Such a committee is able to judge a department's appointment recommendation on a broader, less parochial basis; it is in a position to compare the quality of recommendations coming from the different departments; and it has additional material on which to base a judgment. That additional material includes the outside confidential letters of evaluation, which, generally speaking, are remarkably frank and informative and often contain quite thoughtful analysis of the subfield and comparative assessments of individuals as teacher-scholars.

The committee on appointments makes its recommendations, both for and against, to the president—who usually accepts them, presenting the favorable ones to the trustees for final approval. Experience indicates that faculty-appointments committees are apt to reject more department recommendations for promotion to tenure of faculty from within than recommendations for appointments to tenure from outside. Partly, that is because a number of contemplated appointments from outside may be headed off by the deans and the president's raising questions with the department chairman before a formal recommendation is made by the tenured members of the department.

Faculty assessment of an assistant professor for promotion to tenure based on a five- to seven-year period of experience, which ends in a decision either to promote or to terminate, is a very severe form of testing. During that period, assistant professors at major institutions are under great pressure to achieve an outstanding record in scholarship, in teaching, and in other contributions to the university that compares favorably with the record of scholars in their field at other universities. Such a record generally requires intense dedication to the task of achieving a national and international reputation in one's field for scholarly accomplishment and promise of further accomplishment. In some cases, promotion cannot be achieved because no appropriate tenure opening exists in the assistant professor's subfield at that university.

---

[8] The procedure outlined is very similar to that in effect at Princeton, Stanford, and a number of other universities. Under the Harvard system, the department reports and recommendation for a tenure appointment are submitted to an "ad hoc committee," composed of several inside faculty from different departments and several outside scholars. The committee meets with the president and the dean of the faculty. At Princeton the deans and the president meet with the committee in a series of meetings that review departmental recommendations concerning reappointments, promotions, new outside appointments in the tenure ranks, and salary increases in the three professional ranks.

At most major universities, probably less than half of those who are appointed assistant professors are promoted to continuing tenure. At Princeton University, for example, in the early 1960s about one out of three who were appointed assistant professors eventually achieved tenure; by the late 1960s and early 1970s, that ratio had declined to about one out of four, despite an apparent increase in the average quality of assistant professors.[9] In the arts and sciences at Harvard University, the ratio is considerably lower; assistant professorships there are, for the most part, considered as temporary appointments for one five-year term.

With such severe competition for tenure appointments and so much of the university's future riding on them, it is important to make certain that the universities have proper procedures to assure open and equal opportunity in recruitment and that they base assessment of qualifications on as much valid information and expert judgment as possible. In the enforcement of nondiscrimination in university faculty hiring and advancement, the Office for Civil Rights of the U.S. Department of Health, Education, and Welfare should place more stress and store on proper procedures properly applied and less on questionable statistical estimates.

The faculty procedures are less well-suited for handling appointments outside the regular ranks, such as a lecturer appointment. That is so because candidates for those positions generally are selected on grounds other than scholarly achievement or promise. Such special nonscholarly appointments include persons hired as native-speaking teachers of such foreign languages as Arabic, Chinese, Japanese, Russian, and Turkish. They also include skilled artists in the visual arts: dancers, painters, film makers, and sculptors. Distinguished scholars may find it somewhat difficult to assess the university performance and academic promise of faculty performing such services. Persons in such special categories of faculty are often hired for undergraduate instruction and for short periods of time. The purpose and terms of their appointment need to be clearly defined and mutually understood if they are not to feel discriminated against in cases where their appointments continue over a considerable period of time and then are terminated or do not lead to promotion.

---

[9] For a discussion of the factors and procedures in promotion to tenure at Princeton, see *An Information Statement for the Guidance of New Faculty at Princeton University* (1972).

THE COSTLINESS OF MISTAKES

At leading institutions, an outside appointment to a professorship carries tenure upon appointment, and an outside appointment to an associate professorship either does, or practically does, carry tenure.[10] Appointments that turn out to be mistakes can be quite costly unless the disappointing faculty member can be induced to leave. Since he or she has been a disappointment as a teacher-scholar in a major university, rival universities may not have an interest in hiring that faculty member away.

A teacher-scholar may, over time, develop serious shortcomings. For example, he or she may have a block on publication of his or her theoretical work or research results. If the faculty member has a lively, innovative mind and makes contributions through the effects his or her ideas have on the published work of students and colleagues, that may not be a serious drawback. However, a department in a major university can afford only a limited number of oral-tradition, publication-shy scholars.

Other types of mistakes are more serious. The faculty member on tenure appointment may lack the mental capacity or the drive to do the hard work of advanced teaching and research necessary to become a major figure in his or her field. The scholarly efforts of such a faculty member may consist largely of tidying up the edges of a system of thought of a distinguished professor. Over time both the teaching and research contributions of the faculty member become less and less interesting or important. Similarly, in dynamic disciplines, the faculty member's professional training may be rendered obsolete by the development of new research methods and analytical techniques or of new branches of the discipline, thus reducing the effectiveness of his or her teaching and research activities.[11] Or, the attention and energies of the faculty member may be drained off into outside consulting or other off-campus activities that contribute little to the growth and intellectual enrichment of a teacher-scholar so that his or her academic contributions suffer. For some of these adverse developments in individual cases, a department's faculty or a department's chairman or the university administration, singly or in combination, may share some of the responsibility for the decline. They may have failed to encourage and advise the faculty member and to help him or her to adjust to changes. One reason for stressing research and paid leaves of absence for scholarship is the stimulus to renewal and growth that they provide.

---

[10] Often an initial appointment of associate professor from outside is made as a three-year appointment which, if renewed, carries tenure. Normally, much the same procedure is followed for appointment to associate professor as for appointment to tenure, and the initial appointment is followed by a further appointment carrying tenure in practically all cases. Only a great disappointment with the person's performance would cause a refusal to reappoint an associate professor from outside.

[11] In biochemistry it is said that the field is developing so fast and the competition for scientific contributions is so keen that, over a five-year period, practically all knowledge becomes obsolete, and professors have to spend an extraordinary amount of time on their research and on preparation for teaching advanced courses.

Finally, the faculty member's failure to live up to expectations may be due to nervous breakdowns, alcoholism, severe family problems, or other personal handicaps. The strenuous competition at high levels in academic life and the severe judgment of faculty by able students (reflected in their selection and evaluation of courses and choice of dissertation supervisors) may cause a sensitive faculty member to feel great strain.

As a faculty member's comparative effectiveness as a teacher and scholar declines, his or her usefulness to the department and university becomes more and more limited. He or she is not used so much for graduate teaching, is not invited to give papers or seminars on research achievements, and is less able to raise adequate funding for research. Colleagues in the department, including junior faculty, have less respect for his or her judgment; nevertheless, the professor, though declining in professional status, continues as a tenured member of the department to vote on new appointments, reappointments, and promotions. The relatively ineffective professor may be blocking the subfield either for appointment of a much more able teacher-scholar from outside or for promotion of an outstanding assistant professor in the department to tenure in that subfield.

Over time, the unsatisfactory professor's situation becomes increasingly embarrassing and difficult. Under a merit system of pay based on performance, the professor may receive either no salary increase or a very small one each year, as a result of evaluation of his contributions by the chairman of the department, the faculty appointments or review committee, and the deans. His or her discontent may have unfortunate effects on the department's faculty meetings. Complaints may be made to the administration. Eventually, the professor may charge that he or she is being discriminated against unfairly in various ways—in salary, promotion, the granting of paid leaves for scholarship, the allocation of department and university research funds, the warnings colleagues give to students about the professor's courses, etc. If the professor can do so, he or she may decide to file a complaint with a federal or state civil rights compliance agency, alleging discrimination on grounds of sex, race, or religion.

With a well-developed appointments' procedure and professional handling of cases by the departmental faculty and the administration under that procedure, the uncorrectible "mistakes" at any one time can be confined to no more than 2 percent of the tenured faculty. Weaknesses in procedure or stress on nonprofessional standards is likely to lead to a much higher percentage.[12]

It is, of course, especially troublesome if the "mistakes" tend to be concentrated in one department or a few departments. Where that is the case, it may be difficult to improve faculty quality because such departments would not be attractive to outstanding teacher-scholars or students. Also, in enforcing antidiscrimination laws and regulations, compliance officials may argue that female and minority-group assistant professors are fully qualified for an opening if their training, teaching, and scholarship are equal to the qualifications of some tenured professors in that department.[13] Given a universitywide ratio of, say, only one out of four assistant professors able to continue on through to promotion to tenure, pressures are likely to be very strong indeed to have women and blacks among those promoted in order to meet numerical goals and to have more racial and sexual "diversity" in the faculty. Such pressures, if effective, are likely to increase the percentage of "mistakes," especially in relatively weak departments. Unfortunately, "mistakes" in many instances do not become very evident for 5, 10, or even 15 years, but the tenure period amounts to 30 to 35 years.

---

[12] This is not the place to argue the pros and cons of academic tenure. The author believes that for major universities the tenure system has been, on balance, beneficial in terms of the quality and the performance of the faculty. In promotion cases, tenure provides junior faculty with a definite goal and forces the department's tenured faculty to make a final, well-documented decision on an assistant professor by a specific date, following an adequate period of experience. Tenure encourages professors to take a long-range view of the university's needs and their own careers, including research plans. It makes them more willing to take on tasks (such as department chairmanships and committee assignments) for the good of the university apart from their teaching and research. The security that tenure provides facilitates a collegial atmosphere and, under academic freedom of inquiry, candid criticism of university affairs and colleagues' work; the small number of "mistakes" in granting tenure and the possible disincentive of security to high productivity in an unfavorable environment normally are not sufficient to offset such advantages. For an article pointing to the advantages of tenure in distinguished universities, see Brewster (1972). See also *Discussion Memorandum on Academic Tenure at Harvard University* (1971); the system of Ad Hoc Committees on Permanent Appointments is explained pp. 36–40. For a recent comprehensive analysis of faculty tenure see Commission on Academic Tenure (1973).

[13] Revised Order No. 4 (Title 41 of the Code of Federal Regulations, Chapter 60-2.24 f5) states: "Neither minority nor female employees should be required to possess higher qualifications than those of the lowest qualified incumbent." See also Weitzman (1973, p. 484).

SOME IMPLICATIONS FOR ANTIBIAS REGULATION

The facts set forth in this chapter need to be taken into account in federal and state programs of enforcement of nondiscrimination for the faculties of major universities.

The hiring of tenured faculty in leading institutions is a much more individualistic and carefully considered matter than is generally appreciated. It may make little sense, indeed it may be positively misleading in the case of major institutions, to think in terms of an ill-defined pool of supposedly qualified and available candidates from which judgments are made about the existence or nonexistence of discrimination and on the basis of which universities are to establish numerical goals for their hiring of women and blacks. And, as previously mentioned, it should be realized that charges of discrimination in faculty employment are likely to be directed at the faculty and to imply criticism of faculty procedures, which may, in some instances, need improvement.

There are significant differences among major universities and among academic departments within major universities. Leading institutions vary in size, traditions, governing structures and practices, and educational methods and goals. Vital to America's institutions of higher learning are their independence and the competition among them that is partly based on their differences. A government enforcement program should not, in the name of antidiscrimination, seek to impose a single pattern or set of procedures in a mechanistic, routine manner upon the internal operations and practices of all universities.

One of the great strengths of American universities is the drive their faculties have for improved quality and the opportunity that opens up for persons of diverse background to teach and write their way to the top in the world of science and scholarship. Makers and enforcers of antidiscrimination regulations should be careful not to impose requirements that blunt that professional drive and discourage salary differentials according to merit of performance as teacher-scholars.

Civil rights rule-makers and compliance enforcers need to recognize that graduate study leading to a Ph.D. degree is not the qualifying experience for a tenure position at a major university. The testing period is usually the first five to seven years after completing the requirements for a Ph.D. It is during those years that one demonstrates whether he or she has the intellectual capacity, the ingenuity and originality, the discipline and career dedication to make the outstanding contributions necessary to be a leading teacher-scholar in one's age group in a disciplinary subfield. The age range during which those qualities are demonstrated is usually between 25 and 35.[14]

When major institutions continue to promote to tenure only one out of three or one out of four highly selected assistant professors and the ratio turns out to be that unfavorable for female assistant professors, will the government enforcers recognize that that result is to be expected? Or will they press their aim "to increase materially the utilization of minorities and women at all levels where deficiencies exist"? And will some of the women not promoted (and thus terminated) and their supporters insist that the university is not properly carrying out its "affirmative action obligation"? And will those views lead not to the use of regular faculty self-government procedures for a hearing and ruling by a committee of faculty peers on cases of alleged unfair treatment in relation to appointment, reappointment, promotion, or academic rights but to the filing of a formal complaint with a government compliance agency or a court?

Those are the kinds of questions that press for attention as one studies recent experience and thinks about the future of our major universities in a period of increasing federal and state government intrusion into their governance.

---

[14] As is explained in the next chapter, that age range is likely to be a difficult one for women who seek to combine both a professional career aimed at the top and marriage and children.

3. Discrimination and Qualified Supply

Discrimination in employment pervades all advanced societies. An enterprise generally tries to select employees who will work well together under its kind of supervision and who have the potential for promotion to more responsible positions. Employer preference for "our type of employee" may be based on past experience, employee opinion, management's personal prejudices, unsupported assumptions, and any number of other influences. Firms, through in-plant training and in other ways, invest in developing an efficient work force; selection of the "right people" for particular jobs is a key element in that process.[1]

It is theoretically conceivable that employers' preferences could be distributed—locally, industrially, and occupationally—to reflect a true cross section of the total supply. In that case, all workers with the same qualifications could have equal employment opportunity. The supply itself would, of course, reflect any lack of equal opportunity that individuals might have experienced with respect to the particular kind and amount of preemployment training and experience required to acquire the necessary qualifications.

Actually, individual employer discrimination in hiring and employment presents a serious problem, especially for a democratic society, because it tends to be concentrated against certain classes and groups and to be more prevalent in some occupations than in others.

Theoretically, employer competition for workers should eliminate discrimination in employment and pay. Competitive forces should operate to have persons in a locality who have identical qualifications receive the same pay and have equal opportunity for employment in a job stressing those qualifications. Actually, market forces have not served to eliminate fully discrimination in pay or hiring; indeed, they seem, in many cases, not to have been very effective in significantly reducing the economic consequences of discrimination on the individuals directly affected, even over long periods of time.

---

[1] For a statement of views of managements concerning their preferences in hiring workers for manufacturing operations, see Lester (1954, pp. 53–68).

Because the market has been relatively ineffective in solving many aspects of discrimination in employment against women and blacks and members of other minorities, government corrective action has been taken in the form of legislation, Executive orders, and regulations.

The term *discrimination* has been loosely used, often to ascribe blame and charge guilt without really knowing just what is meant. Strictly speaking, sex discrimination in employment would occur if men with exactly the same qualifications[2] as women were given preference in hiring, advancement, or pay; racial discrimination would occur if, in the same circumstances, a white person were given such preference over a black person. In each case, the reverse would also be true; if a woman or a black were given preference, there would be sex or racial discrimination. Where ability and other attributes are not identical, selection of a man with a better combination of qualifications for the job over a woman, or a white over a black, would not constitute sex or racial discrimination. Discrimination could occur at an earlier stage, however, in the form of unequal opportunity to obtain the necessary education and other qualifications for a particular position.

Education can play an important role in the elimination of prejudice and the development of personal talents, so that individuals enjoy more freedom to choose and enter appropriate careers and can advance in them according to their ability, ambition, hard work, and available job openings. Mainly, education helps to eliminate barriers to opportunity for individuals—whatever their skin color or sex—so that they can become part of the qualified supply for a profession or other high-level position requiring advanced university training.

As leaders in the world of higher learning in the humanities and the social and physical sciences, distinguished universities play a major role in encouraging and developing highly talented supply, while, as a part of the demand, they employ some of that supply. Because they are so important on the supply and demand sides, the faculty of major universities are likely to be sensitive to university obligations in both aspects. As teachers, they are very much aware of both the beneficial consequences that the elimination of bias has for education and the social cost when talent is underdeveloped because it is blocked by discrimination.

---

[2] It would be most extraordinary for two candidates for a particular faculty position to have a combination of qualities for university teaching and for research contributions that is identical, or even "essentially equal." That is one reason that discrimination on grounds of sex, race, etc., may be difficult to prove in some cases.

In this chapter, supply for faculty positions in major institutions will be examined first for women and then for blacks. Many aspects of the discrimination problem, especially in universities, are different for women and blacks. That fact has too often been disregarded in antidiscrimination programs and legislation and by enforcement officials.

Basically, the qualifications for nontenure positions or for tenure positions in major universities should be the same regardless of race, sex, religion, or ethnic background. As suggested above, the qualifications for nontenured faculty can be described as follows: (1) intellectual ability and scholarly promise, demonstrated as a graduate student, that would rate one in the top group of the new Ph.D.'s in the discipline in the country;[3] (2) special competence in the subfield or combination of subfields, because openings in a discipline usually carry subfield qualifications even at the nontenure level; and (3) special abilities in teaching, research, and administrative matters that suit the institution's educational goals and student population and complement the teaching and research capabilities of the existing departmental staff.

For tenured faculty, as previously explained, qualified supply needs to be defined in even more individual and special terms, and the basis for judging qualifications is one's performance in teaching, scholarship, and colleagueship during the first five to seven years as an assistant professor.[4] Generally speaking, a national or international reputation as an outstanding teacher-scholar is a necessary qualification. Beyond that, each institution seeks the person best suited for its particular needs over the projected period of a faculty member's tenureship.

---

[3] One might say top decile to indicate the kind of intellectual ability for academic work that major universities would expect to have for faculty appointment. However, as high as a quarter to half of the Ph.D.'s being turned out at a particular major university might be among those in the top decile for the whole country, in view of the selectivity it may be able to exercise in admissions and the high quality of its graduate program in that discipline.

[4] In disciplines and subfields such as advanced mathematics, theoretical physics, and economic theory, one may gain an international reputation for distinguished contributions that qualify the individual for a tenure position at a major institution in less than five years.

DISCRIMINATION AGAINST WOMEN

Much of what is loosely called sex discrimination in employment is, at least partly, the consequence of choices made by women that are not attributable to a particular university. Those choices—of courses in secondary school and college, of occupation, and of marriage and children—may, of course, have been greatly influenced by notions concerning the proper role for women that are held by parents, friends, teachers, placement officers, and employers.

An example will indicate the problem of assessing responsibility or blame for the lack of female faculty in particular disciplines in universities. Women hold less than a half of 1 percent of the Ph.D. degrees in engineering and constitute a smaller percentage than that of the faculty members in engineering in universities. (By way of contrast, women in Russia represent perhaps 15 percent of those holding the degree that is equivalent to a Ph.D. in engineering and have been about 11 percent of the engineering teaching faculty in universities.)[5]

If an engineering department or school in a major university has never had a female faculty member, does that university have a "deficiency" and can it be charged with "excluding women"? If it should attract a female faculty member to its engineering school from another major institution by an offer at the same rank, has the university overcome its guilt? Can the university from which the female professor was attracted now be charged with sex discrimination for not having a female member in its engineering faculty, whereas formerly it did have one? Such questions assume undue significance under a system of government regulation that stresses numerical hiring goals.

If the supply of women who are well qualified for faculty positions in engineering is not increased but is only shifted from one university to another, what has been accomplished with respect to sex discrimination in universities beyond, perhaps, bidding up women's salaries, even above those for comparable men? It seems evident that the most effective affirmative action that major universities could take is not to bid the few qualified female engineers away from each other in a kind of game of musical chairs but to adopt effective measures to help increase the qualified supply.[6]

---

[5] See Dodge (1966, pp. 137, 208, 279).

Unfortunately, important aspects of supply are neglected in the U.S. Department of Health, Education, and Welfare's *Higher Education Guidelines*[7] (Office for Civil Rights, 1972), issued for determining discrimination and for formulating affirmative action plans. In the HEW Guidelines, a university is given no credit whatsoever for affirmative action through successful efforts in expanding qualified supply; instead a university gets its required numerical goal for employing female faculty increased in proportion to the increase in supply that it achieves.[8]

THE SUPPLY AND DEMAND SIDES

Major universities can discriminate against women for faculty appointment and advancement on the supply side—in graduate education or in postgraduate training as a faculty colleague—or on the demand side—as employers of women who have the graduate training and acquire on-the-job training on their faculties. The supply and demand sides are, of course, in some respects closely interconnected.[9] It is, however, desirable to consider first and separately some of the ways that universities may discriminate against women in training and developing supply qualified for the different levels of teaching and research in higher education.

Universities may discriminate against women in admissions as undergraduate and graduate students. Especially at the graduate level, faculty play a primary part in making decisions on admission and fellowship or research support. Any limitations on female students that are not placed on male students deny the former equal opportunity to qualify for professional careers, including careers as university faculty members. The same can be said with respect to scholarship and fellowship support.

---

[6] Relative increases in women's salaries would, of course, tend to stimulate efforts to increase the qualified supply while at the same time encouraging economy in the use of women at the relatively higher salaries.

[7] Hereafter referred to as HEW Guidelines.

[8] The pertinent provision is as follows: "To the extent that an institution makes a practice of employing its own graduates [presumably in any department], the number and percentage of graduate degrees which it has itself awarded to women and minorities in the past ten years or so should be reflected in the goals it sets for its future faculty appointments" (Office for Civil Rights, 1972, p. J4). Most major universities would employ one or more Ph.D. candidates or recipients on the faculty at least for a short period of time.

[9] The supply and demand sides are interconnected, for example, because increased demand tends to stimulate the development of more qualified supply, and because, during his or her probationary, pretenure period on the faculty, the individual is acquiring generally valuable training in the profession to qualify for a tenure appointment, while at the same time engaging in regular full-time employment.

More subtle is whether a department's faculty, in allocating fellowship or research support, discriminates against women if it takes any account of the fact that female students generally have a longer period of graduate study and complete their Ph.D. requirements at a later age than men. Data for the 1950s and 1960s show that consistently for each discipline there is a difference between the median ages of men and women at Ph.D. attainment; the average of all disciplines shows women to be two to three years older. Family responsibilities as wives and mothers are a significant factor causing the period of graduate study to be more prolonged for women, so that the average lapse of time between the baccalaureate and the doctoral degree was approximately 12 years in the case of 1,547 women who earned Ph.D. degrees in 1957 and 1958 (see Astin, 1969, pp. 19–20, 140–142, and the references therein).

Also, female graduate students are more likely to interrupt or discontinue their graduate study. A study of 3,542 recipients of Woodrow Wilson National Fellowships for preparation for an academic career (all of them at about the same level of intellectual ability and over a quarter of them women), who entered graduate school in 1958, 1959, and 1960, showed that only 18 percent of the women and 42 percent of the men had received Ph.D. degrees by mid-1966.[10] On the other hand, during the same period, 60 percent of the women and 36 percent of the men acquired master's degrees which, the author points out, may have been an adequate degree for the teaching career that many of the women then planned.

Do the facts that, on the average, women take longer to obtain a Ph.D. degree and that highly talented women have a higher dropout rate from graduate study than men have a prejudicial effect on their employment as faculty members in major universities? Presumably they can, unless there is insistence that selection must be made strictly on the basis of each individual's record and promise, apart from any group probabilities or average experience. And, as previously noted, it may be worth taking some risk on such scores where there is a distinct possibility that the candidate could become a distinguished member of the profession.

---

[10] The percentages are standardized for distribution by academic discipline since the average time to the Ph.D. is relatively short for the sciences and long for the humanities (Mooney, 1968).

Marked fluctuations have occurred over the past half century in the number of doctor of philosophy degrees granted to women compared with men. Table 1 shows by five-year periods the percentage of the total Ph.D. degrees awarded by United States universities from 1920 through 1972 that were earned by women. The percentage for 1945 to 1949 is relatively high, not because the number of doctorates granted to women rose so much but because the number granted to men was so low from 1943 through 1947 as a result of the interruption of men's graduate study during World War II.

As Table I indicates, a drive for advanced study and high professional achievement characterized the generation of women who came of age in the 1920s and 1930s (President's Commission on the Status of Women, 1963, pp. 67–70). That drive slacked off after World War II to be replaced to a significant extent by women's interest in the home and care for young children during the years that are so crucial for preparing and establishing oneself in a professional academic career aimed at high achievement, namely, the years from 25 to 35.

The 1950s and early 1960s were years of "the baby boom." Between 1940 and 1965, the proportion of married women in the female population rose significantly, and the percentage of married

TABLE 1
Percentage of all Ph.D.'s granted between 1920 and 1972 that were received by women

*Period**	*Percent*
1920–1924	15.2
1925–1929	15.2
1930–1934	14.7
1935–1939	14.8
1940–1944	13.9
1945–1949	15.1
1950–1954	9.4
1955–1959	10.5
1960–1964	10.8
1965–1969	12.1
1970–1972	14.9
All 52 years	12.5

* From 1920 to 1957 on a calendar-year basis; thereafter on a fiscal-year basis.

women in the age group 25 to 35 who had children under six years of age also increased markedly (see Bowen & Finegan, pp. 202–203 and Appendix Table 7-B, p. 586). Those developments helped to cause the labor force participation rates of these women to decline appreciably and to limit their career ambitions. A result was that in the 1950s and early 1960s a much smaller percentage of women both prepared themselves with Ph.D. training and drove hard to reach the top in their profession.

By the late 1960s and early 1970s, the demographic trends had changed. The proportion of women who were married had declined slightly, the percentage of married women with children under six years of age had dropped sharply, and the labor force participation of women aged 25 to 35 had risen. A new career-oriented drive was in full swing. There was more sharing of household duties among young couples, and stress was being put on the importance of married women having time to pursue academic careers. Generational changes in women's ambitions and the possibilities of fulfilling them through professional careers need to be taken into account, along with factors on the demand side, in any assessment of responsibility for "underrepresentation" of women among tenured faculty, especially in major universities.

Studies and statistics indicate that, in the past, the most serious obstacle to female faculty members progressing in their careers is marriage and children. That is the case even though about half of the female faculty in universities are not married,[11] and surveys indicate that female Ph.D.'s who are married are twice as likely to be childless as women in the same age group in the general population and that they are likely to have a smaller family if they do have children.[12]

---

[11] In a 1972–73 survey, 48 percent of the women in universities and the same percentage in all institutions of higher education had "no spouse" at the time (Bayer, 1973, p. 31).

In a survey of women who received Ph.D. degrees in the calendar years 1957 and 1958, it was found that seven or eight years later (December 1965 or early 1966), 55 percent were married or had been married, compared with a figure of 94 percent for women of comparable age in the general population (Astin, 1969, p. 27).

[12] The survey reported in Astin (1969, pp. 29–30) showed that 28 percent of the married women who had doctorates were childless at that time (that is, generally in their early forties) and that those with children had an average of 2.0 compared with 2.6 children for the women in their early forties in the general population. A survey of college and university faculty in 1968–69 showed that 40 percent of the women in university faculties had not married and that 67 percent had no children (Bayer, 1970, p. 12).

In a questionnaire survey sent out at the end of 1965, the women who received Ph.D. degrees in the calendar years 1957 and 1958 were asked about the problems they "encounter in developing [their] careers fully."[13] Eighty percent of them were then employed in academic institutions. The respondents were asked to indicate whether each item considered to be a career obstacle was a "major problem" or a "minor problem." In reply, 18 percent said that "finding adequate help at home" was a major problem, and 22 percent more said that it was a minor problem. Half of the respondents used some sort of outside help for household work and child care. Nevertheless the female doctorates, as a group, spent an average of 10 hours a week on child care plus 18 hours a week on household tasks such as cooking, cleaning, and marketing, which meant a very large claim on the time and energy of half of the female Ph.D.'s who were married (Astin, 1969, pp. 97, 101-102, 147, and 178-179).

"Employer discrimination" was considered a major problem by 12 percent of the women who held doctorates and a minor problem for an additional 24 percent. "Husband's job mobility" and "husband's negative attitudes toward my working" were considered a major problem by 6 and 2 percent, and a minor problem by 8 and 4 percent, respectively, of all respondents. Since only half of the respondents had husbands, those figures would need to be doubled for married women. Almost half of the female Ph.D.'s (45 percent) had been with the same employer during the seven or eight years since receiving their degrees, and half of the married women reported their husbands also had Ph.D. degrees (ibid., pp. 28, 102-103, and 179). If the husband moves to a new position that necessitates a change of employment for the wife, her employment opportunity and progress in her career can be adversely affected.
